2. NEW VARIETY
Article 7

A variety shall be considered new if, at the date of filing of the application for a variety protection, the propagating or harvested material of the variety has not been sold or otherwise disposed of to others, by or with the consent of the breeder, for the purpose of exploitation of the variety in Montenegro for the period longer than one year or in a territory other than Montenegro for the period longer than four years or, in the case of trees and vines, longer than six years from the said date.

Article 8

The variety shall be deemed to be distinct if it is clearly distinguishable from any other variety whose existence is a matter of common knowledge at the time of the filing of the application.

In particular, the filing of an application for granting of a breeder's right or for entering of another variety into an official register of varieties, in any country, shall be deemed to render that other variety a matter of common knowledge from the date of the application, provided that the application leads to the granting of a breeder's right or to the entering of the said other variety into the official register of varieties, as the case may be.

The methods for checking the distinctness of a variety shall be laid down by the Ministry responsible of agriculture (hereinafter referred to as: Ministry).
