INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS

GENEVA

COUNCIL

Thirty-Fourth Ordinary Session Geneva, October 26, 2000

REVISED LIST OF THE TAXA PROTECTED IN THE MEMBER STATES
OF UPOV AND IN THOSE STATES AND ORGANIZATIONS THAT
HAVE INITIATED THE PROCEDURE FOR ACCEDING TO
UPOV AND WHICH HAVE PROVIDED INFORMATION

prepared by the Office of the Union

Index of Spanish Common Names	104

INTRODUCTION

1. The 1978 Act of the International Convention for the Protection of New Varieties of Plants is applicable, according to its Article 4(1), to all botanical genera and species. Its Article 4(2) provides that “the member States of the Union undertake to adopt all measures necessary for the progressive application of the provisions of this Convention to the largest possible number of botanical genera and species.” The 1991 Act of the Convention provides in its Article 3 that “each Contracting Party which is bound by the Act of 1961/1972 or the Act of 1978 shall apply the provisions of this Convention, (i) at the date on which it becomes bound by this Convention, to all plant genera and species to which it applies, on the said date, the provisions of the Act of 1961/1972 or the Act of 1978 and, (ii) at the latest by the expiration of a period of five years after the said date, to all plant genera and species,” and that “each Contracting Party which is not bound by the Act of 1961/1972 or the Act of 1978 shall apply the provisions of this Convention, (i) at the date on which it becomes bound by this Convention, to at least 15 plant genera or species and, (ii) at the latest by the expiration of a period of 10 years from the said date, to all plant genera and species.”

2. This document surveys the measures for the protection of the various taxa¹ that have been instituted by the member States of the Union and by those States which have filed, pursuant to Article 32(3) of the 1978 Act or to Article 34(3) of the 1991 Act, a request for advice of the Council on the conformity of their laws with the Convention and which have provided information. It also contains additional information which may be useful in the context of this document.

3. This document contains the following parts:

- (a) a main table;
- (b) notes classified by States;
- (c) notes classified by taxa;
- (d) an index of families;
- (e) four indexes of common names.

4. The main table contains the list of the taxa protected in at least one of the States defined above with, for each of them, indications with respect to its protection in each of the States. Explanations of the symbols used for this purpose appear on page 6.

5. The main table contains neither the following States, nor the European Community, which protect the whole or essentially the whole plant kingdom: Argentina, Australia, Bolivia, Bulgaria, Canada, Chile, Colombia, Denmark, Ecuador, Estonia, Finland, France, Germany, Hungary, Israel, Japan, Mexico, Netherlands, New Zealand, Norway, Slovakia, Spain, Sweden, United Kingdom, United States of America. Details on the situation in those countries are given in the notes classified by States.

¹ The expression “protected taxon” and the similar expressions mean that titles of protection may be issued for varieties of the taxon concerned.

6. The taxa are listed in the alphabetical order of their Latin names, except in the case of complex genera which contain many species and subspecies. These are isolated from the rest of the table by dotted lines and are treated differently, for instance with the use of titles, in order to facilitate consultation of the table.

7. The Latin names of the taxa are taken over from the laws and regulations of the States protecting them, except in the following circumstances:

(a) The legislation of a State may not contain Latin names and may therefore specify the protected taxa by means of their common names (in the case of Italy—with respect to certain taxa—Japan and Spain). Where relevant, the Office of the Union has added the Latin name corresponding to the common name.

(b) The legislation of a State may contain a Latin name the scope of which is much greater than that of the corresponding common name which defines the protected taxon. Where relevant, the Office of the Union has completed the Latin name.

(c) Two or more States protecting the same taxon may use different Latin names. Two cases may exist:

(i) The differences are small (presence and absence of authors' names, different spellings, etc.): in this case, the Office of the Union has retained only one Latin name.

(ii) The differences are substantial: where the difference relates to the use of synonyms (for example, *Prunus amygdalus* and *Amygdalus communis*), each designation is the subject of an entry in which the synonym is given in square brackets. Where the difference relates to the rank of the designations used and where, in practice, they cover about the same set of varieties (for example, *Hordeum L.* and *H. vulgare* to designate barley), these designations are the subject of one entry only in which one of them is given in square brackets.

8. For its decisions on the Latin names, the Office of the Union mainly had recourse to the following works:

(a) “Diccionario de Plantas Agrícolas” by E. Sánchez-Monje y Parellada - Ministerio de Agricultura, Servicio de Publicaciones Agrarias, 1980, Madrid;

(b) “Dictionary of Gardening” (second edition (1977)) by P.M. Synge - Oxford University Press;

(c) “Elsevier’s Dictionary of Botany - I. Plant Names” by P. Macura - Elsevier Scientific Publishing Company, Amsterdam - Oxford - New York, 1979;

(d) “Elsevier’s Dictionary of Trees and Shrubs” by Hugues Vaucher, Biel-Bienne, 1986;

(e) “Flora Agrícola” by E. Sánchez-Monje - Ministerio de Agricultura, Pesca y Alimentación, Secretaria General Técnica, 1991, Madrid;

(f) “ISTA List of Stabilized Plant Names” (second edition (1984));

(g) R. Mansfeld - “Vorläufiges Verzeichnis landwirtschaftlich oder gärtnerisch kultivierter Pflanzenarten” - Akademie-Verlag, Berlin, 1959;

(h) “Zander - Handwörterbuch der Pflanzennamen” (tenth edition (of 1972), twelfth edition (of 1980) and thirteenth edition (of 1984)), Eugen Ulmer Publications, Stuttgart.
The species names stabilized by ISTA are preceded by an asterisk.

9. The common names originate from the national laws and regulations or have been indicated by the competent authorities of the member States, or again have been added by the Office of the Union. In this respect, three types of common names may be distinguished:

(a) true common names (examples: wheat, onion, apple, carnation, poplar);

(b) common names deriving from the corresponding Latin name or from which the Latin name is derived (examples: abutilon, acacia, chrysanthemum, dahlia);

(c) Latin names which, in the absence of true common names, are used in the common language (examples: Cymbidium, Dieffenbachia, Romneya). Such names may also coexist with a true common name (example: Anthurium and Tail Flower). As time passes, they may pass into the common language as names of the second type (example: Gerbera). These names may be the subject of some changes, of which the most important are phonetic or spelling adaptations (addition of accents in French and Spanish, change of the last syllable, -ia becoming for example -ie in German, etc.) and total or partial translations (for example *Abies sachalinensis* becomes “Sakhalin fir” and *Pelargonium peltatum* becomes “ivy-leaved Pelargonium”). The result is that several variants may be used in one and the same language. Variants may also exist for other reasons. It should be noted in particular that the spelling of compound names is not always consistent in English (example: meadowgrass, meadow-grass and meadow grass).

10. Where relevant, the Office of the Union has added common names of the third type, thereby choosing those which seemed or were likely to prevail in usage. Concerning ornamental species, it is frequent usage to designate them, in the absence of names of the first or second type, by the name of the genus. Thus the species *Allamanda cathartica* is designated by “Allamanda.” This usage also prevails in the case of certain genera containing several ornamental species. In that case, in order to reduce the list, the Office of the Union has regrouped in one entry all species concerned where this was possible. Thus, *Abutilon megapotamicum*, *A. x milleri*, *A. ochsenii* and *A. vitifolium* are the subject of one entry only.

11. Attention is drawn to the fact that the relationships between common names and Latin names may be different from one taxon to another: in the case of the genera for instance, the common name may apply either to all species of the genus, or to certain species only. In the case of *Viola*, for instance, violet applies to the whole genus, on the one hand, and more particularly to the small-flowered species, on the other (the large-flowered garden plants being called pansies). The main table and the indexes should therefore not be used without care as glossaries.

12. As the above indications show, the drawing up of the synoptical list of protected taxa has led to some departures from the relevant national laws and regulations, in particular because nomenclatures used are not uniform. In this respect, useful information is given in the “notes.” In any case, it is recommended to consult these laws and regulations when precise information is needed.

13. The notes classified by States follow the alphabetical order of the codes applicable to countries. The following will be found therein, wherever it has appeared necessary:

(a) general notes relating in particular to the way in which the national list of protected taxa has been established;

(b) special notes relating to a peculiarity of the national list which concerns a given taxon.

14. The notes classified by taxa contain more detailed information on systematics, notably on the synonyms.

15. Some States now provide for protection at the family level. The index of families indicates for each genus mentioned in the main table the corresponding family. Indications given in respect of fungi are without guarantee in view of the great uncertainties of the classification.

16. The indexes of common names contain alphabetical lists of the common names mentioned in the main table with, opposite each of them, the Latin name of the corresponding genus. The compound common names are the subject of a double entry, as far as this is necessary, for example “maidenhair fern” and “fern (maidenhair).” In general, common names identical or very similar to Latin names do not appear in the indexes, neither do species or family names where they contain the name of the corresponding genus.

17. Unless otherwise indicated, the protection of a fruit crop taxon means that both fruiting varieties and rootstocks may be protected.

EXPLANATION OF THE SYMBOLS USED IN THE MAIN TABLE

Country codes

AR	Argentina	ES	Spain	NO	Norway
AT	Austria	EU	European Union	NZ	New Zealand
AU	Australia	FI	Finland	PA	Panama

EE	Estonia	NL	Netherlands		

Signs in the columns

X	Protected taxon
+	Taxon protected as a result of: a) the protection of a taxon of higher rank to which it belongs (for example in the case of a species: the genus to which it belongs is protected); b) the protection of all taxa of lower rank which belong to it (for example, in the case of a genus, all its species are protected).
(X), (+)	Protection of the taxon envisaged in the near future.
*	<u>Before a taxon name</u> : species name stabilized by ISTA; <u>After a taxon name</u> : refers to the Notes Classified by Taxa; <u>After X or +</u> : refers to a special note to be found under the name of the State concerned in the Notes Classified by States.
Numerals	refer to the general notes to be found under the name of the State concerned in the Notes Classified by States.

NOTES CLASSIFIED BY STATES

AR / ARGENTINA

General Note

There is no provision in the Law on Seed and Phytogenetic Creations (Law No. 20.247 of March 30, 1973) restricting protection to particular genera or species.

AT / AUSTRIA

Special Note

Pisum sativum L. partim: the definition of the protected entities is the following: “Peas for use as grain peas for feeding purposes.”

AU / AUSTRALIA

General Note

According to Section 3(1) of the Plant Breeder’s Rights Act 1994, the term “plant” includes all fungi and algae, but does not include bacteria, bacteroids, mycoplasmas, viruses, viroids and bacteriophages.

BE / BELGIUM²

Special Notes

Aeschynanthus Jack, Kohleria Regel: the definition of the protected entities is the following: “Gesneriaceae: Kohleria Regel, Aeschynanthus Jack: Gesneriaceae, comprising Kohleria, Aeschynanthus.”

Anthurium, Dieffenbachia, Philodendron, Spathiphyllum, Syngonium: the definition of the protected entities is the following: “Araceae Juss.: Araceae (Anthurium, Dieffenbachia, Philodendron, Spathiphyllum, Syngonium).”

Bromeliaceae, Aechmea, Cryptanthus, Guzmania, Neoregelia, Tillandsia, Vriesea: the definition of the protected entities is the following: “Bromeliaceae belonging to the genera and to their mutual hybrids: Bromeliaceae: Aechmea Ruiz et Pav., Cryptanthus Otto et A. Dietr., Guzmania Ruiz et Pav., Neoregelia L.B. Sm., Tillandsia L., Vriesea Lindl.”

² Source: Royal Decree of October 1, 1993, Fixing the Plant Species for which a New Plant Variety Certificate may be Delivered and Fixing the Duration of Protection for Those Species.

Cydonia Mill.: all varieties except ornamental varieties, but including rootstocks, can be protected.

Dizygotheca N.E. Br., Schefflera J.R. et G. Forst.: the definition of the protected entities is the following: “Araliaceae Juss.: Araliaceae (Dizygotheca, Schefflera).”

Epiphyllopsis Berger, Rhipsalidopsis Britt. et Rose, Schlumbergera Lem., Zygocactus K. Schum.: the definition of the protected entities is the following: “cacti with jointed stems belonging to the genera and to their mutual hybrids: Zygocactus K. Schum., Schlumbergera Lem., Epiphyllopsis Berger, Rhipsalidopsis Britt. et Rose.”

Ficus benjamina L., F. elastica Roxb.: the definition of the protected entities is the following: “Ficus L.: Ficus benjamina, rubber Plant.”

Humulus lupulus L.: all varieties except ornamental varieties, but including rootstocks, can be protected.

Malus L.: the definition of the protected entities is the following: “apple, including rootstocks and ornamental varieties.”

Prunus L.: the definition of the protected entities is the following: “cherry, plum, apricot, myrobalan, peach, including rootstocks and ornamental varieties for these species.”

Pyrus L.: the definition of the protected entities is the following: “pear, including rootstocks and ornamental varieties.”

Ribes L.: the definition of the protected entities is the following: “black, red and white currants, gooseberry and hybrids of these species; including ornamental varieties for all these species.”

Rubus L.: the definition of the protected entities is the following: “raspberry; bramble (fruit and ornamental varieties)”; for raspberry all varieties except ornamental varieties, but including rootstocks can be protected.

BO / BOLIVIA

General Note

The scope of application of national legislation is defined by Article 2 of Decision No. 345 (of October 21, 1993) of the Commission of the Cartagena Agreement as “all botanical genera and species insofar as the growing, possession or use thereof are not prohibited for reasons of human, animal or plant health.”

CA / CANADA

General Note

According to the Plant Plant Breeders' Rights Regulations, protection extends to all species of the plant kingdom, except bacteria, algae and fungi.

CH / SWITZERLAND

General Note

Interspecific hybrids: protection also extends to species which are the result of an interspecific hybridization between species belonging to different families of which at least one is mentioned in the national list of protected taxa (Ordinance of May 11, 1977, on Plant Variety Protection - Amendment of June 11, 1990).

CL / CHILE

General Note

The Law on the Rights of Breeders of New Varieties of Plants (No. 19.342 of October 17, 1994) provides that "the right of the breeder may be exercised in relation to all botanical genera and species."

CO / COLOMBIA

General Note

According to Article 1 of Decree No. 533 of March 8, 1994, protection extends to all cultivated varieties of botanical genera and species, provided that the cultivation, possession or use thereof is not prohibited on grounds of human, animal or plant health, but does not extend to wild species, that is, those individual plant species that have not been planted or improved by man.

CZ / CZECH REPUBLIC³

General Note

Protection of animal breeds: protection also extends to breeds of the animal species shown on next page.

³ Sources: Decree No. 134/1989 of November 20, 1989, of the Federal Ministry for Agriculture and Food of Czechoslovakia Establishing the List of Economically Important Plant and Animal Species and Genera, as amended by Decree No. 515/1991 of November 15, 1991; Decree No. 118/1998 of April 15, 1998.

Special Notes

Rubus idaeus L.: the definition of the protected entities is the following: “Rubus idaeus L. and hybrids - Raspberry.”

Vicia sativa L.: the definition of the protected entities is the following: “Vicia sativa L. (including Vicia angustifolia Reichard) - Common Vetch.”

Vicia villosa Roth: the definition of the protected entities is the following: “Vicia villosa Roth (including Vicia dasycarpa Ten.) - Hairy Vetch.”

Vulpes vulpes	Common Fox	Renard commun	Gemeiner Fuchs	Zorro vulgar de Europa

DE / GERMANY

General Note

Protection extends to all taxa of the plant kingdom (First Amendment Law of March 27, 1992, to the Plant Variety Protection Law).

DK / DENMARK

General Note

Protection extends to all plant genera and species (Plant Novelty Act, as last amended by Act No. 1086 of December 20, 1995).

EC / ECUADOR

General Note

The scope of application of national legislation is defined by Article 2 of Decision No. 345 (of October 21, 1993) of the Commission of the Cartagena Agreement as "all botanical genera and species insofar as the growing, possession or use thereof are not prohibited for reasons of human, animal or plant health." In addition, Article 1 of Decree No. 3708 of April 10, 1996, establishing the regulations to the said Decision specifies that wild species which have not been planted or improved by man are excluded.

ES / SPAIN⁴

Special Notes

Malus domestica Borkh.: protection is limited to fruiting varieties.

Zea mays L.: protection is limited to pure lines.

EU / EUROPEAN UNION

General Note

The Council Regulation (EC) No. 2100 / 94 on Community Plant Variety Rights applies to all botanical genera and species.

FI / FINLAND

General Note

Protection extends to all genera and species.

⁴ Source: Order No. 6125 of April 16, 1985, Establishing Protection for New Varieties of Lucerne, Maize, Soya Bean, Lettuce, Apple and Hybrids Between Almond and Peach.

FR / FRANCE

General Note

Protection is granted to any variety belonging to a species of the plant kingdom (Decree No. 95-1407 of December 28, 1995, Amending the Intellectual Property Code (Regulatory Part) and Relating to the Scope of Application of New Plant Variety Certificates and the Scope and Duration of the Breeder's Right).

GB / UNITED KINGDOM

General Note

Protection extends to all plant genera and species (Plant Varieties Act 1997).

HU / HUNGARY

General Note

There is no provision in the Law No. XXXIII of April 25, 1995, on the Protection of Inventions by Patents restricting protection to particular genera or species.

IE / IRELAND

Special Note

Rubus L.: the definition of the protected entities is the following: "Raspberry, Raspberry x Blackberry hybrids and Blackberry, including ornamental herbaceous perennials."

IL / ISRAEL

General Note

The Law on the Rights of the Breeders of Plant Varieties, as last amended on February 23, 1996, applies to all botanical genera and species.

IT / ITALY

General Note

According to Article 28 of Legislative Decree No. 455 of November 3, 1998, protection will be extended to all genera and species on March 30, 2000.

Special Notes⁵

Orchidaceae Juss.: the definition of the protected entities is the following: “Orchis L. - Orchid.”

Prunus salicina Lindl.: the definition of the protected entities is the following: “interspecific hybrids between Japanese types and American types from the genus Prunus.”

JP / JAPAN

General Note

The Seeds and Seedlings Law (No. 83 of May 29, 1998) applies to all “agricultural, forestry and aquatic plants” covering “spermatophytes (seed plants), pteridophytes (ferns), bryophytes (mosses), and multicellular algae”, and also the fungi listed below.

KR / KOREAN REPUBLIC

General Note

Plant genera and species entitled to protection includes the following fungi:
Pleurotus spp.

Special Note

Hyacinthus orientalis L.: Includes *Hyacinthus* spp.

MA / MOROCCO

Special Notes

Citrus L.: Protection also extends to *Citrus aurantifolia*, *C. aurantium* L. x *P. trifoliata* (L.) Raf., *C. clementina* Hort. ex Tan, *C. Inshiu* (Marc.) Marc., *C. jambhiri* Lush. x *P. trifoliata* (L.) Raf., *C. reshni* Hort. ex Tan x *P. trifoliata* (L.) Raf., *C. reshni* Hort. ex Tan x *P. trifoliata* (L.) Raf. x *C. sinensis* Obs., *C. reticulata* Blanco x *C. clementina* Hort. ex Tan, *C. reticulata* Blanco x *C. paradisi* Macfad., *C. reticulata* Blanco x *P. trifoliata* (L.) Raf., *C. sinensis* (L.) Obs. x *C. clementina* Hort ex Tan, *Poncirus trifoliata* (L.) Raf. x *C. x paradisi* Macfad., *Poncirus trifoliata* (L.) Raf. x *C. sinensis* (L.) Obs.

Geraniaceae: Includes *Geranium* spp.

**Prunus domestica* L.*: Includes *Prunus davidiana*.

Prunus persica L. Batsch*: Includes *Prunus mariana*.

Vitis L.* [*Vitis vinifera* L.]: Includes *Vitis berlandieri* Planch., *V. riparia* Michx., *V. rupestris* Scheele, Vigne porte-greffe hybrides.

MX / MEXICO

General Note

The Federal Law on Plant Varieties (Official Journal of the Federation of October 25, 1996) applies to all botanical genera and species.

NL / NETHERLANDS

General Note

Protection extends to all taxa of the plant kingdom (Order of June 14, 1990 [Staatsblad 262], Amending the Plant Breeders' Rights Order of 1975).

NO / NORWAY

General Note

Protection extends to all plant genera and species, including hybrids between genera or species (Ordinance Relating to the Breeder's Right, as last amended on February 6, 1995).

NZ / NEW ZEALAND

General Note

According to the Plant Variety Rights Act 1987, as amended by the Plant Variety Rights Amendment Act 1994, the term "plant" includes a fungus, but does not include an alga or a bacterium.

PL / POLAND

General Note

The list of protected taxa appears in the Decree of the Minister of Agriculture, Forestry and Food Economy of April 15, 1996, on the Execution of Some Provisions of the Seed

Industry Law. It is divided into several groups and subgroups; the main subdivisions are identified as follows in the main table:

- Figure 1: agricultural plants
- Figure 2: agricultural plants, subgroup of medicinal and seasonal plants
- Figure 3: vegetables
- Figure 4: ornamentals
- Figure 5: top fruit
- Figure 6: soft fruit.

Special Notes

Begonia L.: this taxon is protected as a greenhouse plant.

Brassica napus L. emend. Metzg. ssp. rapifera Metzg.: this taxon is listed both in the agricultural plants group and in the vegetables group.

Brassica rapa L. emend. Metzg. ssp. rapa: this taxon is listed both in the agricultural plants group and in the vegetables group.

Calendula officinalis L.: this taxon is listed in both the medicinal and seasonal plants subgroup and in the ornamentals group.

Capsicum annuum L.: this taxon is listed both in the medicinal and seasonal plants group and in the vegetables group.

Cydonia oblonga Mill.: this taxon is listed in the top fruit group; only rootstocks may be protected.

Daucus carota L. ssp. sativus (Hoffm.) Schübl. et G. Martens: this taxon is listed both in the agricultural plants group and in the vegetables group.

Dentranthema x grandiflorum (Ramat.) Kitamura: this taxon is listed, in the ornamentals group, under perennial plants and under greenhouse plants.

Foeniculum vulgare P. Mill.: this taxon is listed both in the medicinal and seasonal plants (as ssp. piperitum (Ucria) Cout.) and in the vegetables group (as ssp. vulgare var. azoricum (Mill.) Thell.).

Helianthus annuus L.: this taxon is listed both in the agricultural plants group and in the ornamental plants group.

Lactuca sativa L.: this taxon is listed in the vegetables group and subdivided into var. capitata L., var. crispa L., var. angustana hort. ex L.H. Bailey and var. longifolia Lam.

Pisum sativum L. sensu lato: this taxon is listed both in the agricultural plants group, as *Pisum sativum L. ssp. sativum*, and in the vegetables group, as *Pisum sativum L. ssp. sativum convar. axiphium* Alef. emend. C.D. Lehm. and *P. sativum L. ssp. sativum convar. medullare* Alef. emend. C.D. Lehm. and *convar. sativum*.

Prunus L.: the definition of the protected entities is the following: “*Prunus L.* - cherry and plum (other species).”

Secale cereale L.: protection extends, in the cereals subgroup, to *Secale cereale L. f. nivalis* and *S. cereale L. f. vernalis* and, in the miscellaneous subgroup, to *S. cereale f. nivalis* (for use as green fodder).

Zea mays L.: protection extends, in the case of vegetables, to *Z. mays L. convar. microsperma* Koern. (popcorn) and *Z. mays L. convar. saccharata* Koern. (sweet maize).

RU / RUSSIAN FEDERATION⁶

General Note

Protection of animal breeds: protection also extends to breeds of the animal species listed overleaf:

Special Notes

Capsicum annuum L.: the definition of the protected entities is the following: *Capsicum annuum L. var. grossum* (L.) Sendt.; *Capsicum annuum L. var. longum* (DC.) Sendt.

Cucurbita pepo L.: the definition of the protected entities is the following: *Cucurbita pepo L.*; *Cucurbita pepo L. var. giraumon* Duch.; *Cucurbita pepo L. var. melopepo*.

Helianthus annuus L.: the definition of the protected entities is the following: *Helianthus annuus L.* & *H. debilis* Nutt.

Latine	English	Français	Deutsch	Español
<i>Box primigehius</i> Bojanus	[Bull, Cow, Calf]	[Taureau, Vache, Veau]	[Stier, Kuh, Kalb]	[Toro, Vaca, Ternera]

<i>Vulpes vulpes L.</i>	Common Fox	Renard commun	Gemeiner Fuchs	Zorro vulgar de Europa

⁶ Source: Communication added to the instrument of accession and further correspondence.

Linum usitatissimum L.: the definition of the protected entities is the following: *Linum usitatissimum* L. var. *intermedia* Vav. et Ell.; *Linum usitatissimum* L. f. *elongata*.

Valerianella locusta (L.) Laterrade: the definition of the protected entities is the following: *Valerianella locusta* L. & V. *eriocarpa* Desv.

Zea mays L.: the definition of the protected entities is the following: *Zea mays* L.; *Zea mays* L. convar. *saccharata* Koern.

SE / SWEDEN

General Note

Protection extends to all botanical genera and species (Plant Breeders' Rights Law (1997: 306)).

SK / SLOVAKIA

General Note

Protection extends to all botanical genera and species. For the list of protected animal species, see under CZ / Czech Republic.

US / UNITED STATES OF AMERICA

General Note

The United States of America protects:

(a) under the Plant Variety Protection Act: all sexually reproduced plant varieties and tuber propagated plant varieties excluding fungi and bacteria (Section 42(a) of the Act);

(b) under the law commonly known as Plant Patent Act, introduced into the General Patent Law: all vegetatively propagated plant varieties, including cultivated sports, mutants, hybrids, and newly found seedlings, other than tuber propagated plants [in practice, Irish potato and Jerusalem artichoke] and plants found in an uncultivated state (Section 161 of the General Patent Law);

(c) under the General (Utility) Patent Law: all varieties (on the basis of the decision in *in re* Hibberd of the US Board of Patent Appeals and Interferences of the Patent and Trademark Office).

ZA / SOUTH AFRICA⁷

Special Notes

Ficus L.: the definition of the protected entities is the following: Ficus L. - fig tree, rubber plant.

Fortunella Swingle: this genus is considered as included in Citrus spp.

Mandevilla Lindl.: the definition of the protected entity is the following: Mandevilla Lindl. (= Dipladenia A.DC.)

Salvia L.: protection does not extend to *S. coccinea* Buc'hoz ex Etling., *S. reflexa* Hornem., *S. runcinata* L. f., *S. sclarea* L., *S. stenophylla* Burch. ex Bent., *S. tiliifolia* Vahl and *S. verbenacea* L.

Sorghum: the definition of the protected entities is the following: *Sorghum bicolor* (L.) Moench - grain sorghum; *Sorghum* spp. [*S. almum* Parodi, *S. sudanense* (Piper) Stapf and hybrids] - fodder sorghum.

Zea mays L.: the definition of the protected entities is the following: *Zea mays* L. - grain maize; *Zea mays* L. var. *saccharata* Bailey - sweet corn, popcorn.

⁷ Source: Regulations Relating to Plant Breeders' Rights, as amended.

NOTES CLASSIFIED BY TAXA

The botanical nomenclature is not an absolute system, mainly because nature cannot be reduced to such a system. Determining the taxonomic rank which should be given to a certain type of plant, defining the borders of a genus or a species, classifying a species within a genus, all these involve some degree of judgement, and thus a risk that different decisions may be taken. This arbitrary element is a source of synonymies, as also is the progress of knowledge when it results in a critical re-examination of earlier decisions.

A list is given below of taxa mentioned in the main table and of their synonyms found mainly in the Diccionario de Plantas Agrícolas, in the Dictionary of Gardening, in Flora Agrícola, in Mansfeld and in Zander (see the introduction to this document). Although certain of these synonyms are today no more than curiosities, having fallen into disuse, others still have a definite importance, being used in scientific works and in practice, notably in commerce. Where relevant, the problems arising from nomenclature are briefly explained. Attention is drawn to the fact that it is the responsibility of the competent authorities of States to define with precision what is covered by a particular denomination for the purposes of plant variety protection.

Abelia R. Br.: synonymies with* *Linnaea*.

Abutilon Mill.: synonymies with *Corynabutilon*, *Sida*.

Abutilon mollis Sweet: syn.: *Sida mollis* Ortega.

Abutilon theophrasti Medik.: syn.: *A. avicennae* Gaertn., *Sida abutilon* L.

Acacia Mill.: synonymies with *Albizia*, *Leucaena*, *Mimosa*.

Acca sellowiana (Berg) Burret: further synonym: *Orthostemon sellowianus* Berg.

Acer L.: certain species have also been grouped into a genus *Negundo*. *A. septemlobum* Thunb. is a synonym of *Kalopanax septemlobus* (Thunb.) Koidz. [*K. pictus* (Thunb. ex Murray) Nakai—name stabilized by ISTA—, *Acanthopanax ricinifolius* (Sieb. et Zucc.) Seem.].

Acer negundo L.: syn.: *Negundo aceroides* Moench, *N. fraxinifolium* (Raf.) C. de Vos.

Achillea L.: synonymies with *Anthemis*, *Tanacetum*.

Aeschynanthus Jack: synonymies with *Lysionotus*, *Trichosporum*.

Ageratum L.: *A. corymbosum* has the synonym *Caelestina ageratoides* and *A. lasseauxii* has the synonym *Eupatorium lasseauxii*.

* The expression “synonymies with” means that subdivisions of the taxon concerned have synonyms in the taxa indicated, and vice versa. In the case of the genus *Abelia*, for instance, a number of species thereof have also been described under the name *Linnaea*.

Ageratum houstonianum Mill.: syn.: *A. mexicanum* Sims, *A. caeruleum*.

Agrostis L.: synonymies with *Achnatherum*, *Aira*, *Apera*, *Oryzopsis*, *Zoysia*.

Agrostis gigantea Roth.: syn.: *A. alba* auct. p.p. non L.

Agrostis stolonifera L.: syn.: *A. alba* auct. p.p. non L. According to ISTA, this species includes *A. palustris* Huds.

Agrostis tenuis Sibth.: syn.: *A. capillaris* L. (name stabilized by ISTA), *A. vulgaris* With.

Alcea rosea L.: syn.: *Althaea rosea* (L.) Cav.

Allium ascalonicum L.: *A. ascalonicum* Lour. is a synonym of *A. fistulosum* L.

Allium cepa L.: *A. cepa* Lour. is a synonym of *A. fistulosum* L.

Allium fistulosum L.: syn.: *A. ascalonicum* Lour., *A. bakeri* Hoop., *A. cepa* Lour., *A. porrum* Debeaux.

Allium porrum L.: syn.: *A. ampeloprasum porrum*. *A. porrum* Debeaux is a synonym of *A. fistulosum* L.

Allium sativum L.: *A. sativum* L. var. *ophioscorodon* (Link) Döll has the synonyms *A. controversum* Schrad., *A. ophioscorodon* Link, *A. scorodoprasum* Lam.

Allium schoenoprasum L.: syn.: *A. sibiricum* L. (according to the Diccionario de Plantas Agrícolas). The botanical variety *sibiricum* has also been made into a species under the name *A. sibiricum* (according to the Dictionary of Gardening).

Alocasia (Schott) G. Don.: synonymies with *Arum*, *Caladium*, *Colocasia*, *Cyrtosperma*, *Schizocasia*.

Aloë spec.: synonymies with *Apicra*, *Astroloba*, *Gasteria*, *Haworthia*, *Sansevieria*.

Alpinia Roxb.: synonymies with *Maranta*.

Amaranthus cruentus L.: syn.: *A. hybridus* L. (name stabilized by ISTA), *A. paniculatus* L., *A. chlorostachys* Willd., *A. hybridus paniculatus* (L.) Hejný.

Amelanchier Medik.: *A. canadensis* (L.) Medik. has the synonym *Mespilus canadensis* L.

Amorpha fruticosa L.: syn.: *A. pubescens* Schlechtd.

Ananas comosus (L.) Merr.: syn.: *Bromelia ananas* L., *B. comosa* L., *B. comosa* Stickm., *A. sativus* (Lindl.) Schult. f., *Ananassa sativa* Lindl.

Anemone L.: synonymies with *Anemonella*, *Hepatica* and *Pulsatilla*.

Anethum graveolens L.: syn.: *A. sowa* Roxb., *Peucedanum graveolens*.

Anigozanthos Labill.: *A. fuliginosus* is a synonym of *Macropidia fumosa*.

Annona squamosa L.: syn.: *A. asiatica* L.

Anthriscus cerefolium (L.) Hoffm.: syn.: *Chaerophyllum sativum*, *Scandix cerefolium* L.

Anthurium Schott: synonymies with *Philodendron*, *Pothos*, *Spathiphyllum*.

Anthurium x cultorum Birdsey: syn.: *A.-Andreanum-Hybrids*, *A. andreanum* hort. non Lind.

Anthurium x scherzeranum hort. non Schott: syn.: *A.-Scherzeranum-Hybrids*, *A. x hortulanum* Birdsey.

Antirrhinum L.: synonymies with *Anarhinum*, *Asarina*.

Arachis hypogaea L.: syn.: *A. nambyquarae* Hohehne.

Argyranthemum Webb ex Schultz Bip.: synonymies with *Chrysanthemum*. *A. frutescens* (L.) Webb is a synonym of *C. frutescens* L.

Aristolochia L.: *A. chrysops* has the synonym *Isotrema chrysops* and *A. heterophylla* has the synonym *Isotrema heterophylla*.

Armoracia rusticana Gaertn., Mey. et Scherb.: syn.: *A. lapathifolia* Gilib., *A. sativa* Bernh., *Cochlearia armoracia* L., *Raphanis magna* Moench.

Aronia melanocarpa (Michx.) Elliott: syn.: *Mespilus arbutifolia* L. var. *melanocarpa* Michx., *Sorbus melanocarpa* (Michx.) Heynh.

Arrhenatherum elatius (L.) P. Beauv. ex J. et C. Presl: syn.: *A. avenaceum* Beauv., *Avena elatior* L.

Aster L.: synonymies recorded in Zander with *Bellidiastrum*, *Calimeris* (*Kalimeris*), *Callistephus*, *Crinitaria*, *Felicia*, *Lynosyris*, *Microglossa*. According to the Dictionary of Gardening, "many attempts have been made to separate groups of this large genus as distinct genera and some have gained a recognized place, but the following seems scarcely distinct enough to warrant separation and are here regarded as forming part of the genus *Aster*: *Bellidiastrum*, *Calimeris*, *Doellingeria*, *Eucephalus*, *Galatella*, *Ionactis*, *Leucelene*, *Machaeranthera*, *Oreostemma*, *Xylorrhiza*." Synonymies with the following genera have also been recorded in the Dictionary of Gardening: *Biota*, *Boltonia*, *Diplopappus*, *Erigeron*, *Inula*.

Astilbe Buch.-Ham. ex D. Don: synonymies with *Hoteia*, *Spiraea*.

Aulax Berg: synonymies with *Protea*.

Avena L.: synonymies with *Arrhenatherum*, *Avenula*, *Helictotrichon*, *Trisetum*.

Avena nuda L.: *A. strigosa* Schreb. is a synonym of *A. nuda* L. ssp. *nuda* (*A. strigosa* Schreb. ssp. *strigosa* (Schreb.) Mansf.).

Bambusa Schreb.: synonymies with *Arundinaria*, *Chimonobambusa*, *Gigantochloa*, *Phyllostachys*, *Pseudosasa*, *Sasa*, *Semiarundinaria*, *Shibataea*.

Barleria L.: synonymies with *Dianthera*, *Hygrophila*.

Begonia semperflorens-cultorum Krauss: syn.: *Begonia-Semperflorens-Hybrids*, *B. x hortensis* Graf et Zwicky, *B. Semperflorens-cultorum*, *Gracilis* group.

Berberis L.: The mahonias, with pinnate leaves, have been separated from *berberis*, with entire leaves, but can still be found under the name *berberis*.

Bergenia Moench: synonymies with *Megasea*, *Saxifraga*.

Beta vulgaris L. ssp. vulgaris var. vulgaris: syn.: *B. cicla* L.

Betula L.: certain species now form the genus *Alnus*.

Bouvardia Salisb.: *B. longiflora* has the synonym *Aeginetia longiflora*, and *B. triphylla* (*B. jacquinii*), *Houstonia coccinea*.

Brachiaria brizantha (Hochst. ex A. Rich.) Stapf: syn.: *B. gangalaensis* Vanderyst, *B. manzonzeensis* Vanderyst, *Panicum brizanthum* Hochst.

Brachyscome Cass.: *B. diversifolia* has the synonyms *Brachystephium leucanthemoides*, *Pyrethrum diversifolium*.

Brassica juncea (L.) Czern. et Coss. in Czern.: syn.: *B. besseriana* Andrz., *B. integrifolia* (West.) Rupr., *B. japonica* Sieb., *Sinapis integrifolia* West., *Sinapis juncea* L.

Brassica napus L. var. napobrassica (L.) Rchb.: syn.: *B. campestris* L. var. *napobrassica* DC., *B. napo-brassica* Mill.

Brassica napus L. ssp. oleifera (Metzg.) Sinsk: further synonym: *B. napus* L. var. *napus*.

Brassica pekinensis (Lour.) Rupr.: syn.: *B. cernua* (Thunb. ex Murray) Forb. et Hemsl., *B. pétsai* L.H. Bail., *Sinapis pekinensis* Lour. According to the Dictionary of Gardening, this is perhaps a cultivated form of *B. integrifolia*. The common name "Chinese cabbage" and its equivalents in the other languages are also used for *B. chinensis* L.

Brassica rapa L.: syn.: *B. campestris* L.

Bromus catharticus Vahl: further synonym: *B. willdenowii* Kunth.

Buddleja L.: *B. indica* Lam. is a synonym of *Nicodemia diversifolia* Ten.

Buddleja davidii Franch.: syn.: *B. variabilis* Hemsl.

Calceolaria x herbeohybrida Voss: syn.: *C.-Hybrids*, *C. x speciosa* Lilja, *C. x hybrida* hort.

Callistemon R. Br.: synonymies with *Metrosideros*.

Callistephus chinensis (L.) Nees: syn.: *Aster chinensis* L.

Calluna vulgaris (L.) Hull: syn.: *Erica vulgaris* L.

Camellia sinensis (L.) O. Kuntze: further synonyms: *C. bohea*, *C. thea* Link, *C. theifera* Griff.

Cannabinaceae: this family is sometimes included in the Moraceae.

Cannabis sativa L.: according to Zander the form 'Gigantea' (var. *chinensis* (Del.) A. DC.) has the synonym *C. gigantea* hort. According to the Dictionary of Gardening, *C. gigantea* and *C. sativa* are synonyms.

Carica papaya L.: syn.: *Papaya carica*.

Carya illinoensis (Wangenh.) C. Koch: syn.: *C. oliviformis* (Michx.) Nutt., *Hicoria pecan* (Marsh.) Britt., *C. pecan* (Marsh.) Engl. et Graebn. non (Walt.) Nutt., *Juglans illinoensis* Wangenh.

Castanea sativa Mill.: syn.: *C. vera* Gaertn., *C. vulgaris* Lam., *Fagus castanea* L.

Celosia cristata L.: syn.: *C. argentea* L. var. *cristata* (L.) O. Kuntze.

Cenchrus ciliaris L.: syn.: *Pennisetum ciliare* (L.) Link.

Chaenomeles Lindl.: the species of this genus have also been classified in the genera *Cydonia* and *Pyrus*. *Pseudocydonia sinensis* Schneid. has the synonyms *Chaenomeles sinensis* and *Cydonia sinensis* (Dum.-Cours.) Schneid.

Chamaecyparis Spach: synonymies with *Cupressus*, *Retinispora*, *Thuycopis*.

Chamaecyparis lawsoniana (A. Murray) Parl.: syn.: *Cupressus lawsoniana* A. Murray.

Chamaecytisus palmensis L.F. Link: syn.: *Cytisus palmensis*, *C. proliferus* var. *palmensis*.

Chamaemelum nobile (L.) All.: syn.: *Anthemis nobilis* L., *Ormenis nobilis* (L.) J. Gray. See also under *Matricaria chamomilla*.

Chamaelaucium Desf.: syn.: *Chamaelaucium* DC.

Chamomilla recutita (L.) Rauschert: see under *Matricaria recutita*.

Cheiranthus L.: synonymies with *Erysimum*, *Malcolmia*, *Parrya*.

Chenopodium album L.: syn.: *Anserina candicans* Montand., *Atriplex alba* Cr., *A. viridis* Cr., *Blitum viride* Moench, *Chenopodium amaranticolor* Coste et Reyn., *Ch. candicans* Lam., *Ch. hybridum* Lour., *Ch. leiospermum* DC., *Ch. reticulatum* Aellen, *Ch. serotinum* Ledeb., *Ch. virgatum* Thunb., *Ch. viride* L., *Ch. vulgare* Güld., *Ch. vulgare* L.

Chrysanthemum L.: synonymies with *Anthemis*, *Argyranthemum*, *Balsamita*, *Chrysoboltonia*, *Leucanthemum*, *Matricaria*, *Parthenium*, *Plagiatus*, *Pyrethrum*, *Tanacetum*. In the stabilization of certain species names, ISTA divided the genus into *Chrysanthemum* (in the restricted sense), *Dendranthema*, *Leucanthemum*, *Tanacetum*. *Dendranthema* comprises in particular *D. indicum* (L.) Desm. and *D. morifolium* (Ramat.) Tzvelev.

Chrysanthemum coccineum Willd.: syn.: *C. roseum* Adam, *Pyrethrum roseum* (Adam) M.B., *P. carneum* M.B., *Tanacetum coccineum* (Willd.) Grierson (name stabilized by ISTA).

Chrysanthemum frutescens L.: syn.: Argyranthemum frutescens (L.) Webb.

Chrysanthemum-Indicum-Hybridae and C. x hortorum L.H. Bailey: further synonym: C. indicum hort. non L.

Chrysanthemum maximum Ram.: C. maximum hort. is a synonym of C. lacustre Brot. (C. superbum Bergm.).

Chrysanthemum morifolium Ramat.: syn.: C. sinense Sabine, C. vestitum Stapf, Dendranthema morifolium (Ramat.) Tzvelev (name stabilized by ISTA).

Chrysanthemum parthenium (L.) Bernh.: syn.: Tanacetum parthenium (L.) Schultz Bip. (name stabilized by ISTA), Matricaria parthenium L., M. parthenioides (Desf.) hort., M. capensis hort. non L., M. eximia hort., Leucanthemum parthenium (L.) Gren. et Godr., Pyrethrum parthenium (L.) Sm.

Citrullus lanatus (Thunb.) Matsum. et Nakai: syn.: Cucurbita citrullus L., Momordica lanata Thunb., Citrullus vulgaris Schrad., Cucumis citrullus.

Citrus L.: synonymies with Aurantium, Fortunella, Limonia, Poncirus.

Citrus limon (L.) Burm. f.: syn.: C. limonum Risso, C. medica var. limon L., C. medica var. limonum (Risso) Wight et Arn.

Citrus x paradisi Macfad. = C. maxima x C. sinensis. Syn.: C. decumana var. racemosa (Risso et Poit.) Roem., C. racemosa (Risso et Poit.) Marcov. ex Tanaka.

Citrus reticulata Blanco: syn.: C. nobilis Andr. non Lour., C. deliciosa Ten.

Citrus sinensis (L.) Pers.: syn.: C. sinensis (L.) Osbeck, C. aurantium Lour., C. aurantium var. sinensis L., C. aurantium ssp. sinensis (L.) Engl.

Clarkia amoena (Lehm.) A. Nels. et Macbr.: syn.: Godetia amoena (Lehm.) G. Don.

Clarkia unguiculata Lindl.: syn.: C. elegans Dougl. non Poir.

Clematis L.: synonymies with Atragene, Clematopsis.

Clivia Lindl.: synonymies with Imantophyllum.

Cnicus benedictus L.: syn.: Centaurea benedicta L.

Cocculus DC.: synonymies with Diploclisia, Sinomenium.

Codiaeum variegatum (L.) A. Juss.: syn.: Croton variegatus L. C. pictum (Lodd.) Hook. is a synonym of C. variegatum (L.) A. Juss. var. pictum (Lodd.) Muell. Arg.

Coleus blumei Benth.: syn.: C.-Blumei-Hybrids

Colocasia Schott: synonymies with Alocasia, Arum, Caladium.

Cordyline Comm. ex Juss.: synonymies with Dracaena.

Coreopsis tinctoria Nutt.: syn.: *C. elegans*, *Calliopsis bicolor* Rehb., *C. tinctoria* (Nutt.) DC.

Cornus mas L.: syn.: *Macrocarpium mas*.

Cotoneaster Medik.: synonymies with *Mespilus* (*C. acuminatus* and *M. acuminata*), *Pyracantha* (*C. pyracantha* and *P. coccinea*).

Cucumis L.: synonymies with *Citrullus*, *Cucurbita*, *Luffa*.

Cucurbita L.: synonymies with *Benincasa*, *Citrullus*, *Cucumis* (*Cucurbita foetidissima* and *Cucumis perennis* - ornamental species), *Lagenaria*, *Sicana*.

Cucurbita maxima Duch.: *C. maxima* Wight et Arn. is a synonym of *C. moschata* (Duch.) Duch. ex Poir.

Cucurbita moschata (Duch.) Duch. ex Poir.: syn.: *C. maxima* Wight et Arn.

Cucurbita pepo L.: syn.: *C. melopepo* L., *C. ovifera* L., *C. verrucosa* L. *C. pepo* Lour. is a synonym of *Benincasa hispida* (Thunb.) Cogn.

Cunninghamia lanceolata (Lamb.) Hook.: syn.: *C. sinensis* R. Br.

x Cupressocyparis Dallim. = *Chamaecyparis* x *Cupressus*. The main species is x *Cupressocyparis leylandii* (Jacks. et Dallim.) Dallim., which is a cross between *Chamaecyparis nootkatensis* and *Cupressus macrocarpa* and has the synonym *Cupressus leylandii* Jacks. et Dallim.

Cupressus L.: synonymies with *Chamaecyparis*, x *Cupressocyparis*, *Fokienia*, *Taxodium*.

Cupressus arizonica E. Greene: The botanical variety *bonita* has also been made into a species under the name *C. glabra*.

Cupressus sempervirens L.: the botanical varieties *horizontalis*, *indica* and *stricta* (or *fastigiata*) have also been made into species under the names *C. horizontalis* Mill., *C. roylei* and *C. fastigiata*, respectively.

Cyathea Sm.: synonymies with *Alsophila*, *Hemitelia*, *Schizocaena*, *Sphaeropteris*.

Cyclamen persicum Mill.: syn.: *C. latifolium* Sibth. et Sm., *C. aleppicum* Fisch., *C. puniceum* Pomel, *C. aleppicum* ssp. *puniceum* (Pomel) Glasau, *C. tomentosum*, *C. albidum*.

Cyphomandra betacea (Cav.) Sendtn.: syn.: *Solanum betaceum* Cav.

Cyrtanthus L. f.: *C. clavatus* has also been named *Gastronema clavatum*.

Dactylis aschersoniana Graebn.: syn. (according to the *Diccionario de Plantas Agrícolas*): *D. glomerata* L.

Dahlia Cav.: *D. zimapanii* is a synonym of *Cosmos diversifolius*.

Dahlia x cultorum Thorsr. et Reis.: syn.: *D.-Hybrids*, *D. variabilis* hort. non (Willd.) Desf.

Datura innoxia Mill.: syn.: *D. fastuosa* L. (name stabilized by ISTA), *D. metel* Uria (non L.), *D. meteloides* DC. (non Dun.), *D. wrightii*.

Delphinium L.: synonymies with *Consolida*.

Dendranthema (DC.) Desmoul.: see under *Chrysanthemum*.

Deschampsia cespitosa (L.) P. Beauv.: syn: *Aira cespitosa* L.

Dianthus L.: *D. noeanus* is frequently commercialized under the name *Acanthophyllum spinosum*.

Dieffenbachia Schott: synonymies with *Caladium*.

Diervilla Mill.: modern American authors group under the name *Diervilla* solely the species of American origin and under the name *Weigela* the Asiatic species (A. Belot. Dictionnaire des arbres et arbustes de jardin - Bordas). Others group all species under the name *Diervilla*.

Dimorphotheca Moench: synonymies with *Calendula*, *Castalis*, *Osteospermum*.

Dizygotheca N.E. Br.: synonymies with *Aralia*.

Dracaena Vand. ex L.: syn.: *Terminalis*. Synonymies with *Cordyline* and subsidiarily *Sansevieria*.

Echinacea purpurea (L.) Moench: syn.: *Rudbeckia purpurea* L.

Epiphyllopsis Berger, Rhipsalidopsis Britt. et Rose, Schlumbergera Lem., Zygocactus K. Schum.: the majority of the species of these genera have been classified in the genus *Epiphyllum* and are still known under that name, which is the correct one for most of the plants formerly known as *Phyllocactus*. The genus Epiphyllopsis is not mentioned in the Dictionary of Gardening and in the 12th edition of Zander. In its 10th edition, Zander refers to *Rhipsalidopsis gaertneri* (Regel) Lindgr. [*Epiphyllum russellianum* Hook. var. *gaertneri* Regel, *Schlumbergera gaertneri* (Regel) Britt. et Rose, *Epiphyllopsis gaertneri* (Regel) Berger]. With respect to the genus Rhipsalidopsis, the Dictionary of Gardening refers to *R. rosea* (Lagerh.) Britt. et Rose [*Rhipsalis rosea* Lagerh.]. According to Zander, this genus also comprises *R. gaertneri* (Regel) Lindgr. [see above] and *R. x graeseri* (Werderm.) Moran [*R. gaertneri* x *R. rosea*, *Rhipsalis* x *graeseri* Werderm., x *Rhipsaphyllopsis graeseri* Werderm.]. According to the 12th edition of Zander, the genus Zygocactus is included in the genus *Schlumbergera*. In its 10th edition, Zander mentioned under *Zygocactus* Z.-Hybrids and *Z. truncatus* (Haw.) K. Schum. [*Epiphyllum truncatum* Haw., *Schlumbergera truncata* (Haw.) Moran]; the latter is also mentioned in the Dictionary of Gardening under *Zygocactus*.

Eragrostis curvula (Schrad.) Nees: syn.: *Poa curvula* Schrad.

Eragrostis tef (Zucc.) Trotter: syn.: *Poa tef* Zucc., *Poa abyssinica* Jacq., *E. abyssinica* (Jacq.) Link.

Eriobotrya japonica (Thunb.) Lindl.: syn.: *Mespilus japonica*, *Photinia japonica*.

Eupatorium L.: synonymies with Ageratum, Brickellia, Hebeclinium, Mikania.

Euphorbia fulgens Karw.: syn.: E. jacquiniiflora Hook.

Euphorbia milii Desmoulins: syn.: E. splendens Boj. ex Hook. Its botanical variety milii is also known as E. bojeri Hook. E. hislopianus N.E. Br. has the synonym E. milii var. hislopianus (N.E. Br.) Ursch et Leandri.

Euphorbia pulcherrima Willd. ex Klotzsch: syn.: Poinsettia pulcherrima (Willd. ex Klotzsch) Grah.

Eustoma russellianum (Hook.) G. Don: syn.: Lisianthus russellianus Hook.

Fagopyrum esculentum Moench: syn.: Polygonum fagopyrum L., F. sagittatum Gilib., F. vulgare Th. Nees.

Feijoa sellowiana (Berg) Berg: further synonym: Orthostemon sellowianus Berg.

Festuca L.: F. fluitans L. is a synonym of Glyceria fluitans (L.) R. Br. (name stabilized by ISTA) and F. spicata Pursh. a synonym of Agropyrum spicatum (Pursh.) Scribn. et Smith (name stabilized by ISTA).

Festuca arundinacea Schreb.: syn.: F. elatior L. (according to ISTA), F. elatior L. p.p. (according to Zander).

Festuca ovina L. sensu lato: according to ISTA, this species includes F. tenuifolia Sibth.

Festuca pratensis Huds.: syn.: F. elatior L. (according to the Diccionario de Plantas Agrícolas), F. elatior auct. non L. (according to ISTA) and F. elatior L. p.p. (according to Zander).

x Festulolium Aschers. et Graebn. = Festuca x Lolium

Ficus L.: synonymies with Artocarpus.

Ficus benjamina L.: syn.: Ficus nitida Thunb.

Foeniculum vulgare P. Mill.: syn.: F. foeniculum Karst., F. officinale All., F. capillaceum Gilib. The botanical variety dulce Batt. et Trab. has the synonym F. dulce Mill.

Fortunella Swingle: synonymies with Citrus, Sclerostylis.

Fragaria x ananassa Duch. = F. chiloensis x F. virginiana. Syn.: F. grandiflora Ehrh.

Fremontodendrum Coville: syn.: Fremontia Torr. 1854 non 1843.

Fritillaria L.: synonymies with Notholirion, Rhinopetalum, Uvularia.

Fuchsia magellanica Lam.: syn.: F. macrostemma Ruiz et Pav. The botanical variety 'Riccantonii' has the synonyms F. riccantonii Lebas, F. riccantoniana hort.

Galega orientalis Lam.: syn.: *G. montana* M. Bieb.

Gardenia Ellis: synonymies with *Mitriostigma*, *Randia*.

Gazania Gaertn.: *G. longiscapa* has the synonym *Gazaniopsis stenophylla*, and *G. rigens* has the synonym *Gorteria rigens*.

Gentiana L.: synonymies with *Crawfurdia*, *Gentianella*, *Golownina*.

Gigantochloa Kurz et Munro: synonymies with *Bambusa*.

Gladiolus L.: synonymies with *Homoglossum*, *Lapeirousia*.

Gladiolus x hybridus hort.: syn.: G.-Hybrids.

Glaucium flavum Crantz: syn.: *G. luteum*.

Gloriosa L.: some botanical varieties of *G. simplex* are also described under the name *Methonica*.

Glycine max (L.) Merrill: syn.: *Dolichos soja* L., *Phaseolus max* L., *Soja hispida* Moench, *G. hispida* (Moench) Maxim.

Godetia L.: syn.: *Clarkia* L.

Gossypium hirsutum L.: the botanical variety *punctatum* has the synonyms *G. religiosum* L., *G. punctatum* Schumach.

Grevillea R. Br. corr. R. Br.: *G. glabrata* (Lindl.) Meissn. has the synonym *Manglesia glabrata* Lindl.

Gypsophila L.: synonymies with *Banffya*, *Phrynia*.

Hardenbergia Benth.: synonymies with *Glycine*, *Kennedia*.

Hebe Comm. ex Juss.: syn.: *Veronica* L. sect. *Hebe*.

Hedera L.: synonymies with *Acanthopanax*, *Kissodendron*.

Helianthus annuus L.: syn.: *H. lenticularis* Doug.

Helichrysum Mill. corr. Pers.: synonymies with *Aphelexis*, *Gnaphalium*, *Leucogenes*, *Ozothamnus*, *Xeranthemum*.

Hemerocallis L.: synonymies with *Hosta*.

Hibiscus L.: synonymies with *Abelmoschus*, *Althaea*, *Thespesia*.

Hibiscus trionum L.: syn.: *H. africanus*.

Hippeastrum Herb.: synonymies with Amaryllis, Griffinia, Habranthus, Phycella, Sprekelia, Zephyranthes.

Hordeum vulgare L. sensu lato: *H. sativum* Jess. is a synonym of *H. vulgare* L. The subdivisions of this species have also been made into species, as follows:

- Hordeum vulgare L. convar. distichon (L.) Alef.: syn.: *H. distichon* L., *H. zeocriton* L.
- Hordeum vulgare L. convar. vulgare: syn.: *H. hexastichon* L., *H. polystichon* Haller, *H. polystichum* Doell, *H. tetrastichum* Stokes.

Hosta Tratt.: syn.: *Funckia* Dumort. non Willd., *Funkia* Spreng. In addition, synonymies with *Hemerocallis*.

Houttuynia Thunb. corr. Thunb.: synonymies with *Anemopsis*, *Gymnotheca*, *Polypara*.

Houttuynia cordata Thunb.: syn.: *Gymnotheca chinensis*, *Polypara cochinchinensis*.

Hypericum L.: synonymies with *Androsaemum*, *Helodes*, *Webbia*.

Hypericum perforatum L.: syn.: *H. vulgare*.

Iberis L.: *I. cappadocica* is a synonym of *Ptilotrichum cappadocicum*.

Iberis amara L.: syn.: *I. coronaria hort.*

Ilex L.: *I. verticillata* (L.) Gray has the synonym *Prinos verticillatus* L.

Impatiens L.: synonymies with *Balsamina*.

Impatiens balsamina L.: syn.: *I. coccinea*, *Balsamina hortensis* Desp.

Impatiens-Neu-Guinea-Hybriden = *I. hawkeri* x *I. linearifolia*.

Impatiens wallerana Hook. f.: syn.: *I. holstii* Engl. et Warb., *I. sultani* Hook. f.

Ipomoea batatas (L.) Poir.: syn.: *Batatas edulis*, *Convolvulus batatas* L., *I. mammosa* Choisy.

Iris L.: synonymies with *Dietes*, *Gynandriris*, *Hermodactylus*, *Moraea*, *Pardanthus*, *Xiphion*.

Ixia L. 1762, non 1753: synonymies with *Belamcanda*, *Lapeirousia*, *Morphixia*, *Sparaxis*, *Tritonia*, *Wurmea*.

Jasminum officinale L.: the form *affine* has the synonyms *J. affine* Royle ex Lindl., *J. grandiflorum hort. non L.* *J. grandiflorum* L. has also been considered a form of *J. officinale*.

Juglans L.: synonymies with *Carya*.

Juglans regia L.: syn.: *J. duclouxiana* Dode.

Juniperus L.: *J. drupacea* Labill. has the synonym *Arceuthos drupacea* (Labill.) Ant. et Kotschy. *J. ericoides* has the synonym *Callitris calcarata*.

Kalanchoë Adans: synonymies with *Bryophyllum*, *Cotyledon*, *Kitchingia*.

Kochia scoparia (L.) Schrad.: syn.: *Bassia scoparia* (L.) A.J. Scott.

Koeleria Pers.: synonymies with *Poa*.

Kohleria Regel: synonymies with *Gloxinia*, *Isoloma*, *Moussonia*, *Sciadocalyx*, *Tydaea*.

Lachenalia Jacq. f. ex Murr.: synonymies with *Phormium*, *Scilla*.

Lactuca sativa L.: The botanical varieties have also been made into species (*L. angustana* Host, *L. capitata* Gars., *L. intybacea* Jacq., *L. romana* Gars. and *L. sativa* DC.).

Lantana montevidensis (Spreng.) Briq.: syn.: *L. sellowiana* Link et Otto, *L. delicatissima* hort., *Lippia montevidensis*.

Lens culinaris Medik.: syn.: *L. esculenta* Moench, *Ervum lens* L.

Lepidium sativum L.: syn.: *Nasturtium sativum* Medik.

Leptospermum J.R. et G. Forst.: synonymies with *Fabricia*, *Kunzea*, *Metrosideros*.

Leucospermum R. Br.: *L. ellipticum* has the synonym *Protea formosa*.

Levisticum officinale W.D.J. Koch: syn.: *Ligusticum paludapifolium* (Lam.) Aschers., *Angelica levisticum* All.

Ligularia Cass.: synonymies with *Erythrochaete*, *Farfugium*, *Senecio*, *Tussilago*.

Lilium L.: synonymies with *Cardiocrinum*, *Fritillaria*, *Nomocharis*, *Notholirion*.

Limonium Mill.: syn.: *Statice* L. p.p., the other part being *Armeria*.

Linum usitatissimum L.: syn.: *L. crepitans* (Boenningh.) Dumort., *L. humile* Mill., *L. humile* Planch.

Litchi chinensis Sonn.: syn.: *Nephelium litchi*, *Scytalia chinensis*.

Lobelia L.: synonymies with *Haynalda*, *Isotoma*, *Monopsis*, *Pratia*, *Siphocampylus*, *Tupa*.

Lobularia Desv.: Monotypic genus whose species, *L. maritima* (L.) Desv., has the synonyms *Alyssum maritimum* (L.) Lam. and *Koeniga maritima*.

Lolium multiflorum Lam.: syn.: *L. italicum* A. Braun, *L. multiflorum* DC.

Lotus corniculatus L., L. tenuis Waldst. et Kit. ex Willd.: these names are stabilized by ISTA. The Diccionario de Plantas Agrícolas considers them as synonyms.

Lotus uliginosus Schkuhr: syn.: *L. pedunculatus* auct. non Cav.

Lupinus albus L.: syn.: *L. hirsutus* Eichw. non *L. nec* Forsk., *L. sativus* Gaertn., *L. varius* Gaertn. non *L. nec* Savi and, according to Zander, *L. termis* Forsk. The Diccionario de Plantas Agrícolas considers the latter as a distinct species.

Lupinus angustifolius L.: syn.: *L. varius* Savi non *L.*

Lycopersicon lycopersicum (L.) Karst, ex Farwell: other synonym: *L. esculentum* Dunal.

Lysimachia L.: synonymies with *Bacopa*, *Naumburgia*, *Steironema*.

Magnolia L.: synonymies with *Michelia*, *Talauma*.

Mahonia Nutt.: see under *Berberis*.

Malus Mill.: syn.: *Pyrus L. partim*. Synonymies with *Crataegus*, *Eriolobus*.

Malus domestica Borkh.: syn.: *M. sylvestris* Mill. var. *domestica* (Borkh.) Mansf., *M. pumila* var. *domestica* (Borkh.) Schneid. Most varieties cultivated in Europe belong to this species. *M. sylvestris* Mill. has the synonyms *Pyrus malus* L., *P. sylvestris* S.F. Gray non Moench, *M. communis* Poir.

Malva L.: synonymies with *Callirhoë*, *Lavatera*, *Malvastrum*, *Sphaeralcea*.

Mandevilla Lindl.: synonymies with *Dipladenia*.

Matricaria recutita L.: according to ISTA, *M. chamomilla* auct., non *L.*, is a synonym of *M. recutita* L. and of *Chamomilla recutita* (L.) Rauschert. According to Zander, the synonyms concern *M. chamomilla* L. p. p. According to the Dictionary of Gardening, *M. chamomilla* is a synonym of *Anthemis nobilis*.

Matthiola incana (L.) R. Br.: syn.: *M. annua*.

Medicago lupulina L.: syn.: *M. lupulina* Scop.

Medicago sativa L.: according to Zander, this species comprises the following subspecies:

- ssp. *caerulea* (Less. ex Ledeb.) Schmalh. (*M. caerulea* Less. ex Ledeb.)
- ssp. *falcata* (L.) Arcang. (*M. falcata* L.)
- ssp. *falcata* x ssp. *sativa* (*M. x varia* Martyn)
- ssp. *sativa*.

Medicago x varia Martyn: see under *Medicago sativa* L.

Melia azedarach L.: syn.: *M. japonica* G. Don.

Mentha x piperita L. = *M. aquatica* x *M. spicata*.

Meryta J.R. et G. Forst.: synonymies with *Aralia*, *Botryodendrum*, *Oreopanax*.

Mimetes Salisb.: see under *Orothamnus spec.*

Moraceae: this family includes sometimes the *Cannabinaceae*.

Musa L.: synonymies with *Ensete*.

Musa acuminata Colla: syn.: *Musa cavendishii* Lamb., *M. malaccensis* Ridl. – according to Zander –, *M. sinensis* – according to the Dictionary of Gardening – and *M. x paradisiaca* L. (name stabilized by ISTA), *M. x sapientium* L. – according to the Diccionario of Plantas Agrícolas.

Myosotis alpestris F.W. Schmidt: *M. alpestris hort.* is a synonym of *M. sylvatica* Ehrh. ex Hoffm. and *M. oblongata* Link.

Narcissus L.: synonymies with *Corbularia*, *Hermione*.

Nephrolepis Schott: *N. acutifolia* has the synonyms *Isoloma lanuginosum*, *Lindsaya lanuginosa*.

Nerine Herb.: synonymies with *Amaryllis*, *Lycoris*.

Nerium L.: *N. divaricum auct. non L.* is a synonym of *Tabernaemontana coronaria* (Jacq.) Willd.

Nerium oleander L.: syn.: *N. indicum* Mill., *N. odorum* Ait.

Oenothera L.: the subgenera have also been made into genera (*Anogra*, *Calylophis*, *Chylismia*, *Hartmannia*, *Kneiffia*, *Lavauxia*, *Megapterium*, *Pachylophus*, *Raimannia*, *Sphaerostigma*, *Taraxia*). Other synonymies with *Godetia*, *Meriolix*, *Onagra*, *Xylopleurum*.

Olea europaea L.: the fruiting subspecies *europaea* has also been made into a species under the name *O. sativa* Hoffmgg. et Link.

Onobrychis viciifolia Scop.: syn.: *Hedysarum onobrychis* L., *O. sativa* Lam.

Ophiopogon Ker-Gawl.: *O. japonicus* (L. f.) Ker-Gawl. has the synonym *Convallaria japonica* L. f. Further synonymies with *Liriope*.

Oreopanax Decne. et Planch.: synonymies with *Aralia*, *Meryta*.

Origanum majorana L.: syn.: *Majorana hortensis* Moench.

Ornithogalum L.: *O. vittatum* has also been described as *Albuca vittata*.

Ornithopus sativus Brot. syn.: *O. sativus* Link. *O. sativus* Willk. is a synonym of *O. isthmocarpus* Coss.

Orothamnus Pappe ex Hook.: monotypic genus, the species of which (*O. zeyheri*) has the synonym *Mimetes zeyheri*.

Osteospermum L.: synonymies with *Dimorphotheca*.

Paeonia albiflora Pall.: syn.: *P. lactiflora* Pall., *P. chinensis* hort., *P. sinensis* (Sims) hort., *P. edulis sinensis*.

Paeonia suffruticosa Andr.: syn.: *P. arborea* Donn, *P. moutan* Sims.

Pandorea (Endl.) Spach: synonymies with *Bignonia*, *Tecoma*.

Paranomus Salisb.: synonymies with *Nivenia*, *Protea*.

Passiflora edulis Sims: syn.: *P. laurifolia* F. Vill.

Pastinaca sativa L.: syn.: *Peucedanum sativum*.

Pelargonium L'Hér. ex Ait.: synonymies with *Geranium*.

Pelargonium-Grandiflorum-Hybridae: syn.: *P. grandiflorum* hort. non Willd.

Pelargonium-Zonale-Hybridae: further synonym: *P. zonale* hort. non (L.) L'Hér. ex Ait.

Pennisetum glaucum (L.) R. Br. emend. Stuntz: syn.: *P. typhoides* (Burm. f.) Stapf et C.E. Hubb., *Setaria glauca* (L.) P. Beauv., *P. typhoideum* L.C. Rich., *P. americanum* (L.) Leeke, *P. americanum* (L.) K. Schum. ssp. *typhoideum* (L.C. Rich.) Maire et Zeiller. The Diccionario de Plantas Agrícolas cites *P. typhoides* (Burm. f.) L.C. Rich. with the synonyms *Alopecurus typhoides* Burm. f., *Panicum glaucum* L., *Penicillaria spicata* Beauv., *Pennisetum spicatum* Roem. et Schult., *Pennisetum typhoideum* L.

Pentas lanceolata (Forssk.) K. Schum.: syn.: *P. carnea* Benth.

Persea americana Mill.: syn.: *P. gratissima* Gaertn. f.

Petroselinum crispum (Mill.) Nym. ex A.W. Hill: syn.: *Apium crispum* Mill., *A. petroselinum* L., *P. hortense* auct. non Hoffm., *P. sativum* Hoffm., *Carum petroselinum*.

Petroselinum crispum (Mill.) Nym. ex A.W. Hill convar. radicosum (Alef.) Danert: syn.: *P. crispum* (Mill.) Nym. ex A.W. Hill ssp. *tuberosum* (Bernh. ex Rchb.) Soo., *Apium latifolium* Mill., *P. sativum* var. *latifolium* Alef.

Petunia x hybrida Vilm. = *P. axillaris* x *P. violacea*. Syn.: *P.-Hybrids*, *P. x atkinsiana* D. Don.

Phalaris aquatica L.: syn.: *P. tuberosa* L., incl. *P. stenoptera* Hackel (according to ISTA).

Phalaris arundinacea L.: syn.: *Typhoides arundinacea* (L.) Moench, *Baldingera arundinacea* (L.) Dumort., *Digraphis arundinacea*.

Pharbitis purpurea (Roth) Bojer: syn.: *Ipomea purpurea* (L.) Roth, *Convolvulus purpureus* L., *C. major*.

Phaseolus coccineus L.: syn.: *P. multiflorus* Lam., *P. multiflorus* Willd.

Philodendron Schott corr. Schott: synonymies with *Anthurium*, *Caladium*, *Monstera*. In particular, *Monstera deliciosa* Liebm. (name stabilized by ISTA) has the synonym *P. pertusum* Kunth et Bouché and is known by the name *Philodendron*.

Phleum bertolonii DC.: further synonym: *P. bulbosum* auct. non L.

Phormium J.R. et G. Forst.: synonymies with *Lachenalia*.

Photinia Lindl.: synonymies with *Crataegus*, *Eriobotrya*, *Heteromeles*. *Eriobotrya japonica* (Thunb.) Lindl. has notably the synonym *P. japonica*.

Phyllostachys Sieb. et Zucc.: synonymies with *Bambusa*, *Chimonobambusa*, *Shibataea*, *Semiarundinaria*.

Physalis ixocarpa Brot. ex Hornem.: syn.: *P. edulis* hort. non Sims.

Picea A. Dietr.: the nomenclature is very complex as there have been confusions with *Abies*, *Pinus* and *Tsuga*. In addition, certain botanists have identified 40 species, others having reduced some of them to synonyms.

Picea abies (L.) Karst.: syn.: *Pinus abies* L., *Picea excelsa* (Lam.) Link, *P. vulgaris* Link.

Pinus spec.: synonymies with *Picea*.

Pistacia L.: syn.: *Terebinthus* Mill.

Pistacia vera L.: syn.: *P. terebinthus* Mill. non L.

Pisum sativum L.: in its modern sense, *P. sativum* L. includes *P. arvense*. Synonymy with *P. elatius* Stev., *P. humile* Boiss.

Plectranthus L'Hér.: synonymies with *Coleus*.

Plumbago L.: synonymies with *Ceratostigma*.

Poa L.: synonymies with *Dactylis*, *Eragrostis*, *Festuca*, *Glyceria*, *Koeleria*, *Puccinellia*.

Polymnia sonchifolia Poepp. et Endl.: syn.: *P. edulis* Wedd.

Polypodium L.: synonymies with *Aglaomorpha*, *Athyrium*, *Currania*, *Dryopteris*, *Goniophlebium*, *Microsorium*, *Phlebodium*, *Solanopteris*,

Poncirus Raf.: monotypic genus (*P. trifoliata* (L.) Raf.) which has the synonyms *Citrus trifoliata* L., *Aegle sepiaria*, *Limonia trifoliata*.

Potentilla L.: synonymies with Argentina, Comarum, Dasyphora, Drymocallis, Sibbaldiopsis.

Potentilla fruticosa L.: syn.: Dasyphora fruticosa. As the main table shows, certain types of cinquefoil are either considered to be subspecies of *P. fruticosa* L., or made into distinct species. Differences in the scope of application of protection result therefrom.

Primula vulgaris Huds.: syn.: *P. acaulis* (L.) Hill.

Protea L.: synonymies with Aulax, Leucospermum, Paranomus, Serruria.

Prunus L.: this genus has been made into several genera by some botanists. The nomenclature most encountered in practice is the following:

- Amygdalus (almond);
- Armeniaca (apricot);
- Cerasus (cherry);
- Persica (peach);
- Prunus (plum).

As far as the species are concerned, the synonymies are given below. Certain States have defined the protected species by the indication of the genus *Prunus* L. followed by the common name of the species, in particular to avoid problems with nomenclature.

Prunus amygdalus Bartock: syn.: *Amygdalus communis* L., *P. communis* (L.) Arcang. non Huds.

Prunus armeniaca L.: syn.: *Armeniaca vulgaris* Lam.

Prunus avium (L.) L.: syn.: *Cerasus avium* (L.) Moench.

Prunus cerasifera Ehrh.: syn.: *P. myrobalana* Poit. et Turp., *P. myrobalanus* (L.) Loisel. The group of ornamental varieties of the *Atropurpurea* type is also known under the name *P. pissardii* Carr. In the States which rely mainly on common names, this species may or may not be protected depending on the interpretation of "plum."

Prunus cerasus L.: syn.: *Cerasus vulgaris* Mill. The subspecies and botanical varieties have also been made into species (*P. acida* K. Koch non Ehrh.; *P. austera* (L.) Ehrh., *Cerasus austera* (L.) Borkh.; *Cerasus marasca* Host, *P. marasca* (Host) Rchb.).

Prunus domestica L., Prunus insititia L.: classification of plums is extremely confused, as most botanists who have dealt with the genus *Prunus* have adopted their own system. On the species level, the most controversial question is whether *P. insititia* constitutes a species or should be considered a subspecies of *P. domestica*. The latter is at present the most commonly recognized, but the former can still be found. In addition, there is controversy over the allocation of the various types of plums to the taxonomic entities that have been defined. For instance, mirabelle belongs to the entity (subspecies or species) *insititia* according to certain authors and to the entity *syriaca* according to others. The various types are not always used in the same manner from one country to another. For example, damson is used solely as a root-stock in France, whereas in the United Kingdom it is also used as a fruiting species for pies, stewing and bottling. Finally, partly as a consequence of the different uses, types identified by

a common name in one country may not have a common name in others; thus for example, there is no equivalent of the English name bullace in French. All these factors may influence the scope of application of protection.

Prunus insititia L.: see under *P. domestica* L.

Prunus laurocerasus L.: syn.: *Laurocerasus officinalis* M.J. Roem., *Cerasus laurocerasus* (L.) Loisel.

Prunus mume Sieb. et Zucc.: syn.: *Armeniaca mume* (Sieb. et Zucc.) Sieb. ex Carr.

Prunus persica (L.) Batsch: syn.: *Amygdalus persica* L., *A. pumila* Lour. non L., *Persica vulgaris*.

Prunus salicina Lindl.: syn.: *P. triflora*. In the States which rely mainly on common names, this species may or may not be protected depending on the interpretation of “plum.”

Pseudotsuga Carr.: synonymies with *Abies*.

Psidium guajava L.: syn.: *P. pyriferum* L., *P. pomiferum* L.

Pyracantha M.J. Roem.: synonymies with *Cotoneaster*, *Crataegus*.

Pyrus L.: synonymies with *Amelanchier*, *Aronia*, *Chaenomeles*, *Cydonia*, *Malus*, *Mespilus*, *Sorbus*.

Pyrus communis L.: syn.: *P. domestica* Medik. non (L.) Ehrh. (according to Zander). The *Diccionario de Plantas Agrícolas* considers the latter as a separate species, and *P. communis* Smith as a synonym of *Sorbus domestica* L.

Pyrus pyrifolia (Burm. f.) Nakai var. culta (Mak.) Nakai: syn.: *P. sinensis* L.H. Bailey non Poir. nec Lindl.

Quercus L.: synonymies with *Lithocarpus*.

Radermachera Zoll. et Mor.: synonymies with *Oroxylum*, *Stereospermum*.

Ranunculus L.: synonymies with *Batrachium*, *Callianthemum*, *Ceratocephalus*, *Ficaria*.

Ranunculus asiaticus L.: syn.: *R. hortensis* Pers., *R. africanus* hort.

Retama monosperma (L.) Boiss.: syn.: *Genista monosperma* (L.) Lam., *Lygos monosperma* (L.) Heyw., *Spartium monospermum*.

Rheum rhabarbarum L.: syn.: *R. undulatum* L. *R. undulatum* Pall. is a synonym of *R. rhaponticum* L.

Rhipsalidopsis Britt. et Rose: see under *Epiphyllopsis*...

Rhododendron L.: in its modern sense, this genus includes Azalea and Rhodora.

Ribes niveum Lindl.: see under *R. sylvestre*. Syn.: *R. gracile*.

Ribes sylvestre (Lam.) Mert. et W. Koch: syn.: *R. rubrum* L. p.p. et auct. mult., *R. vulgare* Lam. p.p., *R. sativum* (Rchb.) Syme, *R. rubrum* ssp. *vulgare* (Lam.) Domin (according to Zander). Zander also maintains that most cultivated varieties derive from this species. According to the Dictionary of Gardening, the main ancestor of red and white currants is *R. sativum*, often wrongly called *R. rubrum*. Varieties of *R. rubrum* are cultivated in Scandinavia (northern red currant). The Diccionario de Plantas Agrícolas and Zander refer to this species under the name *R. spicatum* Robs. emend. Wilmoth (*R. rubrum* L. p.p., *R. vulgare* Lam. p.p., *R. rubrum* (L.) O. Schwarz, *R. sylvestre* Syme).

Ribes uva-crispa L.: according to Zander, the majority of cultivated varieties belong to the botanical variety *sativum* DC., which has the synonym *R. grossularia* L. The Diccionario de Plantas Agrícolas gives *R. uva-crispa* L. and *R. grossularia* L. as synonyms (and *R. grossularia* Wall. as a synonym of *R. alpestre* Wall.).

Rubus fruticosus L.: according to the Dictionary of Gardening, this term is a broad one and covers the blackberries. They have been divided by certain botanists into more than 100 species. The name does not appear in Zander.

Rubus idaeus L.: according to the Dictionary of Gardening, *R. idaeus* (wild raspberry) is the ancestor of cultivated raspberries. *R. strigosus* is the American counterpart of *R. idaeus* and has the synonym *R. idaeus* var. *strigosus*.

Rudbeckia hirta L.: the name stabilized by ISTA includes *R. bicolor* Nutt.

Saccharum L.: synonymies with *Gynerium*, *Pogonatherum*, *Rhynchelytrum*.

Saccharum officinarum L.: *S. officinarum* ssp. *barberi* (Jesw.) Burk. and *S. officinarum* ssp. *sinense* (Roxb.) Burk. var. *sinense* are synonyms of *S. barberi* Jesw. and *S. sinense* Roxb. (names stabilized by ISTA), respectively.

Salvia L.: synonymies with *Audibertia*, *Sclarea*.

Salvia officinalis L.: the sub-species *lavandulifolia* (Vahl) Gams has also been made into a species (*S. lavandulifolia* Vahl).

Scabiosa L.: synonymies with *Cephalaria*, *Knautia*, *Pterocephalus*, *Succisa*.

Scaevola L.: synonymies with *Lechenaultia*.

Schefflera J.R. et G. Forst.: synonymies with *Brassaia*, *Heptapleurum*, *Aralia*.

Schlumbergera Lem.: see under *Epiphyllopsis*...

Senecio L.: synonymies with *Brachyglottis*, *Cacasia*, *Cineraria*, *Emilia*, *Kleinia*, *Ligularia*, *Mikania*, *Notonia*.

Senecio cruentus (Masson ex L'Hér.) DC.: syn.: *Cineraria cruenta* DC.

Serruria Salisb.: synonymies with *Protea*.

Setaria sphacelata (Schum.) Stapf. et C.E. Hubb.: syn.: *Panicum sphacelatum* Schum.

Silybum marianum (L.) Gaertn.: syn.: *Carduus marianus* L.

Simmondsia chinensis (Link) Schneid.: syn.: *S. californica* (Link) Nutt.

Sinningia x hybrida hort.: further synonym: *Gloxinia speciosa* Lodd.

Solanum melongena L.: syn.: *S. aethiopicum* Thunb., *S. incanum* L.

Solanum tuberosum L.: syn.: *S. andigenum* Juz. et Buk.

Solidago L.: *S. graminifolia* has the synonym *Euthamia graminifolia* and its botanical variety *nuttallii* has the synonym *E. nuttallii*. *S. rigida* has the synonym *Oligoneuron rigidum*.

Sorbaria (Ser. ex DC.) A. Br.: synonymies with *Spiraea*.

Sorbus L.: synonymies with *Aronia*, *Crataegus*, *Micromeles*, *Pyrus*.

Sorbus aria L. Crantz: syn.: *Pyrus aria* (L.) Ehrh.

Sorghum Moench: synonymies with *Andropogon*, *Holcus*, *Millium*, *Panicum*.

Sorghum bicolor (L.) Moench: main synonym: *S. vulgare* Pers. According to the *Diccionario de Plantas Agrícolas*, this species contains all annual cultivated types, whereas Zander distinguishes several species.

Spartium L.: *S. junceum* L. (name stabilized by ISTA) has the synonyms *Genista juncea*, *G. odorata*. *S. scoparium* L. is a synonym of *Sarothamnus scoparius* (L.) Wimm.

Spathiphyllum Schott: synonymies with *Anthurium*, *Pothos*, *Rhodospatha*.

Sutera Roth: syn.: *Chaenostoma* Benth.; further synonymies with *Buchnera*, *Manulea*.

Swertia L.: synonymies with *Ophelia*.

Symphoricarpos Duham.: *S. rivularis* has also been described as *Symphoria racemosa*.

Syringa L.: synonymies with *Ligustrina*.

Syzygium Gaertn.: according to the *Dictionary of Gardening* this genus is included in the genus *Eugenia*. According to Zander there are synonymies with *Caryophyllus*, *Eugenia*, *Jambosa*, *Myrtus*.

Tagetes tenuifolia Cav.: syn.: *T. signata* Bartl.

Tanacetum parthenium (L.) Schultz Bip.: see under *Chrysanthemum parthenium*.

Thuja L.: synonymies with Biota, Platycladus, Tetraclinis, Thujopsis.

Tibouchina Aubl.: synonymies with Lasiandra, Pleroma, Pleionema, Rhexia.

Trifolium repens L.: syn.: T. nigrescens Schur [non Viv.].

Trifolium resupinatum L.: T. resupinatum Less. is a synonym of T. fragiferum L.

Trisetum flavescens (L.) P. Beauv.: syn.: Avena flavescens L.

Triticum L.: synonymies with Agropyron.

Triticum aestivum L. emend. Fiori et Paol.: syn.: T. hybernum L., T. sativum Lam., T. vulgare Vill., T. cereale Schrank (according to Zander). In the Diccionario de Plantas Agrícolas, classification is based on T. aestivum (L.) Thell. (syn.: T. aestivum L.), which groups units that are made into species in Zander (in particular T. macha Dekapr. et Menabde, T. spelta L., T. sphaerococcum Perciv.).

Triticum durum Desf.: syn.: T. turgidum (L.) Thell. ssp. turgidum convar. durum (Desf.) Mac Kay.

Triticum spelta L.: syn.: T. aestivum (L.) Thell. ssp. spelta (L.) Thell.

Vaccinium L.: synonymies with Agapetes, Andromeda, Batodendron, Cyanococcus, Epigynium, Herpothamnus, Hugeria, Oxycoccoides, Oxycoccus, Polycodium, Thibaudia, Vitis-idaea.

Vaccinium macrocarpon Ait.: syn.: Oxycoccus macrocarpus (Ait.) Pursh.

Valerianella locusta (L.) Laterrade: syn.: V. olitoria (L.) Poll.

Verbena L.: synonymies with Junellia, Lippia.

Verbena x hybrida Voss: syn.: V.-Hybrids, V. hortensis.

Viburnum L.: V. rigidum has the synonym Tinus rugosus.

Vicia faba L.: syn.: Faba bona Medik., F. vulgaris Moench.

Vicia sativa L.: the subspecies nigra (L.) Ehrh. (angustifolia (L.) Aschers. et Graebn.) also has the synonym V. angustifolia L.

Vicia villosa Roth: according to ISTA, this species includes V. dasycarpa Ten. The Diccionario de Plantas Agrícolas considers them as synonyms.

Vigna unguiculata (L.) Walp.: synonym other than that indicated in the main table: Dolichos biflorus L. According to the Diccionario de Plantas Agrícolas and Zander, the subspecies have the following synonyms:

- ssp. cylindrica (L.) Van Eseltine ex Verdc.: V. catjang (Burm. f.) Walp., V. cylindrica (L.) Skeels, Phaseolus cylindricus Stickm.;

- ssp. sesquipedalis (L.) Verdc.: *V. sesquipedalis* (L.) Fruwirth, *Dolichos sesquipedalis*;
- ssp. unguiculata: *Dolichos sinensis* Stickm.

Vinca L.: *V. rosea* L. is frequently separated from *Vinca* under the name *Catharanthus roseus* (L.) G. Don (name stabilized by ISTA).

Viola L.: *V. hederacea* has also been described under the names *Erpetion reniforme* and *E. hederaceum*.

Viola x wittrockiana Gams: syn.: *V.-Wittrockiana-Hibridae*, *V. tricolor* var. *maxima* hort., *V. tricolor hortensis* auct. non DC., *V. hortensis* auct. non Schur.

Vitis L.: the genera *Ampelopsis*, *Cissus*, *Columella*, *Parthenocissus* and *Tetrastigma* have been included in the genus *Vitis* by certain botanists, particularly by Bentham and Hooker in their *Genera Plantarum*. A great number of synonyms resulting from this conception are still in use. Other synonymies are due to the fact that certain species have been classified in two or three, or even four of the above-mentioned genera. Other synonymies with *Muscadinia*, *Pterisanthes*, *Spinovitis*.

Weigela Thunb.: see under *Diervilla* Mill.

Zantedeschia Spreng.: synonymies with *Calla*, *Richardia*.

Ziziphus sativa Gaertn.: syn.: *Z. jujuba* Mill., *Z. vulgaris* Lam.

Zygocactus K. Schum.: see under *Epiphyllopsis*...

Teff..... Eragrostis
Théier..... Camellia
Thlaspi..... Iberis

Thuya..... Thuja
Tilleul..... Tilia
Tomate..... Lycopersicon, Solanum
Tomate en arbre..... Cyphomandra
Topinambour..... Helianthus
Tournesol..... Helianthus
Toute-épice..... Nigella
Trèfle..... Trifolium
— jaune des sables..... Anthyllis

Verge d'or..... Solidago
Véronique..... Hebe
Verveine..... Verbena
Vesce..... Vicia
— de Narbonne..... Vicia
Vigne..... Vitis
Violette..... Viola
Viorne..... Viburnum
Vulpin des prés..... Alopecurus

Weigela..... Diervilla, Weigela
Yuzu..... Citrus

INDEX OF GERMAN COMMON NAMES / INDEX DES NOMS COMMUNS ALLEMANDS /
VERZEICHNIS DER DEUTSCHEN LANDESÜBLICHEN NAMEN /
ÍNDICE DE NOMBRES COMUNES ALEMANES

Abessinische Zwerghirse	Eragrostis	Birkenfeige	Betula
Ackerbohne	Vicia	Birne	Ficus
Ahorn	Acer	— (Felsen-)	Pyrus
Akazie	Acacia	Bitterdistel	Amelanchier
— (Schein-)	Robinia	-orange	Simaroubaceae
Alexandrinischer Klee	Trifolium	-schopf	Poncirus
Alpenveilchen	Cyclamen	Blattähre	Aloë
Amaryllis	Hippeastrum	Blätterpilze	Phyllostachys
Ananasgewächse	Bromeliaceae	Blaues Halskraut	Agaricaceae
Apfel	Malus	Bleiwurz	Trachelium
— (Rahm-)	Annona	Blumenrohr	Plumbaginaceae
-sine	Citrus	Blutblume	Canna
— (Zucker-)	Annona	Blüte (Winter-)	Chimonanthus
Amerikanische Pflaume	Prunus	Bodenfrüchtiger Klee	Haemanthus
Ampfer (Gartensauer-)	Rumex	Bogenlilie	Trifolium
Aprikose	Prunus	Bohne (Acker-)	Cyrtanthus
Arabische Mahaleb	Prunus	— (Augen-)	Vicia
Aralie (Berg-)	Oreopanax	— (Busch-)	Vigna
— (Finger-)	Dizygotheca	— (Catjang-)	Phaseolus
Arizonazypresse	Cupressus	— (Dicke)	Vigna
Aronstabgewächse	Araceae	— (Feuer-)	Vicia
Artischocke	Cynara	— (Garten-)	Phaseolus
Aster	Aster	— (Prunk-)	Phaseolus
— (Sommer-)	Callistephus	— (Puff-)	Phaseolus
Atlasblume	Clarkia	— (Soja-)	Vicia
Aubergine	Solanum	— (Spargel-)	Glycine
Augenbohne	Vigna	— (Stangen-)	Vigna
Avocado	Persea	Bohnenkraut	Phaseolus
Azalee	Rhododendron	Boretsch	Borago
Baldrian	Valeriana	Borstengras (Feder-)	Satureja
Balsam (Bienen-)	Monarda	Brechnußgewächse	Pennisetum
Balsamine	Impatiens	Brokkoli	Brassica
Bambus	Bambusa	Brombeere	Loganiaceae
— (Riesen-)	Dendrocalamus	Buchengewächse	Rubus
Banane	Musa	Buchsbaumgewächse	Buxaceae
— (Tafel-)	Heliconia	Buchweizen	Fagaceae
Bärenklaugewächse	Acanthaceae	Büffelgras	Fagopyrum
-ohr	Arctotis	Buntnessel	Coleus
Bartnelke	Dianthus	Buschbohne	Cenchrus
Basilikum	Ocimum	Cardy	Phaseolus
Bastardindigo	Amorpha	Catjangbohne	Cynara
Batate	Ipomoea	Celosie (Federbusch-)	Vigna
Baumtomate	Cyphomandra	Champignon	Celosia
Baumwolle	Gossypium	Cherimoya	Agaricus
— Westindische	Gossypium	Chinesische Jute	Annona
Baumwürgergewächse	Celastraceae	Chinesische Kastanie	Castanea
Becherfarn	Cyathea	Chinesischer Hanf	Abutilon
Benediktenkraut (Kardo-)	Cnicus	Chinesische Spaltkölbchen	Schizandra
Berberitze	Berberis	Christusdorn	Abutilon
Bergaralie	Oreopanax	-rose	Euphorbia
Bermudagrass	Cynodon	Croton	Helleborus
Besenheide	Calluna	Dattelpalme	Codiaeum
-kraut	Kochia	Dickblattgewächse	Phoenix
-sommerzypresse	Kochia	Dicke Bohne	Crassulaceae
Bete	Beta	Dill	Vicia
Bienenbalsam	Monarda	Dinkel	Anethum
Binsengewächse	Juncaceae	Distel (Bitter-)	Triticum
-ginster	Monarda	— (Edel-)	Cnicus
Birke	Spartium		

Distel (Färber-).....	Eryngium	Flachs (Neuseeländer).....	Phormium
— (Marien-).....	Carthamus	Flamingoblume.....	Anthurium
Doldenblütler.....	Silybum	Flammenblume.....	Phlox
Douglasie.....	Apiaceae, Umbelliferae	Fleißiges Lieschen.....	Impatiens
Drachenbaum.....	Pseudotsuga	Flieder.....	Syringa
Drehfrucht.....	Dracaena	— (Gold-).....	Forsythia
Duprez Zypresse.....	Streptocarpus	Frauenhaarfarne.....	Adiantaceae
Duftsteinrich.....	Cupressus	Froschlöffelgewächse.....	Alismataceae
Ebenholtzgewächse	Lobularia	Fuchsschwanz.....	Amaranthus
Eberesche.....	Ebenaceae	Fuchsgewächse.....	Amaranthaceae
Echte Feige.....	Sorbus	— (Wiesen-).....	Alopecurus
Echte Zypresse.....	Ficus	Funkie.....	Hosta
Edeldistel.....	Cupressus	Gänseblümchen	Bellis
—pelargonie.....	Anthemis	—fuß.....	Chenopodium
Efeu.....	Pelargonium	Gartenbohne.....	Phaseolus
Eibe.....	Hedera	—kresse.....	Lepidium
Eibengewächse.....	Taxus	—ringelblume.....	Calendula
Eibisch.....	Taxales	—sauerampfer.....	Rumex
Eiche.....	Hibiscus	Geigenholz.....	Citharexylon
Eierfrucht.....	Quercus	Geißblatt.....	Lonicera
Eisenhut.....	Solanum	—gewächse.....	Caprifoliaceae
—kraut.....	Aconitum	Gelbklee.....	Medicago
Eiskrautgewächse.....	Verbena	—senf.....	Sinapsis
Elsbeere.....	Sorbus	Gerste.....	Hordeum
Endivie.....	Aizoaceae	Ginkgo.....	Ginkgo
Enzian.....	Cichorium	Ginseng.....	Panax
Erbse.....	Gentiana	Ginster (Binsen-).....	Spartium
— (deutsche Kicher-).....	Lathyrus	Gipskraut.....	Gypsophila
— (Futter-).....	Pisum	Glanzgras.....	Phalaris
— (Gemüse-).....	Pisum	—mispel.....	Photinia
— (Kicher-).....	Cicer	—strauch.....	Pimelea
— (Platt-).....	Lathyrus	Glatthafer.....	Arrhenatherum
Erdbeere.....	Fragaria	Glockenblumengewächse.....	Campanulaceae
—nuß.....	Arachis	—heide.....	Erica
Esche (Eber-).....	Sorbus	Gloxinie.....	Sinningia
— (Rot-).....	Fraxinus	Godetie.....	Clarkia
Eschenahorn.....	Acer	Goldflieder.....	Forsythia
Esparssette.....	Onobrychis	—glöckchen.....	Forsythia
Eukalyptus.....	Eucalyptus	—hafer.....	Trisetum
Falsche Kamille	Chrysanthemum,	—kolben.....	Ligularia
	Tanacetum	—lack.....	Cheiranthus
Falscher Jasmin.....	Philadelphus	—mohn.....	Eschscholzia
Fächerblume.....	Scaevola	—rute.....	Solidago
Färberdistel.....	Carthamus	Granadilla (Purpur-).....	Passiflora
Farnpflanzen.....	Pteridophyta	Granatbaumgewächse.....	Punicaceae
Federborstengras.....	Pennisetum	Grapefruit.....	Citrus
—busch-Celosie.....	Celosia	Grindkraut.....	Scabiosa
Feige.....	Ficus	Guayave.....	Psidium
Feijoa.....	Acca, Feijoa	Guineagrass.....	Panicum
Felberich.....	Lysimachia	Gummibaum.....	Ficus
Feldsalat.....	Valerianella	Gurke.....	Cucumis
Felsenbirne.....	Amelanchier	Hafer	Avena
—-kirche.....	Prunus	— (Glatt-).....	Arrhenatherum
Fenchel.....	Foeniculum	— (Gold-).....	Trisetum
Feuerbohne.....	Phaseolus	— (Mittelmeer-).....	Avena
—dorn.....	Pyracantha	— (Nackt-).....	Avena
Fichte.....	Picea	Hahnenfuß.....	Ranunculus
Filzkirsch.....	Prunus	—kamm.....	Celosia
Fingeraralie.....	Dizygotheca	—kopf (Italienischer).....	Hedysarum
—hut.....	Digitalis	Halbpeltaten.....	Pelargonium
—kraut.....	Potentilla	Halbrohr.....	Arundinaria
—strauch.....	Potentilla	Halskraut (Blaues).....	Trachelium
Fioringras.....	Agrostis	Hanf.....	Cannabis

Hanf (Chinesischer)	Abutilon	Kappenmohn	Eschscholzia
Harfenstrauch	Plectranthus	Kapuzinerkresse	Tropaeolum
Hartriegelgewächse	Cornaceae	Karakabaum	Corynocarpus
-weizen	Triticum	Karambola	Averrhoa
Haselnuß	Corylus	Kardengewächse.....	Dipsacaceae
Heckenkirsche	Lonicera	Kardobenediktenkraut	Cnicus
Heide (Besen-).....	Calluna	Kardone.....	Cynara
— (Glocken-)	Erica	Karotte.....	Daucus
-krautgewächse	Ericaceae	Kartoffel.....	Solanum
Heidelbeere	Vaccinium	— (Süß-)	Ipomoea
Helikonie	Heliconia	-zwiebel	Allium
Herbstrübe	Brassica	Kastanie.....	Castanea
Himbeere	Rubus	— (Chinesische).....	Castanea
Hirse (Abessinische Zwerg-).....	Eragrostis	— (Ross-).....	Aesculus
— (Mohren-)	Sorghum	Kaukasische Insektenblume	Chrysanthemum
— (Rispen-).....	Panicum	Kerbel.....	Anthriscus
Hopfen.....	Humulus	Keulenbaum	Cordyline
Hopfenklee	Medicago	-lilie	Cordyline
Hornmohn.....	Glaucium	Kichererbse	Cicer
Horntrespe	Bromus	— (deutsche-).....	Lathyrus
Hortensie	Hydrangea	Kiefer	Pinus
Hülsenfrüchtler	Fabaceae, Leguminosae	Kirsche	Prunus
Hundsgiftgewächse.....	Apocynaceae	— (Hecken-)	Lonicera
-zahngras	Cynodon	— (Kornel-).....	Cornus
Hyazinthe.....	Hyacinthus	— (Sauer-).....	Prunus
— (Riesen-).....	Galtonia	— (Süß-)	Prunus
Immergrün	Vinca	— (Toll-).....	Atropa
Impatiens (Neu-Guinea-).....	Impatiens	Kirschpflaume	Prunus
Indigo (Bastard-)	Amorpha	Kiwifrucht	Actinidia
Ingwer.....	Zingiber	Klebschwertel.....	Ixia
Inkalilie.....	Alstroemeria	Klee	Trifolium
Inkarnatklee	Trifolium	— (Alexandrin).....	Trifolium
Insektenblume.....	Chrysanthemum	— (Bodenfrüchtiger).....	Trifolium
Japanische Mispel	Eriobotrya	— (Gelb-).....	Medicago
— Pflaume.....	Prunus	— (Hopfen-).....	Medicago
Jasmin.....	Jasminum	— (Inkarnat-)	Trifolium
— (Falscher).....	Philadelphus	— (Persischer).....	Trifolium
Johannisbeere	Ribes	— (Rot-).....	Trifolium
-kraut	Hypericum	— (Schnecken-)	Medicago
-krautgewächse	Guttiferae, Hypericaceae	— (Schoten-).....	Lotus
Jobabastrauch.....	Simmondsia	— (Schweden-)	Trifolium
Jujube	Zizyphus	— (Stein-)	Melilotus
Jute (Chinesische).....	Abutilon	— (Süß-)	Hedysarum
Kaffee.....	Coffea	— (Tannen-).....	Anthyllis
Kakipflaume	Diospyros	— (Weiß-).....	Trifolium
Kaktusgewächse	Cactaceae	— (Wund-).....	Anthyllis
— (Oster-)	Epiphyllopsis, Rhipsalidopsis	Klivie.....	Clivia
— (Weihnachts-)	Schlumbergera, Zygocactus	Knaulgras	Dactylis
Kalla	Zantedeschia	Knoblauch	Allium
Kamelie	Camellia	Knöterichgewächse	Polygonaceae
Kamille	Matricaria	Kohl.....	Brassica
— (Echte)	Matricaria	-rabi	Brassica
— (Edel-)	Chamaemelum	-rübe	Brassica
— (Falsche)	Chrysanthemum, Tanacetum	Kokkelstrauch	Cocculus
— (Römische)	Chamaemelum	Kölle.....	Satureja
Kammgras	Cynosurus	Korallenranke	Euphorbia
Kanariengras.....	Phalaris	Korbblütler	Asteraceae, Compositae
Känguruhblume	Anigozanthos	Koriander	Coriandrum
Kannenstrauch	Nepenthes	Kornelkirsche	Cornus
Kapkörbchen	Dimorphotheca	Kranzlauch	Tulbaghia
		Kraut (Weiß-).....	Brassica
		— (Rot-).....	Brassica
		Kresse (Garten-).....	Lepidium
		Kreuzblütler	Brassicaceae, Cruciferae

-kraut	Senecio	Milchstern	Ornithogalum
-dorngewächse	Rhamnaceae	Minze (Pfeffer-)	Mentha
Krokus	Crocus	— (Pferde-)	Monarda
Kronwicke	Coronilla	Mirabelle	Prunus
Kümmel	Carum	Mispel (Japanische).....	Eriobotrya
— (Schwarz-)	Nigella	— (Zwerg-)	Cotoneaster
Kumquat	Fortunella	Mittelmeerhafer	Avena
Kürbis	Cucurbita	Mohn	Papaver
-gewächse	Cucurbitaceae	— (Gold-).....	Eschscholzia
L ärche	Larix	— (Horn-)	Glaucium
Lauch	Allium	— (Kappen-)	Eschscholzia
Lavendel	Lavandula	Möhre	Daucus
— (Meer-)	Limonium	Mohrenhirse	Sorghum
Lebensbaum.....	Thuja	Moosbeere	Vaccinium
Leberbalsam	Ageratum	Myrobalane	Prunus
Leierholz.....	Citharexylon	N achtkerze	Oenothera
Lein	Linum	-kerzengewächse	Onagraceae
-gewächse	Linaceae	-schattengewächse	Solanaceae
Levkoje.....	Matthiola	Nackthafer	Avena
Leyland Zypresse.....	x Cupressocyparis	Narbonner Wicke	Vicia
Liebegras (Behaartes).....	Eragrostis	Narzisse	Narcissus
Lieschen (Fleißiges)	Impatiens	Narzissengewächse.....	Amaryllidaceae
Lieschgras.....	Phleum	Nektarine	Prunus
Lilie (Bogen-)	Cyrtanthus	Nelke	Dianthus
— (Inka-).....	Alstroemeria	Nelkengewächse.....	Caryophyllaceae
— (Keulen-)	Cordyline	Nessel (Bunt-)	Coleus
— (Schmuck-)	Agapanthus	-gewächse	Urticaceae
— (Schwert-).....	Iris	— (Taub-)	Lamium
— (Tag-).....	Hemerocallis	Neu-Guinea-Impatiens	Impatiens
Liliengewächse	Liliaceae	Neuseeländer Flachs.....	Phormium
Limone	Citrus	Nieswurz	Helleborus
Linde	Tilia	Ö lbaum.....	Olea
Linse	Lens	Oleander	Nerium
Lippenblütler	Labiatae, Lamiaceae	Olive	Olea
Litschi	Litchi	Ölrettich	Raphanus
Löcherpilze.....	Polyporaceae	Ölweidengewächse	Elaeagnaceae
Loquate	Eriobotrya	Orange.....	Citrus
Löwenmaul	Antirrhinum	— (Bitter-)	Poncirus
Lupine.....	Lupinus	Orangenblume	Choisya
Luzerne.....	Medicago	Orchideen	Orchidaceae
M ädchenauge	Coreopsis	Osterkaktus.....	Epiphyllopsis, Rhipsalidopsis
Maggikraut	Levisticum	Osterluzei	Aristolochia
Mahalebkirschbaum	Prunus	P alma Christi.....	Ricinus
Mairübe	Brassica	Palme (Dattel-).....	Phoenix
Mais	Zea	— (Stech-).....	Ilex
Majoran	Origanum	Palmen.....	Palmae
Malve.....	Malva	Pantoffelblume	Calceolaria
— (Stock-).....	Alcea	Päonie.....	Paeonia
Mandarine.....	Citrus	Papaya	Carica
Mandel.....	Amygdalus, Prunus	Pappel.....	Populus
Mango	Mangifera	— (Samt-)	Abutilon
Mangold	Beta	Paprika	Capsicum
Mannstreu	Eryngium	Paradiesvogelblume	Strelitzia
Margerite	Chrysanthemum	Passionsblumengewächse	Passifloraceae
Mariendistel.....	Silybum	-frucht.....	Passiflora
Maulbeergewächse	Moraceae	Pastinak	Pastinaca
Mäusedorn	Ruscus	Pekan.....	Carya
Meerlavendel.....	Limonium	Peltaten (Halb-)	Pelargonium
-rettich	Armoracia	Pepino	Solanum
Mehlbeere.....	Sorbus	Perille	Perilla
Melone.....	Cucumis	Persischer Klee.....	Trifolium
— (Wasser-)	Citrullus	Petersilie.....	Petroselinum
Melonenbaum	Carica		

Pfaffenhütchen.....	Euonymus	Rote Rübe.....	Beta
Pfeffergewächse	Piperaceae	-gewächse	Rubiaceae
-kraut	Satureja	Rotklee	Trifolium
-minze.....	Mentha	-kraut	Brassica
Pfeifenstrauch.....	Philadelphus	Rübe	Beta
-blume.....	Aristolochia	— (Herbst-).....	Brassica
Pfeilwurz	Alocasia	— (Kohl-).....	Brassica
Pferdeminze.....	Monarda	— (Mai-).....	Brassica
Pfingstrose	Paeonia	— (Rote).....	Beta
Pfirsich	Prunus	— (Runkel-).....	Beta
Pflaume.....	Prunus	— (Zucker-).....	Beta
— Amerikanische.....	Prunus	Rübsen.....	Brassica
Phazelia	Phacelia	Runkelrübe	Beta
Phlox	Phlox	Saatplatterbse	Lathyrus
Pistazie	Pistacia	Saatwicke	Vicia
Platterbse	Lathyrus	Saflor.....	Carthamus
Poinsettie	Euphorbia	Safranwurz	Curcuma
Porree	Allium	Salat.....	Lactuca
Portulakgewächse.....	Portulacaceae	— (Feld-).....	Valerianella
Prachtscharte	Liatris	Salbei.....	Salvia
-kerze	Gaura	Sammetblume	Tagetes
-spiere.....	Astilbe	-pappel.....	Abutilon
Preiselbeere	Vaccinium	Sandbirne	Pyrus
Primel	Primula	Sareptasenf.....	Brassica
Prunkbohne.....	Phaseolus	Sauerampfer (Garten-).....	Rumex
Puffbohne	Vicia	-dorngewächse.....	Berberidaceae
Purpurgranadilla.....	Passiflora	-kirsche.....	Prunus
-winde.....	Pharbitis	-zitrone	Citrus
Quitte	Cydonia	Saumfarne	Acrostichaceae
— (Japanische).....	Chaenomeles, Cydonia	Saumfarngewächse.....	Pteridaceae
Rachenblütler	Scrophulariaceae	Schachtelhalmgewächse.....	Equisetaceae
Radieschen	Raphanus	Schafgarbe.....	Achillea
Rahmapfel	Annona	Schalotte.....	Allium
Ranunkel.....	Ranunculus	Scheinakazie.....	Robinia
Raps.....	Brassica	-zypresse.....	Chamaecyparis
Rasenschmiele	Deschampsia	Schiefblattgewächse	Begoniaceae
Rauhblattgewächse	Boraginaceae	Schildfarngewächse.....	Aspidiaceae
Rautengewächse	Rutaceae	Schillergras.....	Koeleria
Raygras.....	Lolium	Schlafmützchen	Eschscholzia
Rebe.....	Vitis	Schlangenbart.....	Ophiopogon
— (Wald-).....	Clematis	Schleierkraut	Gypsophila
Reis.....	Oryza	Schleifenblume.....	Iberis
Rettich	Raphanus	Schlüsselblume.....	Primula
— (Meer-).....	Armoracia	Schmetterlingsstrauch	Buddleja
— (Öl-).....	Raphanus	Schmiele (Rasen-).....	Deschampsia
Rhabarber	Rheum	Schmucklilie.....	Agapanthus
Rhodesgras	Chloris	Schneckenklee.....	Medicago
Riedgrasgewächse	Cyperaceae	Schneeball	Viburnum
Riemenblatt	Clivia	-beere.....	Symphoricarpos
Riesenbambus.....	Dendrocalamus	-rose.....	Helleborus
-hyazinthe	Galega	Schnittlauch.....	Allium
Ringelblume (Garten-).....	Calendula	Schöllkraut	Chelidonium
Rippenfarngewächse.....	Blechnaceae	Schotenklee	Lotus
Rispengras	Poa	Schraubenbaumgewächse.....	Pandanaceae
-hirse.....	Panicum	Schwarzkümmel	Nigella
Rittersporn.....	Delphinium	-wurzel	Scorzonera
Ritterstern	Hippeastrum	-wurzelgewächse	Melastomataceae
Roggen	Secale	Schwedenklee.....	Trifolium
Rohrgras	Arundinaria	Schwertel (Kleb-).....	Ixia
Rose.....	Rosa	Schwertel (Kleb-).....	Nephrolepidaceae
— (Stock-).....	Alcea	-lilie	Iris
Roßkastanie	Aesculus	Schwingel.....	Festuca
Roßkastaniengewächse.....	Hippocastanaceae	Seidelbastgewächse.....	Thymelaeaceae
		Seidenpflanzengewächse.....	Asclepiadaceae

Sellerie.....	Apium	Tausendschön.....	Bellis
Senf (Gelb-).....	Sinapsis	Tee	Camellia
— (Sarepta-).....	Brassica	-strauchgewächse.....	Theaceae
— (Weißer).....	Sinapis	Teff.....	Eragrostis
Serradella.....	Ornithopus	Thymian	Thymus
Silberbaumgewächse	Proteaceae	Timothe	Phleum
Skabiose	Scabiosa	Tollkirsche	Atropa
Sojabohne	Glycine	Tomate	Lycopersicon, Solanum
Sommeraster	Callistephus	— (Baum-)	Cyphomandra
Sonnenblume	Helianthus	Tomatillo.....	Physalis
-hut	Rudbeckia	Topinambur	Helianthus
-taugewächse	Droseraceae	Träuschlinge.....	Strophariaceae
Spaltkölbchen (Chinesische).....	Schizandra	Trespe.....	Bromus
Spargel.....	Asparagus	Trompetenbaumgewächse	Bignoniaceae
-bohne.....	Vigna	Tropenwurz	Alocasia
-kohl.....	Brassica	Tulpe	Tulipa
Spelz.....	Triticum	Tulpenbaumgewächse	Magnoliaceae
Sperrkrautgewächse.....	Polemoniaceae	Tüpfelfarn.....	Polypodium
Spießtanne	Cunninghamia	Ulme.....	Ulmus
Spinat.....	Spinacia	Ungarische Wicke	Vicia
Spindelstrauch	Euonymus	Usambaraveilchen	Saintpaulia
Spitzahorn.....	Acer	Veilchen	Viola
Springkraut	Impatiens	— (Alpen-).....	Cyclamen
-gewächse	Balsaminaceae	— (Usambara-).....	Saintpaulia
Sprossenbrokkoli	Brassica	Vergißmeinnicht.....	Myosotis
Stachelbeere	Ribes	Veronika (Strauch-).....	Hebe
Stangenbohne	Phaseolus	Vogelmilch.....	Ornithogalum
Stechapfel	Datura	Wacholder.....	Juniperus
-palme.....	Ilex	Waldrebe	Clematis
-palmengewächse.....	Aquifoliaceae	Walnuß	Juglans
Steinbrechgewächse.....	Saxifragaceae	Wasserblattgewächse	Hydrophyllaceae
-klee.....	Melilotus	-dost.....	Eupatorium
-rich (Duft-).....	Lobularia	Wassermelone	Citrullus
Stern von Bethlehem	Ornithogalum	-nußgewächse	Trapaceae
Stiefmütterchen.....	Viola	Weichweizen	Triticum
Stockmalve	Alcea	Weide	Salix
-rose.....	Alcea	Weidelgras	Lolium
Storchschnabelgewächse	Geraniaceae	Weiderichgewächse.....	Lythraceae
Strahlengriffel.....	Actinidia	Weigelia	Diervilla, Weigela
Strauchmargerite.....	Chrysanthemum	Weihnachtskaktus.....	Schlumbergera, Zygocactus
-veronika.....	Hebe	-stern	Euphorbia
Straußgras.....	Agrostis	Weinreben gewächse.....	Vitaceae
Streifenfarngewächse.....	Aspidiaceae	Weißklee	Trifolium
Strohblume	Helichrysum	-kraut	Brassica
Studentenblume	Tagetes	Weißer Senf.....	Sinapis
Stundeneibisch.....	Hibiscus	Weizen	Triticum
Sumachgewächse.....	Anacardiaceae	— (Buch-)	Fagopyrum
Sumpfympressengewächse	Taxodiaceae	— (Hart-)	Triticum
Südseemyrte	Leptospermum	— (Weich-)	Triticum
-gräser.....	Graminae, Poaceae	Westindische Baumwolle	Gossypium
Süßkartoffel.....	Ipomoea	Wicke	Vicia
-kirsche	Prunus	— (Kron-)	Coronilla
-klee.....	Hedysarum	— (Narbonner).....	Vicia
-sack	Annona	— (Saat-).....	Vicia
Tabak.....	Nicotiana	— (Ungarische).....	Vicia
Tafelbanane	Heliconia	— (Wohlrichende).....	Lathyrus
Taglilie	Hemerocallis	— (Zottel-)	Vicia
Tangelo.....	Citrus	Wickelwurz	Bergenia
Tangor	Citrus	Widerstoß.....	Limonium
Tanne.....	Abies	Wiesenfuchsschwanz.....	Alopecurus
— (Spieß).....	Cunninghamia	Winde (Purpur-)	Pharbitis
Tannenklee	Anthyllis	Windengewächse.....	Convolvulaceae
Taro	Colocasia		
Taubnessel.....	Lamium		

Windröschen.....	Anemone	Zitronenmelisse	Melissa
Winterblüte.....	Chimonanthus	Zitrus	Citrus
Wirsing.....	Brassica	Zottelwicke.....	Vicia
Wohlfriechende Wicke	Lathyrus	Zucchini	Cucurbita
Wolfsmilchgewächse.....	Euphorbiaceae	Zuckerapfel	Annona
Wollbaumgewächse.....	Bombacaceae	-rohr.....	Saccharum
Wunderbaum	Ricinus	-rübe	Beta
-baumstrauch	Codiaeum	Zwerhirse (Abessinische)	Eragrostis
-blumengewächse	Nyctaginaceae	Zwiebel.....	Allium
Wundklee	Anthyllis	Zylinderputzer	Callistemon
Y uzu	Citrus	Zypresse (Arizona-).....	Cupressus
Z aubernußgewächse	Hamamelidaceae	— (Besensommer-)	Kochia
Zedrachbaum	Melia	— (Duprez)	Cupressus
Zichorie	Cichorium	— (Echte).....	Cupressus
Zistrosengewächse.....	Cistaceae	— (Leyland).....	x Cupressocyparis
Zitrone	Citrus	— (Schein-).....	Chamaecyparis
