INTRODUCTION

1. The International Convention for the Protection of New Varieties of Plants is applicable, according to its Article 4(1), to all botanical genera and species. Its Article 4(2) provides that "the member States of the Union undertake to adopt all measures necessary for the progressive application of the provisions of this Convention to the largest possible number of botanical genera and species." This document surveys the measures for the protection of the various taxa* that have been instituted by the member States of the Union and the States not yet members but signatories of the 1978 Revised Act of the Convention. It also contains additional information which may be useful in the context of this document.
2. This document contains the following parts:
 - (i) a main table;
 - (ii) notes classified by States;
 - (iii) notes classified by taxa;
 - (iv) three indexes of common names.
3. The main table contains the list of the taxa protected in at least one of the States defined above with, for each of them, indications with respect to its protection in each of the States. Explanations of the symbols used for this purpose appear on page 5.
4. The taxa are listed in the alphabetical order of their Latin names, except in the case of complex genera which contain many species and subspecies. These are isolated from the rest of the table by dotted lines and are treated differently, for instance with the use of titles, in order to facilitate consultation of the table.
5. The Latin names of the taxa are taken over from the rules and regulations of the member States protecting them, except in the following circumstances:
 - (i) The legislation of a member State may not contain Latin names and may therefore specify the protected taxa by means of their common names (in the case of France, Italy--with respect to certain taxa--Japan and Spain). Where relevant, the Office of the Union has added the Latin name corresponding to the common name.
 - (ii) The legislation of a member State may contain a Latin name the scope of which is much greater than that of the corresponding common name which defines the protected taxon. Where relevant, the Office of the Union has completed the Latin name.
 - (iii) Two or more States protecting the same taxon may use different Latin names. Two cases may exist:
 - (a) The differences are small (presence and absence of authors' names, different spellings, etc.): in this case, the Office of the Union has retained only one Latin name.
 - (b) The differences are substantial: where the difference relates to the use of synonyms (for example, *Prunus amygdalus* and *Amygdalus communis*), each designation is the subject of an entry in which the synonym is given in square brackets. Where the difference relates to the rank of the designations used and where, in practice, they cover about the same set of varieties (for example, *Hordeum* L. and *H. vulgare* to designate barley), these designations are the subject of one entry only in which one of them is given in square brackets.
6. For its decisions on the Latin names, the Office of the Union mainly had recourse to the following works:

* The expression "protected taxon" and the similar expressions mean that titles of protection may be issued for varieties of the taxon concerned.

(i) "Dictionary of Gardening" (second edition (1977)) by P.M. Synge - Oxford University Press;

(ii) "ISTA List of Stabilized Plant Names" (first edition (1966)) and complementary list established by the Secretariat of ISTA and containing all names stabilized between 1966 and 1980;

(iii) "Zander - Handwörterbuch der Pflanzennamen" (tenth edition reviewed and completed by F. Encke and G. Buchheim), Eugen Ulmer Publications, Stuttgart, Federal Republic of Germany.

The species names stabilized by ISTA are preceded by an asterisk.

7. The common names originate from the national laws and regulations or have been indicated by the competent authorities of the member States, or again have been added by the Office of the Union. In this respect, three types of common names may be distinguished:

(i) true common names (examples: wheat, onion, apple, carnation, poplar);

(ii) common names deriving from the corresponding Latin name or from which the Latin name is derived (examples: abutilon, acacia, chrysanthemum, dahlia);

(iii) Latin names which, in the absence of true common names, are used in the common language (examples: Cymbidium, Dieffenbachia, Romneya). Such names may also co-exist with a true common name (example: Anthurium and Tail Flower). As time passes, they may pass into the common language as names of the second type (example: Gerbera). These names may be the subject of some changes, of which the most important are phonetic or spelling adaptations (addition of accents in French, change of the last syllable, -ia becoming for example -ie in German, etc.) and total or partial translations (for example Abies sachalinensis becomes "Sachalin Fir" and Pelargonium peltatum becomes "Ivy-leaved Pelargonium"). The result is that several variants may be used in one and the same language. Variants may also exist for other reasons. It should be noted in particular that the spelling of compound names is not always consistent in English (example: meadowgrass, meadow-grass and meadow grass).

8. Where relevant, the Office of the Union has added common names of the third type, thereby choosing those which seemed or were likely to prevail in usage. Concerning ornamental species, it is frequent usage to designate them, in the absence of names of the first or second type, by the name of the genus. Thus the species Allamanda cathartica is designated by "Allamanda." This usage also prevails in the case of certain genera containing several ornamental species. In that case, in order to reduce the list, the Office of the Union has regrouped in one entry all species concerned where this was possible. Thus, Abutilon megapotamicum, A. X milleri, A. ochsenii and A. vitifolium are the subject of one entry only.

9. Attention is drawn to the fact that the relationships between common names and Latin names may be different from one taxon to another: in the case of the genera for instance, the common name may apply either to the whole of the species of the genus, or to certain species only. In the case of Viola, for instance, violet applies to the whole of the genus, on the one hand, and more particularly to the small flowered species on the other hand, the large flowered garden plants being called pansies. The main table and the indexes should therefore not be used without care as glossaries.

10. As the above indications show, the drawing up of the synoptical list of protected taxa has led to some departures from the relevant national laws and regulations, in particular because nomenclatures used are not uniform. In this respect, useful information is given in the "notes." In any case, it is recommended to consult these laws and regulations when precise information is needed.

11. The notes classified by States follow the alphabetical order of the codes applicable to countries. The following will be found therein, wherever it has appeared necessary:

(i) general notes relating in particular to the way in which the national list of protected taxa has been established;

(ii) special notes relating to a peculiarity of the national list which concerns a given taxon.

12. The notes classified by taxa contain more detailed information on systematics, notably on the synonyms.

13. The indexes of common names contain alphabetical lists of the common names mentioned in the main table with, opposite each of them, the Latin name of the corresponding genus. The compound common names are the subject of a double entry, as far as this is necessary, for example "Maidenhair Fern" and "Fern (Maidenhair)." In general, common names identical or very similar to Latin names do not appear in the indexes, neither do species names where they contain the name of the corresponding genus.

14. Unless otherwise indicated, the protection of a fruit crop taxon means that both fruiting varieties and rootstocks may be protected.

EXPLANATION OF THE SYMBOLS USED IN THE MAIN TABLE

Letters in the column headings (country codes)

BE	Belgium	IL	Israel
CA	Canada	IT	Italy
CH	Switzerland	JP	Japan
DE	Germany (Federal Republic of)	MX	Mexico
DK	Denmark	NL	Netherlands
ES	Spain	NZ	New Zealand
FR	France	SE	Sweden
GB	United Kingdom	US	United States of America
IE	Ireland	ZA	South Africa

Signs in the columns

X Protected taxon

+ Taxon protected as a result of:

(i) the protection of a taxon of higher rank to which it belongs (for example in the case of a species: the genus to which it belongs is protected);

(ii) the protection of all taxa of lower rank which belong to it (for example, in the case of a genus, all its species are protected).

This sign is not used where the protected taxa are mentioned in national legislation not by name, but by means of a collective word or expression.

(X) Protection of the taxon envisaged in the near future.

* Before a taxon name: species name stabilized by ISTA;
After a taxon name: refers to the Notes Classified by Taxa;
After X or +: refers to a special note to be found under the name of the State concerned in the Notes Classified by States.

Numerals Refer to the general notes to be found under the name of the State concerned in the Notes Classified by States.

NOTES CLASSIFIED BY STATES

BE/BELGIUMSpecial Notes

Bromeliaceae, Aechmea, Cryptanthus, Guzmania, Neoregelia, Tillandsia, Vriesea: the definition of the protected entities is the following (Royal Decree of September 10, 1981, Amending the Royal Decree of November 25, 1977, Fixing the Plant Species for Which a New Plant Variety Certificate may be Delivered and Fixing the Duration of Protection for Those Species): "Bromeliaceae belonging to the genera and to their mutual hybrids: Bromeliaceae: Aechmea Ruiz et Pav., Cryptanthus Otto et A. Dietr., Guzmania Ruiz et Pav., Neoregelia L.B. Sm., Tillandsia L., Vriesea Lindl."

Ribes L.: the definition of the protected entities is the following (ibid.): "Currants, gooseberry and hybrids of those species."

Rubus L.: the definition of the protected entities is the following (ibid.): "Raspberry, blackberry."

CH/SWITZERLANDSpecial Notes

Rosa L.: protection is limited to ornamental varieties (Ordinance of May 11, 1977, on Plant Variety Protection - Amendment of November 7, 1979).

Rubus idaeus L.: ornamental varieties are excluded from protection (ibid.).

Vitis L.: ornamental varieties are excluded from protection (ibid.).

DE/GERMANY (FEDERAL REPUBLIC OF)Special Notes

Ribes L.: the definition of the protected entities is the following (Order of June 26, 1978, Concerning the List of Species under the Plant Variety Protection Law): "Currants [Johannisbeere], gooseberry [Stachelbeere], excluding ornamental varieties."

Rubus L.: the definition of the protected entities is the following (ibid.): "Blackberry, raspberry, excluding ornamental varieties."

Vitis L.: ornamental varieties are excluded from protection (ibid.).

DK/DENMARK*General Notes

Protected taxa defined by genera: it is stated for the following genera, identified by the figure 1 in the main table, that all species are protected: Agrostis, Cydonia, Festuca, Lolium, Poa, Thuja. Concerning Cydonia, see also the special note below.

* Unless otherwise indicated, the source is the Order of the Ministry of Agriculture No. 386 of July 24, 1975, on Plant Variety Protection (List of Species).

Rootstocks of fruit crops: rootstocks may be protected in the case of the following fruit crops, identified by the figure 2 in the main table: *Malus*, *Prunus avium*, *P. cerasus*, *P. domestica*. Their protection is not provided for in the case of the following woody fruit crops, identified by the figure 3 (it being understood that grafting is not in use for some of them): *Cydonia*, *Pyrus*, *Ribes*, *Rubus*, *Vaccinium*. Concerning *Cydonia*, see the special note below.

Special Notes

Brassica rapa L. var. *rapa* (L.) Thell.: the definition of the protected entities is the following:

(i) *Brassica rapa* L. var. *rapa* (L.) Thell. - majroe (common name more particularly applicable to early garden turnips);

(ii) *Brassica rapa* L. var. *rapifera* - turnips (common name more particularly applicable to fodder turnips).

The combination of these two entries corresponds to what the majority of States designate by the name *Brassica rapa* var. *rapa*. It is to be noted that certain works use "var. *rapifera*" as if it were a synonym of "var. *rapa*."

Cydonia Mill.: it is stated that all species may be protected; protection of rootstocks is not provided for.

Epiphyllopsis Berger, *Rhipsalidopsis* Britt. et Rose, *Schlumbergera* Lem., *Zygocactus* K. Schum.: the definition of the protected taxon is the following (Order of the Ministry of Agriculture No. 436 of August 26, 1981, Concerning the Protection of the Rights of the Breeders of Novelties of *Zygocactus* K. Schum., *Schlumbergera* Lem., *Rhipsalidopsis* Britt. et Rose, *Epiphyllopsis* Berger ([literally: cactus with jointed stems]) and their Hybrids): "*Zygocactus* K. Schum., *Schlumbergera* Lem., *Rhipsalidopsis* Britt. et Rose, *Epiphyllopsis* Berger ([literally: cactus with jointed stems], comprising [literally: November] and Christmas Cactus, including Easter and [literally: Whitsun] Cactus) and their hybrids."

Pelargonium L'Hér. ex Ait.: the definition of the protected taxon is the following: "*Pelargonium* L'Hér. (including *P. X domesticum* L.H. Bail.; *P. X hortorum* L.H. Bail. and *P. X peltatum* (L.) Ait.) - pelargonium."

GB/UNITED KINGDOM

General Notes

Legal form of the extension of protection: protection is extended to a taxon by means of statutory instruments entitled "The Plant Breeders' Rights ([designation of the purpose of the instrument]) Scheme [year]" (example: "The Plant Breeders' Rights (Barley) Scheme 1965"). There is now a tendency to establish instruments relating to groups of plants. Thus, the aforementioned instrument has been repealed by "The Plant Breeders' Rights (Cereals) Scheme 1980," which states by name the protected cereals.

Definition of the protected entity: the precise definition of what may be protected is in general the following: "all plant varieties of [(i) common name of the taxon, or (ii) collective designation of the group of taxa] which conform with the characteristics of cultivated plant varieties of [(i) designation of the rank of the taxon and Latin name thereof, or (ii) designation of the ranks of the taxa concerned and reference to a table containing the list of the Latin names of those taxa and the corresponding common names]."

Herbaceous perennial plants and trees, shrubs and woody climbers: the technique of the collective statutory instruments has been used in particular for two groups of taxa which are identified in the main table because of the limitation of the scope of the Latin names of the taxa deriving from the collective designation:

(i) the taxa protected under "The Plant Breeders' Rights (Herbaceous Perennials) Scheme 1969" - figure 1: the only varieties which may be protected under that instrument are those which are herbaceous and hardy under the climate of the United Kingdom;

(ii) the taxa protected under "The Plant Breeders' Rights (Trees, Shrubs and Woody Climbers) Scheme 1969" as amended in 1971 - figure 2: the only varieties which may be protected within a taxon specified under that instrument are varieties of trees, shrubs and woody climbers. Concerning the following species, protection under that instrument has been limited to ornamental varieties by the amendment of 1971: *Prunus* L., *Pyrus* L., *Ribes* L., *Rubus* L., *Vaccinium* L.

Rootstocks of fruit crops: in the case of woody fruit crops, account is taken of the fact that fruiting varieties and rootstock varieties do not always belong to the same species. In the main table, the "X" indicating that the taxon is protected is placed alongside the fruiting species and is accompanied by the figure 3. The scope of protection of each fruit crop is specified in the following table.

Common names (fruit crops)	Protected taxa	
	Fruiting varieties	Rootstocks
Apple	Species <i>Malus domestica</i> Borkh.	<i>Malus</i> spp.
Cherry	Species <i>Prunus avium</i> L., <i>Prunus cerasus</i> L. and <i>Prunus fruticosa</i> Pall.	<i>Prunus</i> species or varieties of species belonging to the sub-genus <i>Cerasus</i> Pers. (genus <i>Cerasus</i> Mill.) and hybrids between any of these, or between species or varieties or hybrids belonging to the sub-genus <i>Cerasus</i> Pers. and species or varieties or hybrids belonging to other sub-genera, subdivisions or segregates of the genus <i>Prunus</i> L.
Plum	Species <i>Prunus domestica</i> and <i>Prunus cerasifera</i>	Species <i>Prunus domestica</i> , <i>Prunus cerasifera</i> or <i>Prunus insititia</i> , including hybrids derived from any two or all of these species.
Damson, Bullace and Mirabelle	Species <i>Prunus insititia</i>	
Pear	Species <i>Pyrus communis</i>	<i>Pyrus</i> spp.
Gooseberry	<i>Ribes grossularia</i> , <i>Ribes uva-crispa</i>	-
Black Currants	<i>Ribes nigrum</i> , <i>Ribes ussuriense</i> , <i>Ribes dikuscha</i>	-
Raspberry	<i>Rubus idaeus</i> , <i>Rubus strigosus</i> , <i>Rubus occidentalis</i>	-

Special Notes

Chrysanthemum L. partim: the reference to the taxon concerned is: "all plant varieties of perennial chrysanthemums which conform with the characteristics of cultivated plant varieties of the genus *Chrysanthemum* of the following species or groups:

Chrysanthemum morifolium Ramat.; *C. indicum* auct. non L.;
C. sinense Sabine; *C. chinense* hort.; *C. hortorum* W. Mill.;
C. japonense (Makino) Nakai; *C. vestitum* (Hemsl.) Stapf;
C. makinoi Matsum. and Nakai; *C. sibiricum* (DC.) Fischer ex Turcz;
C. zawadskii Herbich and varieties; *C. rubellum* Sealy (*C. erubescens* hort. non Stapf); *C. cuneifolium* Kitamura; *C. okiense* Kitamura;
C. boreale (Makino); *C. aphrodite* Kitamura; *C. arcticum* auct. non L.;
C. ornatum Hemsl.; *C. koreanum* (coreanum) hort.;
C. yezoense Maekawa; Korean chrysanthemums; Konji chrysanthemums and Cascade chrysanthemums."

Brassica rapa L. var. *rapa* (L.) Thell.: protection has been extended to this taxon under "The Plant Breeders' Rights (Vegetables) (including Field Beans and Field Peas) Scheme 1980," but it is to be noted that Turnip is often grouped with the vegetables.

Lupinus L.: this taxon is protected under both statutory instruments mentioned in the paragraph "Herbaceous perennial plants and trees, shrubs and woody climbers."

Oenothera L.: this taxon is protected under "The Plant Breeders' Rights (Herbaceous Perennials) Scheme 1969" and under "The Plant Breeders' Rights (Oil and Fibre Plants) Scheme 1980," the latter not applying to ornamental varieties.

Paeonia L.: this taxon is protected under both statutory instruments mentioned in the paragraph "Herbaceous perennial plants and trees, shrubs and woody climbers."

Zea mays L.: protection does not extend to varieties of sweetcorn and popcorn.

JP/JAPAN

General Notes

The list of protected taxa appears in the implementing regulations to the revised Seeds and Seedlings Law (Cabinet Order No. 391 of December 22, 1978). That list was extended by virtue of a Cabinet Order of October 16, 1981. It is divided into eight groups, identified by the figures 1 to 8 in the main table. The groups bear no titles, but the following may be given:

- Group 1: "agricultural" plants
- Group 2: vegetables
- Group 3: fruit crops
- Group 4: fodder plants
- Group 5: herbaceous ornamental plants
- Group 6: woody ornamental plants
- Group 7: aquatic plants
- Group 8: mushrooms.

Each group is subdivided into genera, species and sub-species. The subdivisions are not identified at all in the main table, because they are readily recognizable in most cases from the Latin names.

Special Notes

Brassica napus L. var. napus: it is specified that protection extends also to Japanese local types.

NL/NETHERLANDSGeneral Notes

A special protection regime is provided for in respect of certain taxa--identified by the figure 1 in the main table--by Section 85 of the Seeds and Planting Materials Act: pursuant to that section, reproductive material of a registered variety may only be commercialized, offered for sale or exported by the breeder and by any person who has obtained from the breeder foundation stock suitable for the production of reproductive material.

Special Notes

Bromeliaceae, Aechmea, Cryptanthus, Guzmania, Neoregelia, Tillandsia, Vriesea: the definition of the protected entities is the following (Order of December 15, 1980 (Staatsblad 773) amending the Plant Breeders' Rights Order of 1975): "Plants of the Bromelia type, provided that they belong to one of the genera mentioned [above] or to a hybrid between them."

NZ/NEW ZEALANDGeneral Notes

New Zealand protects the following (Plant Varieties Act Extension Order 1980 (No. 164)):

- (a) Agricultural and vegetable crops:
 - (i) Barley (*Hordeum* sp.)
 - (ii) Brassica varieties (*Brassica* sp.) of agricultural importance such as turnips, swedes, kale, and rape, but excluding vegetable varieties such as cabbage, cauliflower, broccoli, and Brussels sprouts
 - (iii) Linseed (*Linum usitatissimum* L.)
 - (iv) Lucerne (*Medicago sativa* L.)
 - v) Oats (*Avena* sp.)
 - (vi) Peas, field and garden (*Pisum* sp.)
 - (vii) Phacelia (*Phacelia tanacetifolia* Benth.)
 - (viii) Potatoes (*Solanum tuberosum* L.)
 - (ix) Wheat (*Triticum* sp.)
- (b) Fruit:
 - (i) All fruit species except those species such as tomatoes and aubergines commonly termed vegetables
 - (ii) All nut species
- (c) Herbage:
 - (i) Fescue (*Festuca* sp.)
 - (ii) Lotus (*Lotus* sp.)
 - (iii) Phalaris (*Phalaris* sp.)
 - (iv) Ryegrass (*Lolium* sp.)
 - (v) Yorkshire Fog (*Holcus lanatus*)
- (d) Ornamentals: all ornamental species except Orchidaceae (other than *Cymbidium* sp.)

SE/SWEDENGeneral Notes

The list of protected taxa is divided into two chapters, of which the second is subdivided into three groups, as follows:

- A. Agricultural Crops (figure 1 in the main table)
- B. Horticultural Crops
 - 1 - Vegetables (figure 2)
 - 2 - Fruit Crops (figure 3)
 - 3 - Ornamental Plants (figure 4)

Concerning the fruit crops, protection of rootstocks is provided for in respect of *Malus*, *Prunus*, *Pyrus* and *Ribes*, but not in respect of *Rubus* and *Vaccinium*.

Special Notes

Brassica napus L. var. *rapa* (L.) Thell.: the protected taxon appears in the group of agricultural crops under the name of "*Brassica rapa* L. var. *rapifera* Metzg. - Rova."

Brassica napus L. var. *napobrassica* (L.) Rchb.: this taxon appears both in the agricultural crops group and in the vegetables group.

Phaseolus vulgaris L.: this taxon appears both in the agricultural crops group and in the vegetables group.

Pisum sativum L.: this taxon appears both in the agricultural crops group and in the vegetables group.

Zea mays L.: this taxon appears both in the agricultural crops group and in the vegetables group.

US/UNITED STATES OF AMERICAGeneral Notes

The United States of America protects:

(i) all sexually reproduced plant varieties excluding fungi, bacteria and first generation hybrids (Section 42(a) of the Plant Variety Protection Act);

(ii) all vegetatively propagated plant varieties, including cultivated sports, mutants, hybrids, and newly found seedlings, other than tuber propagated plants [in practice, potato and Jerusalem artichoke] and plants found in an uncultivated state (Section 161 of the Patent Law).

NOTES CLASSIFIED BY TAXA

A botanical nomenclature is not an absolute system, mainly because nature cannot be reduced to such a system. Determining the taxonomic rank which should be given to a certain type of plant, defining the borders of a genus or a species, classifying a species within a genus, all these involve some degree of arbitrary judgement, and thus a risk that different decisions may be taken. This arbitrary element is a source of synonymies, as also is the progress of knowledge when it results in a critical re-examination of earlier decisions.

A list is given below of taxa mentioned in the main table and of their synonyms found mainly in the Dictionary of Gardening and in Zander (see the introduction to this document). Although certain of these synonyms are today no more than curiosities, having fallen into disuse, others still have a definite importance, being used in scientific works and in practice, notably in commerce. Where relevant, the problems arising from nomenclature are briefly explained. Attention is drawn to the fact that it is the responsibility of the competent authorities of States to define with precision what is covered by a particular denomination for the purposes of plant variety protection.

Abelia R. Br.: synonymies with* Linnaea.

Abelmoschus esculentus (L.) Moench: syn.: Hibiscus esculentus L., the latter being stabilized by ISTA.

Abutilon megapotamicum St.-Hil. et Naud.: syn.: A. vexillarium E. Morr.

Abutilon X milleri hort. = A. megapotamicum X A. pictum.

Acacia Mill.: synonymies with Albizia, Leucaena, Mimosa.

Acer L.: certain species have also been grouped into a genus Negundo. A. septemlobum Thunb. is a synonym of Kalopanax septemlobus (Thunb.) Koidz. (K. pictus (Thunb.) Koidz. ex Rehd., Acanthopanax ricinifolius (Sieb. et Zucc.) Seem.).

Achillea L.: synonymies with Anthemis, Tanacetum.

Adiantum L.: A. adiantoides (A. hewardia) has the synonym Hewardia adiantoides.

Aechmea Ruiz et Pav.: numerous synonymies, notably with Androlepis, Billbergia, Bromelia, Canistrum, Chevaliera, Echinostachys, Gravisia, Hohenbergia, Hoplophytum, Lamprococcus, Macrochordium, Nidularium, Ortgiesia, Pironneava, Portea, Pothuava, Quesnelia, Streptocalyx, Wittmackia.

Aërides Lour.: see under Orchidaceae. Synonymies with Ascocentrum, Ornithochilus, Rhynchostylis, Saccolabium, Sarcanthus, Vanda.

Aesculus L.: synonymies with Pavia.

Agaricus L.: synonymies with Pratella, Psalliota.

Ageratum L.: A. corymbosum has the synonym Caelestina ageratoides and A. lasseauxii has the synonym Eupatorium lasseauxii.

Agrostis L.: synonymies with Achnatherum, Aira, Apera, Oryzopsis.

* The expression "synonymies with" means that subdivisions of the taxon concerned have synonyms in the taxa indicated, and vice versa. In the case of the genus Abelia, for instance, a number of species thereof have also been described under the name Linnaea.

Agrostis gigantea Roth: syn.: *A. alba* auct. p.p. non L.

Agrostis stolonifera L.: syn.: *A. alba* auct. p.p. non L. According to ISTA, this species includes *A. palustris* Huds.

Agrostis tenuis Sibth.: syn.: *A. vulgaris* With.

Albizia julibrissin Durazz.: syn.: *A. nemu*.

Allamanda cathartica L.: syn.: *A. aubletii*, *A. linnaei*, *Orelia grandiflora*. Certain botanical varieties have also been made into species (*A. grandiflora* Hook., *A. hendersonii* Bull (*A. wardleyana*), *A. nobilis* T. Moore, *A. schottii* Pohl, *A. williamsii*).

Allium L.: *A. fragrans* is a synonym of *Nothoscordum inodorum*.

Allium porrum L.: syn.: *A. ampeloprasum porrum*.

Allium schoenoprasum L.: the variety *sibiricum* has also been made into a species under the name *A. sibiricum*.

Allium tuberosum Rottl. ex Spreng.: syn.: *A. angulosum* Lour. non L., *A. senescens* Miq. non L., *A. odorum* partim.

Alnus Mill.: certain species have also been classified in the genus *Betula*.

Alocasia (Schott) G. Don: synonymies with *Caladium*, *Colocasia*, *Cyrtosperma*, *Schizocasia*.

Aloë spec.: synonymies with *Apicra*, *Astroloba*, *Gasteria*, *Haworthia*.

Althaea rosea (L.) Cav.: syn.: *Alcea rosea* L.

Amaranthus tricolor L.: syn.: *A. melancholicus* L., *A. gangeticus* L. (according to Zander). According to the Dictionary of Gardening, *A. tricolor* is a botanical variety of *A. melancholicus*.

Amorphophallus rivieri Durieu: syn.: *Hydrosme rivieri* (Durieu) Engl., *Proteinophallus rivieri*.

Ampelopsis hort.: synonymies with *Cissus*, *Parthenocissus*, *Vitis*.

Ananas comosus (L.) Merr.: syn.: *Bromelia ananas* L., *B. comosa* L., *A. sativus* (Lindl.) Schult. f., *Ananassa sativa* Lindl.

Anchusa angustissima K. Koch: syn.: *A. caespitosa hort.* non Lam.

Anchusa italica Retz.: syn.: *A. azurea* auct. non Mill.

Andromeda L.: many species now classified in the genera *Arctica*, *Cassiope*, *Chamaedaphne*, *Enkianthus*, *Gaultheria*, *Leucothoe*, *Lyonia*, *Oxydendrum*, *Pernettya*, *Pieris*, *Phyllodoce*, *Vaccinium* and *Zenobia* are still listed and commercialized under the name *Andromeda*.

Anemone L.: synonymies with *Anemonella*, *Hepatica* and *Pulsatilla*.

Anemone hupehensis Lemoine: *A. hupehensis* (Lemoine) Lemoine has the synonym *A. japonica* (Thunb.) Sieb. et Zucc. var. *hupehensis* Lemoine. Its botanical variety *japonica* (Thunb.) Bowles et Stearn has the synonyms *A. japonica* (Thunb.) Sieb. et Zucc. non Houtt. and *A. nipponica* Merr. *A. hupehensis* var. *tomentosa* (Maxim.) Hyl. is a synonym of *A. tomentosa* (Maxim.) Pe'i (*A. vitifolia* Buch.-Ham. var. *tomentosa* (Maxim.) Ulbr.). *A.-Japonica-Hybrids* is a denomination which according to Zander covers the hybrids of *A. hupehensis* var. *japonica* and of *A. vitifolia* and which has notably the synonym *A. X elegans* Decne. Concerning *A. elegans*, the Dictionary of Gardening refers to *A. hupehensis*.

Anethum graveolens L.: syn.: *Peucedanum graveolens*.

Angraecum Bory: see under *Orchidaceae*. This genus comprises the following sections, which have also been made into genera by certain authors: *Aëragis*, *Angraecum* (in the restricted sense), *Caliptrochilum*, *Cyrtorchis*, *Diaphananche*,

Eurychone, Jumellea, Leptocentrum, Microcoelia, Mystacidium, Neofinetia, Tridactyle. In Zander and "Orchid care - A guide to cultivation and breeding" (Walter Richter - Studio Vista, London), Angraecum is considered in the restricted sense. In the Dictionary of Gardening, it is considered in the wide sense. The latter records further synonymies with: Aeonia (Oeonia), Aëranthus, Angraecopsis, Dendrophylax, Listrostachis, Saccolabium.

Anthemis L.: synonymies with Achillea, Anacyclus, Chrysanthemum, Cladanthus.

Anthriscus cerefolium (L.) Hoffm.: syn.: Chaerophyllum sativum.

Anthurium Schott: synonymies with Philodendron, Pothos, Spathiphyllum.

Aquilegia L.: A. ecalcarata Maxim. is a synonym of Semiaquilegia ecalcarata (Maxim.) Sprague et Hutchins.

Aralia elata (Miq.) Seem.: syn.: Dimorphanthus elatus Miq., D. mandshuricus (Maxim.) Maxim. et Rupr., A. mandshurica Maxim., A. chinensis L. var. mandshurica (Maxim.) Rehd.

Arbutus L.: synonymies with Arctostaphylos (Arbutus uva-ursi L. and Arctostaphylos uva-ursi (L.) Spreng.) and Pernettya (A. furians and P. furians).

Arctium lappa L.: syn.: Lappa major Gaertn.

Arctostaphylos Adans.: synonymies with Arbutus, Arctous, Mairrania, Uva-ursi.

Ardisia crispa A. DC.: according to the Dictionary of Gardening, A. crispa has the synonyms A. crenata, A. crenulata, A. elegans. According to Zander, A. crenata Sims (A. crenulata Lodd.) is not A. crispa (Thunb.) A. DC.

Armeria (DC.) Willd.: synonymies with Statice.

Armoracia rusticana Gaertn., Mey. et Scherb.: syn.: A. lapathifolia Gilib., A. sativa Bernh., Cochlearia armoracia L., Raphanis magna Moench.

Aronia Med.: synonymies with Mespilus, Pyrus, Sorbus.

Arrhenatherum elatius (L.) Beauv. ex J. et C. Presl: syn.: Avena elatior L.

Asclepias L.: synonymies with Gomphocarpus, Hoya, Xysmalobium.

Ascocentrum Schlechter: see under Orchidaceae. Synonymies with Saccolabium, a genus of which Ascocentrum is a section when it is taken in the wide sense.

Asparagus plumosus Bak.: syn.: A. setaceus (Kunth) Jessop, Asparagopsis setacea Kunth.

Aspidistra elatior Bl.: syn.: A. lurida hort. non Ker-Gawl., A. punctata.

Aster L.: synonymies recorded in Zander with Bellidiastrum, Calimeris (Kalimeris), Callistephus, Crinitaria, Felicia, Lynosyris, Microglossa. According to the Dictionary of Gardening, "many attempts have been made to separate groups of this large genus as distinct genera and some have gained a recognized place, but the following seems scarcely distinct enough to warrant separation and are here regarded as forming part of the genus Aster: Bellidiastrum, Calimeris, Doellingeria, Eucephalus, Galatella, Ionactis, Leucelene, Machaeranthera, Oreostemma, Xylorrhiza." Synonymies with the following genera have also been recorded in the Dictionary of Gardening: Biota, Boltonia, Diplopappus, Erigeron, Inula.

Astilbe Buch.-Ham. ex D. Don: synonymies with Hoteia, Spiraea.

Aulax spec.: synonymies with Protea.

Avena nuda L.: A. strigosa Schreb. is a synonym of A. nuda L. ssp. strigosa (Schreb.) Mansf.

Babiana stricta (Ait.) Ker-Gawl.: the botanical variety sulphurea has also been named Gladiolus sulphureus and G. plicatus.

Belamcanda chinensis (L.) DC.: syn.: Pardanthus chinensis (L.) Ker-Gawl., Gemmingia chinensis (L.) O. Kuntze, B. punctata Moench, Ixia chinensis.

Benincasa hispida (Thunb.) Cogn.: syn.: B. cerifera Savi, Cucurbita hispida Thunb., Lagenaria siceraria (Mol.) Standl. var. hispida (Thunb.) Hara.

Berberis L.: The mahonias, with pinnate leaves, have been separated from berberis, with entire leaves, but can still be found under the name berberis.

Bergenia Moench: synonymies with Megasea, Saxifraga.

Betula L.: certain species now form the genus Alnus.

Bletilla Rchb. f.: see under Orchidaceae. Synonymies with Arethusa, Bletia. B. striata has also been named Cymbidium hyacinthinum.

Boltonia asteroides (L.) L'Hér.: syn. B. glastifolia (Hill) L'Hér. B. latisquama A. Gray is a synonym of B. asteroides var. latisquama (A. Gray) Cronq.

Bougainvillea spectabilis Willd.: syn.: Josepha augusta. According to the Dictionary of Gardening, forms of this species have also been named B. bracteata, B. brasiliensis, B. peruviana, B. splendens. In Zander, B. peruviana Humb. et Bonpl. is considered a species. The variety 'Mrs Butt' has also been classified in a species B. buttiana (cf. Encyclopédie des plantes d'appartement - M. Schubert and R. Herwig - Denoël).

Brassavola R. Br.: see under Orchidaceae. Synonymies with Epidendrum, Laelia, Rhyncholaelia.

Brassica rapa L.: syn.: B. campestris L.

Brassica pekinensis (Lour.) Rupr.: syn.: B. cernua (Thunb. ex Murray) Forb. et Hemsl., B. pëtsai L.H. Bail. According to the Dictionary of Gardening, this is perhaps a cultivated form of B. integrifolia. The common name "Chinese cabbage" and its equivalents in the other languages is also used for B. chinensis L.

Bromus arvensis L.: B. arvensis Poll. non L. is a synonym of B. erectus Huds.

Buddleja L.: B. indica Lam. is a synonym of Nicodemia diversifolia Ten.

Buddleja madagascariensis Lam.: syn.: B. heterophylla Lindl.

Caladium bicolor (Ait.) Vent.: syn.: Arum bicolor Ait. The botanical varieties have also been made into species (C. argyrosphilum, C. baraquinii, C. brongniartii, C. chantinii, C. devosianum, C. leopoldii, C. macrophyllum, C. neumannii, C. regale, C. rubrivenium).

Calanthe R. Br.: see under Orchidaceae. Synonymies with Bletia, Limatodes.

Calathea G.F.W. Mey.: synonymies with Maranta, name under which many Calatheas are commercialized, Phrynium, Thalia. C. allouia is known in English as Topinambour.

Calceolaria L.: the species of the genus Jovellana are frequently included in the genus Calceolaria.

Callicarpa purpurea Juss.: syn.: C. dichotoma (Lour.) K. Koch, C. japonica Thunb. var. angustifolia Sav., C. gracilis, C. koreana.

Callistemon R. Br.: synonymies with Metrosideros.

Callistephus chinensis (L.) Nees: syn.: Aster chinensis L.

Calluna vulgaris (L.) Hull: syn.: Erica vulgaris L.

Camelina sativa (L.) Crantz: syn.: Myagrum sativum L.

Camellia L.: *Thea sinensis* is frequently included in the genus *Camellia* under the names *Camellia sinensis* (L.) O. Kuntze (name stabilized by ISTA), *C. thea* Link, *C. theifera* Griff., *C. bohea*.

Campanula L.: synonymies with *Adenophora*, *Asyneuma*, *Azorina*, *Canarina*, *Edraianthus*, *Legousia*, *Phyteuma*, *Platycodon*, *Symphyanthra*, *Wahlenbergia*.

Campsis Lour.: synonymies with *Bignonia*, *Tecoma*.

Cannabis sativa L.: according to Zander the form 'Gigantea' (var. *chinensis* (Del.) A. DC.) has the synonym *C. gigantea* hort. According to the Dictionary of Gardening, *C. gigantea* and *C. sativa* are synonyms.

Carica papaya L.: syn.: *Papaya carica*.

Carpinus L.: two species have been separated by certain botanists from the genus *Carpinus* to form the genus *Distegocarpus* (*C. cordata* (D. cordata) and *C. japonica* (D. carpinus)).

Carya illinoensis (Wangenh.) C. Koch: syn.: *C. oliviformis* (Michx.) Nutt., *Hicoria pecan* (Marsh.) Britt., *C. pecan* (Marsh.) Engl. et Graebn. non (Walt.) Nutt.

Caryopteris incana (Thunb. ex Houtt.) Miq.: syn.: *C. mastacanthus* Schau., *C. sinensis* (Lour.) Dipp., *C. tangutica* Maxim., *Mastacanthus sinensis*.

Cassiope D. Don: synonymies with *Harrimanella*. The species of this genus have also been classified in *Andromeda* and may still be commercialized under that name.

Castanea Mill.: synonymies with *Castanopsis*.

Cataranthus roseus (L.) G. Don: syn.: *Vinca rosea* L., *Lochnera rosea* (L.) Rchb.

Cattleya Lindl.: see under *Orchidaceae*. Synonymies with *Encyclia*, *Epidendrum*, *Laelia*, *Schomburgkia*, *Sobralia*, *Sophranitis*.

Cenchrus ciliaris L.: syn.: *Pennisetum ciliare* (L.) Link.

Centaurea L.: synonymies with *Aetheopappus*, *Amberboa*, *Rhaponticum*.

Ceratostigma plumbaginoides Bunge: syn.: *Plumbago larpentae* Lindl., *Valeriana plumbaginoides*.

Chaenomeles Lindl.: the species of this genus have also been classified in the genera *Cydonia* and *Pyrus*. *Pseudocydonia sinensis* Schneid. has the synonyms *Chaenomeles sinensis* and *Cydonia sinensis* (Dum.-Cours.) Schneid.

Chamaecyparis Spach: synonymies with *Cupressus*, *Retinispora*, *Thuyopsis*.

Chamaecyparis obtusa (Sieb. et Zucc.) Sieb. et Zucc. ex Endl.: syn.: *Retinispora obtusa* Sieb. et Zucc., *Cupressus obtusa* (Sieb. et Zucc.) K. Koch. The botanical variety *ericoides* also has the synonym *Retinispora sanderi*.

Cheiranthus cheiri L.: syn.: *Erysimum cheiri* (L.) Crantz. The botanical variety *senoneri* also has the synonym *C. senoneri*.

Chimonanthus Lindl.: synonymies with *Calycanthus*.

Chrysanthemum L.: synonymies with *Anthemis*, *Balsamita*, *Chrysoboltonia*, *Leucanthemum*, *Matricaria*, *Parthenium*, *Plagiatus*, *Pyrethrum*, *Tanacetum*.

Chrysanthemum cinerariifolium (Trev.) Vis.: syn.: *C. cinerariaefolium* Bocq., *Pyrethrum cinerariifolium* Trev.

Chrysanthemum coccineum Willd.: syn.: *C. roseum* Adam, *Pyrethrum roseum* (Adam) M.B., *P. carneum* M.B.

Chrysanthemum maximum Ram.: syn.: *Leucanthemum maximum* (Ram.) DC. *C. maximum* hort. is a synonym of *C. lacustre* Brot. (*C. superbum* Bergm.).

Cimicifuga Wernischek: synonymies with *Actaea*, *Pytirosperma*.

Cinnamomum camphora (L.) Sieb. var. glaucescens Kamikoti: Synonyms for the species: *Camphora officinarum*, *Laurus camphora*.

Cirsium Mill. emend. Scop.: synonymies with *Carduus*, *Cnicus*, *Ptilostemon*.

Cistus L.: synonymies with *Fumana*, *Halimium*.

Citrullus lanatus (Thunb.) Matsum. et Nakai: syn.: *Cucurbita citrullus* L., *Momordica lanata* Thunb., *Citrullus vulgaris* Schrad., *Cucumis citrullus*.

Citrus L.: synonymies with *Fortunella* and *Poncirus*.

Citrus limon (L.) Burm. f.: syn.: *C. limonum* Risso, *C. medica* var. *limon* L., *C. medica* var. *limonum* (Risso) Wight et Arn.

Citrus medica L.: *C. medica* L. ssp. *acida* (Roxb.) Engl. is a synonym of *C. aurantiifolia* (Christm.) Swingle. *C. medica* L. var. *limon* L. and var. *limonum* (Risso) Wight et Arn. are synonyms of *C. limon* (L.) Burm. f.

Citrus paradisi Macf.: syn.: *C. decumana* var. *racemosa* (Risso et Poit.) Roem., *C. racemosa* (Risso et Poit.) Marcov. ex Tanaka.

Citrus reticulata Blanco: syn.: *C. nobilis* Andr. non Lour.

Citrus sinensis (L.) Osbeck: syn.: *C. aurantium* var. *sinensis* L., *C. aurantium* ssp. *sinensis* (L.) Engl.

Clematis L.: synonymies with *Atragene*, *Clematopsis*.

Clematis heracleifolia DC.: syn.: *C. tubulosa* Turcz. *C. davidiana* Decne. ex Verlot is a synonym of *C. heracleifolia* DC. var. *davidiana* (Decne. ex Verlot) Hemsl.

Cleome L.: synonymies with *Gynandropsis*, *Peritoma*.

Clethra alnifolia L.: the botanical varieties have also been made into species (*C. paniculata*, *C. tomentosa*).

Clethra barbinervis Sieb. et Zucc.: syn.: *C. canescens*.

Clethra tomentosa Lam.: syn.: *C. alnifolia pubescens*, *C. alnifolia tomentosa*.

Clivia Lindl.: synonymies with *Imantophyllum*.

Codiaeum variegatum (L.) A. Juss.: syn.: *Croton variegatus* L. *C. pictum* (Lodd.) Hook. is a synonym of *C. variegatum* (L.) A. Juss. var. *pictum* (Lodd.) Muell. Arg.

Colchicum L.: synonymies with *Bulbicodium*, *Merendera*.

Coleus Lour.: synonymies with *Neomuelleria*, *Plectranthus*.

Colocasia Schott: synonymies with *Alocasia*, *Caladium*.

Convallaria L.: certain species of the genera *Liriope*, *Maianthemum*, *Ophiopogon* and *Polygonatum* have also been classified in the genus *Convallaria*.

Cordyline Comm.: synonymies with *Dracaena*.

Coreopsis L.: synonymies with *Bidens*, *Calliopsis*, *Chrysostemma*, *Cosmos*, *Leptosyne*.

Cornus L.: in view of variations recorded on the inflorescence, certain botanists have divided the genus *Cornus* into *Afrocania*, *Chamaepericlymenum*, *Cornus* (in the restricted sense), *Cynoxylon*, *Dendrobenthamia*, *Macrocarpium*. In addition, synonymies with *Benthamia*.

Cornus alba L.: syn.: *C. tatarica* Mill. *C. sibirica* is a synonym of *C. alba* L. var. *sibirica*. *C. alba* Wangenh. non L. is a synonym of *C. stolonifera* Michx.

Cornus controversa Hemsl.: syn.: *C. brachipoda* K. Koch non C.A. Mey.

Cornus florida L.: syn.: *Cynoxylon floridum*.

Cornus kousa (Buerger ex Miq.) Hance: syn.: *Dendrobenthamia japonica*.

Cornus mas L.: syn.: *Macrocarpium mas*.

Cornus nuttallii Audub.: syn.: *Cynoxylon nuttallii*.

Cortaderia Stapf: synonymies with *Arundo*, *Gynerium*.

Cosmos Cav.: synonymies with *Bidens*, *Coreopsis*, *Dahlia*.

Cotoneaster (B. Ehrh.) Med.: synonymies with *Mespilus* (*C. acuminata* and *M. acuminata*), *Pyracantha* (*C. pyracantha* and *P. coccinea*).

Crataegus L.: synonymies with *Malus* and *Pyrus* (*C. trilobata*), *Mespilus* (*C. orientalis* and *M. odoratissima*).

Cryptanthus Otto et A. Dietr.: synonymies with *Billbergia*, *Catopsis*, *Tillandsia*.

Cryptomeria japonica Hassk.: the botanical varieties of this species, the only one of its genus, have also been made into species in their own right.

Cucurbita L.: synonymies with *Benincasa*, *Citrullus*, *Cucumis* (*Cucurbita foetidissima* and *Cucumis perennis* - ornamental species), *Lagenaria*.

Cyclamen persicum Mill.: syn.: *C. latifolium* Sibth. et Sm., *C. aleppicum* Fisch., *C. puniceum* Pomel, *C. aleppicum* ssp. *puniceum* (Pomel) Glasau, *C. tomentosum*, *C. albidum*.

Cymbidium Sw.: see under *Orchidaceae*. Synonymies with *Cymbidiella*, *Cyperorchis*, *Epidendrum*, *Grammangis*, *Grammatophyllum*, *Iridorchis*.

Cyrtanthus L. f.: *C. clavatus* has also been named *Gastronema clavatum*.

Cytisus L.: synonymies with *Cajanus*, *Chamaecytisus*, *Coroethamnus*, *Genista*, *Laburnum*, *Lembotropis*, *Petteria*, *Sarothamnus*, *Spartium*, *Spartocytisus*, *Teline*.

Cytisus fragrans Lam.: syn.: *C. supranubius*, *C. nubigenus*, *Genista fragrans*, *G. nubigenus*, *Spartocytisus supranubius*.

Daboecia D. Don: synonymies with *Boretta*, *Menziesia*.

Dahlia Cav.: *D. zimapanii* is a synonym of *Cosmos diversifolius*.

Daphne L.: synonymies with *Mezereon*, *Thymelaea*.

Daphne odora Thunb.: syn.: *D. japonica* Paxt., *D. sinensis*, *D. indica* hort.

Daucus carota L. ssp. *sativus* (Hoffm.) Arcang.: syn.: *D. sativus* (Hoffm.) Röhl.

Delphinium L.: synonymies with *Consolida*.

Dendrobium Sw.: see under *Orchidaceae*. Synonymies with *Aporum*, *Callista*, *Dipodium*, *Epigeneium*, *Genyorchis*, *Latouria*.

Dianthus L.: *D. noeanus* is frequently commercialized under the name *Acanthophyllum spinosum*.

Dicentra Borkh. emend. Bernh.: synonymies with *Diclythra*, *Diclytra*, *Dielytra*, *Fumaria*.

Dieffenbachia Schott: synonymies with *Caladium*.

Diervilla Mill.: modern American authors group under the name *Diervilla* solely the species of American origin and under the name *Weigela* the Asiatic species (A. Belot. Dictionnaire des arbres et arbustes de jardin - Bordas). Others group all species under the name *Diervilla*.

Digitalis L.: *D. chinensis* is a synonym of *Adenosma grandiflorum*.

Dioscorea L.: synonymies with *Bordera*, *Helmia*, *Tamus*, *Testudinaria*.

X Doritaenopsis hort.: see under Orchidaceae. Hybrids *Doritis* X *Phalaenopsis*. Syn.: X *Doritopsis hort.*

Doronicum L.: synonymies with *Arnica*, *Aronicum*.

Dracaena Vand. ex L.: syn.: *Terminalis*. Synonymies with *Cordyline* and subsidiarily *Sansevieria*.

Emilia Cass.: synonymies with *Cacalia*, *Senecio*.

Enkianthus Lour.: synonymies with *Andromeda*, *Meisteria*, *Melidora*, *Rhodora*.

Epidendrum L. 1763, non 1753: see under Orchidaceae. Synonymies with *Barteria*, *Broughtonia*, *Cattleya*, *Caularthron*, *Diacrium*, *Dinema*, *Encyclia*, *Isochilus*, *Nanodes*, *Schomburgkia*, *Seraphyta*, *Sobralia*.

Epiphyllopsis Berger, Rhipsalidopsis Britt. et Rose, Schlumbergera Lem., Zygo-
cactus K. Schum.: the majority of the species of these genera have been classified in the genus *Epiphyllum* and are still known under that name, which is the correct one for the plants formerly known as *Phyllocactus*. The genus *Epiphyllopsis* is not mentioned in the Dictionary of Gardening. Zander refers to *Rhipsalidopsis gaertneri* (Regel) Lindgr. (*Epiphyllum russellianum* Hook. var. *gaertneri* Regel, *Schlumbergera gaertneri* (Regel) Britt. et Rose, *Epiphyllopsis gaertneri* (Regel) Berger). The genus *Rhipsalidopsis* is monotypic according to the Dictionary of Gardening, the species being *R. rosea* (Lagerh.) Britt. et Rose and having as synonym *Rhipsalis rosea* Lagerh. According to Zander, this genus also comprises *R. gaertneri* (Regel) Lindgr. (see above) and *R. X graeseri* (Werderm.) Moran (*R. gaertneri* X *R. rosea*, *Rhipsalis* X *graeseri* Werderm., X *Rhipsapiphyllopsis graeseri* Werderm.). The genus *Schlumbergera* comprises according to the Dictionary of Gardening *S. gaertneri* (see above) and *S. russelliana* (Gardn.) Britt. et Rose (*Epiphyllum russellianum* Hook.) and according to Zander the latter only. Finally the genus *Zygocactus* is monotypic according to the Dictionary of Gardening, the species being *Z. truncatus* (Haw.) K. Schum. and having as synonyms *Epiphyllum truncatum* Haw. and--according to Zander--*Schlumbergera truncata* (Haw.) Moran. In addition Zander has on the one hand separated the cultivated varieties under the name *Z.-hybridi* and on the other hand distinguished the following two botanical varieties within the species *Z. truncatus*:

- var. *altensteinii* (Pfeiff.) Lem. (*Z. altensteinii* (Pfeiff.) K. Schum., *Epiphyllum altensteinii* Pfeiff., *Schlumbergera truncata* var. *altensteinii* (Pfeiff.) Moran)

- var. *truncatus*.

In the twelfth edition of Zander (1980), *Zygocactus* has been included in *Schlumbergera*, the latter having been enriched by two further species: *S. opuntioides* and *S. orssichiana*. The botanical varieties of *Z. truncatus* are no longer mentioned therein.

Erica carnea L.: syn.: *E. herbacea* L. The latter name is frequently used for *E. carnea* var. *alba*.

Erica ciliaris L.: the variety *maweana* is also known as *E. maweana*.

Erica X darleyensis Bean = *E. carnea* X *E. mediterranea*. Syn.: *E. hybrida*, *E. mediterranea hybrida*.

Erica lusitanica Rud.: syn.: *E. coconodes*.

Erica mackaiana Bab.: this is probably a hybrid *E. ciliaris* X *E. tetralix*.

Erica mediterranea hort.: syn.: *E. purpurascens* L. The Dictionary of Gardening gives also *E. carnea occidentalis* as a synonym of *E. mediterranea*.

Erica terminalis Salisb.: syn.: *E. stricta* Andr. non Donn ex Willd., *E. corsica*, *E. ramulosa*.

Erica X veitchii Bean = *E. arborea* X *E. lusitanica*.

Erica X watsonii Benth. = *E. ciliaris* X *E. tetralix*.

Erica X williamsii Druce = *E. tetralix* X *E. vagans*.

Erigeron L.: synonymies with *Aster*, *Stenactis*, *Vittadinia*.

Eriobotrya japonica (Thunb.) Lindl.: syn.: *Mespilus japonica*, *Photinia japonica*.

Eucryphia glutinosa (Poepp. et Endl.) Baill.: syn.: *E. pinnatifolia* Gay.

Eucryphia X intermedia Bausch: name proposed for hybrids between *E. glutinosa* and *E. lucida*.

Eucryphia X nymanensis Bausch: name proposed for hybrids between *E. cordifolia* and *E. glutinosa*.

Euphorbia L.: synonymies with *Monadenium*, *Pedilanthus*, *Poinsettia*, *Sarcostemma*.

Euphorbia fulgens Karw.: syn.: *E. jacquiniiflora* Hook.

Euphorbia-Milii-Hybridi: *E. milii* Desmoulins has the synonym *E. splendens* Boj. ex Hook. Its botanical variety *milii* is also known as *E. bojeri* Hook. *E. hislopianii* N.E. Br. has the synonym *E. milii* var. *hislopianii* (N.E. Br.) Ursch et Leandri.

Euphorbia pulcherrima Willd. ex Klotzsch: syn.: *Poinsettia pulcherrima* (Willd. ex Klotzsch) Grah.

Eustoma russellianum (Hook.) G. Don: syn.: *Lisianthus russellianus* Hook.

Exochorda Lindl.: *E. racemosa* has also been named *Spiraea grandiflora*.

Fagopyrum esculentum Moench.: syn.: *Polygonum fagopyrum* L., *F. sagittatum* Gilib., *F. vulgare* Th. Nees.

Fagus L.: synonymies with *Nothofagus*.

X Fatschedera Guillaum. = *Fatsia* X *Hedera*.

Festuca arundinacea Schreb.: syn.: *F. elatior* L. p.p.

Festuca ovina L. sensu lato: according to ISTA, this species includes *F. tenuifolia* Sibth.

Festuca pratensis Huds.: syn.: *F. elatior* L. (according to ISTA), *F. elatior* L. p.p. (according to Zander).

Foeniculum vulgare P. Mill.: syn.: *F. officinale* All. The botanical variety *dulce* Batt. et Trab. has the synonym *F. dulce* Mill.

Fortunella Swingle: synonymies with *Citrus*.

Fuchsia magellanica Lam.: syn.: *F. macrostemma* Ruiz et Pav. The botanical variety '*Riccartonii*' has the synonyms *F. riccartonii* Lebas, *F. riccartoniana* hort.

Gaillardia Foug.: *G. acaulis* Pursh is a synonym of *Hymenoxys* (Pursh) Parker (*Actinea acaulis* (Pursh) Spreng. ~~*Tetraneuris acaulis* (Pursh) Greene~~, *Actinea herbacea* A. Gray).

Gardenia Ellis: synonymies with *Mitriostigma*, *Randia*.

Garrya X thuretii Carr. = *G. elliptica* X *G. pernettya*.

X Gaulnettya W.J. Marchant = *Gaultheria* X *Pernettya*.

Gaultheria Kalm ex L.: synonymies with *Andromeda*, *Arbutus*, *Brossaea*, *Diplycosia*, *Pernettya*, *Pieris*, *Vaccinium*.

Genista L.: synonymies with *Chamaespartium*, *Cytisanthus*, *Cytisus*, *Echinopartum*, *Genistella*, *Pterospartium*, *Retama*, *Scorpius*, *Spartium*.

Gentiana L.: synonymies with *Crawfurdia*, *Gentianella*, *Golownina*.

Geum L.: synonymies with *Parageum*, *Sieversia*.

Gladiolus L.: synonymies with *Homoglossum*, *Lapeirousia*.

Glycine max (L.) Merrill: syn.: *Dolichos soja* L., *Phaseolus max* L., *Soja hispida* Moench, *G. hispida* (Moench) Maxim.

Godetia Spach: synonymies with *Oenothera*.

Gossypium hirsutum L.: the botanical variety *punctatum* has the synonyms *G. religiosum* L., *G. punctatum* Schumach.

Grifola frondosa (Fr.) S.F. Gray: syn.: *Griphola frondosa*, *Polyporus frondosus*.

Guzmania Ruiz et Pav.: synonymies with *Caraguata*, *Massangea*, *Pitcairnia*, *Puya*, *Schlumbergia*, *Vriesea*.

Gypsophila L.: synonymies with *Banffya*, *Phrynica*.

Halesia J. Ellis ex L.: *H. corymbosa* is a synonym of *Pterostyrax corymbosa*.

Hebe Comm. ex Juss.: syn.: *Veronica* L. sect. *Hebe*.

Hedera L.: synonymies with *Acanthopanax*, *Kissodendron*.

Helianthemum Mill.: synonymies with *Fumana*, *Halimium*.

Helianthus L.: synonymies with *Harpalium*, *Rudbeckia*.

Helichrysum Mill. corr. Pers.: synonymies with *Aphelexis*, *Gnaphalium*, *Leucogenes*, *Ozothamnus*, *Xeranthemum*.

Helleborus niger L.: the sub-species *macranthus* (Freyn) Schiffn. (*vernalis*, *angustifolius*, *maximus*) has also been made into a species under the name *H. macranthus* Freyn.

Hemerocallis L.: synonymies with *Hosta*.

Heuchera L.: synonymies with *Heucherella* (= *Heuchera* X *Tiarella*), *Tiarella*.

Hibiscus L.: synonymies with *Abelmoschus*, *Althaea*, *Thespesia*.

Hibiscus syriacus L.: syn.: *Althaea fruticosa*.

Hippeastrum Herb.: synonymies with *Amaryllis*, *Griffinia*, *Habranthus*, *Phycella*, *Sprekelia*, *Zephyranthes*.

Holcus L.: *H. odoratus* L. is a synonym of *Hierochloë odorata* (L.) P. Beauv.

Hordeum vulgare L. sensu lato: *H. sativum* Jess. is a synonym of *H. vulgare* L.

Hordeum vulgare L. convar. distichon (L.) Alef.: syn.: *H. distichon* L.

Hosta Tratt.: syn.: *Funckia* Dumort. non Willd., *Funkia* Spreng. In addition, synonymies with *Hemerocallis*.

Hypericum L.: synonymies with *Androsaemum*, *Helodes*, *Webbia*.

Iberis L.: *I. cappadocica* is a synonym of *Ptilotrichum cappadocicum*.

Ilex X altaclarensis (Loud.) Dallim. = *I. aquifolium* X *I. perado*.

Impatiens L.: synonymies with *Balsamina*.

Indigofera gerardiana (Wall.) Bak.: syn.: *I. dosua* Lindl. non D. Don.

Indigofera incarnata (Willd.) Nakai: syn.: *I. decora* Lindl.

Ipomoea batatas (L.) Poir.: syn.: *Batatas edulis*.

Ipomoea tricolor Cav.: syn.: *I. violacea* L., *I. rubro-coerulea* Hook., *Pharbitis rubro-coerulea* (Hook.) Choisy, *P. tricolor*.

Iris L.: synonymies with *Dietes*, *Gynandriris*, *Hermodactylus*, *Moraea*, *Pardanthus*, *Xiphion*.

Ixia L. 1762, non 1753: synonymies with *Lapeirousia*, *Morphixia*, *Sparaxis*, *Tritonia*, *Wurmea*.

Jasminum grandiflorum L.: syn.: *J. officinale* f. *grandiflorum* (L.) Kobuski. *J. grandiflorum* hort. is a synonym of *J. officinale* L. f. *affine* Royle ex Lindl.

Jasminum humile L.: the botanical variety *revolutum* has also been made into a species under the names *J. revolutum* Sims, *J. reevesii*, *J. triumphans*. *J. wallichianum* Lindl. has the synonyms *J. humile* L. f. *wallichianum* (Lindl.) P.S. Green, *J. humile* L. var. *glabrum* (DC.) Kobuski, *J. pubigerum* D. Don var. *glabrum* DC.

Jasminum officinale L.: the form *affine* has the synonyms *J. affine* Royle ex Lindl., *J. grandiflorum* hort. non L. *J. grandiflorum* L. has also been considered a form of *J. officinale*.

Jasminum X stephanense Lemoine = *J. beesianum* X *J. officinale*.

Juniperus L.: *J. drupacea* Labill. has the synonym *Arceuthos drupacea* (Labill.) Ant. et Kotschy. *J. ericoides* has the synonym *Callitris calcarata*.

Juglans L.: *J. glabra* Mill. is a synonym of *Carya glabra* (Mill.) Sweet (C. *porcina* (Michx. f.) Nutt.) (not a fruit species).

Kalanchoë Adans: synonymies with *Bryophyllum*, *Cotyledon*, *Kitchingia*.

Kalmia L.: *K. hirsuta* has the synonym *Kalmiella hirsuta*.

Kerria japonica (L.) DC.: syn.: *K. lutea*, *Corchorus japonica*.

Kniphofia Moench: synonymies with *Tritonia*.

Laburnum Fabr.: synonymies with *Cytisus*.

Lachenalia Jacq. ex Murr.: synonymies with *Phormium*, *Scilla*.

Laelia Lindl.: see under *Orchidaceae*. Synonymies with *Bletia*, *Brassavola*, *Cattleya*, *Neocogniauxia*, *Schomburkia*.

X Laeliocattleya Rolfe: see under *Orchidaceae*. Hybrids *Cattleya* X *Laelia*.
Synonyme: X *Catlaelia hort.*

Lagenaria siceraria (Mol.) Standl. var. hispida Hara.: syn.: *Benincasa hispida* (Thunb.) Cogn., *B. cerifera* Savi, *Cucurbita hispida* Thunb. The species *L. siceraria* (Mol.) Standl. also has the synonyms *Cucurbita lagenaria* L., *L. vulgaris* Ser.

Lantana Mill.: *L. selloviana* has the synonym *Lippia montevidensis*.

Larix kaempferi (Lamb.) Carr.: syn.: *L. leptolepis* (Sieb. et Zucc.) Sieb. ex Gord. - according to Zander and ISTA - and *Pseudolarix amabilis* - according to the Dictionary of Gardening. According to the latter, it is the *L. kaempferi* of Sargent which is synonymous with *L. leptolepis* and with *L. japonica*.

Lavandula L.: synonymies according to Zander:

- *L. angustifolia* Mill., *L. spica* L. p.p. [non Cav.], *L. officinalis* Chaix, *L. vera* DC.
- *L. latifolia* (L. f.) Med., *L. spica* L. p.p.

Lens culinaris Med.: syn.: *L. esculenta* Moench, *Ervum lens* L.

Leptospermum scoparium Forst.: syn.: *L. bullatum*. *L. baccatum* is a synonym of *L. scoparium* or of *L. arachnoideum*.

Leucospermum R. Br.: *L. ellipticum* has the synonym *Protea formosa*.

Leucothoë D. Don: synonymies with *Andromeda*, *Eubotrys*, *Lyonia*, *Oreocallis*.

Ligularia Cass.: synonymies with *Erythrochaete*, *Farfugium*, *Senecio*, *Tussilago*.

Lilium L.: synonymies with *Cardiocrinum*, *Fritillaria*, *Nomocharis*, *Notholirion*.

Limonium Mill.: syn.: *Statice* L. p.p., the other part being *Armeria*.

Linaria Mill.: the genus *Linaria* is frequently divided into three genera, namely: *Cymbalaria*, *Chaenorrhinum*, *Linaria* (in the restricted sense).

Linum usitatissimum L.: syn.: *L. crepitans* (Boenningh.) Dumort.

Litchi chinensis Sonn.: syn.: *Nephelium litchi*, *Scytalia chinensis*.

Lithospermum L.: synonymies with *Buglossoides*, *Lithodora*, *Moltkia*.

Lobelia L.: synonymies with *Haynaldia*, *Isotoma*, *Monopsis*, *Pratia*, *Siphocampylus*, *Tupa*.

Lolium X boucheanum Kunth. = L. multiflorum X L. perenne.

Lotus spp.: synonymies with *Carmichaelia*, *Tetragonolobus*.

Lotus uliginosus Schkuhr: syn.: *L. pedunculatus* auct. non Cav.

Luffa cylindrica M.J. Roem.: according to Zander, this species is not identical to *L. aegyptiaca* Mill. (*Momordica luffa* L., *M. cylindrica* L.). The Dictionary of Gardening considers them to be synonyms.

Lupinus angustifolius L.: syn.: *L. varius* Savi non L.

Lycaste Lindl.: see under *Orchidaceae*. Synonymies with *Bifrenaria*, *Colax*, *Maxillaria*, *Paphinia*.

Lychnis L.: synonymies with *Agrostemma*, *Coronaria*, *Melandrium*, *Petrocoptis*, *Silene*, *Viscaria*.

Lychnis coronaria (L.) Desr.: syn.: *L. tomentosa*, *Coronaria tomentosa* A. Br., *C. coriacea* Schischkin ex Gorschk., *Agrostemma coronaria*.

Lycoris Herb.: synonymies with *Amaryllis*, *Nerine*, *Ungernia*.

Magnolia L.: synonymies with *Michelia*, *Talauma*.

Mahonia Nutt.: see under *Berberis*.

Mahonia aquifolium (Pursh) Nutt.: syn.: *Berberis aquifolium* Pursh. *M. pinnata* (Lag.) Fedde (*M. fascicularis* DC.) is considered to be a distinct species by the Dictionary of Gardening and Zander, and to be *M. aquifolium* 'Fascicularis' in the Dictionnaire des arbres et arbustes de jardin (A. Belot - Bordas).

Mahonia bealei (Fort.) Carr.: syn.: *Berberis japonica* var. *bealei* (Fort.) Skeels, *B. bealei* Fort. The Dictionary of Gardening and Zander make *M. japonica* (Thunb.) DC. (*B. japonica* (Thunb.) R. Br.) into a distinct species, the first adding that *M. japonica* is distributed under the incorrect name *M. bealei* and vice versa. The Dictionnaire des arbres et arbustes de jardin considers *M. bealii* to be *M. japonica* var. *bealei*.

Mahonia japonica (Thunb.) DC.: see under *Mahonia bealei* (Fort.) Carr.

Mahonia repens (Lindl.) G. Don: syn.: *Berberis repens* Lindl.

Malus Mill.: syn.: *Pyrus* L. partim. Synonymies with *Crataegus*, *Eriolobus*.

Malus domestica Borkh.: syn.: *M. sylvestris* Mill. var. *domestica* (Borkh.) Mansf., *M. pumila* var. *domestica* (Borkh.) Schneid. Most varieties cultivated in Europe belong to this species. *M. sylvestris* Mill. has the synonyms *Pyrus malus* L., *P. sylvestris* S.F. Gray non Moench, *M. communis* Poir.

Malva L.: synonymies with *Callirhoë*, *Lavatera*, *Malvastrum*, *Sphaeralcea*.

Maranta L.: synonymies with *Alpinia*, *Calathea*, *Ctenanthe*, *Saranthe*, *Stromanthe*.

Matthiola incana (L.) R. Br.: syn.: *M. annua*.

Medicago falcata L.: see under *Medicago sativa* L.

Medicago sativa L.: according to Zander, this species comprises the following sub-species:

- ssp. *caerulea* (Less. ex Ledeb.) Schmalh. (*M. caerulea* Less. ex Ledeb.)
- ssp. *falcata* (L.) Arcang. (*M. falcata* L.)
- ssp. *falcata* X ssp. *sativa* (*M. X varia* Martyn)
- ssp. *sativa*.

Medicago X varia Martyn: see under *Medicago sativa* L.

Mentha L.: *M. requienii* Benth. has the synonyms *Menthella requienii* (Benth.) Pér., *Menthella conica*.

Miltonia Lindl.: see under *Orchidaceae*. Synonymies with *Macrochilus*, *Odontoglossum*, *Oncidium*.

Mimetes spec.: see under *Orothamnus spec.*

Momordica charantia L.: syn.: *M. muricata* Willd. - according to Zander. According to the Dictionary of Gardening, the botanical varieties have also been made into species (*M. chinensis* and *M. muricata*) and *M. marteniensis* may also belong to the species in question.

Monstera Adans.: synonymies with *Macgravia*, *Philodendron*, *Raphiodophora*. The species most commonly known as *Philodendron* is *Monstera deliciosa* Liebm. (*Philodendron pertusum* Kunth et Bouché).

Musa cavendishii Lamb.: syn.: *M. acuminata* Colla, *M. malaccensis* Ridl., *M. sinensis*.

Narcissus L.: synonymies with *Corbularia*, *Hermione*.

Nelumbo nucifera Gaertn.: syn.: *Nelumbium nelumbo* (L.) Druce, *N. speciosum* Willd.

Neoregelia L.B. Sm.: synonymies with *Aregelia* and *Nidularium*, names under which the species of this genus are described in the Dictionary of Gardening, which also records synonymies with *Bromelia* and *Karatas*.

Nepeta L.: synonymies with *Dracocephalum*, *Glechoma*, *Micromeria*, *Thymus*.

Nephrolepis Schott: *N. acutifolia* has the synonyms *Isoloma lanuginosum*, *Lindsaya lanuginosa*.

Nerine Herb.: synonymies with *Amaryllis*, *Lycoris*.

Nopalxochia Britt. et Rose: synonymies with *Epiphyllum*, *Phyllocactus*.

Nothofagus Bl.: synonymies with *Fagus*.

Nymphaea L.: synonymies with *Nuphar*.

Odontoglossum H.B.K.: see under Orchidaceae. This genus includes *Mesospinidium*. Synonymies with *Cochlioda*, *Miltonia*, *Oncidium*, *Zygopetalum*.

Oenothera L.: the sub-genera have also been made into genera (*Anogra*, *Calylophus*, *Chylismia*, *Hartmannia*, *Kneiffia*, *Lavauxia*, *Megapterium*, *Pachylophus*, *Raimannia*, *Sphaerostigma*, *Taraxia*). Other synonymies with *Godetia*, *Meriolix*, *Onagra*, *Xylopleurum*.

Olea europaea L.: the fruiting sub-species *europaea* has also been made into a species under the name *O. sativa* Hoffm. et Link.

Olearia X haastii Hook. f. = *O. avicenniifolia* X *O. moschata*.

Oncidium Sw.: see under Orchidaceae. This genus includes *Cyrtochilum* and *Palumbina*. Synonymies with *Cymbidium*, *Epidendrum*, *Leochilus*, *Lophiaris*, *Miltonia*, *Odontoglossum*, *Walwea*.

Onobrychis viciifolia Scop.: syn.: *Hedysarum onobrychis* L., *O. sativa* Lam.

Orchidaceae Juss.: This very large family is characterized by many synonymies and by easy interspecific and intergeneric hybridizations. This family is specified as protected in several States, whereas others protect certain of its genera. The genera mentioned in the main table are the following: *Aërides*, *Angraecum*, *Ascocentrum*, *Bletilla*, *Brassavola*, *Calanthe*, *Cattleya*, *Cymbidium*, *Dendrobium*, X *Doritaenopsis*, *Epidendrum*, *Laelia*, X *Laeliocattleya*, *Lycaste*, *Miltonia*, *Odontoglossum*, *Oncidium*, *Paphiopedilum*, *Phalaenopsis*, *Renanthera*, *Rhynchostylis*, *Sophranitis*, *Vanda*, X *Vuylstekeara*.

Origanum L.: synonymies with *Amaracus*, *Majorana*.

Ornithogalum spec.: *O. vittatum* has also been described as *Albuca vittata*.

Orothamnus spec.: monotypic genus, the species of which (*O. zeyheri*) has the synonym *Mimetes zeyheri*.

Osmanthus Lour.: synonymies with *Olea*, *Siphonosmanthus*.

Osmanthus heterophyllus (G. Don) P.S. Green: synonym other than those indicated in the main table: *Olea aquifolium* Sieb. et Zucc.

Oxalis L.: *O. sensitiva* is a synonym of *Biophytum sensitivum*.

Paeonia albiflora Pall.: syn.: *P. lactiflora* Pall., *P. chinensis* hort., *P. sinensis* (Sims) hort., *P. edulis sinensis*.

Paeonia officinalis L.: according to Zander, this species includes the subspecies *humilis* (Retz.) Cull. et Heyw., which has the synonyms *P. humilis* Retz., *P. peregrina* var. *humilis* (Retz.) Huth. In the Dictionary of Gardening, *P. banatica*, *P. clusii*, *P. coriacea*, *P. peregrina* are classified as species and it is stated that they are also considered subdivisions of *P. officinalis*.

Paeonia suffruticosa Andr.: syn.: *P. arborea* Donn, *P. moutan* Sims.

Panicum L.: synonymies with *Digitaria*, *Echinochloa*, *Oplismenus*, *Setaria*, *Tricholaena*.

Paphiopedilum Pfitz.: see under Orchidaceae. Syn.: *Cypripedium* hort. non L.

Paranomus spec.: synonymies with *Nivenia*, *Protea*.

Parrotia C.A. Mey.: *P. jacquemontiana* Decne. has the synonym *Parrotiopsis jacquemontiana* (Decne.) Rehd.

Parthenocissus Planch.: synonymies with *Ampelopsis*, *Cissus*, *Vitis*.

Pastinaca sativa L.: syn.: *Peucedanum sativum*.

Pelargonium-Peltatum-Hybridi: syn.: *P. peltatum* hort. non (L.) L'Hér. ex Ait.

Pelargonium-Zonale-Hybridi: syn.: *P. X hortorum* L.H. Bailey, *P. zonale* hort. non (L.) L'Hér. ex Ait.

Pennisetum typhoides (Burm.) Stapf et C.E. Hubb.: syn.: *P. glaucum* (L.) R. Br., *Setaria glauca* (L.) P. Beauv., *P. typhoideum* L.C. Rich., *P. americanum* (L.) K. Schum. ssp. *typhoideum* (L.C. Rich.) Maire et Zeiller.

Penstemon Schmidel: synonymies with *Chelone*.

Perilla L.: *P. frutescens* (L.) Britt. has the synonyms *Ocimum frutescens* L., *P. ocymoides* L. The subdivision 'Nankinensis' has the synonyms var. *crispa* (Thunb.) Decne. ex L.H. Bailey, *Ocimum crispum* Thunb., *P. nankinensis* (Lour.) Decne.

Pernettya Gaudich.: synonymies with *Arbutus*, *Gaultheria*.

Persea americana P. Mill.: syn.: *P. gratissima* Gaertn. f.

Petasites japonicus (Sieb. et Zucc.) Fr. Schmidt: syn.: *Nardosmia japonica*.

Petroselinum crispum (Mill.) Nym. ex A.W. Hill: syn.: *P. hortense* auct. non Hoffm., *P. sativum* Hoffm., *Carum petroselinum*.

Phalaenopsis Bl.: see under Orchidaceae. Synonymies with *Doritis*, *Kingiella*, *Polychilus*, *Sarcochilus*, *Strauopsis*, *Trichoglottis*.

Phalaris arundinacea L.: syn.: *Typhoides arundinacea* (L.) Moench, *Balclutha arundinacea* (L.) Dumort., *Digraphis arundinacea*.

Pharbitis nil Choisy.: according to Zander, this species has the synonyms *Ipomoea nil* (L.) Roth, *Convolvulus nil* L. and includes *Ipomoea imperialis* hort. (japanische Kaiserwinde). According to the Dictionary of Gardening, Japanese Morning Glory is species *P. X imperialis*, probably a cross between *P. hederacea* and *P. tricolor*. *P. hederacea* has the synonyms *Convolvulus nil*, *P. albomarginata*, *Ipomoea limbata*. Concerning *P. tricolor*, see under *Ipomoea tricolor*.

Phaseolus coccineus L.: syn.: *P. multiflorus* Lam.

Philodendron Schott corr. Schott: synonymies with *Anthurium*, *Caladium*, *Monstera*. In particular, *Monstera deliciosa* Liebm. has the synonym *P. pertusum* Kunth et Bouché and is known by the name *Philodendron*.

Phormium J.R. et G. Forst.: synonymies with *Lachenalia*.

Photinia Lindl.: synonymies with *Crataegus*, *Eriobotrya*, *Heteromeles*. *Eriobotrya japonica* (Thunb.) Lindl. has notably the synonym *P. japonica*.

Physostegia virginiana (L.) Benth.: syn.: *Dracocephalum variegatum*, *D. virginianum*.

Picea A. Dietr.: the nomenclature is very complex as there have been confusions with *Abies*, *Pinus* and *Tsuga*. In addition, certain botanists have identified 40 species, others having reduced some of them to synonyms.

Picea jezoensis (Sieb. et Zucc.) Carr.: syn.: *P. ajanensis* Fisch. ex Carr.; the botanical variety *hondoensis* (Mayr) Rehd. is also named *P. hondoensis* Mayr.

Pieris D. Don: synonymies with *Andromeda*, *Arcterica*, *Lyonia*, *Portuna*.

Pieris japonica (Thunb.) D. Don ex G. Don: syn.: *Andromeda japonica* Thunb.

Pinus thunbergii Parl. non Lamb.: syn.: *P. thunbergiana* Franco.

Pisum sativum L.: in its modern sense, *P. sativum* L. includes *P. arvense*.

Platycodon grandiflorum (Jacq.) A. DC.: syn.: *Campanula grandiflora* Jacq., *Wahlenbergia grandiflora* (Jacq.) Schrad. Botanical varieties thereof have also been given species names (in particular *P. autumnale* and *P. chinensis*).

Poa L.: synonymies with *Dactylis*, *Eragrostis*, *Festuca*, *Glyceria*, *Koeleria*.

Polemonium L.: *P. brandegeei* has also been named *Gilia brandegeei*.

Polygonatum Mill.: syn.: *Axillaria*, *Evallaria*. Synonymies with *Convallaria*.

Polygonum L.: synonymies with *Bilderdykia*, *Fagopyrum*, *Muehlenbeckia*, *Reynoutria*.

Poncirus Raf.: monotypic genus (*P. trifoliata* (L.) Raf.) which has the synonyms *Citrus trifoliata* L., *Aegle sepiaria*, *Limonia trifoliata*.

Potentilla L.: synonymies with *Argentina*, *Comarum*, *Dasyphora*, *Drymocallis*, *Sibbaldiopsis*.

Potentilla fruticosa L.: syn.: *Dasyphora fruticosa*. As the main table shows, certain types of cinquefoil are either considered to be sub-species of *P. fruticosa* L., or made into distinct species. Differences in the scope of application of protection result therefrom.

Protea spec.: synonymies with *Aulax*, *Leucospermum*, *Paranomus*, *Serruria*.

Prunus L.: this genus has been made into several genera by some botanists. The nomenclature most encountered in practice is the following:

- *Amygdalus* (almond)
- *Armeniaca* (apricot)
- *Cerasus* (cherry)
- *Persica* (peach)
- *Prunus* (plum).

As far as the species are concerned, the synonymies are given below. Certain States have defined the protected species by the indication of the genus *Prunus* L. followed by the common name of the species, in particular to avoid problems with nomenclature.

Prunus amygdalus Bartock: syn.: *Amygdalus communis* L., *P. communis* (L.) Arcang. non Huds.

Prunus armeniaca L.: syn.: *Armeniaca vulgaris* Lam.

Prunus avium (L.) L.: syn.: *Cerasus avium* (L.) Moench.

Prunus cerasifera Ehrh.: syn.: *P. myrobalana* Poit. et Turp., *P. myrobalanus* (L.) Loisel. The group of ornamental varieties of the *Atropurpurea* type is also known under the name *P. pissardii* Carr. In the States which rely mainly on common names, this species may or may not be protected depending on the interpretation of "plum."

Prunus cerasus L.: syn.: *Cerasus vulgaris* Mill. The sub-species and botanical varieties have also been made into species (*P. acida* K. Koch non Ehrh.; *P. austera* (L.) Ehrh., *Cerasus austera* (L.) Borkh.; *Cerasus marasca* Host, *P. marasca* (Host) Rchb.).

Prunus domestica L., Prunus insititia L.: classification of plums is extremely confused, as most botanists who have dealt with the genus *Prunus* have adopted their own system. On the species level, the most controversial question is whether *P. insititia* constitutes a species or should be considered a sub-species of *P. domestica*. The latter is at present the most commonly recognized, but the former can still be found. In addition, there is controversy over the allocation of the various types of plums to the taxonomic entities that have been defined. For instance, mirabelle belongs to the entity (sub-species or species) *insititia* according to certain authors and to the entity *syriaca* according to others. The various types are not always used in the same manner from one country to another. For example, Damson is used solely as a rootstock in France, whereas in the United Kingdom it is also used as a fruiting species for pies, stewing and bottling. Finally, partly as a consequence of the different uses, types identified by a common name in one country may not have a common name in others; thus for example, there is no equivalent of Bullace in French. All these factors may influence the scope of application of protection.

Prunus fruticosa Pall.: syn.: *Cerasus fruticosa* (Pall.) Woron, *C. sylvestris*. In the States which rely mainly on common names, this species may be protected or not depending on the interpretation of "cherry."

Prunus glandulosa Thunb.: syn.: *P. sinensis*.

Prunus insititia L.: see under *P. domestica* L.

Prunus laurocerasus L.: syn.: *Laurocerasus officinalis* M.J. Roem., *Cerasus laurocerasus* (L.) Loisel.

Prunus lusitanica L.: syn.: *Cerasus lusitanica* (L.) Loisel.

Prunus persica (L.) Batsch: syn.: *Amygdalus persica* L., *A. pumila* Lour. non L., *Persica vulgaris*.

Prunus prostrata Labill.: syn.: *Cerasus prostrata*.

Prunus salicina Lindl.: syn.: *P. triflora*. In the States which rely mainly on common names, this species may or may not be protected depending on the interpretation of "plum."

Prunus tenella Batsch: syn.: *P. nana* (L.) Stokes non Du Roi, *Amygdalus nana* L.

Prunus triloba Lindl.: syn.: *Amygdalopsis lindleyi*.

Pseudocydonia sinensis Schneid.: syn.: *Chaenomeles sinensis*, *Cydonia sinensis* (Dum.-Cours.) Schneid.

Pseudotsuga Carr.: synonymies with *Abies*.

Psidium guajava L.: syn.: *P. pyriferum* L., *P. pomiferum* L.

Pulmonaria L.: *P. virginica* L. is a synonym of *Mertensia virginica* (L.) Pers.

Pyracantha M.J. Roem.: synonymies with *Cotoneaster*, *Crataegus*.

Pyrus L.: synonymies with *Amelanchier*, *Aronia*, *Chaenomeles*, *Cydonia*, *Malus*, *Mespilus*, *Sorbus*.

Pyrus communis L.: syn.: *P. domestica* Med. non (L.) Ehrh.

Quamoclit Mill.: synonymies with Calboa, Ipomoea, Mina.

Quercus L.: synonymies with Lithocarpus.

Ranunculus L.: synonymies with Batrachium, Callianthemum, Ceratocephalus, Ficaria.

Ranunculus asiaticus L.: syn.: R. hortensis Pers., R. africanus hort.

Renanthera Lour.: see under Orchidaceae. Synonymies with Aërides, Arachnis, Vanda, Vandopsis.

Rhamnus L.: synonymies with Frangula, Oreohertzogia.

Rheum rhabarbarum L.: syn.: R. undulatum L.

Rhipsalidopsis Britt. et Rose: see under Epiphyllopsis...

Rhododendron L.: in its modern sense, this genus includes Azalea and Rhodora.

Rhodohypoxis baurii (Bak.) Nel: syn.: Hypoxis platypetala.

Rhus L.: synonymies with Cotinus, Toxidendron.

Rhynchostylis Bl.: see under Orchidaceae. Synonymies with Aërides, Saccolabium.

Ribes niveum Lindl.: see under R. sylvestre. Syn.: R. gracile.

Ribes sylvestre (Lam.) Mert. et W. Koch: syn.: R. rubrum L. p.p. et auct. mult., R. vulgare Lam. p.p., R. sativum (Rchb.) Syme, R. rubrum ssp. vulgare (Lam.) Domin (according to Zander). Zander also maintains that most cultivated varieties derive from this species. According to the Dictionary of Gardening, the main ancestor of Red and White Currants is R. sativum, often wrongly called R. rubrum. Varieties of R. rubrum are cultivated in Scandinavia (Northern Red Currant). Zander refers to this species under the name R. spicatum Robs. emend. Wilmoth (R. rubrum L. p.p., R. vulgare Lam. p.p., R. rubrum (L.) O. Schwarz).

Ribes uva-crispa L.: according to Zander, the majority of cultivated varieties belong to the variety sativum DC., which has the synonym R. grossularia L.

Rohdea japonica (Thunb.) Roth: syn.: Orontium japonicum.

Rubus fruticosus L.: according to the Dictionary of Gardening, this term is a broad one and covers the blackberries. They have been divided by certain botanists into more than 100 species. The name does not appear in Zander.

Rubus idaeus L., R. strigosus Michx.: according to the Dictionary of Gardening, R. idaeus (wild raspberry) is the ancestor of cultivated raspberries. R. strigosus is the American counterpart of R. idaeus and has the synonym R. idaeus var. strigosus.

Rudbeckia L.: synonymies with Centrocarcha, Dracopis, Echinacea, Helianthus, Lepachys.

Ruta L.: synonymies with Haplophyllum.

Salvia L.: synonymies with Audibertia, Sclarea.

Salvia officinalis L.: the sub-species lavandulifolia (Vahl) Gams has also been made into a species (S. lavandulifolia Vahl).

Saponaria L.: S. pumila has the synonym Silene pumila. S. vaccaria L. is a synonym of Vaccaria hispanica (Mill.) Rauschert (V. pyramidata Med., V. vulgaris Host, V. segetalis Garcke, V. grandiflora (Fisch.) Jaub. et Spach).

Saxifraga L.: synonymies with *Aceriphyllum*, *Bergenia*, *Boykinia*, *Chondrosa*, *Ciliaria*, *Leptasea*, *Peltiphyllum*, *Zahlbruckneri*.

Scabiosa L.: synonymies with *Cephalaria*, *Knautia*, *Pterocephalus*, *Succisa*.

Schlumbergera Lem.: see under *Epiphyllopsis*...

Scilla L.: synonymies with *Barnardia*, *Dipcadi*, *Drimia*, *Endymion*, *Hyacinthoides*, *Hyacinthus*, *Lachenalia*, *Ledebouria*, *Urginea*.

Scindapsus Schott: synonymies with *Pothos*, *Raphidophora*.

Sedum L.: synonymies with *Byrnesia*, *Cotyledon*, *Crassula*, *Cremnophila*, *Echeveria*, *Gormanina*, *Graptopetalum*, *Monanthes*, *Orostachys*, *Pistorinia*, *Rhodiola*, *Rosularia*, *Sinocrassula*, *Umbilicus*.

Selaginella P. Beauv.: *S. cuspidata* var. *elongata* has the synonym *Lycopodium cordifolium*.

Senecio cruentus (L'Hér.) DC.: syn.: *Cineraria cruenta* DC.

Serruria spec.: synonymies with *Protea*.

Sesamum indicum L.: syn.: *S. orientale* L.

Sidalcea A. Gray: *S. malvaeflora* has the synonyms *Callirhoë spicata*, *Sida malvaeflora*.

Silene L.: synonymies with *Agrostemma*, *Cucubalus*, *Eudianthe*, *Heliosperma*, *Lychnis*, *Melandrium*, *Saponaria*, *Viscaria*.

Sinningia Nees: synonymies with *Gloxinia*, *Rosanowia*, *Stenogaster*, *Tapeionites*.

Sisyrinchium L.: synonymies with *Eleutherine*, *Marica*, *Olsynium*, *Solenomelus*.

Solanum L.: synonymies with *Cyphomandra*, *Lycopersicon*.

Solidago L.: *S. graminifolia* has the synonym *Euthamia graminifolia*, its variety *nuttallii*, *E. nuttallii* and *S. rigida* has the synonym *Oligoneuron rigidum*.

Sophora L.: synonymies with *Edwardsia*.

Sophronitis Lindl.: see under *Orchidaceae*. *S. cernua* has the synonym *Sophronia cernua*. *S. violacea* Lindl. has the synonyms *Sophronitella violacea* (Lindl.) Schlechter, *Cattleya violacea* (Lindl.) Beer non Rolfe nec hort.

Sorbus L.: synonymies with *Aronia*, *Micromeles*, *Pyrus*.

Sorghum dochna (Forssk.) Snowden: syn.: *S. vulgare* var. *saccharatum* (Moench) Boerl.

Spartium L.: *S. junceum* L. has the synonyms *Genista juncea*, *G. odorata*.

Spathiphyllum spec.: synonymies with *Anthurium*, *Pothos*, *Rhodopatha*.

Spiraea L.: synonymies with *Aruncus*, *Astilbe*, *Lhamaebatiaria*, *Filipendula*, *Gillenia*, *Holodiscus*, *Luetkea*, *Petrophytum*, *Physocarpus*, *Sibiraea*, *Sorbaria*.

Stachys L.: synonymies with *Betonica*.

Stevia rebaudiana (Bertoni) Hemsl.: syn.: *Eupatorium rebaudianum*.

Stewartia L.: syn.: *Stuartia* L'Hér. *S. ovata* has also the synonym *Malacodendron pentagynum*.

Stranvaesia Lindl.: *S. davidiana* has also been described as *Photinia davidiana*.

Symphoricarpos Duham.: *S. rivularis* has also been described as *Symphoria racemosa*.

Syringa L.: synonymies with *Ligustrina*.

Tamarix L.: *T. germanica* L. is a synonym of *Myricaria germanica* (L.) Desv.

Tecoma Juss.: synonymies with *Bignonia*, *Campsidium*, *Campsis*, *Pandorea*, *Podra-*
nea, *Stenolobium*, *Tecomaria*, *Tecomella*.

Teucrium chamaedrys L.: *T. chamaedrys* hort. is perhaps a synonym of *T. massi-*
liense L.

Teucrium fruticans L.: syn.: *T. latifolium*.

Thalictrum L.: synonymies with *Anemonella*, *Isopyrum*.

Thea sinensis L.: syn.: *Camellia sinensis* (L.) O. Kuntze (name stabilized by
ISTA), *T. viridis* L., *T. bohea* L., *C. thea* Link, *C. theifera* Griff.

Thuja L.: synonymies with *Biota*, *Platycladus*, *Tetraclinis*, *Thujopsis*.

Thuja orientalis L.: syn.: *Biota orientalis* (L.) Endl., *Platycladus orien-*
talis (L.) Franco, *P. stricta* Spach.

Tiarella L.: *T. menziesii* is a synonym of *Tolmiea menziesii*.

Tillandsia L.: synonymies with *Allardtia*, *Anoplophytum*, *Billbergia*, *Catopsis*,
Cryptanthus, *Phytarrhiza*, *Platystachis*, *Pourretia*, *Streptocalyx*, *Vriesea*,
Wallisia.

Tradescantia L.: synonymies with *Aneilema*, *Commelina*, *Dichorisandra*, *Gibasis*,
Hadrodemas, *Phyodina*, *Pyrreima*, *Rhoeo*, *Spironema*, *Zebrina*.

Trisetum flavescens (L.) Beauv.: syn.: *Avena flavescens* L.

Triticum aestivum L.: syn.: *T. hybernum* L., *T. sativum* Lam., *T. vulgare*
Vill., *T. cereale* Schrank.

Tritonia Ker-Gawl.: synonymies with *Acidanthera*, *Crocasmia*, *Dichone*, *Gladio-*
lus, *Ixia*, *Montbretia*.

Trollius L.: *T. lilacinus* has the synonym *Hegemone lilacina*.

Vaccinium L.: synonymies with *Agapetes*, *Andromeda*, *Batodendron*, *Cyanococcus*,
Epigynium, *Herpothamnus*, *Hugeria*, *Oxycoccoides*, *Oxycoccus*, *Polycodium*, *Thibau-*
dia, *Vitis-idaea*.

Valerianella locusta (L.) Laterrade: syn.: *V. olitoria* (L.) Poll.

Vanda Jones: see under *Orchidaceae*. Synonymies with *Acampe*, *Aërides*, *Anota*,
Arachnanthe, *Esmeralda*, *Euanthe*, *Luisia*, *Phalaenopsis*, *Renanthera*, *Rhyncho-*
stylis, *Saccolabium*, *Sarcanthus*, *Stauroopsis*, *Vandopsis*.

Veratrum L.: *V. viride* has also been described under the name *Helonias viride*.

Verbena L.: synonymies with *Junellia*, *Lippia*.

Veronica L.: the genera *Hebe*, *Paederota*, *Veronicastrum* are either included in
Veronica, or separated.

Viburnum L.: *V. rigidum* has the synonym *Tinus rugosus*.

Vicia articulata Hornem.: syn.: *Ervum monanthum* L.

Vicia faba L.: syn.: *Faba bona* Med., *F. vulgaris* Moench.

Vicia sativa L.: the sub-species *nigra* (L.) Ehrh. (*angustifolia* (L.) Aschers.
et Graebn.) also has the synonym *V. angustifolia* L.

Vicia villosa Roth: according to ISTA, this species includes *V. dasycarpa* Ten.

Vigna unguiculata (L.) Walp.: synonym other than that indicated in the main table: Dolichos biflorus L. According to Zander, the sub-species have the following synonyms:

- ssp. cylindrica (L.) Van Eseltine ex Verdc.: V. catjang (Burm. f.) Walp., V. cylindrica (L.) Skeels
- ssp. sesquipedalis (L.) Verdc.: V. sesquipedalis (L.) Fruwirth, Dolichos sesquipedalis;
- ssp. unguiculata: (none mentioned).

Vinca L.: V. rosea L. is frequently separated from Vinca under the name Catharanthus roseus.

Viola L.: V. hederacea has also been described under the names Erpetion reniforme and E. hederaceum.

Vitis L.: the genera Ampelopsis, Cissus, Columella, Parthenocissus and Tetragium have been included in the genus Vitis by certain botanists, particularly by Bentham and Hooker in their Genera Plantarum. A great number of synonyms resulting from this conception are still in use. Other synonymies are due to the fact that certain species have been classified in two or three, or even four of the above-mentioned genera. Other synonymies with Muscadinia, Pterisanthes, Spinovitis.

Vriesea Lindl. corr. Beer: synonymies with Encholirion, Guzmania, Massangea, Tillandsia.

Vriesea splendens (Brongn.) Lem.: synonymies with V. speciosa, Tillandsia vittata, T. zebrina. V. splendens var. major hort. Duval. is a synonym of V. longibracteata (Bak.) Mez.

X Vuylstekeara hort.: see under Orchidaceae. Hybrids Cochlioda X Miltonia X Odontoglossum.

Weigela Thunb.: see under Diervilla Mill.

Wysteria Nutt.: synonymies with Glycine, Millettia, Wistaria.

Yucca L.: synonymies with Dasyilirion, Furcraea, Hesperaloë, Hesperoyucca, Nolina.

Yucca aloifolia L.: Y. draconis is a synonym of Y. aloifolia var. draconis.

Yucca baccata Torr.: syn.: Y. circinata. Y. baccata var. australis is a synonym of Y. torreyi Shafer (Y. macrocarpa (Torr.) Coville non Engelm.).

Yucca whipplei Torr.: syn.: Hesperoyucca whipplei.

Zantedeschia Spreng.: synonymies with Calla, Richardia.

Zelkova Spach: syn.: Abelicia. Synonymies with Hemiptelea, Ulmus.

Zygocactus K. Schum.: see under Epiphyllopsis...

INDEX OF ENGLISH COMMON NAMES
INDEX DES NOMS COMMUNS ANGLAIS
VERZEICHNIS DER ENGLISCHEN LANDESÜBLICHEN NAMEN

Acacia	Acacia	Bean (Kidney)	Phaseolus
- (False)	Robinia	- (Runner)	Phaseolus
African Cornlily	Ixia	- (Soya)	Glycine
- Lily	Agapanthus	- (Tick)	Vicia
- Violet	Saintpaulia	Bearberry	Arctostaphylos
Alder	Alnus	Beard Tongue	Penstemon
- (White)	Clethra	Beech	Fagus
Alfalfa	Medicago	- (Southern)	Nothofagus
Allspice (Japan)	Chimonanthus,	Beefsteak Plant	Perilla
	Meratia	Beet	Beta
Almond	Amygdalus,	Beetroot	Beta
	Prunus	Bell Flower	Campanula
Alum Root	Heuchera	- (Chinese)	Platycodon
Amaranth (Common Globe-) .	Gomphrena	- (Golden)	Forsythia
- (Gangea)	Amaranthus	- Heather	Erica
Amaryllis	Hippeastrum	- Tree (Silver-)	Halesia
- (Cluster-)	Lycoris	Bentgrass	Agrostis
American Laurel	Kalmia	Bergamot	Monarda
Andromeda (Japanese)	Pieris	Besom Heath	Erica
Angelica Tree (Japanese) .	Aralia	Bilberry	Vaccinium
Apple	Malus	Bill (Crane's)	Geranium
- (Crab)	Malus	- (Stork's)	Pelargonium
- (Golden)	Poncirus	Birch	Betula
- (Sugar)	Annona	Bird of Paradise Flower ..	Strelitzia
Apricot	Prunus	Bird's Foot Trefoil	Lotus
Arborvitae (Chinese)	Thuja	Black Mustard	Brassica
Artichoke (Globe)	Cynara	- Radish	Raphanus
- (Jerusalem)	Helianthus	- Salsify	Scorzonera
Arum (Ivy-)	Scindapsus	Blackberry	Rubus
Arum-lily	Zantedeschia	- Lily	Belamcanda
Asatsuki	Allium	Bladder Nut	Staphylea
Ash	Fraxinus	Blanket-flower	Gaillardia
- (Mountain)	Sorbus	Blazing Star	Liatris
Asparagus Fern	Asparagus	Bleeding Heart	Dicentra
Aster	Callistephus	Bloodflower	Asclepias
- (China)	Callistephus	Blue Beard	Caryopteris
- (Stoeck's)	Stokesia	Blueberry	Vaccinium
Aubergine	Solanum	Blue Bottle	Centaurea
Auricula	Primula	- Buffalo Grass	Cenchrus
Autumn-crocus	Colchicum	- Eyed Grass	Sisyrinchium
Avens	Geum	Bluegrass	Poa
Avocado	Persea	Blue Spirea	Caryopteris
Azalea	Rhododendron	Bog Rosemary	Andromeda
Azaleodendron	Rhododendron	Bottle (Blue)	Centaurea
Azuca-caa.....	Stevia	Bottle-brush	Callistemon
Azuki Red Bean	Phaseolus	Bottle Gourd	Lagenaria
		Bowstring Hemp	Sansevieria
Baby's Breath	Gypsophila	Box	Buxus
Bahia Grass	Paspalum	Bramble	Rubus
Balloon Flower	Platycodon	Bridal Wreath	Spiraea
Balsam	Impatiens	Broad Bean	Vicia
- Pear	Momordica	Broccoli	Brassica
Banana	Musa	Brome	Bromus
Barberry	Berberis	Broom	Cytisus
Barley	Hordeum	-	Genista
Bay (Rose)	Nerium	- Corn	Sorghum
Beam (White)	Sorbus	- (Spanish)	Spartium
Bean (Azuki Red)	Phaseolus	Brown Mustard	Brassica
- (Broad)	Vicia	- Top	Agrostis
- (Castor-)	Ricinus	Brussels Sprouts	Brassica
- (Field)	Vicia	Buckthorn	Rhamnus
- (French)	Phaseolus	Buckwheat	Fagopyrum
- (Horse)	Vicia	Buffalo Grass (Blue)	Cenchrus
- (Indian)	Catalpa	Bugwort	Cimicifuga
		Bullace	Prunus

Burdock (Edible)	Arctium	Cineraria (Florists') ...	Senecio
Bush Vetch	Vicia	Cinquefoil	Potentilla
Busy Lizzie	Impatiens	Citron	Citrus
Butter Bur (Japanese) ...	Petasites	Clover	Trifolium
Buttercup	Ranunculus	Club Moss	Selaginella
Butterfly-bush	Buddleja	Cluster-amaryllis	Lycoris
Butterfly Flower (Wingleaf)	Schizanthus	Cockscomb	Celosia
- Lily	Hedychium	Cocksfoot	Dactylis
		Coffee	Coffea
Caa-ehe	Stevia	Columbine	Aquilegia
Cabbage	Brassica	Common Four O'clock	Mirabilis
Cactus (Christmas)	Zygocactus	- Globe-amaranth	Gomphrena
- (Crab)	Zygocactus	- Hyacinth	Hyacinthus
- (Easter)	Epiphyllopsis	- Millet	Panicum
Calabash Cucumber	Lagenaria	- Sage	Salvia
Calabrese	Brassica	- Snapdragon	Antirrhinum
Calico Bush	Kalmia	- Tobacco	Nicotiana
California Poppy	Eschscholzia	- Vetch	Vicia
Calla	Zantedeschia	Cone Flower	Rudbeckia
Campion	Lychnis	Conifers	Coniferae
Camphor Laurel	Cinnamomum	Coral Flower	Heuchera
- Tree	Cinnamomum	Corn (Broom)	Sorghum
Canary Grass	Phalaris	Cornel	Cornus
- Seed	Phalaris	Cornelian Cherry	Cornus
Candytuft	Iberis	Cornflower	Centaurea
Cape Cowslip	Lachenalia	Cornish Heath	Erica
- Figwort	Physalis	Cornlily (African)	Ixia
- Gooseberry	Physalis	Cornsalad	Valerianella
Caraway	Carum	Corn Spurry	Spergula
Carnation	Dianthus	Cotton	Gossypium
Carrot	Daucus	Courgette	Cucurbita
Cast-iron Plant	Aspidistra	Cowpea	Vigna
Castorbean	Ricinus	Cowslip	Primula
Catchfly	Silene	- (Cape)	Lachenalia
Cat Mint	Nepeta	Crab Apple	Malus
Cauliflower	Brassica	- Cactus	Zygocactus
Cedar (Japanese)	Cryptomeria	Cranberry	Vaccinium
Celeriac	Apium	Crane's Bill	Geranium
Celery	Apium	Crape Myrtle	Lagerstroemia
Chamomile	Anthemis	Creeper (Virginia)	Parthenocissus
- (False)	Boltonia	Cress	Lepidium
Cherimoya	Annona	- (Indian)	Tropaeolum
Cherry	Prunus	Crested Dog's-tail	Cynosurus
- (Cornelian)	Cornus	Crocus	Crocus
- (Dwarf)	Prunus	- (Autumn-)	Colchicum
- (Ground)	Prunus	Cross-leaved Heath	Erica
- laurel	Prunus	Croton	Codiaeum
- plum	Prunus	Crown of Thorns	Euphorbia
- (Rock)	Prunus	Cucumber	Cucumis
- (Sour)	Prunus	- (Calabash)	Lagenaria
- (Sweet)	Prunus	Cupid's Dart	Catananche
Chervil	Anthriscus	Currant	Ribes
Chestnut	Castanea	Cypress (Hinoki)	Chamaecyparis
- (Horse)	Aesculus	- Vine	Quamoclit
Chickling Vetch (Dwarf) .	Lathyrus		
Chick-pea	Cicer	Daffodil	Narcissus
Chicory	Cichorium	Daisy	Chrysanthemum
Chilean Fire Bush	Embothrium	- Bush	Olearia
Chili	Capsicum	- (English)	Bellis
China Aster	Callistephus	- (Michaelmas)	Aster
Chinese Arborvitae	Thuja	- (Paris)	Chrysanthemum
- Bell-flower	Platycodon	- (Shasta)	Chrysanthemum
- Lantern Plant	Physalis	- (Tree)	Olearia
- Quince	Pseudocydonia	- (True)	Bellis
Chinkerinchee	Ornithogalum	Dallisgrass	Paspalum
Chives	Allium	Dalmatian Pyrethrum	Chrysanthemum
Chokeberry	Aronia	Damson	Prunus
Christmas Cactus	Zygocactus	Day-lily	Hemerocallis
- Rose	Helleborus	Devil-in-a-bush	Nigella
Christ's Thorn	Euphorbia	Devil's Tongue	Amorphophallus

Devil's Walking Stick	Aralia	Gangea Amaranth	Amaranthus
Diervilla	Diervilla,	Garden Nasturtium	Tropaeolum
	Weigela	- Pea	Pisum
Dill	Anethum	Garlic	Allium
Dishcloth Gourd	Luffa	Gayfeather	Liatris
Dog's-tail (Crested)	Cynosurus	Gentian	Gentiana
Dogwood	Cornus	- (Prairie)	Eustoma
Dorset Heath	Erica	Geranium	Pelargonium
Douglas Fir	Pseudotsuga	Germander	Teucrium
Dracena	Dracaena	Gherkin	Cucumis
Dragon Tree	Dracaena	Ginger	Zingiber
Dropwort (Water)	Oenanthe	- -lily	Hedychium
Dutchman's Breeches	Dicentra	Ginseng	Panax
Dwarf Cherry	Prunus	Globe-amaranth (Common) ..	Gomphrena
- Chickling Vetch	Lathyrus	- Artichoke	Cynara
		- Flower	Trollius
		- Thistle	Echinops
Easter Cactus	Epiphyllopsis	Glory (Morning)	Pharbitis
East Indian Lotus	Nelumbo	- (Star-)	Quamoclit
Edible Burdock	Arctium	Gloxinia	Sinningia
Eggplant	Solanum	Goats' Rue	Galega
Elder	Sambucus	Golden Apple	Poncirus
Elm	Ulmus	- Bell	Forsythia
Endive	Cichorium	- Chain	Laburnum
English Daisy	Bellis	- Oatgrass	Trisetum
Enokitake	Flammulina	- Rod	Solidago
Evening Primrose	Oenothera	Combo	Abelmoschus
Evergreen	Euonymus	Gooseberry	Ribes
Everlasting	Helichrysum	- (Cape)	Physalis
- (Winged)	Ammobium	Gorse	Ulex
		Gourd (Bottle)	Lagenaria
		- (Dishcloth)	Luffa
		- (Sponge)	Luffa
		- (Wax)	Benincasa
False Acacia	Robinia	Granadilla	Passiflora
- Chamomile	Boltonia	Grape (Oregon)	Mahonia
- Flax (Large-seeded) ...	Camelina	Grapefruit	Citrus
- Oatgrass	Arrhenatherum	Grass Pea Vine	Lathyrus
Fennel	Foeniculum	Grey Heath	Erica
Fenugreek	Trigonella	Ground Cherry	Prunus
Fern (Asparagus)	Asparagus	Groundnut	Arachis
- (Ladder)	Nephrolepis	Guava	Psidium
- (Maidenhair)	Adiantum	Guelder Rose	Viburnum
- (Sword-)	Nephrolepis	Gyp	Gypsophila
Fescue	Festuca		
Field Bean	Vicia		
- Brome	Bromus		
- Pea	Pisum		
Fig	Ficus	Hairy Vetch	Vicia
Figwort (Cape)	Phygelius	Hardings Grass	Phalaris
Filbert	Corylus	Hardy Plumbago	Ceratostigma
Fir (Douglas)	Pseudotsuga	Hawthorn	Crataegus
- (Sachalin)	Abies	Hazelnut	Corylus
Fire Bush (Chilean)	Embothrium	Hazel (Winter)	Corylopsis
Firethorn	Pyracantha	- (Witch-)	Hamamelis
Flax	Linum	Heath	Erica
- (Large-seeded False) ..	Camelina	- (Besom)	Erica
- (New Zealand)	Phormium	- (Cornish)	Erica
- (Toad-)	Linaria	- (Cross-leaved)	Erica
Flea-bane	Erigeron	- (Dorset)	Erica
Florists' Cineraria	Senecio	- (Grey)	Erica
Flowering Quince	Chaenomeles,	- (Scotch)	Erica
	Cydonia	- (Spanish)	Erica
	Tiarella	- (St. Dabeoc's)	Daboecia
Foam Flower	Raphanus	- (Tree)	Erica
Fodder Radish	Myosotis	Heather	Calluna
Forget-me-not	Mirabilis	- (Bell)	Erica
Four O'clock (Common)	Digitalis	Hedge Vetch	Vicia
Foxglove	Alopecurus	Hellebore	Helleborus
Foxtail (Meadow)	Setaria	Hemp	Cannabis
- Millet	Rhynchosstylis	Hemp (Bowstring)	Sansevieria
Fox Tail Orchid	Phaseolus	Hen of the Woods	Grifola
French Bean	Hosta	Herb Lily	Alstroemeria
Funkia			

Hercules Club	Aralia	Larch	Larix
Hinoki Cypress	Chamaecyparis	Large-seeded False Flax ..	Camelina
Hiratake	Pleurotus	Larkspur	Delphinium
Holly	Ilex	Laurel (American)	Kalmia
- (Sea)	Eryngium	- (Camphor)	Cinnamomum
Hollyhock	Althaea	- (Cherry-)	Prunus
Honewort (Japanese)	Cryptotaenia	- (Mountain)	Kalmia
Honey Locust	Gleditsia	- (Portugal)	Prunus
Honeysuckle	Lonicera	Laurustinus	Viburnum
Hop	Humulus	Lavender	Lavandula
Hornbeam	Carpinus	- (Sea)	Limonium
Horse Bean	Vicia	Laver (Purple)	Porphyra
- Chestnut	Aesculus	Leek	Allium
- Radish	Armoracia	Lemon	Citrus
Hungarian Vetch	Vicia	Lenten Rose	Helleborus
Husk-tomato	Physalis	Lentil	Lens
Hyacinth (Common)	Hyacinthus	Lettuce	Lactuca
- (Wild)	Scilla	- (Lamb's)	Valerianella
		Lilac	Syringa
		Lily	Lilium
		- (African)	Agapanthus
		- (African Corn-)	Ixia
		- (Arum-)	Zantedeschia
		- (Blackberry)	Belamcanda
		- (Butterfly)	Hedychium
		- (Day-)	Hemerocallis
		- (Ginger-)	Hedychium
		- (Herb)	Alstroemeria
		- (Ifafa)	Cyrtanthus
		- (Kaffir-)	Clivia
		- of the Valley	Convallaria
		- (Plantain)	Hosta
		- (Toad-)	Tricyrtis
		- (Torch-)	Kniphofia
		- (Water-)	Nymphaea
Jacob's Ladder	Polemonium	Lime	Tilia
Japan Allspice	Chimonanthus,	Ling	Calluna
	Meratia	Linseed	Linum
Japanese Andromeda	Pieris	Locust (Honey)	Gleditsia
- Angelica Tree	Aralia	Loosestrife	Lythrum
- Butter Bur	Petasites	Loquat	Eriobotrya
- Cedar	Cryptomeria	Lotus (East Indian)	Nelumbo
- Honewort	Cryptotaenia	Lovegrass (Weeping)	Eragrostis
- Persimmon	Diospyros	Love-in-a-mist	Nigella
Jasmine	Jasminum	Lucerne	Medicago
Jerusalem Artichoke	Helianthus	Lungwort	Pulmonaria
- Sage	Phlomis	Lupin	Lupinus
Jew's Ear	Auricularia		
- Mallow	Kerria	Maidenhair Fern	Adiantum
Jonquil	Narcissus	Maize	Zea mays
Judas Tree	Cercis	Major Bird's Foot Trefoil	Lotus
Juniper	Juniperus	Mallow	Malva
		- (Jew's)	Kerria
Kaffir-lily	Clivia	- (Prairie)	Sidalcea
Kaki	Diospyros	- (Rose-)	Hibiscus
Kale	Brassica	- (Tree)	Hibiscus
Katsura Tree	Cercidiphyllum	Mandarine	Citrus
Kenaf	Hibiscus	Mangel	Beta
Kidney Bean	Phaseolus	Mango	Mangifera
King Cup	Caltha	Manuka	Leptospermum
Kiwifruit	Actinidia	Maple	Acer
Knotgrass	Polygonum	Marguerite	Chrysanthemum
Knotweed	Polygonum	Marigold	Tagetes
Kohlrabi	Brassica	- (Marsh)	Caltha
Konnyaku	Amorphophallus	- (Pot)	Calendula
Kumquat	Fortunella	Marjoram (Sweet)	Origanum
		Marrow	Ocubita
Ladder Fern	Nephrolepis	Marsh Marigold	Caltha
Lady Palm	Rhapis	Marvel of Peru	Mirabilis
Lady's Slipper	Paphiopedilum	Meadow Foxtail	Alopecurus
Lamb's Lettuce	Valerianella		
Lantern Plant (Chinese) ..	Physalis		

Meadow-grass	Poa	Oriental Poppy	Papaver
- Rue	Thalictrum	Ox-eye (North American) ..	Heliopsis
Medick	Medicago	Oxlip	Primula
Megasea	Bergenia	Oyster Mushroom	Pleurotus
Melon	Cucumis		
- (Water-)	Citrullus		
Mespilus (Snowy)	Amelanchier	Paeony	Paeonia
Michaelmas Daisy	Aster	Palm (Lady)	Rhapis
Milfoil	Achillea	Pampas Grass	Cortaderia
Milkweed	Asclepias	Pansy	Viola
Millet (Common)	Panicum	- orchid	Miltonia
- (Foxtail)	Setaria	Paris Daisy	Chrysanthemum
- (Italian)	Setaria	Parsley	Petroselinum
- (Pearl)	Pennisetum	Parsnip	Pastinaca
Mint	Mentha	Pasque Flower	Pulsatilla
- (Cat)	Nepeta	Passion Flower	Passiflora
Mirabelle	Prunus	Pawpaw	Carica
Mock Orange	Philadelphus	Pea	Pisum
Monkshood	Aconitum	- (Chick-)	Cicer
Morello	Prunus	- (Cow-)	Vigna
Morning Glory	Pharbitis	- (Field)	Pisum
Moss (Club)	Selaginella	- (Garden)	Pisum
- (Rose-)	Portulaca	- (Grass - Vine)	Lathyrus
Moth Orchid	Phalaenopsis	- (Sweet)	Lathyrus
Mountain Ash	Sorbus	- (Tangier)	Lathyrus
- Laurel	Kalmia	Peach	Prunus
Mugwort	Artemisia	- plum	Prunus
Mulberry	Morus	Peanut	Arachis
Mullein	Verbascum	Pear	Pyrus
- Pink	Lychnis	- (Balsam)	Momordica
Mushroom	Agaricus	Pearl Millet	Pennisetum
- (Oyster)	Pleurotus	Pecan Nut	Carya
Mustard (Black)	Brassica	Pepper Bush (Sweet)	Clethra
- (Brown)	Brassica	- (Sweet)	Capsicum
- (White)	Sinapis	Periwinkle	Vinca
Myrobalan	Prunus	Persimmon (Japanese)	Diospyros
Myrtle (Crape)	Lagerstroemia	Pine	Pinus
		Pineapple	Ananas
		Pink	Dianthus
		- (Mullein)	Lychnis
		- (Sea)	Armeria
Nameko	Pholiota	Plane	Platanus
Nasturtium (Garden)	Tropaeolum	Plantain Lily	Hosta
New Zealand Flax	Phormium	Plum	Prunus
North American Ox-eye	Heliopsis	- (Cherry-)	Prunus
Nut (Bladder)	Staphylea	- (Peach-)	Prunus
- (Pecan)	Carya	Plumbago (Hardy)	Ceratostigma
- (Queensland)	Macadamia	Plumed Thistle	Cirsium
- (Wal-)	Juglans	Poinsettia	Euphorbia
		Poker (Red Hot)	Kniphofia
Oak	Quercus	Pomegranate	Punica
Oatgrass (False)	Arrhenatherum	Poplar	Populus
- (Golden)	Trisetum	Poppy	Papaver
- (Tall)	Arrhenatherum	- (California)	Eschscholzia
Oats	Avena	- (Opium)	Papaver
Obedient Plant	Physostegia	- (Oriental)	Papaver
Okra	Abelmoschus	Portugal Laurel	Prunus
Oleander	Nerium	Potato	Solanum
Olive	Olea	- (Sweet)	Ipomoea
One-flowered Vetch	Vicia	Pot Marigold	Calendula
Onion	Allium	Prairie Gentian	Eustoma
Opium Poppy	Papaver	- Mallow	Sidalcea
Orange	Citrus	Primrose	Primula
- (Mock)	Philadelphus	- (Evening)	Oenothera
- (Trifoliate)	Poncirus	Privet	Ligustrum
Orchard Grass	Dactylis	Protea	Aulax
Orchid (Fox Tail)	Rhynchostylis		Leucadendron,
- Moth	Phalaenopsis		Leucospermum,
- (Pansy-)	Miltonia		Mimetes,
- (Tree)	Epidendrum		Orothamnus,
Orchids	Orchidaceae		Paranomus,
Oregon Grape	Mahonia		

Protea	Protea,	Serviceberry	Amelanchier
Pumpkin	Serruria	Sesame	Sesamum
Purple Laver	Cucurbita	Shallot	Allium
Pyrethrum	Porphyra	Sharon (Rose of)	Hypericum
	Chrysanthemum	Shasta Daisy	Chrysanthemum
		Shiitake	Lentinus
		Shrubby Cinquefoil	Potentilla
		- Speedwell	Hebe
Queensland Nut	Macadamia	Silk-tree	Albizia
Quince	Cydonia	Silkweed	Asclepias
- (Chinese)	Pseudocydonia	Silver-bell Tree	Halesia
- (Flowering)	Chaenomeles	Silver Vine	Scindapsus
- (Flowering)	Cydonia	Slipper Flower	Calceolaria
		Slipperwort	Calceolaria
		Smoke Tree	Cotinus
Radish	Raphanus	Snapdragon (Common)	Antirrhinum
- (Black)	Raphanus	Sneezeweed	Helenium
- (Fodder)	Raphanus	Snowball Tree	Viburnum
- (Horse)	Armoracia	Snowberry	Symphoricarpos
Rakyo	Allium	Snowdrop Tree	Halesia
Rape	Brassica	Snowy Mespilus	Amelanchier
Raspberry	Rubus	Solomon's Seal	Polygonatum
Red Bean (Azuki)	Phaseolus	Sop (Sweet)	Annona
- Hot Poker	Kniphofia	Sorrel (Wood-)	Oxalis
- Top	Agrostis	Sour Cherry	Prunus
Reed Canary Grass	Phalaris	Southern Beech	Nothofagus
Rhodesgrass	Chloris	Soya Bean	Glycine
Rhubarb	Rheum	Soybean	Glycine
Rice	Oryza	Spanish Broom	Spartium
Rock Cherry	Prunus	- Heath	Erica
- Rose	Cistus	Speedwell	Veronica
Rose	Rosa	- (Shrubby)	Hebe
- Bay	Nerium	Spelt	Triticum
- Campion	Lychnis	Spider Flower	Cleome
- (Christmas)	Helleborus	- Wort	Tradescantia
- (Guelder)	Viburnum	Spinach	Spinacia
- (Lenten)	Helleborus	Spindle Tree	Euonymus
- mallow	Hibiscus	Spirea	Spiraea
- moss	Portulaca	- (Blue)	Caryopteris
- of Sharon	Hypericum	Sponge Gourd	Luffa
- (Rock)	Cistus	Spruce	Picea
- (Sun)	Helianthemum	Spurges	Euphorbia
Rosemary	Rosmarinus	Spurry (Corn)	Spergula
- (Bog)	Andromeda	Squash	Cucurbita
Rowan	Sorbus	Squill	Scilla
Rubber Plant	Ficus	St. Dabeoc's Heath	Daboecia
Rue	Ruta	St. John's Wort	Hypericum
- (Goats')	Galega	Star (Blazing)	Liatris
- (Meadow)	Thalictrum	- glory	Quamoclit
Runner Bean	Phaseolus	- Ipomoea	Quamoclit
Rush	Juncus	- of Bethlehem	Ornithogalum
Russian Sage	Perovskia	Stock	Matthiola
Rye	Secale	Stoeck's Aster	Stokesia
Ryegrass	Lolium	Stonecrop	Sedum
		Stork's Bill	Pelargonium
		Strawberry	Fragaria
		- Tree	Arbutus
Sachalin Fir	Abies	Sugar Apple	Annona
Safflower	Carthamus	- Cane	Saccharum
Sage	Salvia	Sumach	Rhus
- (Common)	Salvia	Sunflower	Helianthus
- (Jerusalem)	Phlomis	Sun Plant	Portulaca
- (Russian)	Perovskia	- Rose	Helianthemum
Sainfoin	Onobrychis	Swede	Brassica
Salsify (Black)	Scorzonera	- Rape	Brassica
Satin Flower	Sisyrinchium	Sweet Cherry	Prunus
Saxifrage	Saxifraga	- Gum	Liquidambar
Scabious	Scabiosa	- Marjoram	Origanum
Scotch Heath	Erica	- Pea	Lathyrus
Sea Holly	Eryngium	- Pepper	Capsicum
- Lavender	Limonium	- Pepper Bush	Clethra
- Pink	Armeria		
Serradella	Ornithopus		

Sweet Potato	Ipomoea	Vetch	Vicia
- Sop	Annona	- (Bush)	Vicia
- William	Dianthus	- (Common)	Vicia
- (Winter)	Chimonanthus	- (Dwarf Chickling)	Lathyrus
- (Winter)	Meratia	- (Hairy)	Vicia
Swiss Chard	Beta	- (Hedge)	Vicia
Sword-fern	Nephrolepis	- (Hungarian)	Vicia
		- (One-flowered)	Vicia
Tail Flower	Anthurium	Vinca	Catharanthus
Tall Oatgrass	Arrhenatherum	Vine	Vitis
Tamagitake	Pleurotus	- (Cypress)	Quamoclit
Tamarisk	Tamarix	- (Grass Pea)	Lathyrus
Tangelo	Citrus	- (Silver)	Scindapsus
Tangier Pea	Lathyrus	Violet	Viola
Tangor	Citrus	- (African)	Saintpaulia
Taro	Colocasia	Virginia Creeper	Parthenocissus
Taxads	Taxales		
Tea	Thea	Wallflower	Cheiranthus
- Tree	Leptospermum	Walnut	Juglans
Thistle (Globe)	Echinops	Water Dropwort	Oenanthe
- (Plumed)	Cirsium	Waterlily	Nymphaea
Thrift	Armeria	Watermelon	Citrullus
Throatwort	Trachelium	Wax Gourd	Benincasa
Thuya	Thuja	Wayfaring Tree	Viburnum
Tick Bean	Vicia	Weeping Lovegrass	Eragrostis
Tickseed	Coreopsis	Wheat	Triticum
Timothy	Phleum	White Alder	Clethra
Toadflax	Linaria	- Mustard	Sinapis
- -lily	Tricyrtis	Whitebeam	Sorbus
Tobacco (common)	Nicotiana	Whortleberry	Vaccinium
Tomatillo	Physalis	Wild Hyacinth	Scilla
Tomato	Lycopersicon,	Willow	Salix
	Solanum	Winged Everlasting	Ammobium
- (Husk-)	Physalis	Wingleaf Butterfly Flower	Schizanthus.
Torch-lily	Kniphofia	Winter Hazel	Corylopsis
Touch-me-not	Impatiens	- Sweet	Chimonanthus
Tree Daisy	Olearia	- Sweet	Meratia
- Heath	Erica	Witch-hazel	Hamamelis
- Mallow	Hibiscus	Wood-sorrel	Oxalis
- Orchid	Epidendrum	Woundwort	Stachys
Trefoil (Bird's Foot)	Lotus		
- (Yellow)	Medicago	Yam	Dioscorea
Tricolor Ipomoea	Ipomoea	Yarrow	Achillea
Trifoliate Orange	Poncirus	Yellow Trefoil	Medicago
True Daisy	Bellis	Yew	Taxus
Trumpet Flower	Campsis,	Yorkshire Fog	Holcus
	Tecoma	Youth and Age	Zinnia
Tulip	Tulipa	- -and-old-age	Zinnia
- Tree	Liriodendron		
Turnip	Brassica		
- Rape	Brassica		
- -rooted Parsley	Petroselinum
