INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS

GENEVA

COUNCIL

**Twenty-first Ordinary Session
Geneva, October 15 and 16, 1987**

**PROGRESS REPORT ON THE WORK OF THE TECHNICAL COMMITTEE AND
THE TECHNICAL WORKING PARTIES**

prepared by the Office of the Union

TECHNICAL COMMITTEE

1. According to a decision taken by the Council at its twentieth ordinary session, the twenty-third session of the Technical Committee will take place in the week preceding the twentieth session of the Council. As the twenty-second session of the Technical Committee took place on November 20 and 21, 1986, and an oral report has already been given to the Council at its nineteenth ordinary session, the present document deals, as far as the Technical Committee is concerned, mainly with its program for the twenty-third session.

2. The twenty-third session of the Committee is to take place from October 6 to 8, 1987, in Geneva. A joint meeting with the Administrative and Legal Committee is scheduled for October 8. It is planned that the following business be conducted during the session: hearing of Progress Reports on the work of the Technical Working Parties; discussion of questions raised by the Technical Working Parties; discussion of the introduction of Combined Over-Years Analysis for further species and discussion of the necessary level of significance for grasses; hearing the report on the study of various electrophoretic methods; hearing the outcome of discussions in the Technical Working Party for Automation and Computer Programs on a possible new method of testing for homogeneity; discussion of priorities for the extension of the list of species for which protection may be sought in the Member States. In addition the Technical Committee will have to take decisions on the following Test Guidelines which will be submitted by the Technical Working Parties for final adoption:

TG/28/7(proj.) - Zonal Pelargonium, Ivy-leaved Pelargonium (Revision)
TG/29/5(proj.) - Alstroemeria (Revision)
TG/51/5(Proj.) - Gooseberry (Revision)
TG/101/2(proj.) - Christmas Cactus
TG/104/3(proj.) - Melon
TG/105/2(proj.) - Chinese Cabbage
TG/106/2(proj.) - Leaf Beet
TG/109/2(proj.) - Show and Fancy Pelargonium
TG/110/2(proj.) - Guava
TG/111/2(proj.) - Macadamia
TG/112/2(proj.) - Mango
TG/113/1(proj.) - Easter Cactus

3. Annexes I and II hereto contain an overview of the status of Test Guidelines as at July 1, 1987.

4. It is planned, in the joint meeting with the Administrative and Legal Committee to discuss the definition and testing of hybrid varieties and the question of minimum distances between varieties.

TECHNICAL WORKING PARTIES

Progress Report on the Work of the Technical Working Party for Agricultural Crops (TWA)

5. The Technical Working Party for Agricultural Crops held its sixteenth session from June 23 to 25, 1987, in Geneva, Switzerland, under the Chairmanship of Mr. J. Guiard (France). The detailed report on that session is given in Document TWA/XVI/10 Prov. At that session, the Working Party completed its work on the Test Guidelines for Common Vetch (Revision) and for Durum Wheat (Revision) to be communicated to the professional organizations for their comments. It further rediscussed the revision of the Test Guidelines for Lucerne and for Turnip and Turnip Rape, both of which will, however, require further discussion at the coming session. In addition to its discussions on the drafting of Test Guidelines and their revision, the Working Party dealt with a number of general items and reached the following conclusions:

(i) It noted the progress of work in the Technical Working Party for Automation and Computer Programs, particularly as regards the application of Combined Over-Years Analysis. It expressed some concern at the rapid introduction of that method and warned of proposing and introducing precipitated changes in other fields in which the TWC was active.

(ii) It took note of the change adopted in the standard Test Guidelines.

(iii) It held a brief discussion on the concept of distinctness and homogeneity with respect to discontinuous characteristics of not truly self-pollinated varieties and of cross-pollinated varieties. In that context, it also discussed the definition of hybrid varieties and of synthetic varieties and the matter of distances between varieties.

(iv) A written report is to be submitted to the Working Party on the status of results of electrophoretic testing of wheat in a number of member States.

6. Since the term of office of the current Chairman of the Working Party, Mr. J. Guiard (France), was to come to an end at the forthcoming ordinary session of the Council, the Working Group suggested to the Technical Committee that it propose Mr. D.P. Feeley (Ireland) to the Council as the new Chairman of the Working Party.

7. The seventeenth session of the Working Party will take place from July 5 to 8, 1988, in Surgères, France. In view of the comprehensive agenda, an additional day of discussion has been scheduled. During the session, the Working Party will rediscuss - with the aim of submitting the documents to the Technical Committee for adoption - the working papers on revision of the Test Guidelines for Lucerne, for Turnip and Turnip Rape, for Common Vetch and for Durum Wheat. In addition, it will discuss or rediscuss working papers for Test Guidelines for Triticale, Sorghum, Safflower, Bent (Revision), Ryegrass (Revision) and Peas (Revision) and hear the reports of the subgroups. It is further planned to discuss or rediscuss the following matters: progress report on the work of the Technical Working Party for Automation and Computer Programs; concept of distinctness and homogeneity with respect to discontinuous characteristics in not truly self-pollinated varieties and in cross-pollinated varieties, hybrid varieties; results of electrophoretic tests in wheat. The items "Electrophoresis, Triticale and Durum Wheat" are scheduled for the second day of the session in the presence of technical experts appointed by the professional organizations. Technical experts from the professional organizations are also to be invited to the meeting of the Sub-group on Grasses.

Report on the Progress of Work of the Technical Working Party for Automation and Computer Programs (TWC)

8. The Technical Working Party for Automation and Computer Programs held its fifth session from June 10 to 12, 1987, at Lyngby, near Copenhagen, Denmark, under the chairmanship of Mrs. V. Silvey (United Kingdom). The detailed report on that session is given in Document TWC/V/8 Prov. At its session, the Working Party discussed the following items and took the following decisions:

(i) It noted the decision of the Technical Committee with respect to its proposal to replace the present criterion of distinctness for grasses by Combined Over-Years Analysis (COY). It further noted the experience gained with that method and agreed to continue the studies on a suitable range of confidence and on application of the method to varieties of other species, particularly vegetable species.

(ii) It further noted the progress of a possible alternative to the UPOV testing methods for homogeneity in cross-fertilized plants. However, that method would require further study during the forthcoming year.

(iii) It took note of the differences in homogeneity testing of self-fertilized plants, but saw no possibility, for the time being, of overcoming those difficulties.

(iv) It proposed to the Technical Working Parties that more attention be paid to a logical sequence of states of expression in the case of really quantitative characteristics which are, however, reproduced in a qualitative manner, particularly those concerning shape.

(v) It discussed in detail the various methods used in the member States to compensate for missing data in the bases for calculating the least significant difference (LSD), the number of years taken into account in the calculations and the methods of stabilizing data over a number of years. The Working Party will continue to collect information on these differences in order to facilitate the achievement of harmonized methods.

(vi) It took note of progress in the field of electronic exchange of information and of the difficulties that had arisen in the preceding year.

(vii) It took note of the collection of information on existing hardware and computer languages used in the member States and is to update that information, particularly as regards the database management systems used in the member States.

(viii) It took note of the efforts made to develop a library of software for the assessment of varieties which could be exchanged between the Offices of the member States.

9. Since the term of office of Mrs. Silvey (United Kingdom) was to come to an end at the next ordinary session of the Council, the Working Group suggested to the Technical Committee that it propose Dr. F. Laidig (Federal Republic of Germany) to the Council as new Chairman of the Working Group for the coming three years.

10. The sixth session of the TWC is to take place from June 7 to 9, 1988, in Edinburgh, United Kingdom. At the session, the Working Party will discuss or rediscuss the following items: Combined Over-Years Analysis (COY); survey of statistical practices; testing for homogeneity of cross-fertilized plants; testing for homogeneity of self-fertilized plants; variety descriptions; harmonization of official gazettes; report on existing database management systems; programs which may be exchanged between the computer centers of the Offices of the member States; progress report on machine vision techniques for variety identification; non-parametric methods; questions submitted by other Technical Working Parties of UPOV.

Report of the Progress of Work of the Technical Working Party for Fruit Crops (TWF)

11. The Technical Working Party for Fruit Crops held its eighteenth session from March 18 to 20, 1987, under the chairmanship of Mr. F. Schneider (Netherlands) in Kiryat Anavim, Israel. Meetings of a number of subgroups took place at the same venue on March 17 in order to expedite discussion of working papers during the session of the Working Party. The detailed report on that session is given in Document TWF/XVIII/13 Prov. At its session, the Working Party finalized the Test Guidelines for Gooseberry (Revision), Guava, Macadamia and Mango, for submittal to the Technical Committee for final adoption. It also completed its work on the Test Guidelines for Blackberry (Revision) for communication to the professional organizations for their comments. In addition to its discussions on the drafting of Test Guidelines and their revision, the Working Party dealt with a number of general items.

12. Since the term of office of Mr. Schneider (Netherlands) was to come to an end at the next ordinary session of the Council, the Working Party suggested to the Technical Committee that it propose Mr. Bar-Tel (Israel) to the Council as the new Chairman of the Working Party.

13. The nineteenth session of the Working Party will take place from June 29 to July 1, 1988, in Hanover, Federal Republic of Germany. Various subgroups will possibly meet on June 28 at the same venue. During the session, the Working Party will rediscuss the working papers for the Test Guidelines for Blackberry (Revision) with a view to their submission to the Technical Committee. Additionally, working papers for Test Guidelines for Banana, Chestnut, Prunus Rootstocks, Walnut, Blackcurrant (Revision), Red and White Currant (Revision), Citrus (Revision) and Jostaberry will be discussed or rediscussed.

Progress Report on the Work of the Technical Working Party for Ornamental Plants and Forest Trees (TWO)

14. The Technical Working Party for Ornamental Plants and Forest Trees held its twentieth session from March 23 to 26, 1987, under the chairmanship of Mr. B. Bar-Tel (Israel) at Kiryat Anavim, Israel. The detailed report on the session is given in Document TWO/XX/20 Prov. At the session, the Working Party finalized the Test Guidelines for Alstroemeria (Revision), Christmas Cactus, Easter Cactus, Regal Pelargonium, Zonal Pelargonium and Ivy-Leaved Pelargonium (Revision) with a view to their submission to the Technical Committee for final adoption. It further completed its work on the Test Guidelines for Tuberous Begonia Hybrids, Exacum, Tulip and Euphorbia Fulgens (Revision) for communication to the professional organizations for their comments. The Working Party further dealt with Test Guidelines for Gladiolus and for Hortensia, which will nevertheless require further discussion at the forthcoming meeting. In addition to the discussion on the drafting of Test Guidelines, the Working Party also dealt with various general items.

15. Since the term of office of Mr. Bar-Tel (Israel) was to end with the next ordinary session of the Council, the Working Group suggested to the Technical Committee that it propose Mr. Barendrecht (Netherlands) to the Council as the new chairman of the Working Party.

16. The twenty-first session of the Working Party will be held from June 20 to 24, 1988, in Ghent, Belgium. At that session, the Working Party intends to finalize the Test Guidelines for Gladiolus, Tuberous Begonia Hybrids, Exacum, Tulip and Euphorbia Fulgens (Revision) for submission to the Technical Committee for adoption. It further intends to discuss or rediscuss the following working papers on Test Guidelines: Chinkerinchee, Chrysanthemum (Revision), Carnation (Revision), Dieffenbachia, Gerbera (Revision), Hortensia, Iris (bulbous), Lachenalia, Leucadendron, Leucospermum, Norway Spruce, Protea, Pyracantha, Rhododendron (Revision), Rose (Revision), Spathiphyllum and Weigela. It is additionally planned to discuss or rediscuss the following matters: report on special developments in the field of plant variety protection; list of reference books and documents; matters for the Technical Working Party on Automation and Computer Programs; color charts; improved efficiency in variety testing.

Progress Report on the Work of the Technical Working Party for Vegetables (TWV)

17. The Technical Working Party for Vegetables held its twentieth session from June 2 to 4, 1987, in Bamberg, Federal Republic of Germany, under the chairmanship of Dr. J. Habben (Federal Republic of Germany). The detailed report on that session is given in Document TWV/XX/13 Prov. At that session, the Working Party finalized the Test Guidelines for Chinese Cabbage, Leaf Beet

and Melon for submission to the Technical Committee for final adoption. It further completed its work on Test Guidelines for Vegetable Marrow and Pumpkin, Endive, Egg Plant, Runner Bean (Revision) and Black Salsify for communication to the professional organizations for their comments. It referred the finalization of the Test Guidelines for Turnip and Turnip Rape to the Technical Working Party for Agricultural Crops. The Working Party further discussed working papers on Test Guidelines for Parsley, but these will require further discussion at the forthcoming session. Lack of time made it impossible for the Working Party to deal with the Working Papers on Test Guidelines or revised Test Guidelines for numerous other species. In addition to the discussions on the drafting of Test Guidelines and their revision, the Working Party dealt with a number of general items and reached the following conclusions:

(i) It decided to set up a Subgroup for Bremia Lactucae, which is to meet on November 4 and 5, 1987, in Cambridge, United Kingdom.

(ii) It noted the report by the Subgroup for Peas and the fact that a further session of that Subgroup will be necessary before a revised draft for Test Guidelines for Peas can be produced.

(iii) It supported the comments made by a number of the technical experts appointed by the professional organizations that more contacts should be established at national level during the drafting of Test Guidelines and that, likewise, more written comments should be distributed by the professional organizations since it was not possible for them to appoint technical experts for every species and experts competent for numerous fields would be less helpful at meetings of the Technical Working Parties on one given species.

18. Since the term of office of Dr. Habben (Federal Republic of Germany) was to end at the next ordinary session of the Council, the Working Party suggested to the Technical Committee that it propose Mr. R. Brand (France) to the Council as the new Chairman of the Working Party.

19. The twenty-first session of the Working Party will take place from June 14 to 17, 1988, in Wageningen, Netherlands. At that session, the Working Party will rediscuss the working papers for Vegetable Marrow and Pumpkin, Endive, Egg Plant, Runner Bean (Revision) and Black Salsify with a view to submission of the documents to the Technical Committee for adoption. It will additionally discuss or rediscuss working papers on Test Guidelines for Tomato (Revision), Peas (Revision), Asparagus, Carrot, Brussel Sprouts (Revision), Cabbage (Revision), Cauliflower (Revision), Spinach (Revision), Cucumber, Gherkin (Revision), Broccoli and Parsley. It is additionally intended to discuss or rediscuss the following matters: list of reference books and documents, testing for Bremia Lactucae in Lettuce, testing for disease. Due to the extensive agenda, that was already responsible for scheduling the meetings for next year for one day longer than usual, further additional items, such as the drafting of revised Test Guidelines for Beans and Lettuce or working papers on Test Guidelines for Watermelon, had to be postponed to the session in 1989.

ANNEX I

General Overview - Status of Test Guidelines (as of July 1, 1987)

* * Technical *	*	*	Ornamental	*	*
