INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS

GENEVA

ADMINISTRATIVE AND LEGAL COMMITTEE**Sixth Session****Geneva, November 13 and 14, 1980****UPOV MODEL FORM FOR THE NOTIFICATION OF THE RECEIPT
OF THE PLANT MATERIAL NECESSARY FOR THE EXAMINATION**Document prepared by the Office of the Union

1. At its session of June 23 and 24, 1980, the Subgroup of the Administrative and Legal Committee considered that the work on further strengthening of the system of cooperation based on bilateral administrative agreements and concerning the examination of varieties could be carried on by the Administrative and Legal Committee parallel to its activities concerning national legislation and other activities, whenever the need was felt to resolve a particular problem. In that connection the Subgroup noted that a form could be devised for use by the service receiving the plant material for examination in order to notify receipt to the service with which the application for protection had been filed (see paragraph 10 of document CAJ/VI/4).

2. A draft of a model form for the notification of the receipt of the plant material necessary for the examination appears in Annex I to this document. The first part ("Information on the application for protection/inclusion in the national list in the State requesting the examination") has been taken from the UPOV Model Form for the Request of Examination Results (see the annex to document C/XI/5).

3. The suggestion that a form for the notification of the receipt of the plant material necessary for the examination be established was made by the Delegation of the Netherlands. That Delegation indicated that for certain member States it was important for the assessment of the validity of the application to know that no material for the examination had been furnished or that the material furnished had not met the prescribed requirements.

4. The Delegation further indicated that the form could be partly completed by the service requesting the examination and could be transmitted with the form for the request of examination results. It appears preferable, however, not to follow this procedure, in particular if the form under discussion is to be used in all pertinent cases of cooperation in examination. Indeed, in many cases the examination of the variety is not performed on the basis of the request by the said service, but has already been performed, is in progress, or will be performed on the basis of another application.

5. If the form under discussion is to be used in all cases of cooperation in examination, it would be useful to examine whether item 5 of the UPOV Model Form for the Interim Report on the Examination of a Variety (see Annex II to this document) should not be deleted. The item would become useless and its deletion would make it possible to dispense with the mailing of an interim report.

6. It should be noted that the form under discussion would be used, depending on the examination procedure applicable to the species concerned, either once only or for each growing cycle in which the examination is performed.
