

TC/48/21

ORIGINAL: English

DATE: January 23, 2012

**INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS**

Geneva

**TECHNICAL COMMITTEE****Forty-Eighth Session  
Geneva, March 26 to 28, 2012**REVISION OF DOCUMENT TGP/14:  
NEW SECTION FOR COLOR CHARACTERISTICS

*Document prepared by the Office of the Union  
(containing proposal prepared by experts from the European Union, Germany  
and the Netherlands)*

1. The purpose of this document is to present a draft of a Section 2: Botanical Terms Subsection 3: Color for inclusion in document TGP/14 "Glossary of Terms Used in UPOV Documents" and the comments of the Technical Working Parties at their sessions in 2011 and of the TC-EDC, at its meeting on January 11 and 12, 2012 on that draft.

2. The following abbreviations are used in this document:

CAJ:	Administrative and Legal Committee
TC:	Technical Committee
TC-EDC:	Enlarged Editorial Committee
TWA:	Technical Working Party for Agricultural Crops
TWC:	Technical Working Party on Automation and Computer Programs
TWF:	Technical Working Party for Fruit Crops
TWO:	Technical Working Party for Ornamental Plants and Forest Trees
TWV:	Technical Working Party for Vegetables

3. *The TC is invited to consider the draft of Section 2: Botanical Terms, Subsection 3: Color, as set out in the ANNEX to this document.*

[ANNEX follows]

TC/48/21

ANNEX

TGP/14 : SUBSECTION 3 : COLOR

**DRAFT**

**DOCUMENT TGP/14**

**“GLOSSARY OF TERMS USED IN UPOV DOCUMENTS”**

**Section 2: Botanical Terms**

Subsection 3: Color

*Document prepared by experts from the European Union, Germany and the Netherlands*

Annex I COLOR NAMES FOR THE RHS COLOUR CHART

- Appendix I: Allocation of UPOV Color Groups for each RHS Color in RHS Reference order
- Appendix II: RHS Colors contained in each UPOV Color Group

Annex II SCHEME FOR DETERMINING COLOR PATTERN TERMS

- Appendix 1: Patches
- Appendix 2: Stripes
- Appendix 3: Stripes
- Appendix 4: Net
- Appendix 5: Distribution

**SUBSECTION 3: COLOR**

	<u>Comments from the TWPs in 2011</u>	
General	The TWA noted the modifications made to document TWA/40/16 Rev. With regard to “Section 2: Botanical Terms, Subsection 3: Color”, contained in the Annex to document TWA/40/16 Rev.	TWA
	The TWC considered document TWC/29/16.  The TWC noted that different color groups, as established in Section 3 of Annex I of document TWC/29/16, were not created for the purpose of grouping varieties for DUS trials and should not be used for that purpose.  The TWC agreed to invite papers on how information on colors is used for DUS examination for presentation at the next session of the TWC and to inform other Technical Working Parties.	TWC
	With regard to the comments of the Technical Working Party on Automation and Computer Programs (TWC), at its twenty-ninth session, held in Geneva, from June 7 to 10, 2011 (see paragraph 6 of this document), the TWO and the TWF noted that the reference to inviting papers on how information on colors is used for DUS examination referred to the use of image analysis to assess color.	TWO TWF

	<u>Comments from the TC-EDC in 2012</u>	
	The TC-EDC considered document TC-EDC/Jan12/6 and proposed that a new draft based on the present document and the comments of the TWPs should be prepared for their sessions in 2012 by the experts from the European Union, Germany and the Netherlands.	

**PART I: INTRODUCTION**

1. The purpose of this document is:
  - (a) To provide guidance on the development of characteristics related to colors and color patterns;
  - (b) To provide standard illustrations and examples in relation to colors and color patterns which may be useful for inclusion in the Test Guidelines, whilst noting that illustrations for specific characteristics can be found in the relevant Test Guidelines and noting that searches for relevant individual characteristics can be made through TGP/7 “Collection of Approved Characteristics”; and
  - (c) To provide definitions of botanical terms with an indication of whether those terms are generally used in Test Guidelines, or whether alternative terms might be more appropriate for use in Test Guidelines.

	<u>Comments from the TWPs in 2011</u>	
1.	To add an explanation that “Color is complex and can be defined in terms of three main elements: HUE (distinguishes the different colors), SATURATION (the element of color that indicates the purity or grayness of the color) and the BRIGHTNESS (distinguishes the total amount of light that is reflected by the color, how the color is perceived by the eye on the dark to light scale).”  In addition, to explain that, in some circles (e.g. industry), it is common practice to use a separation of two elements of color: COLOR and INTENSITY (= brightness): one-color; self-colored etc., but that such an approach is not necessarily followed in the Test Guidelines.	TWO TWF

PART II: COLOR

	<u>Comments from the TWPs in 2011</u>	
	The TWV considered that the new section for color characteristics should include guidance that the Test Guidelines should provide an explanation of the use of color terms that did not follow generally accepted rules, e.g. the use of “red” in onion for “purple” colors.	TWV
	The TWO and the TWF did not agree with the proposal made by the TWV at its forty-fifth session, that the new section for color characteristics should include guidance that the Test Guidelines should provide an explanation of the use of color terms that did not follow generally accepted rules, e.g. the use of “red” in onion for “purple” colors.	TWO TWF

2.1 Terms used for color

There are various forms in which color may be presented as states of expression in the Test Guidelines:

- (a) Single color
- (b) Color combinations
- (c) Intensity
- (d) RHS Colour Chart

	<u>Comments from the TWPs in 2011</u>	
2.1	To be revised in accordance with changes below.	TWO TWF

2.2 States of expression for color characteristics

	<u>Comments from the TWPs in 2011</u>	
2.2	To explain that the level of precision of color used in states of expression will vary according to the circumstances. For example, the following states of expression reflect differing levels of precision: yellow; yellow orange; yellowish orange; light yellow; RHS Colour Chart reference.	TWO TWF

2.2.1 Single color

**Only one color present**

*Flower: main color: white (1); yellow (2); orange (3); red (4)*

2.2.2 Color combinations

- (a) The second color indicates the predominant color with blending of both colors, resulting in what can look like a single color. For example in “green red” the predominant color is red and in “red green” the predominant color is green. *Flower: main color: white (1); yellow white (2); yellow (3); yellow orange (4); orange (5)*

(b) In some combinations the use of "ish" is common and indicates that there is a predominant color (e.g. yellow) but in addition indicates the presence of another minor color. For example,

*yellowish*, covers all colors which are predominantly yellow (would include, for example, white yellow; brown yellow; orange yellow; etc.)  
*yellowish green* covers all colors which are predominantly green with some yellow (would include, for example, white yellow green; brown yellow green; orange yellow green etc.)  
*Flower: main color: whitish (1); yellowish (2); greenish (3)*

### 2.2.3 Intensity

The intensity can be presented in combination with the color

*Flower: main color: white (1); light yellow (2); medium yellow (3); dark yellow (4); orange (5)*

### 2.2.4 Color Chart

Because of its worldwide availability, UPOV uses the color chart from the Royal Horticultural Society (RHS), the "RHS Colour Chart". There are 5 editions of this color chart, dating from 1966, 1986, 1995, 2001 and 2007. Since 2005, the "RHS Mini Colour Chart" has also been published by the Flower Council Holland and is also frequently used by breeders. Other color charts might also be appropriate.

Document TGP/7 "Development of Test Guidelines" (see ASW 4(2)(d)) explains that "Because daylight varies, color determinations made against a color chart should be made either in a suitable cabinet providing artificial daylight or in the middle of the day in a room without direct sunlight. The spectral distribution of the illuminant for artificial daylight should conform with the CIE Standard of Preferred Daylight D 6500 and should fall within the tolerances set out in the British Standard 950, Part I. These determinations should be made with the plant part placed against a white background". When it is not possible to make observations under artificial daylight, for example when observations have to be made in the open, observations should not be made in direct sunlight. The observations should be made on a cloudy day with sufficient light intensity, or in a shaded area. When artificial shading is needed in the open, it should be ensured that the color of the shading cloth does not interfere with the observations.

When using the RHS Colour Chart, the reference number of the RHS color, the color name and the edition of the chart should be mentioned in the variety description. A proposal for naming the colors has been made in Annex I of this document.

## 2.3 Observation

	<u>Comments from the TWPs in 2011</u>	
2.3	Title to read "2.3 <i>Observation of color</i> "	TWO TWF

It is not always necessary, or even possible, to make color observations with the help of a color chart. Some examples where the use of a color chart is less useful are:

- in cases where the intensity of a color is observed (e.g. intensity of green color: light - medium - dark);
- where the size of the color surface or amount of color is very small;
- where only limited, clearly separated, color expressions are present;
- where other elements influence the observation of color (e.g. where the surface is covered with hairs or with a waxy layer);
- where colors are blended;
- where colors are not well represented on the color chart (e.g. greens, browns, dark intensities of some colors);
- where an overall color impression is required.

## 2.4 Developing characteristics

### 2.4.1 Type of expression

Color is complex and can be defined in terms of 3 main elements: hue, saturation and intensity. Therefore, any characteristic which combines more than one of those elements is likely to constitute a pseudo-qualitative characteristic. However, in some cases it may be appropriate to consider one of the elements as a quantitative characteristic. For example, the intensity of green color can be considered as a quantitative characteristic, with the states light, medium and dark. Where there is a clear discontinuity between color states (e.g. white and red), a qualitative characteristic is indicated.

	<u>Comments from the TWPs in 2011</u>	
2.4.1	To be reviewed in accordance with changes to 2.2.	TWO TWF

#### 2.4.1.1 Examples

##### 2.4.1.1.1 Qualitative characteristics

*Stem: color: green (1); red (2)*

##### 2.4.1.1.2 Quantitative characteristics

*Leaf: intensity of green color: light (3); medium (5); dark (7)*

##### 2.4.1.1.3 Pseudo-Qualitative characteristics

(i) Single colors

*Flower: main color: white (1); yellow (2); orange (3); red (4)*

(ii) Single colors and intensity

*Flower: main color: white (1); light yellow (2); medium yellow (3); dark yellow (4); orange (5)*

(iii) Color combination

*Flower: main color: white (1); yellow white (2); yellow (3); yellow orange (4); orange (5)*

*Spathe: color of apex: whitish (1); yellowish (2); greenish (3)*

(iv) Color chart

*Flower: main color: RHS Colour Chart (indicate reference number)*

⇒ *variety description: RHS 11D – light yellow orange*

#### 2.4.2 Order of states of expression

In the Test Guidelines, the states of expression for colors are normally presented in the following order: white, green, yellow, orange, pink, red, purple, violet, blue, brown, black. (note: it is quite common to have the order white, yellow, green where only those colors occur). However, the chronological appearance of the color (e.g. as the fruit ripens) may also be used (see also documents TGP/14/1 "Glossary of Terms Used in UPOV Documents" [cross ref.]) where appropriate. The same sequence should normally be used for organs with similar states within the same Test Guidelines (e.g. color of leaf and color of the stem).

## 2.5 Unsuitable color names

Color terms such as "bronze", "fuchsia", "gold", "ochre", "salmon", "silver", etc. should not be used as states of expression in the Test Guidelines because they could cause confusion concerning the intended color. Therefore, these terms should be replaced by standard colors (e.g. orange brown instead of bronze). However, where these terms are intended to cover a wide range of colors and where those colors do not overlap with the colors in any other states of expression, they could be used in the Test Guidelines. For example: the use of "salmon" to cover all colors between pink and brown, where the only other possible colors are white and green.

*Example: Flower: Pistil: Main color: white (1); green (2); salmon (3)*

## 2.6 Timing of observations

2.6.1 All color observations on the different organs of the plant should be made at a clearly defined stage of development of the organ. Color expression of the organ might change, for example, during development or aging of the plant/organ or the time of the day.

2.6.2 In cases where the color of an organ, or part of an organ, changes during the development of the plant, it may be appropriate to have separate characteristics for the color at appropriate, clearly defined stages of development. In some cases, it may also be appropriate to have a characteristic which describes the rate at which the color changes.

## 2.7 Organ elements that may distort color

The observation of color on a surface or whole organ can be distorted by the presence of glaucosity or hair. The characteristic should make it clear whether or not the overall color is observed or the color surface after the glaucosity or hair has been removed.

*Example: Fruit: color of skin (hair removed)*  
*Leaf: color of upper side (wax removed)*

PART III: APPROACHES TO DESCRIBE COLORS AND COLOR PATTERNS

	<u>Comments from the TWPs in 2011</u>	
New	To provide introduction based on Section 3.3	TWO TWF

3.1 General: The use of number of colors

	<u>Comments from the TWPs in 2011</u>	
General	To be deleted	TWO TWF

A characteristic for number of colors of a plant part should be indicated as pseudo-qualitative because there is always the risk that a person may consider hues of a color to be a different color therefore record them as additional colors while another person may not does not.

3.2 Approaches to describe colors and color patterns

- (a) Main color / secondary color
- (b) Ground color / over color
- (c) Colors of defined parts of an organ
- (d) RHS Colour Chart order (“Lisbon” approach)
- (e) Variegation
- (f) Pigments (anthocyanin, carotenoid)
- (g) Conspicuousness
- (h) Color change over time

3.2.1 Main color / secondary color

In this approach all colors of a plant part are determined according to the size of the surface area they occupy. The color with the largest surface area is the main color; the one with the second largest area is the secondary color and so on.

The following standard explanation should be included in the Test Guidelines when using this approach for describing color:

“The main color is the color which has a continuous dispersion across the surface of the plant part; in general and will also cover the largest surface area.”

The term “MAIN COLOR” should only be used in association with a clearly identifiable color; one with a continuous distribution across the relevant plant part, without consideration of other colors present as isolated spots, patches etc.

	<u>Comments from the TWPs in 2011</u>	
General	<b>To amend the example to read:</b> “The main color is the color with the largest surface area. In cases where the areas of the main and secondary color are approximately the same [the darkest color] / [the color..[location]...] is considered to be the main color.”	TWO TWF

3.2.2 Ground color / over color

For organs which have two independent layers of tissue containing color pigmentation (e.g. apple), the two layers could be described as follows:

(a) **GROUND COLOR:** The first color to appear chronologically during the development of the plant part. Other colors may develop in time in the form of spots, blotches, or a color flush or blush. The ground color is not always the color occupying the largest surface area of the plant part concerned. The ground color can be the main color of the lower side of an organ.

(b) **OVER COLOR:** In the case of a plant part which has a ground color upon which a second color such as a flush develops over time, the flush is considered the over color. The over color is not always the color occupying the smallest surface area of the plant part concerned.

	<u>Comments from the TWPs in 2011</u>	
General	<p>(a) <b>GROUND COLOR:</b></p> <p>to explain that “Ground color” can be used in the following ways:</p> <p>(i) For organs which have two independent layers of tissue containing color pigmentation (e.g. apple), the two layers could be described as follows: “The ground color is the first color to appear chronologically during the development of the plant part. Other colors may develop in time in the form of spots, blotches, or a color flush or blush”</p> <p>(ii) The ground color of the upper side is the color that is the main color of the lower side of an organ.</p> <p>(iii) The ground color is the color which has a continuous dispersion across the surface of the plant part.</p> <p>It should also be explained that the ground color is not always the color occupying the largest surface area of the plant part concerned. It should also be explained, where appropriate, that the ground color is not always visible.</p>	TWO TWF

### 3.2.3 Colors of defined parts of an organ

(a) When an organ has one color with different intensities, the parts of the organ which are lighter or darker should be described.

*Example:*

---

1.	<b><u>Only varieties with one color :</u></b> <b>Ray floret: color distribution on upper side</b>	
PQ	lighter towards base	1
	even	2
	lighter towards apex	3

---

(b) If the different parts of a plant organ can have different colors, the color of these different parts can be described separately. If for example the petals of some varieties have a differently colored margin the color of the margin should be described and the color of the rest of the petal.

*Example: Petal: color of margin, Petal: color of middle zone, Petal: color of base*

	<u>Comments from the TWPs in 2011</u>	
3.2.3	Example 1: to delete "Only varieties with one color:"	TWO TWF

3.2.4 Order of observation of colors based upon the RHS Colour Chart number of the color in question ("Lisbon" approach)

In this approach all colors of the plant part concerned are assessed using the RHS Colour Charts first. The colors are then ordered from the lowest to highest number according to the color number from the Colour Chart, with the lowest number being RHS 1 A and the highest number being RHS 203 D. With this approach the determination of color is made without consideration of the surface area occupied by that color.

The following standard explanation should be included in the Test Guidelines when using this approach for describing color:

The order of colors follows the RHS Colour Chart order. The lowest number is RHS 1A and the highest RHS 203D.

The color should first be described, followed by characteristics explaining the area, distribution, pattern and conspicuousness of the color.

The same sequence should be followed for color two, color three and so on. In order to make it clear that a variety does not show color two, color three and so on, the state of expression 'none' (1) should be added as an option to the characteristic.

*Example:*

<b>1.</b>	<b>Leaf blade : secondary color</b>	
<b>PQ</b>	RHS Colour Chart (indicates reference number)	
<b>2.</b>	<b>Leaf blade: secondary color: distribution</b>	
<b>PQ</b>	none	1
	on veins	2
	along veins	3
	at marginal zone	4
<b>3.</b>	<b>Leaf blade: secondary color: pattern</b>	
<b>PQ</b>	speckled	1
	blotched	2
	throughout	3

	<u>Comments from the TWPs in 2011</u>	
3.2.4	<p>To add the example provided in document TG/HEUCH(proj.4)</p> <p>Example 1. to read “Leaf blade : secondary color (if present)” (TWF).</p> <p>The RHS 203D is indicated as the highest in the ordering of the color charts. However, 203D is not included in Appendix I to Annex I on page 29. This is because the table in Appendix I does not include the 2007 edition of the charts. To update the paragraph as follows (changes highlighted in yellow):</p> <p>“The colors are then ordered from the lowest to highest number according to the color number from the Colour Chart, with the lowest number being RHS 1 A and the highest number being RHS 202D. Additional cards in new editions of the RHS Colour charts may increase the highest number. With this approach the determination of color is made without consideration of the surface area occupied by that color.</p> <p>The following standard explanation should be included in the Test Guidelines when using this approach for describing color: The order of colors follows the RHS Colour Chart order. For example, in the RHS Colour charts 2001 edition, the lowest number is RHS 1A and the highest RHS 202D.”</p>	<p>TWO TWF</p> <p>TWF</p>

### 3.2.5 Variegation

Variegation: Well defined areas of different colors or intensities, with less or no chlorophyll, especially as yellow or white longitudinal stripes or irregular shaped areas or marginal zone combined with a green color on leaves.

#### **New proposal to be discussed:**

"Variegation" is the term for white or yellow colored zones on the leaf with diminished or no chlorophyll. These zones can have different shapes; they occur as longitudinal stripes, as irregularly shaped areas or along the margin of a leaf. They are contrasting with the usual green color of the leaf.

	<u>Comments from the TWPs in 2011</u>	
3.2.5	The TWA recommended that the new proposal for subsection 3.2.5 “Variegation” be redrafted to avoid the impression that variegation is only limited to white and yellow color.	TWA
3.2.5	To delete new proposal	TWO TWF

### 3.2.6 Pigments (anthocyanin, carotenoid)

Color pigments like anthocyanin usually can be found on a plant organ or part of an organ in the form of an over color. Depending on the amount and intensity of the pigments it could be useful to describe the color of the organ with or without the pigments. If the pigments should be excluded from the observation it should be indicated in the characteristic (e.g. Leaf blade: color (excluding anthocyanin)).

When the name of the pigment is known, reference should be made to the name, e.g. “anthocyanin coloration”. Where the name of the pigment is not known, the color should be mentioned, e.g. “red coloration”.

Pigments can be described using intensity and /or size of their distribution. Usually the intensity is a QN characteristic.

*Example:*

<b>1.</b>	<b>Leaf blade : anthocyanin coloration</b>	
<b>QN</b>	weak	3
	medium	5
	strong	7

The distribution of the pigment is usually a PQ characteristic, e.g.,

<b>2.</b>	<b>Leaf blade: distribution of anthocyanin coloration</b>	
<b>PQ</b>	at margin	1
	along veins	2
	at base	3

### 3.2.7 Conspicuousness

**CONSPICUOUS:** clearly visible, evident.

**INCONSPICUOUS:** not clearly visible, obscure.

Additional notes in relation to conspicuousness observations:

In some cases conspicuousness could be difficult to be observed, for instance for small organs (e.g. veins, hairs), or because they are not consistently expressed across the organ.

To make clear what is meant with the term conspicuousness the following standard wording could be used in the TG:

- (a) The conspicuousness is determined by the color contrast
- (b) The conspicuousness is determined by the color contrast combined with size.

	<u>Comments from the TWPs in 2011</u>	
3.2.7	To delete "In some cases conspicuousness could be difficult to be observed, for instance for small organs (e.g. veins, hairs), or because they are not consistently expressed across the organ."	TWO TWF

### 3.2.8 Color change over time

When a plant organ changes the color over time it might be necessary to observe the same organ at different times of its development.

*Example:*

<b>1.</b>	<b>Fruit : color (before maturity)</b>	
<b>PQ</b>	greenish white	1
	yellow	2
	green	3
	purple	4
<b>2.</b>	<b>Fruit: color (at maturity)</b>	
<b>PQ</b>	yellow	1
	orange	2
	red	3
	brown	4
	green	5

### 3.2 Guidance for deciding which approach to use for the description of colors and color patterns

The decision on which approach to use describing the colors of a plant part depends on the number of colors, types of color distribution and color patterns which are possible for the species concerned.

In situations on where only a few colors, a few types of color distribution and a color few patterns need to be described, it would be more appropriate to use approach (a) Main color / secondary color (see 3.2.1). For more complex situations where several different colors and/or several different types of color distribution and color patterns are possible, it would be more appropriate to use approach (d) RHS Colour Chart order ("Lisbon" approach (see 3.2.4)). A good example of the use of approach (a) can be found in the Alstroemeria Test Guideline (TG/29/7), an example for approach (d) can be found in the Heuchera Test Guideline (TG/HEUCH(proj.2)).

	<u>Comments from the TWPs in 2011</u>	
3.2.(=3.3)	To be moved to become the introduction to Part III	TWO TWF

PART IV: COLOR DISTRIBUTION AND COLOR PATTERNS

4.1 Color distribution

There are two ways of describing the distribution of color:

- (a) descriptive approach: for example, at margin, at distal part, etc.
- (b) systematic approach

	<u>Comments from the TWPs in 2011</u>	
4.1	To be reviewed	TWO TWF

4.2 Terms used for color distribution

	<u>Comments from the TWPs in 2011</u>	
4.2	To be deleted	TWO TWF

The following sets of terms can be used to describe the distribution of color.

4.2.1 Main / Secondary / Tertiary Color (see also chapter 3.2.1)

- (a) MAIN COLOR: color of the largest surface area of the plant part.
- (b) SECONDARY COLOR: when more than one color is present, the color covering the second largest surface area of the plant part is the secondary color.
- (c) TERTIARY COLOR: when more than two colors are present, the color covering the third largest area of the plant part is the tertiary color.

The following standard wording could be used in the TG:

The main color is the color with largest surface area, the secondary color (if present) is the color with the second largest surface area. If the area of the colors is nearly half and half, the darker color is the main color.

4.3. Terms used for Color Patterns

A schematic illustration of the different color patterns can be found in Annex II.

	<u>Comments from the TWPs in 2011</u>	
4.3	To use the schematic illustration of the different color patterns in Annex II to define terms for pattern, with necessary amendments, e.g. addition of missing terms from Sections 4.3.2 to 4.3.6 and modification of “central band” to “transverse band”.  To incorporate the schematic in Annex II into the main document. Sections 4.3.2 to 4.3.6 to be replaced by schematic in Annex II.	TWO TWF

4.3.1 Flush / Blush

- (a) FLUSH: different color hue as a faint layer over the ground color of a surface
- (b) BLUSH: special case of FLUSH where the color of the layer over the ground color of the surface is reddish, pinkish or purplish.

#### 4.3.2 Spotted / Dotted / Patched / Blotched / Speckled / Mottled

- (a) SPOTTED: with other color as sharply outlined spots (round or nearly round contour). Compare to “dotted”, where the spots are smaller;
- (b) DOTTED: finely spotted, if made with a pen. Compare to “spotted”, where the spots are larger and “patched”, where the spots are irregular;
- (c) PATCHED: with small irregular spots that have another color. Compare to “dotted”, “spotted” and “blotched”;
- (d) BLOTCHED: with sharply outlined irregular large spots. Compare to “spotted”, where the spots are regular, “mottled”, where the blotches are not sharply outlined and “speckled” where the spots are irregular, but smaller;
- (e) FLECKED: with sharply outlined irregular large and small markings.
- (f) SPECKLED: with many small spots, patches (irregular contour) or flecks (irregular spot, usually longer than broad);
- (g) MOTTLED: with other color as blotches which are not sharply outlined. Compare to “spotted” and “blotched”, which are sharply outlined and to “blotched” where the spots are irregular, but larger.

#### New proposal of NZ, definitions to be discussed:

<b>DOT:</b>	A CLEAR, REGULAR, VERY SMALL SPOT
<b>PATCHED:</b>	A CLEAR, IRREGULAR, MEDIUM SPOT
<b>BLOTCHED:</b>	A CLEAR, IRREGULAR, LARGE SPOT
<b>FLECK:</b>	A DIFFUSE, IRREGULAR, SMALL SPOT
<b>SPECKLE:</b>	A DIFFUSE, IRREGULAR, MEDIUM SPOT
<b>MOTTLED:</b>	A DIFFUSE, IRREGULAR, LARGE SPOT

	<u>Comments from the TWPs in 2011</u>	
Section 4.3.2	<p>The proposal from New Zealand to read as follows:</p> <p>DOTTED: HAVING CLEAR, REGULAR, VERY SMALL SPOTS</p> <p>PATCHED: HAVING CLEAR, IRREGULAR, MEDIUM SPOTS</p> <p>BLOTCHED: HAVING CLEAR, IRREGULAR, LARGE SPOTS</p> <p>FLECKED: HAVING DIFFUSE, IRREGULAR, SMALL SPOTS</p> <p>SPECKLED: HAVING DIFFUSE, IRREGULAR, MEDIUM SPOTS</p> <p>MOTTLED: HAVING DIFFUSE, IRREGULAR, LARGE SPOTS</p>	TWC

#### 4.3.3 Aciculate / Striated / Striped / Banded

- (a) ACICULATE: with another color as fine, straight stripes, lying in different directions.
- (b) STRIATED: finely striped: with another color as fine, more or less parallel fine stripes.
- (c) STRIPED: with another color as more or less parallel stripes of medium width.
- (d) BANDED: broadly striped: with another color as broad, more or less parallel stripes. Compare to “striped” (narrower) and “striated” (much finer).

#### 4.3.4 Along Midrib / Banded / Central Band / Central Bar

- (a) ALONG MIDRIB: with other color on or around the central vein (synonym MAIN VEIN for monocotyledonous plants). Compare to “central bar” where the zone with another color is broader.
- (b) CENTRAL BAND: with another color as a horizontal band at the central part of the organ. Compare to “central bar” which is vertical.
- (c) CENTRAL BAR: with another color as a vertical bar at the central part of the organ. Compare to “along midrib”, which is usually narrower and “central band” which is horizontal.

#### 4.3.5 On Margin / Picotee / Marginal Zone

- (a) **ON MARGIN/EDGED:** different color around the margin of an organ. Compare to “marginal zone” where the zone with another color is broader.
- (b) **PICOTEE:** flower characteristic, special form of ON MARGIN/EDGED, where the colored margin is narrow and has a contrasting color compared to the rest of the flower.
- (c) **MARGINAL ZONE:** with another color on the marginal zone (see also ON MARGIN/EDGED and PICOTEE). Compare to “on margin/edged” where the zone with another color is narrower.

#### 4.3.6 Tessellate / Netted / Marbled / Veined

- (a) **TESSELATE:** pattern that lies over the main color with no overlaps or gaps.
- (b) **NETTED:** with another color as in the form of a net over the surface of the plant part.
- (c) **MARBLED:** resembling marble in color pattern.
- (d) **VEINED:** different color of veins compared to the rest of the organ.

#### 4.4 The use of photographs to illustrate color distribution and color patterns

For all mentioned approaches it could be useful to recommend that a photograph be taken to illustrate certain color characteristics. It is recommended that a disclaimer be included in the Test Guideline to clarify the purpose for which the photograph is to be used; i.e. to illustrate number of colors, types of color distribution and/or color patterns, rather than the actual colors of the plant part concerned.

“A photograph of the [relevant plant part] could be provided in conjunction with the description in order to clarify the color distribution and/or color pattern. However, a warning should be added to this photograph, explaining that the primary intent of the photograph is to show the distribution and/or pattern of colors on the plant part rather than the actual colors. Color on photographs can be affected by the technology of the camera and the facilities used to display the photograph (printer, overhead projector, etc.).”

#### 4.5 Illustration

	<u>Comments from the TWPs in 2011</u>	
4.5	To check for consistency with Annex II / revised Section 4.3 To amend spelling of “BASAL THREE QUARTERS” in Section 4.5.2.	TWO TWF

##### 4.5.1 Color Patterns

##### 4.5.1.1 Flush / Blush

FLUSH

BLUSH

4.5.1.2 Dotted / Spotted / Patched / Blotched / Flecked / Speckled / Mottled according to the proposal of NZ

OUTLINE/ SIZE	CLEAR REGULAR	CLEAR IRREGULAR	DIFFUSE IRREGULAR

[Annex I to ANNEX follows]

Annex I

**COLOR NAMES FOR THE RHS COLOUR CHART**

	<u>Comments from the TWPs in 2011</u>	
General	To update to include reference to latest RHS Colour Chart version To delete paragraph 1.3	TWO TWF
	To check Spanish translation of colors in Appendix I.	TWF

**1. Introduction**

1.1 When using the RHS Colour Chart, the variety description should contain both the RHS Colour Chart reference number and a name for the color. The purpose of this document is to harmonize color names for variety descriptions.

1.2 The RHS Colour Chart contains up to 884 different colors, which are divided into 23 “groups” to name the colors. However, for UPOV purposes, this initial grouping seemed unable to name the colors in variety descriptions in a sufficiently precise way. Therefore, UPOV has identified 50 color “groups” which are presented in this document. It is important to note that these color “groups” were not created for the purpose of grouping varieties for DUS trials and should not be used for that purpose.

1.3 The names used for the 50 UPOV Color Groups consist of either the [pure color] / [color hue] (e.g. yellow, orange, red), a combination of two [pure colors] / [color hues] (e.g. yellow orange, orange pink, purple red), or a combination of the [pure color(s)] / [color hue(s)] with “light” or “dark” (e.g. light yellow, dark pink red).

1.4 The color names in this document can be used with different editions of the RHS Colour Chart. The 1986 version of the RHS Colour Chart was used for the initial grouping and naming. In the 1995 edition no new charts were added. The additional charts in the 2001 edition (marked with “N”) have been integrated into the existing groups.

**2. Example for the use of the UPOV Color Names in a variety description**

2.1 If in Test Guidelines a characteristic is described by using the RHS Colour Chart, it is not obvious which color the plant part has, because it is only asked to indicate the RHS Colour Chart reference number, e.g.

*Flower: main color of upper side*                      *RHS Colour Chart (indicate reference number)*

2.2 For the variety description, it is useful to translate the RHS Colour Chart number into a color name and to fill this name into the column “state of expression”. The color name can be found in the appendix to this document, in which the RHS Colors are listed according to the UPOV Color Group to which they belong: e.g. RHS 46C belongs to group 21 “red”, RHS N 74B belongs to group 27 “purple” and RHS N 57A belongs to group 23 “purple red”.

Example:

2.3 Part of a variety description for New Guinea Impatiens (TG/196/1)

No.	Characteristic	State of expression		Note
20	Flower: main colour of upper side	red	RHS 46C	
21	<u>Varieties with bi- or multicoloured flowers only:</u> Flower: secondary colour of upper side	purple	RHS N 74B	
22	<u>Varieties with bi- or multicoloured flowers only:</u> Flower: distribution of secondary colour	mainly on upper petal		1
23	Flower: eye zone	present		9
24	Flower: size of eye zone	large		7
25	Flower: main colour of eye zone	purple red	RHS N 57A	

### 3. UPOV Color Groups

3.1 The 50 UPOV Color Groups are as follows:

UPOV Group No.	English	français	deutsch	español
1	white		weiss	
2	light green		hellgrün	
3	medium green		mittelgrün	
4	dark green		dunkelgrün	
5	yellow green		gelbgrün	
6	grey green		graugrün	
7	light blue green		hellblaugrün	
8	blue green		blaugrün	
9	brown green		braungrün	
10	light yellow		hellgelb	
11	yellow		gelb	
12	light yellow orange		hellgelborange	
13	yellow orange		gelborange	
14	orange		orange	
15	orange pink		orangerosa	
16	light red pink		hellrotrosa	
17	red pink		rotrosa	
18	light blue pink		hellblaurosa	
19	blue pink		blaurosa	
20	orange red		orangerot	
21	red		rot	
22	dark pink red		dunkelrosarot	
23	purple red		purpurrot	
24	dark purple red		dunkelpurpurrot	
25	brown red		braunrot	
26	brown purple		braunpurpur	
27	purple		purpur	
28	violet		violett	
29	dark violet		dunkelviolet	
30	light blue violet		hellblauviolett	
31	blue violet		blauviolett	
32	light violet blue		hellviolettblau	
33	violet blue		violettblau	
34	light blue		hellblau	
35	medium blue		mittelblau	
36	dark blue		dunkelblau	
37	light green blue		hellgrünblau	
38	green blue		grünblau	
39	grey blue		graublau	
40	light brown		hellbraun	
41	medium brown		mittelbraun	
42	dark brown		dunkelbraun	
43	light yellow brown		hellgelbbraun	

<b>UPOV Group No.</b>	<b>English</b>	<b>français</b>	<b>deutsch</b>	<b>español</b>
44	yellow brown		gelbbraun	
45	orange brown		orangebraun	
46	grey brown		graubraun	
47	green brown		grünbraun	
48	grey		grau	
49	green grey		grüngrau	
50	black		schwarz	

3.2 The appendices to this document allocate the colors in the RHS Colour Chart to the appropriate UPOV Color Groups as follows:

Appendix I: Allocation of UPOV Color Groups for each RHS Color in RHS Reference order

Appendix II: RHS Colors contained in each UPOV Color Group

[Appendices to Annex I of ANNEX follow]

Appendix I to Annex I

Allocation of UPOV Color Groups for each RHS Color in RHS Reference order

Annex II  
SCHEME FOR DETERMINING COLOR PATTERN TERMS

TC/48/21: ANNEX  
 TGP/14: Subsection 3: Color: Appendix 1 to Annex II  
 PATCHES

**PATTERN (fig.)-1**

**PATCHES**

outline (sharply / not sharply)  
 shape (regular / irregular)  
 size (small / medium / large)

OUTLINED SIZE \ SHAPE	sharply		not sharply	
	regular	irregular	regular	irregular
small	  DOTTED			
medium	  SPOTTED	  PATCHED		
large		  BLOTCHED	  MOTTLED	

TC/48/21: ANNEX  
 TGP/14: Subsection 3: Color: Appendix 2 to Annex II  
 STRIPES

**PATTERN (fig.)-2-1**

**STRIPES**

positional relation ( parallel / not parallel )  
 direction ( vertical / horizontal )  
 width ( narrow / medium / wide )  
 number ( one / few / many )

position direction	parallel					
	vertical			horizontal		
width \ number	one	few	many	one	few	many
narrow			 STRIATED			
medium	 MIDRIB		 STRIPED			
wide	 CENTRAL BAR	 BANDED		 CENTRAL BAND		

**PATTERN (fig.)-2-1**

**STRIPES**

positional relation ( parallel / not parallel )  
direction ( vertical / horizontal )  
width ( narrow / medium / wide )  
number ( one / few / many )

position	not parallel	
direction		
width \ number	few	many
narrow		
medium		  ACICULATE
wide		

**PATTERN (fig.)-3**

**NET**

connection ( locked / unlocked )

shape/grid (uniform/ uneven) / ( regular / irregular )

shape	grid	locked	unlocked
uniform	regular	 <p>TESSELLATED</p>	
	irregular		
uneven	regular	 <p>RETICULATE</p>	 <p>VEINED</p>
	irregular	 <p>MARBLING</p>	

TC/48/21: ANNEX  
 TGP/14: Subsection 3: Color: Appendix 5 to Annex II  
 DISTRIBUTION

**DISTRIBUTION**

**TYPE 1-1**

**TYPE2-1**

**TYPE 3-1**

**TYPE 1-2**

arrange  
: shift of the center position

**TYPE2-2**

**TYPE 3-2**
