

DISCUSSION ON MOLECULAR TECHNIQUES

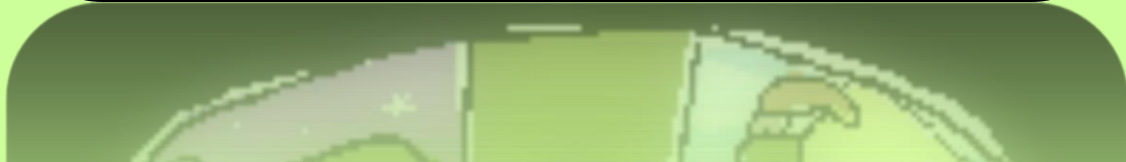

Opportunities for cooperation
between
OECD, UPOV, ISO and ISTA with
regard to molecular techniques

Peter Button
Vice Secretary-General, UPOV

Geneva, March 24, 2015

PLUTO: Plant Variety Database

New: Video Tutorial

The data currently in PLUTO is the data in version 201206 of the UPOV-ROM Plant Variety Database. A subscription service will also shortly be introduced for PLUTO, which will allow us to inform users of future updates of the data.

Joint UPOV-OECD-ISTA Workshop proposals

- to develop a joint document explaining the principle features of OECD, UPOV and ISTA systems (e.g. DUS, variety identification, variety purity, etc.)
- to repeat the joint workshop at relevant meetings of the OECD and ISTA
- an inventory by UPOV, OECD and ISTA of the use of molecular marker techniques, by crop, with a view to developing a document containing that information, in a similar format to UPOV document UPOV/INF/16 “Exchangeable Software”
- to invite UPOV, OECD and ISTA to develop lists of possible joint initiatives in relation to molecular techniques (UPOV: could be drafted by the BMT at its fifteenth session, subject to approval by the Technical Committee)
