Document prepared by the Office of the Union
Disclaimer: this document does not represent UPOV policies or guidance

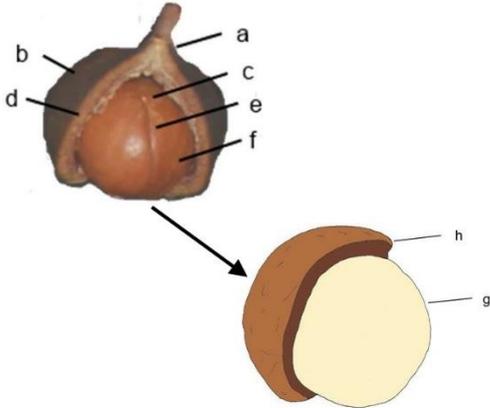

1. The Enlarged Editorial Committee (TC-EDC), at its meeting held in Geneva, on March 26, 2019, considered document TG/111/4(proj.5) and identified certain technical issues concerning the proposed revision of the Test Guidelines for Macadamia that should be addressed by the Technical Working Party for Fruit Crops (TWF).

2. The TWF, at its fiftieth session, held in Budapest, Hungary, from June 24 to 28, 2019, considered document TWF/50/6 "Matters to be resolved concerning Test Guidelines put forward for adoption by the Technical Committee: Macadamia," including the technical issues identified by the TC-EDC (indicated below by "#"). The proposed responses by the Leading Expert, Mr. Nik Hulse (Australia), and the conclusions of the TWF were as follows (see document TWF/50/13 "Report", paragraph 83):

1.	- to delete "and their hybrids" - to add GN3 from TGP/7: "Guidance on the use of Test Guidelines for interspecific hybrids that are not explicitly covered by Test Guidelines is provided in document TGP/13 'Guidance for New Types and Species'". <i>Leading Expert: agreed</i> <i>TWF: agreed</i>
3.1.2	to be deleted <i>Leading Expert: agreed</i> <i>TWF: agreed</i>
4.2.2	delete "varieties" (duplication) <i>Leading Expert: agreed</i> <i>TWF: agreed</i>

#Char. 13	<p>to add the following example varieties: "H2 Hinde" for state "none", "HAES 800" for state "apiculate", "A268" for state "acuminate", "Hidden Valley A38" for state "mucronate" <i>Leading Expert: to be agreed by TWF</i> TWF: agreed</p>

#Char. 27	to read "Seed: size" <i>Leading Expert: agreed. The reference to "shell" is not clear as it can be confused with the shell characteristics (Chars. 29, 30 and 31). It is better to use "seed". Previously the term "nut" was used however macadamia is not a true nut.</i> <i>TWF: agreed</i>																														
#Char. 28	to read "Seed: shape" <i>Leading Expert: agreed. See comment for Char. 27</i> <i>TWF: agreed</i>																														
#Char. 29	to use a 3 or 5-notes scale to have the mid-point in the middle of the scale <i>Leading Expert: I propose a 5 note scale:</i> <i>smooth (1)</i> <i>slightly rough (2)</i> <i>moderately rough (3)</i> <i>moderately rough to very rough (4)</i> <i>very rough (5)</i> <i>The example varieties do not change and there are no example varieties for note 4.</i> <i>TWF: agreed</i>																														
#Char. 33	- to add example varieties "A16" for state 1 and "A38" for state 2 - to add example varieties for states 3 to 5 <i>Leading Expert: I propose to delete this characteristic</i> <i>TWF: agreed</i>
