

Technical Committee**TC/57/2****Fifty-Seventh Session
Geneva, October 25 and 26, 2021****Original:** English
Date: August 31, 2021**TEST GUIDELINES***Document prepared by the Office of the Union**Disclaimer: this document does not represent UPOV policies or guidance***EXECUTIVE SUMMARY**

1. The purpose of this document is to provide information on developments concerning Test Guidelines.

Revision of Technical Questionnaires of Test Guidelines

2. The TC is invited to note:

(a) the Test Guidelines proposed to be partially revised for the inclusion of characteristics in the Technical Questionnaires, as set out in paragraph 15 of this document.

(b) that the TWV invited interested experts to discuss characteristics for inclusion in the Technical Questionnaires for Carrot, Cucumber, Lettuce, Maize, Melon, Spinach, Squash, Tomato Rootstocks and Watermelon, including any elements of document TGP/7 that might need to be revised.

(c) that the TWO invited the expert from the European Union to coordinate discussions to define characteristics for inclusion in the Technical Questionnaire for Rose, including any elements of document TGP/7 that might need revising.

(d) that a proposal for partial revision of the Test Guidelines for Hemp is presented in document TC/57/19;

(e) that the TWA invited the expert from the European Union to coordinate discussions among TWA and TWV experts to propose characteristics for inclusion in the Technical Questionnaire for Maize;

(f) that the TWA invited the expert from the United Kingdom to coordinate discussions and present a proposal for the revision of the Technical Questionnaire for Wheat;

(g) that the TWA invited experts discussing the partial revision of the Test Guidelines for Maize and Wheat to consider whether guidance in document TGP/7 concerning the relationship between asterisks in the Test Guidelines and TQ characteristics should be revised.

(h) that proposals for partial revision of the Test Guidelines for Peach, Japanese Plum, Actinidia and Prunus Rootstocks are presented in documents TC/57/20, TC/57/21, TC/57/22 and TC/57/23, respectively.

(i) the presentation made at the TWV, at its fifty-fifth session, on a “Project to harmonize Technical Questionnaires in the European Union”.

Additional Characteristics

3. The TC is invited to note:

(a) the additional characteristics notified to the Office of the Union since the fifty-sixth session of the TC, as reproduced in Annex I to this document; and

(b) that the additional characteristics notified will be presented to the TWA, at its fifty-first session, for consideration on whether these should be posted on the TG Drafters' webpage of the UPOV website and/or whether to initiate a revision of partial revision of the Test Guidelines concerned.

Test Guidelines for adoption

4. The Technical Committee (TC) is invited to note the list of draft Test Guidelines planned for adoption at the TC/57 session, subject to any changes proposed by the TC-EDC, as set out in Annex II to this document;

Corrections to Test Guidelines

5. The Technical Committee (TC) is invited to note the corrections made to the adopted Test Guidelines for Actinidia (document TG/98/7 Rev. Corr.), and Phalaenopsis (document TG/213/2 Rev. Corr.), as set out in paragraph 53 of this document;

Draft Test Guidelines discussed by the TWPs in 2021

6. The Technical Committee (TC) is invited to note the draft Test Guidelines discussed by the TWPs, at their sessions in 2021, as listed in Annex III to this document;

Draft Test Guidelines to be discussed by the TWPs in 2022

7. The TC is invited to:

(a) consider the proposal for partial revision of the Test Guidelines for Blueberry (document TG/137/5), as set out in paragraphs 58 and 59 of this document;

(b) consider the proposal for a full revision of the Test Guidelines for Fodder Beet (document TG/150/3), as set out in paragraphs 60 and 61 of this document;

(c) agree the program for the development of new Test Guidelines and for the revision of adopted Test Guidelines, as set out in Annex IV to this document;

Status of existing Test Guidelines or draft Test Guidelines

8. The TC is invited to note the status of the existing Test Guidelines or draft Test Guidelines, as listed in Annex V to this document;

Superseded Test Guidelines

9. The TC is invited to:

(a) note the list of superseded Test Guidelines, as presented in Annex VI to this document;

(b) note that the superseded versions of Test Guidelines are available on the Test Guidelines page of the UPOV website.

10. The following abbreviations are used in this document:

TC: Technical Committee

TC-EDC: Enlarged Editorial Committee

TWA: Technical Working Party for Agricultural Crops

TWC: Technical Working Party on Automation and Computer Programs

TWF: Technical Working Party for Fruit Crops

TWO: Technical Working Party for Ornamental Plants and Forest Trees

TWV: Technical Working Party for Vegetables

TWPs: Technical Working Parties

11. The structure of this document is as follows:

EXECUTIVE SUMMARY.....	1
REVISION OF TECHNICAL QUESTIONNAIRES OF TEST GUIDELINES	3
Proposals for partial revisions of Test Guidelines.....	3
Relationship between Asterisked, Grouping and TQ characteristics	4
Comments from the Technical Working Parties.....	5
ADDITIONAL CHARACTERISTICS	9
Agricultural crops.....	10
Additional characteristics	10
TEST GUIDELINES FOR ADOPTION	10
CORRECTIONS TO TEST GUIDELINES	11

ANNEX I. Additional characteristics notified to the Office of the Union (in English only)	
ANNEX II. Test Guidelines for adoption	
ANNEX III. Draft Test Guidelines discussed by the TWPs in 2021	
ANNEX IV. Draft Test Guidelines to be discussed by the TWPs in 2022	
ANNEX V. Status of existing Test Guidelines or draft Test Guidelines	
ANNEX VI. Superseded Test Guidelines	

REVISION OF TECHNICAL QUESTIONNAIRES OF TEST GUIDELINES

12. The background to this matter is provided in document TC/56/2 "Test Guidelines".

13. The TC, at its fifty-sixth session¹, agreed to invite the Office of the Union to consult interested members of the Union to explore for which Test Guidelines it would be feasible to propose partial revisions that would enable members of the Union to follow a revised UPOV Technical Questionnaire. The TC agreed that for the Test Guidelines concerned, the Office of the Union would develop proposals for the partial revision of the Test Guidelines, to be presented to the TWPs, at their sessions in 2021 (see document TC/56/23 "Report", paragraph 79).

Proposals for partial revisions of Test Guidelines

14. On December 28, 2020, the Office of the Union issued Circular E-20/247 to all designated persons at the TC and TWPs inviting proposals for the addition of characteristics from the Table of Characteristics to the Technical Questionnaire of UPOV Test Guidelines.

15. On the basis of the replies received to Circular E-20/247, the following Test Guidelines were proposed to be partially revised for the inclusion of characteristics in section 5 of the Technical Questionnaire:

¹ Held via electronic means on October 27 and 28, 2020

- TWV

TG reference	Test Guidelines Common Name
TG/2/7	Maize
TG/13/11	Lettuce
TG/49/8 Corr.	Carrot
TG/55/7 Rev. 5	Spinach
TG/61/7 Rev. 2	Cucumber, Gherkin
TG/104/5 Rev.	Melon
TG/119/4	Vegetable Marrow, Squash
TG/142/5	Watermelon
TG/294/1 Corr. Rev. 2	Tomato Rootstocks

- TWO:

TG reference	Test Guidelines Common Name
TG/11/8 Rev.	Rose

- TWA:

TG reference	Test Guidelines Common Name
TG/2/7	Maize
TG/3/12	Wheat
TG/276/1	Hemp

- TWF:

TG reference	Test Guidelines Common Name
TG/53/7 Rev.	Peach
TG/84/4 Corr. 2 Rev.	Japanese Plum
TG/98/7 Rev. Corr.	Actinidia
TG/187/2	Prunus Rootstocks

16. An overview of the individual proposals and the full proposals in revisions mode are presented in the Addendum to this document.

17. *The TC is invited to note the Test Guidelines proposed to be partially revised for the inclusion of characteristics in the Technical Questionnaires, as set out in paragraph 15 of this document.*

Relationship between Asterisked, Grouping and TQ characteristics

18. Document TGP/7 “Development of Test Guidelines”, GN13, establishes that characteristics in the Technical Questionnaire should, in general, receive an asterisk in the Table of Characteristics and be used as grouping characteristics. Information provided by UPOV members on requested technical questionnaire demonstrates that more characteristics are used in authorities’ technical questionnaires than those currently provided in the Technical Questionnaires of UPOV Test Guidelines.

19. In the procedure for partial revisions presented to the TWPs, it was proposed not to consider the addition of asterisks where the proposed new TQ characteristics do not currently have an asterisk in the table of characteristics and to consider that matter further at the next full revision of the Test Guidelines concerned.

20. It was also proposed that the TWPs considered whether to revise the guidance in document TGP/7 “Development of Test Guidelines” concerning the relationship between asterisks in the Test Guidelines and TQ characteristics on the basis of the information received by members of the Union.

Comments from the Technical Working Parties

21. At their sessions in 2021, the TWV², TWO³, TWA⁴ and TWF⁵ considered document TWP/5/13 (see documents TWV/55/16 "Report", paragraphs 105 to 111; TWO/53/10 "Report", paragraphs 88 to 93; TWA/50/9 "Report", paragraphs 69 to 77; and TWF/52/10 "Report", paragraphs 85 to 88).

22. The TWV, TWO, TWA and TWF agreed not to consider the addition of asterisks where the proposed new TQ characteristics do not currently have an asterisk in the table of characteristics and to consider that matter further at the next full revision of the Test Guidelines concerned.

Technical Working Party for Vegetables

23. The TWV, at its fifty-fifth session, recalled guidance in document TGP/7 "Development of Test Guidelines" concerning the relationship between asterisks in the Test Guidelines and TQ characteristics, as reproduced below.

"GN 13 Characteristics with specific functions

1. Asterisked characteristics (Chapter 7)

1.1 *The General Introduction (Chapter 4.8: Table: Functional Categories of Characteristics) states that asterisked characteristics are "characteristics that are important for the international harmonization of variety descriptions." The criteria for selecting a characteristic as an asterisked characteristic are that:*

(a) *it must be a characteristic included in the Test Guidelines;*

(b) *it should always be examined for DUS and included in the variety description by all members of the Union except when the state of expression of a preceding characteristic or regional environmental conditions render this inappropriate;*

(c) *it must be useful for the international harmonization of variety descriptions;*

(d) *particular care should be taken before selection of disease resistance characteristics.*

1.2 *It should be clarified that criterion (b) is worded to ensure that members of the Union which are not able to examine the characteristic do not use this as a reason to object to the characteristic being agreed as an asterisked characteristic. Thus, any characteristic which satisfies the criteria and, in particular, is useful for the international harmonization of variety descriptions should be selected as an asterisked characteristic, even if it cannot be examined for all varieties or by all members of the Union. The number of asterisked characteristics should, therefore, be determined by the characteristics which are required to achieve useful internationally harmonized variety descriptions.*

2. Grouping characteristics (Chapter 5.3)

2.1 Selection

The General Introduction (Chapter 4.8: Table: Functional Categories of Characteristics) explains that grouping characteristics are characteristics in which the documented states of expression, even where recorded at different locations, can be used either individually or in combination with other such characteristics: to select varieties of common knowledge that can be excluded from the growing trial used for examination of distinctness, and/or to organize the growing trial so that similar varieties are grouped together.

Thus, the General Introduction specifies that grouping characteristics:

1. Must be:

(a) *qualitative characteristics or,*

(b) *quantitative or pseudo qualitative characteristics which provide useful discrimination between the varieties of common knowledge from documented states of expression recorded at different locations.*

2. Must be useful for:

² at its fifty-fifth session, hosted by Turkey and held via electronic means, from May 3 to 7, 2021

³ at its fifty-third session, hosted by the Netherlands and held via electronic means, from June 7 to 11, 2021

⁴ at its fiftieth session, hosted by the United Republic of Tanzania and held via electronic means, from June 21 to 25, 2021

⁵ at its fifty-second session, hosted by China and held via electronic means, from July 12 to 16, 2021

- (a) selecting varieties of common knowledge that can be excluded from the growing trial used for examination of distinctness and/or,
- (b) organizing the growing trial so that similar varieties are grouped together.

3. Should be:

- (a) an asterisked characteristic and/or, (see also GN 13.4)
- (b) included in the Technical Questionnaire or application form.

The number of grouping characteristics is not fixed. If there are only a few characteristics which satisfy the criteria these are all likely to be selected as grouping characteristics. However, if there are many characteristics which fulfill the criteria these might not all be selected as grouping characteristics in the Test Guidelines. In the latter case, a selection of the most efficient characteristics for the uses set out in 2(a) and 2(b) might be made.

[...]

3. Technical Questionnaire (TQ) characteristics (Chapter 10: TQ 5)

3.1 The model Technical Questionnaire included in the Test Guidelines seeks information on specific characteristics of importance for distinguishing varieties.

3.2 Characteristics to be included in the Technical Questionnaire should comprise:

- (a) the grouping characteristics and
- (b) the most discriminating characteristics,

unless it is considered unrealistic to expect breeders to describe these characteristics.

3.3 In addition to the characteristics identified in Section 3.2, the Technical Questionnaire may also include characteristics that are agreed to be important for the management of the trial and the planning of observations.

3.4 Where necessary, characteristics in the Test Guidelines can be simplified (e.g. color groups can be created rather than requesting an RHS Colour Chart reference) for inclusion in the Technical Questionnaire (TQ), if this would be of assistance for the breeder completing the TQ. Furthermore, the characteristics contained in the Test Guidelines can be formulated in a different way, if breeders would then be able to describe them more precisely and the information would be useful for performing the test. For example, the TQ for peach may request information on whether the variety is a "melting" or "non-melting" type, which although not a characteristic in the Table of Characteristics would provide information on the states of expression of certain characteristics included in the Table of Characteristics.

3.5 In the case of quantitative characteristics for which an abbreviated scale is used in the Table of Characteristics (e.g. use of 3, 5, 7 for characteristics with notes 1-9), all states of expression should be presented in the Technical Questionnaire (e.g. notes 1, 2, etc. to 9).

3.6 GN 13(4)(b) explains that "TQ characteristics selected from the Table of Characteristics should, in general, receive an asterisk in the Table of Characteristics". Certain characteristics, particularly disease resistance characteristics, which are potentially useful as grouping characteristics might not be indicated with an asterisk in the Table of Characteristics. In the case of disease resistance characteristics, for example, there may be obstacles to the use of the characteristic for a number of members of the Union because of technical or quarantine requirements. Those same obstacles might also make it difficult for applicants to provide information on those characteristics if they were included in the Technical Questionnaire, Section 5 "Characteristics of the variety to be indicated". Therefore, for such characteristics, information should be sought in Section 7 "Additional information which may help in the examination of the variety" of the Technical Questionnaire. The guidance on the presentation of the characteristics for Section 5 (see GN 13.3 & 13.4 above would also apply for the presentation of characteristics in Section 7.

4. Relationship between Asterisked, Grouping and TQ characteristics

The relationship between grouping, asterisked and TQ characteristics can be summarized as follows:

(a) Grouping characteristics selected from the Table of Characteristics should, in general, receive an asterisk in the Table of Characteristics and be included in the Technical Questionnaire.

(b) TQ characteristics selected from the Table of Characteristics should, in general, receive an asterisk in the Table of Characteristics and be used as grouping characteristics. TQ characteristics are not restricted to those characteristics used as grouping characteristics;

(c) Asterisked characteristics are not restricted to those characteristics selected as grouping or TQ characteristics."

24. The TWV considered the proposals for partial revisions of the Test Guidelines for Maize, Carrot, Spinach, Cucumber, Melon, Squash, Watermelon and Tomato Rootstocks, as set out in document TWP/5/13, paragraph 17 and Annexes I to IX.

25. The TWV noted that no proposals were received for Onion and Shallot. The TWV noted a proposal from the European Union to add new characteristics to the Technical Questionnaire of the crops concerned, circulated shortly before the session. The TWV agreed that the proposal should be considered at its fifty-sixth session.

26. The TWV agreed the need for further discussions on the proposals for partial revisions of the crops listed in document TWP/5/13 at its fifty-sixth session. The TWV agreed to invite the experts that had submitted proposals (CZ, GB, IL, JP, MD, QZ, UA), and other interested experts (including representatives from the breeders) to organize a meeting by December 2021 to propose characteristics to be included in the Technical Questionnaires. Conclusions from discussions would be reported to the TWV at its fifty-sixth session, including any elements of document TGP/7 that might need to be revised.

27. The TWV noted the comments provided by the breeders' organizations that characteristics in the TQ should reflect requirements for selecting similar varieties and organizing the growing trial. It further noted comments provided by the breeders' organizations that international harmonization should consider the demands on applicants in terms of work and planning needed to provide data and PVP Offices to receive the required information.

28. *The TC is invited to note that the TWV invited interested experts to discuss characteristics for inclusion in the Technical Questionnaires for Carrot, Cucumber, Lettuce, Maize, Melon, Spinach, Squash, Tomato Rootstocks and Watermelon, including any elements of document TGP/7 that might need to be revised.*

Technical Working Party for Ornamental Plants and Forest Trees

29. The TWO, at its fifty-third session⁶, considered the proposal for partial revision of the Test Guidelines for Rose, as set out in document TWP/5/13, paragraph 17 and Annex X. The TWO noted that the proposal added 21 characteristics to the current six characteristics in the Technical Questionnaire of the Test Guidelines.

30. The TWO agreed there was a need for further discussing the proposal for partial revision of the Test Guidelines for Rose. The TWO agreed to invite the experts that had submitted proposals (GB, JP, NZ, QZ), and other interested experts (CA, DE, NL) to organize a meeting by December 2021 to define the characteristics to be proposed for inclusion in the Technical Questionnaire.

31. The TWO agreed to invite the expert from the European Union to coordinate discussions and report conclusions from discussions at the fifty-fourth session of the TWO, including any elements of document TGP/7 that might need revising.

32. *The TC is invited to note that the TWO invited the expert from the European Union to coordinate discussions to define characteristics for inclusion in the Technical Questionnaire for Rose, including any elements of document TGP/7 that might need revising.*

Technical Working Party for Agricultural Crops

33. The TWA, at its fiftieth session⁷, considered the proposals for partial revisions of the Test Guidelines for Maize, Wheat and Hemp to include characteristics from the table of characteristics in the

⁶ Hosted by the Netherlands and organized via electronic means from June 7 to 11, 2021

⁷ Hosted by the United Republic of Tanzania and held via electronic means from June 21 to 25, 2021

technical questionnaire (TQ) of the Test Guidelines, as set out in document TWP/5/13, paragraph 17 and Annexes I, XI and XII.

34. The TWA noted that proposals on the technical questionnaire of the Test Guidelines for Sunflower were not presented in document TWP/5/13, as the Test Guidelines were already under revision (document TG/81/7(proj.3)).

35. The TWA agreed to propose the partial revision of the Test Guidelines for Hemp (document TG/276/1) to include in the TQ the characteristics proposed in document TWP/5/13, paragraph 17 and Annex XII, as reproduced below and presented in document TC/57/19 (characteristics for inclusion indicated with grey highlighting and underline):

Char. No.	(*)	Characteristic Name
8	(*)	<u>Leaf: number of leaflets</u>
10		<u>Central leaflet: width</u>
11	(*)	Time of male flowering
13	(*)	Inflorescence: THC content
14	(*)	Plant: proportion of hermaphrodite plants
15	(*)	Plant: proportion of female plants
16	(*)	Plant: proportion of male plants
17	(*)	Plant: natural height
18	(*)	<u>Main stem: color</u>
24		<u>Seed: color of testa</u>
25		<u>Seed: marbling</u>

36. The TWA noted the expression of interest from the European Union to propose the addition of characteristics from the table of characteristics in the TQ for Maize and Wheat beyond those presented in document TWP/5/13.

37. The TWA agreed that further discussion was required on partial revision of the Test Guidelines for Maize and Wheat and agreed to invite experts that had submitted proposals for Wheat (CZ, DK, GB, IL, JP, MD, QZ, SK, UA) to meet by December 2021, along with any other interested experts (see Annex IV). The TWA agreed to invite the United Kingdom to act as leading expert and present a proposal for partial revision of the Test Guidelines for Wheat at the fifty-first sessions of the TWA.

38. The TWA noted that the TWV had formed a subgroup of experts to discuss the partial revision of the Test Guidelines for Maize (see document TWV/55/16 "Report", paragraph 110) and agreed to propose that the TWA experts (CZ, DK, GB, IL, JP, MD, QZ, SK, UA and any other interested experts, see Annex IV) join the TWV group. The TWA agreed to invite the European Union to act as leading expert and present a proposal for partial revision of the Test Guidelines for Maize at the fifty-first sessions of the TWA.

39. The TWA agreed that experts discussing the partial revision of the Test Guidelines for Maize and Wheat should consider whether guidance in document TGP/7 "Development of Test Guidelines" concerning the relationship between asterisks in the Test Guidelines and TQ characteristics should be revised. Any proposals should be presented to the TWA at its fifty-first session.

40. *The TC is invited to note that:*

(a) *a proposal for partial revision of the Test Guidelines for Hemp is presented in document TC/57/19;*

(b) *the TWA invited the expert from the European Union to coordinate discussions among TWA and TWV experts to propose characteristics for inclusion in the Technical Questionnaire for Maize;*

(c) the TWA invited the expert from the United Kingdom to coordinate discussions and present a proposal for the revision of the Technical Questionnaire for Wheat;

(d) the TWA invited experts discussing the partial revision of the Test Guidelines for Maize and Wheat to consider whether guidance in document TGP/7 concerning the relationship between asterisks in the Test Guidelines and TQ characteristics should be revised.

Technical Working Party for Fruit Crops

41. The TWF, at its fifty-second session⁸, noted the invitation to consider whether to revise the guidance in document TGP/7 "Development of Test Guidelines" concerning the relationship between asterisks in the Test Guidelines and TQ characteristics, and agreed no comments could be provided at this stage.

42. The TWF agreed with the proposals for partial revisions of the Test Guidelines for Peach, Japanese Plum, Actinidia and Prunus Rootstocks, as set out in document TWP/5/13, paragraph 17 and Annexes XIII to XVI, and presented in documents TC/57/20, TC/57/21, TC/57/22 and TC/57/23.

43. *The TC is invited to note that proposals for partial revision of the Test Guidelines for Peach, Japanese Plum, Actinidia and Prunus Rootstocks are presented in documents TC/57/20, TC/57/21, TC/57/22 and TC/57/23, respectively.*

Harmonization of Technical Questionnaires in the European Union

44. The TWV, at its fifty-third session⁹, received a presentation on a "Project to harmonize Technical Questionnaires in the European Union" by an expert from the European Union. A copy of the presentation is provided in document TWV/55/8. The TWV agreed to invite the expert from the European Union to report further developments on the project for harmonization of TQs at its fifty-sixth session (see document TWV/55/16 "Report", paragraph 112).

45. *The TC is invited to note the presentation made at the TWV, at its fifty-fifth session, on a "Project to harmonize Technical Questionnaires in the European Union".*

ADDITIONAL CHARACTERISTICS

46. Document TGP/5 Section 10/3 "Experience and Cooperation in DUS Testing, Section 10: Notification of Additional Characteristics and States of Expression" states that "proposals for additional characteristics and states of expression notified to the Office of the Union by means of document TGP/5 Section 10, will be presented to the relevant Technical Working Party(ies) (TWP(s)) at the earliest opportunity with information on the extent of use of the characteristic. The characteristics will then, as appropriate, be posted on the TG Drafters' webpage of the UPOV website (https://www.upov.int/resource/en/tg_drafters.html) on the basis of comments made by the relevant TWP(s), and/or the TWP(s) may initiate a revision or a partial revision of the Test Guidelines concerned."

47. The UPOV Office received notifications of the following additional characteristics or states of expression since the fifty-sixth session of the Technical Committee. The additional characteristics or states of expression notified will be presented to the TWA, at its fifty-first session, for consideration on whether these should be posted on the TG Drafters' webpage of the UPOV website and/or whether to initiate a revision or partial revision of the Test Guidelines concerned.

⁸ Hosted by China and held via electronic means from July 12 to 16, 2021

⁹ Hosted by Turkey and held via electronic means from May 3 to 7, 2021

Agricultural crops

Additional characteristics

Notified by the European Union (See: Annex I (in English only)):

- *Brassica napus* L.:
 - “Alpha-linolenic acid content”
- *Lolium perenne* L.:
 - “Plant: length in autumn of year of sowing”
- *Triticum aestivum* L.:
 - “Production of pollen (male sterility)”

48. *The TC is invited to note:*

(a) *the additional characteristics notified to the Office of the Union since the fifty-sixth session of the TC, as reproduced in Annex I to this document; and*

(b) *that the additional characteristics notified will be presented to the TWA, at its fifty-first session, for consideration on whether these should be posted on the TG Drafters’ webpage of the UPOV website and/or whether to initiate a revision of partial revision of the Test Guidelines concerned.*

TEST GUIDELINES FOR ADOPTION

49. The TC, at its forty-seventh session, held in Geneva from April 4 to 6, 2011, noted that the Council, at its forty-third ordinary session, held in Geneva on October 22, 2009, had endorsed the practice whereby Test Guidelines are adopted by the TC on behalf of the Council on the basis of the program of work approved by the Council, without the individual Test Guidelines being submitted to the Council for review (see document C/43/17 “Report”, paragraph 38).

50. At its fifty-fourth ordinary session, held in Geneva on October 30, 2020, the Council approved the work of the TC and the work programs of the TWPs and BMT reported to the TC, as provided in documents C/54/7 and TC/56/23 “Report” (see document C/54/21 “Report”, paragraphs 56 and 57).

51. Annex II to this document presents the list of draft Test Guidelines proposed for adoption by the TWV, TWO, TWA and TWF, at their sessions in 2021, which will be considered by the TC-EDC at its meeting on October 12 and 13, 2021.

52. *The TC is invited to note the list of draft Test Guidelines planned for adoption by the TC, subject to any changes proposed by the TC-EDC, as set out in Annex II to this document.*

CORRECTIONS TO TEST GUIDELINES

53. The following corrections to Test Guidelines have been made and published on the UPOV website since the fifty-fifth session of the TC:

(a) TG/98/7 Rev. Corr. Actinidia

The correction concerns the following items:

- Characteristic 47: correction of spelling of example variety "Hort16A (A)" (instead of Hort16 (A))
- Characteristic 63: correction of spelling of example variety "Abbott" (instead of "Abott")
- Characteristic 72: correction of notes (1, 2, 3, 4 instead of 1, 2, 3, 5)
- Ad. 50: in the legend of the grid, "elongated" replaced with "high" and "compressed" with "low"

(b) TG/213/2 Rev. Corr. Phalaenopsis

The correction concerns the following items:

- Characteristic 20: to be indicated as QN instead of PQ
- Characteristic 79: to add missing method of observation (VG)
- Ad. 12: to read "..., the darker color is considered to be the main color." instead of "..., the darkest color..."

54. The TC is invited to note the corrections made to the adopted Test Guidelines for Actinidia (document TG/98/7 Rev. Corr.) and Phalaenopsis (document TG/213/2 Rev. Corr.), as set out in paragraph 53 of this document.

DRAFT TEST GUIDELINES DISCUSSED BY THE TWPS IN 2021

55. The Test Guidelines discussed by the TWPs at their sessions in 2021 are presented in Annex III to this document.

56. The TC is invited to note the draft Test Guidelines discussed by the TWPs, at their sessions in 2021, as listed in Annex III to this document.

DRAFT TEST GUIDELINES TO BE DISCUSSED BY THE TWPS IN 2022

Proposals from Technical Working Parties

57. For their sessions in 2022, the TWPs proposed to discuss the development of new Test Guidelines, or the revision of adopted Test Guidelines, as listed in Annex IV to this document.

New proposals for the revision of the Test Guidelines for Blueberry and Fodder Beet

Blueberry

58. The Office of the Union received a proposal from Australia for a partial revision of the Test Guidelines for Blueberry (document TG/137/5) to revise the following elements:

- Expansion of the scope to include *V.darrowii*;
- Char. 14: to delete example variety 'Ridley' from note 2
- Ad. 8: to replace the illustration for the state of expression "lanceolate"

59. The TC may wish to consider whether to commission the partial revision of the Test Guidelines for Blueberry by the TWF, at its session in 2022, with Ms. Nahida Bhuiyan (Australia) as Leading Expert.

Fodder Beet

60. The Office of the Union received a proposal from France for a full revision of the Test Guidelines for Fodder Beet (document TG/150/3)

61. The TC may wish to consider whether to commission the full revision of the TG Fodder Beet by the TWA, at its session in 2022, with Ms. Anne-Lise Corbel (France) as Leading Expert.

62. *The TC is invited to consider:*

(a) *the proposal to request a partial revision of the Test Guidelines for Blueberry (document TG/137/5), as set out in paragraphs 58 and 59 of this document;*

(b) *the proposal to request a full revision of the Test Guidelines for Fodder Beet (document TG/150/3), as set out in paragraphs 60 and 61 of this document; and*

(c) *the program for the development of new Test Guidelines and for the revision of adopted Test Guidelines, as set out in Annex IV to this document.*

STATUS OF EXISTING TEST GUIDELINES OR DRAFT TEST GUIDELINES

63. A summary table showing the status of the existing Test Guidelines or draft Test Guidelines, at the date of this document, is attached as Annex V.

64. *The TC is invited to note the status of the existing Test Guidelines or draft Test Guidelines, as listed in Annex V to this document.*

SUPERSEDED TEST GUIDELINES

65. The list of adopted Test Guidelines that have since been superseded is presented as Annex VI to this document.

66. The superseded versions of Test Guidelines are available on the Test Guidelines page of the UPOV website.

67. *The TC is invited to note:*

(a) *the list of superseded Test Guidelines, as presented in Annex VI to this document; and*

(b) *that the superseded versions of Test Guidelines are available on the Test Guidelines page of the UPOV website.*

[Annex I follows]

ANNEX I

(in English only)

ADDITIONAL CHARACTERISTICS OR STATES OF EXPRESSION NOTIFIED TO THE OFFICE OF THE UNION SINCE THE FIFTY-SIXTH SESSION OF THE TECHNICAL COMMITTEE

Additional characteristic proposed for *Brassica napus* L.

Type of expression (QL, PQ, QN)	Characteristic	Growth Stage	Method of observation (VG,VS,MG,MS)	States of expression (at least two)	Example varieties	Note
QL	Alpha-linolenic acid content	00	MG			

Proposal not to set thresholds and values, neither states of expression. Absolute values can be used for this particular case.

It seemed to be a statement made by EOs and breeders that the threshold for note 1 can be set at less than 4% of linolenic acid, with the description of the note as "low"; and the "normal" varieties around 8% with the note 9 and the description "normal". EOs report also that there is a clear gap between 4% and 8%. However, there were concerns expressed during the AEM20 and the e-mail reactions in relation to the setting of thresholds and attributing notes at that early stage.

Therefore we think that today we should gain more experience with this characteristic and to put for the variety pair at hand only the absolute values and no notes.

Additional information on the way of observation:

This characteristic should be examined on the basis of bulk samples. As recommended in UPOV TGP 8 chapter 12, there is knowledge of the genetic control of the characteristic; the suitability of the characteristic was validated through an initial assessment of uniformity on individual plants by GEVES (see presentation at AEM20);

States of expression are not necessary at this stage; additional experience needed on existing variation between varieties considering environmental influence, in order to establish states of expression.

Please provide method of observation/protocol for the characteristic in question

The alpha-linolenic acid content should be observed on seeds sent in by the applicant.

10 grams of seeds are taken and are crushed, for each variety.

We then use the method of dosing fatty acids by gas chromatography according to the standards NF ISO 17059 and NF EN ISO 12966-4.

The content should be expressed as a percentage by mass of methyl esters in accordance with the ISO standards.

Usually, seeds containing less than 4 % of linolenic acid will be classified as "low linolenic acid content (LL)"; more important is the gap in the content found between the candidate variety and the comparison variety. A classic variety with normal linolenic acid content usually ranges around 8 %.

Additional characteristic proposed *Lolium perenne* L.

Type of expression (QL, PQ, QN)	Characteristic	Growth Stage	Method of observation (VG,VS,MG,MS)	States of expression (at least two)	Example varieties	Note
QN	DE3: Plant: length in autumn of year of sowing	DC 20-29	MS	short 3 medium 5 long 7	Bargold Honroso Novello	3 5 7

Additional information on the way of observation:

This characteristic is routinely measured since years on national level at single spaced plants before cutting in autumn and is highly discriminative without correlating with other plant height characteristics.

The characteristic is also used in other species such as in the CPVO-TP/039/1 (01/10/2015) Meadow fescue/Tall fescue. In *Lolium* species it could be proven as well that the characteristic is reliable, uniform and stable.

Additional characteristic proposed for *Triticum aestivum* L.

Type of expression (QL, PQ, QN)	Characteristic	Growth Stage	Method of observation (VG,VS,MG,MS)	States of expression (at least two)	Example varieties	Note
QL	Production of pollen (male sterility)	60-65	VS	Absent present	A10858 SY Epson	1 9

Summary/Résumé/Zusammenfassung/Resumen

- 7 New Test Guidelines / Nouveaux principes directeurs d'examen / Neue Prüfungsrichtlinien / Nuevas directrices de examen.
- 30 Revisions of adopted Test Guidelines / Révisions de principes directeurs d'examen adoptés / Revisionen angenommener Prüfungsrichtlinien / Revisiones de directrices de examen adoptadas.
- 15 Partial revisions of adopted Test Guidelines / Révisions partielles de principes directeurs d'examen adoptés / Teilrevisionen angenommener Prüfungsrichtlinien / Revisiones parciales de directrices de examen adoptadas.

Total/Insgesamt: 52

of which / dont / davon / de las cuales:

24 * — “Final” draft Test Guidelines (2 New, 13 Revisions, 9 Partial Revision) / Versions “finales” de projets de principes directeurs d'examen (2 nouveaux, 13 révisions, 9 révision partielle) / „Endgültige“ Entwürfe von Prüfungsrichtlinien (2 Neue, 13 Revisionen, 9 Teilrevisionen) / Proyectos “finales” de directrices de examen (2 nuevas, 13 revisiones, 9 revisión parcial).
