

Technical Committee**TC/59/2****Fifty-Ninth Session
Geneva, October 23 and 24, 2023****Original:** English
Date: September 15, 2023**TEST GUIDELINES***Document prepared by the Office of the Union**Disclaimer: this document does not represent UPOV policies or guidance***EXECUTIVE SUMMARY**

1. The purpose of this document is to provide information on developments concerning Test Guidelines.

Additional Characteristics and States of Expression

2. The TC is invited to:

(a) note that no additional states of expression or characteristics were notified to the Office of the Union since the fifty-eighth session of the TC; and

(b) consider posting on the TG Drafters' webpage of the UPOV website the additional characteristic notified by the European Union for the Test Guidelines for Lettuce, as set out in Annex I to this document.

Test Guidelines for adoption

3. The TC is invited to consider the proposal from the TWV to revise characteristic "male sterility" in the Test Guidelines for Broccoli (document TG/151/5) along with the revision of all other *Brassica oleracea* species.

4. The TC is invited to note the list of draft Test Guidelines planned for adoption by the TC, subject to any changes proposed by the TC-EDC, as set out in Annex II to this document.

Test Guidelines adopted by correspondence in 2023

5. The TC is invited to note the draft Test Guidelines adopted by correspondence, as set out in Annex III to this document.

Corrections to Test Guidelines

6. The TC is invited to note the corrections to be made to the adopted Test Guidelines for Wheat (French version of document TG/3/2) and Leaf Chicory (document TG/154/4 Rev.), as set out in paragraph 31 of this document.

Draft Test Guidelines discussed by the TWPs in 2023

7. The TC is invited to note the draft Test Guidelines discussed by the TWPs, at their sessions in 2023, as listed in Annex IV to this document.

Draft Test Guidelines to be discussed by the TWPs in 2024

8. The TC is invited to consider the program for the development of new Test Guidelines and for the revision of adopted Test Guidelines, as set out in Annex V to this document.

Status of existing Test Guidelines or draft Test Guidelines

9. The TC is invited to note the list of existing Test Guidelines, as presented on the UPOV website (see: https://www.upov.int/test_guidelines/en/list.jsp).

Superseded Test Guidelines

10. The TC is invited to note that the superseded versions of Test Guidelines are available on the "Superseded Test Guidelines" page of the UPOV website at: (https://www.upov.int/test_guidelines/en/list_supersede.jsp)

11. The structure of this document is as follows:

EXECUTIVE SUMMARY.....	1
ADDITIONAL CHARACTERISTICS / STATES OF EXPRESSION.....	2

ANNEX II Test Guidelines for adoption by the TC at its fifty-ninth session	
ANNEX III Draft Test Guidelines adopted by correspondence in 2023	
ANNEX IV Draft Test Guidelines discussed by the TWPs in 2023	
ANNEX V Draft Test Guidelines to be discussed by the TWPs in 2024	

12. The following abbreviations are used in this document:

TC:	Technical Committee
TC-EDC:	Enlarged Editorial Committee
TWA:	Technical Working Party for Agricultural Crops
TWF:	Technical Working Party for Fruit Crops
TWM:	Technical Working Party on Testing Methods and Techniques
TWO:	Technical Working Party for Ornamental Plants and Forest Trees
TWPs:	Technical Working Parties
TWV:	Technical Working Party for Vegetables

ADDITIONAL CHARACTERISTICS / STATES OF EXPRESSION

Notification and decision procedure

13. Document TGP/5, Section 10: Notification of Additional Characteristics and States of Expression" states that "proposals for additional characteristics and states of expression notified to the Office of the Union by means of document TGP/5 Section 10, will be presented to the relevant Technical Working Party(ies) (TWP(s)) at the earliest opportunity with information on the extent of use of the characteristic. The characteristics will then, as appropriate, be posted on the TG Drafters' webpage of the UPOV website

(https://www.upov.int/resource/en/tg_drafters.html) on the basis of comments made by the relevant TWP(s), and/or the TWP(s) may initiate a revision or a partial revision of the Test Guidelines concerned."

Additional characteristics and states of expression notified

New notifications

14. The Office of the Union has not received notifications of additional characteristics or states of expression since the fifty-eighth session of the Technical Committee.

Previous notifications

15. The additional characteristic and state of expression notified to the TC, at its fifty-eighth session¹, were presented to the TWV, at its fifty-seventh session², for consideration on whether to be posted on the TG Drafters' webpage of the UPOV website and/or whether to initiate a revision or partial revision of the documents (see documents TC/58/2 "Test Guidelines", paragraph 27, and TC/58/31 "Report", paragraphs 112 and 113).

16. The TWV, at its fifty-seventh session, considered the additional state of expression in the Test Guidelines for Asparagus (document TG/130) and additional characteristic on the Test Guidelines for Lettuce (document TGP/13), as set out in document TWP/7/9, Annexes I and II (see document TWV/57/26 "Report", paragraphs 52 and 54).

Additional state of expression: TG/130/4 Asparagus

- Char. 16: Type of flowering (notified by the European Union)

17. The TWV, at its fifty-seventh session, agreed to invite Japan to propose a draft for partial revision of the Test Guidelines for Asparagus to consider the additional state of expression notified to the Office of the Union (Characteristic 16).

Additional characteristic: TG/13/11 Lettuce

- Char. "Resistance to *Bremia lactucae* (Bl) Isolate PT2036" (notified by the European Union)

18. The TWV, at its fifty-seventh session, agreed that the additional characteristic on the Test Guidelines for Lettuce should be posted on the TG Drafters' webpage of the UPOV website. The TWV agreed that a partial revision would not be required to consider the inclusion of the additional characteristic notified (see Annex I to this document).

19. *The TC is invited to:*

(a) note that no additional states of expression or characteristics were notified to the Office of the Union since the fifty-eighth session of the TC; and

(b) consider posting on the TG Drafters' webpage of the UPOV website the additional characteristic notified by the European Union for the Test Guidelines for Lettuce, as set out in Annex I to this document.

TEST GUIDELINES FOR ADOPTION

Background

20. The TC, at its forty-seventh session, held in Geneva from April 4 to 6, 2011, noted that the Council, at its forty-third ordinary session, held in Geneva on October 22, 2009, had endorsed the practice whereby Test Guidelines are adopted by the TC on behalf of the Council on the basis of the program of work approved by the Council, without the individual Test Guidelines being submitted to the Council for review (see document C/43/17 "Report", paragraph 38).

¹ Held in Geneva, on October 24 and 25, 2022

² Held in Antalya, Türkiye, from May 1 to 5, 2023.

21. At its fifty-sixth ordinary session, held in Geneva on October 28, 2022, the Council approved the work of the TC and the work programs of the TWPs reported to the TC, as provided in document TC/58/31 "Report" (see document C/56/15 "Report", paragraph 60).

Test Guidelines for Broccoli (document TG/151/5)

22. The TWV, at its fifty-seventh session³, noted that all Test Guidelines for *Brassica oleracea* species had been revised in 2023 for updating the characteristic "male sterility", except the Test Guidelines for Broccoli (*Brassica oleracea* L. var. *italica* Plenck, document TG/151/5). The TWV agreed that the omission of the Test Guidelines for Broccoli had been a mistake and agreed to propose to the Technical Committee amending characteristic 24 [male sterility] and its explanation in TG Broccoli (see document TWV/57/26 "Report", paragraph 79).

23. The proposal for partial revision of the Test Guidelines for Broccoli (document TG/151/5) for the revision of characteristic 24 "male sterility" is provided in document TC/59/9.

24. *The TC is invited to consider the proposal from the TWV to revise characteristic "male sterility" in the Test Guidelines for Broccoli (document TG/151/5) along with the revision of all other Brassica oleracea species.*

List of draft Test Guidelines proposed for adoption

25. Annex II to this document presents the list of draft Test Guidelines proposed for adoption by the TWV, TWA, TWO and TWF, at their sessions in 2023, which will be considered by the TC-EDC at its meeting on October 17 and 18, 2023.

26. *The TC is invited to note the list of draft Test Guidelines planned for adoption by the TC, subject to any changes proposed by the TC-EDC, as set out in Annex II to this document.*

TEST GUIDELINES ADOPTED BY CORRESPONDENCE IN 2023

Background

27. Document TGP/7 "Development of Test Guidelines" states that "The Technical Committee may adopt Test Guidelines at its session or by correspondence. Test Guidelines may be adopted by correspondence according to the following procedure:

- "the draft Test Guidelines are circulated to the TC for adoption by correspondence with the recommendations by the TC-EDC;
- "the draft Test Guidelines are considered as adopted if no comments are received within six weeks;
- "if any comments are received, the draft Test Guidelines are referred to the relevant TWP to address those comments."

Adoptions by correspondence

28. The TC-EDC, at its meeting held on March 20 and 21, 2023, considered the draft Test Guidelines submitted for adoption by the TWPs. The TC-EDC recommended the adoption by correspondence of the Test Guidelines, as set out in Annex III to this document.

29. On July 20, 2023, the Office of the Union issued Circular E-23/121 proposing the adoption by correspondence of the revised draft Test Guidelines incorporating the editorial amendments recommended by

³ Held in Antalya, Türkiye, from May 1 to 5, 2023.

the TC-EDC. No objections were received by the Office of the Union and the Test Guidelines were considered as adopted by the TC by correspondence.

30. The TC is invited to note the draft Test Guidelines adopted by correspondence, as set out in Annex III to this document.

CORRECTIONS TO TEST GUIDELINES

31. The following corrections to Test Guidelines will be made and published on the UPOV website after the fifty-ninth session of the TC:

- (a) TG/3/12 Wheat

The correction concerns the following item only in the French version of the Test Guidelines:

- Technical questionnaire: Characteristic 5.7 (17): to add missing state of expression (3) "awns present".

- (b) TG/154/4 Rev. Leaf Chicory

The correction concerns the following item:

- Table 1: to use same number for the states of expression as in characteristic 24; and "circular to oblate" to read "oblate to circular"

32. The TC is invited to note the corrections to be made to the adopted Test Guidelines for Wheat (French version of document TG/3/2) and Leaf Chicory (document TG/154/4 Rev.), as set out in paragraph 31 of this document.

DRAFT TEST GUIDELINES DISCUSSED BY THE TWPS IN 2023

33. The Test Guidelines discussed by the TWPs at their sessions in 2023 are presented in Annex IV to this document.

34. The TC is invited to note the draft Test Guidelines discussed by the TWPs, at their sessions in 2023, as listed in Annex IV to this document.

DRAFT TEST GUIDELINES TO BE DISCUSSED BY THE TWPS IN 2024

Proposals from Technical Working Parties

35. For their sessions in 2024, the TWPs proposed to discuss the development of new Test Guidelines, or the revision of adopted Test Guidelines, as listed in Annex V to this document.

36. The TC is invited to consider the program for the development of new Test Guidelines and for the revision of adopted Test Guidelines, as set out in Annex V to this document.

STATUS OF EXISTING TEST GUIDELINES OR DRAFT TEST GUIDELINES

37. The list of existing Test Guidelines is available on the UPOV website (see: https://www.upov.int/test_guidelines/en/list.jsp).

38. Draft Test Guidelines are published as provisional working documents on the respective pages of the Technical Working Parties and have no status until adopted by the Technical Committee (available at: <https://www.upov.int/meetings/en/topic.jsp>).

39. *The TC is invited to note the list of existing Test Guidelines, as presented on the UPOV website (see: https://www.upov.int/test_guidelines/en/list.jsp).*

SUPERSEDED TEST GUIDELINES

40. The superseded versions of Test Guidelines are available on the “Superseded Test Guidelines” page of the UPOV website (available at: https://www.upov.int/test_guidelines/en/list_supersede.jsp).

41. *The TC is invited to note that the superseded versions of Test Guidelines are available on the “Superseded Test Guidelines” page of the UPOV website (https://www.upov.int/test_guidelines/en/list_supersede.jsp).*

- [i] indicate type of expression (QL, PQ, QN)
- [ii] indicate method of observation (VG, VS, MG, MS)
- [iii] example varieties to be provided for at least 2 states.

Explanation / Illustration (including extent of the use of the characteristic(s)):

Resistance to *Bremia lactucae* (Bl) isolate PT2036

- | | |
|-------------------------------------|--|
| 1. Pathogen | <i>Bremia lactucae</i> |
| 2. Quarantine status | no |
| 3. Host species | lettuce - <i>Lactuca sativa</i> L. |
| 4. Source of inoculum | Naktuinbouw (resistentie@naktuinbouw.nl) |
| 5. Isolate | PT2036 |
| 6. Establishment isolate identity | test on differentials (see table below) |
| 7. Establishment pathogenicity | test on susceptible varieties |
| 8. Multiplication inoculum | |
| 8.1 Multiplication medium | lettuce plantlets |
| 8.2 Multiplication variety | susceptible variety, for example Green Towers. |
| 8.3 Plant stage at inoculation | cotyledon to first leaf |
| 8.4 Inoculation medium | tap water |
| 8.5 Inoculation method | spraying a spore suspension |
| 8.6 Harvest of inoculum | washing off from leaves |
| 8.7 Check of harvested inoculum | counting spores |
| 8.8 Shelf life/viability inoculum | 2 hours at room temperature; 2 days in fridge |
| 9. Format of the test | |
| 9.1 Number of plants per genotype | at least 20 |
| 9.2 Number of replicates | - |
| 9.3 Control varieties (informative) | differentials (see table below) |
| 9.4 Test design | - |
| 9.5 Test facility | climate room |
| 9.6 Temperature | 15°C-18°C |
| 9.7 Light | adequate for good plant growth; seedlings should not etiolate.
option: reduced light 24 hours after inoculation |
| 9.8 Season | - |
| 9.9 Special measures | plants may grow on wet blotting paper with or without a nutrient solution, on sand, or on potting soil (see point 13). |

high humidity (>90%) is essential for infection and sporulation.

- 10. Inoculation**
- 10.1 Preparation inoculum
washing off from leaves by vigorous shaking in a closed container
 - 10.2 Quantification inoculum
counting spores; spore density should be 3.10^4 - 1.10^5
 - 10.3 Plant stage at inoculation
cotyledon stage
 - 10.4 Inoculation method
spraying till run-off
option: reduced light 24 hours after inoculation
 - 10.5 First observation
beginning of sporulation on susceptible varieties (around 7 days after inoculation)
 - 10.6 Second observation
3-4 days after first observation (around 10 days after inoculation)
 - 10.7 Final observations
14 days after inoculation
two of these three observations may be sufficient; the third notation is optional for observation of evolution of symptoms in case of doubt. The day of maximum sporulation should occur in this period.
- 11. Observations**
- 11.1 Method
visual observation of sporulation and necrotic reaction to infection
 - 0.2 Observation scale
resistant
 - 0 no sporulation, no necrosis
 - 1 no sporulation, necrosis present
 - 2 weak sporulation (much less than susceptible control) with necrosis
 - 3 weak sporulation (less than susceptible control and not evolving between second and third observations) with necrosis
 - 4 very sparse sporulation (not evolving between second and third observation) without necrosis
susceptible
 - 5 reduced sporulation (compared to susceptible control) without necrosis
 - 6 normal sporulation without necrosis
on standards.
 In case of normal sporulation (same level as susceptible control) with necrosis, another test on bigger plants or other substrate must be undertaken.
 - 11.3 Validation of test
class 0, 1, 2, 3 and 4: resistant
class 5 and 6: susceptible
- 12. Interpretation of data in terms of UPOV characteristic states**
- 13. Critical control points**
- Reaction of standards (the infection pressure may vary between experiments, leading to slight differences in sporulation intensity); when the reactions are not clear the experiment should be repeated.
The sowing on soil can be used to see necrosis, but weak sporulation (much less than susceptible control) can appear; when testing on sand, spores can be confused with grains of sand.
In case of use of nutritive solution on blotting paper, a fungicide can be added to avoid contamination by saprophytes
