**GUIDELINES
FOR THE CONDUCT OF TESTS
FOR DISTINCTNESS, UNIFORMITY AND STABILITY**

TOBACCO

(Nicotiana tabacum L.)

These Guidelines should be read in conjunction with document TG/1/2, which contains explanatory notes on the general principles on which the Guidelines have been established.

X. Technical Questionnaire	35

I. Subject of these Guidelines

These Test Guidelines apply to all varieties of *Nicotiana tabacum* L.

II. Material Required

1. The competent authorities decide when, where and in what quantity and quality the plant material required for testing the variety is to be delivered. Applicants submitting material from a State other than that in which the testing takes place must make sure that all customs formalities are complied with. As a minimum, the following quantity of plant material is recommended:

2 g.

The seed should at least meet the minimum requirements for germination capacity, moisture content and purity as required for tobacco production in the country in which the application is made.

2. The plant material must not have undergone any treatment unless the competent authorities allow or request such treatment. If it has been treated, full details of the treatment must be given.

III. Conduct of Tests

1. The minimum duration of tests should normally be two independent growing cycles.
2. The tests should normally be conducted at one place. If any important characteristics of the variety cannot be seen at that place, the variety may be tested at an additional place.
3. The field tests should be carried out under conditions ensuring normal growth. The size of the plots should be such that plants or parts of plants may be removed for measurement and counting without prejudice to the observations which must be made up to the end of the growing period. As a minimum each test should include a total of at least 40 plants in two or more replicates. Separate plots for observation and for measuring should only be used if they have been subject to similar environmental conditions.
4. Additional tests may be established, especially with respect to the classification of tobacco.

IV. Methods and Observations

1. All observations for the assessment of distinctness and stability should be made on the plot as a whole. In the case of measured characteristics, observations should be made on at least 20 plants or parts taken from each of the 20 plants.

2. For the assessment of uniformity a population standard of 1% with an acceptance probability of at least 95% should be applied. In the case of a sample size of 40 plants, the maximum number of off types allowed would be 2.
3. All observations on the plant should be made after the beginning of flowering when the leaves in the middle third of the main stem are fully expanded.
4. All observations on the leaf should be made after the beginning of flowering on the largest fully-developed leaf in the middle third of the main stem, excluding the inflorescence.
5. All observations on flowers should be made on the main inflorescence on fully open flowers at flowering time.
6. All observations on the inflorescence should be made on the main inflorescence at full flowering time.
7. Suckers are excluded from observations except for characteristics related to the suckers themselves.

V. Grouping of Varieties

1. The collection of varieties to be grown should be divided into groups to facilitate the assessment of distinctness. Characteristics which are suitable for grouping purposes are those which are known from experience not to vary, or to vary only slightly, within a variety. Their various states of expression should be fairly evenly distributed throughout the collection.
2. It is recommended that the competent authorities use the following characteristics for grouping varieties:
 - (a) Plant: height of main stem (including inflorescence) (characteristic 2)
 - (b) Plant: number of leaves (characteristic 4)
 - (c) Leaf: shape of blade (characteristic 11)
 - (d) Leaf: color of midrib on lower side (characteristic 13)
 - (e) Time of flowering (50% of plants with at least one corolla open) (characteristic 23)
 - (f) Flower: color of corolla (characteristic 29)
 - (g) Flower: development of stamens (characteristic 30)

VI. Characteristics and Symbols

1. To assess distinctness, uniformity and stability, the characteristics and their states as given in the Table of Characteristics should be used. Two Tables of Characteristics are provided with different sets of example varieties:
 - a) Table of Characteristics containing example varieties provided by Greece;
 - b) Table of Characteristics containing example varieties provided by Brazil. In this set of example varieties, for certain characteristics, different example varieties, separated by a semicolon, are indicated for Burley type and for Virginia Flue Cured type. Where Virginia Flue Cured type varieties are indicated they follow the semicolon.
2. Notes (numbers), for the purposes of electronic data processing, are given opposite the states of expression for each characteristic.
3. Legend
 - (*) Characteristics that should be used on all varieties in every growing period over which examinations are made and always be included in the variety descriptions, except when the state of expression of a preceding characteristic or regional environmental conditions render this impossible.
 - (+) See Explanations on the Table of Characteristics in Chapter VIII.

VII. (a) Table of Characteristics/Tableau des caractères/Merkmalstabelle/Tabla de caracteresticas

VIII. Explanations on the Table of Characteristics

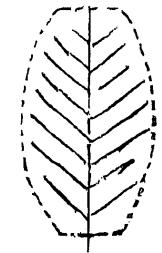

Ad. 1: Plant: shape

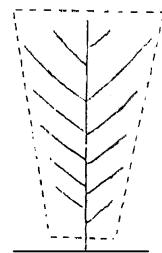

1
conical

2
cylindrical

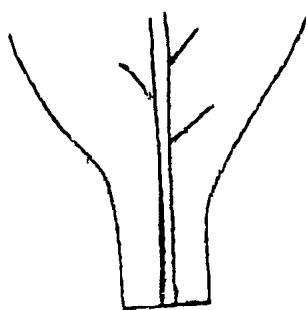

3
elliptical

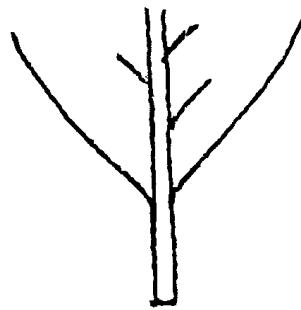

4
inverted conical

Ad. 6: Leaf: type

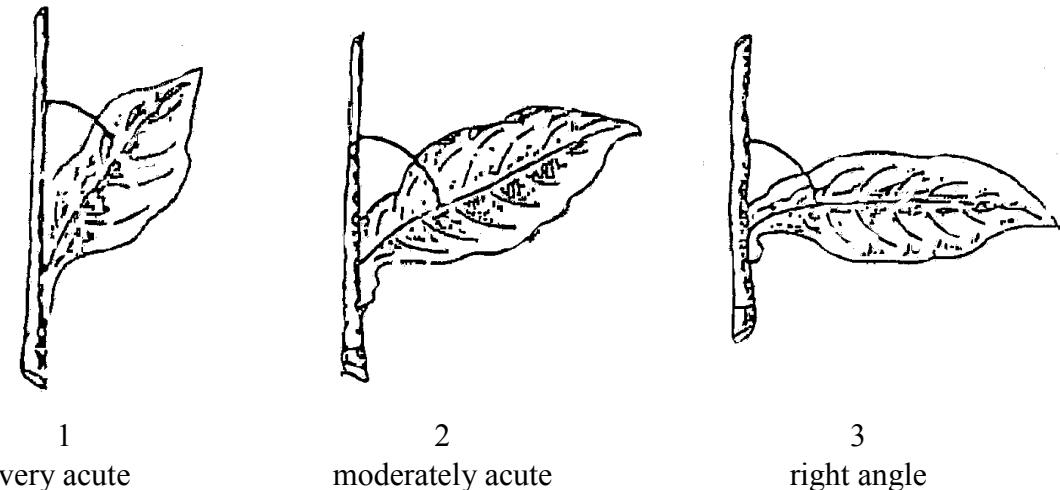

1
sessile

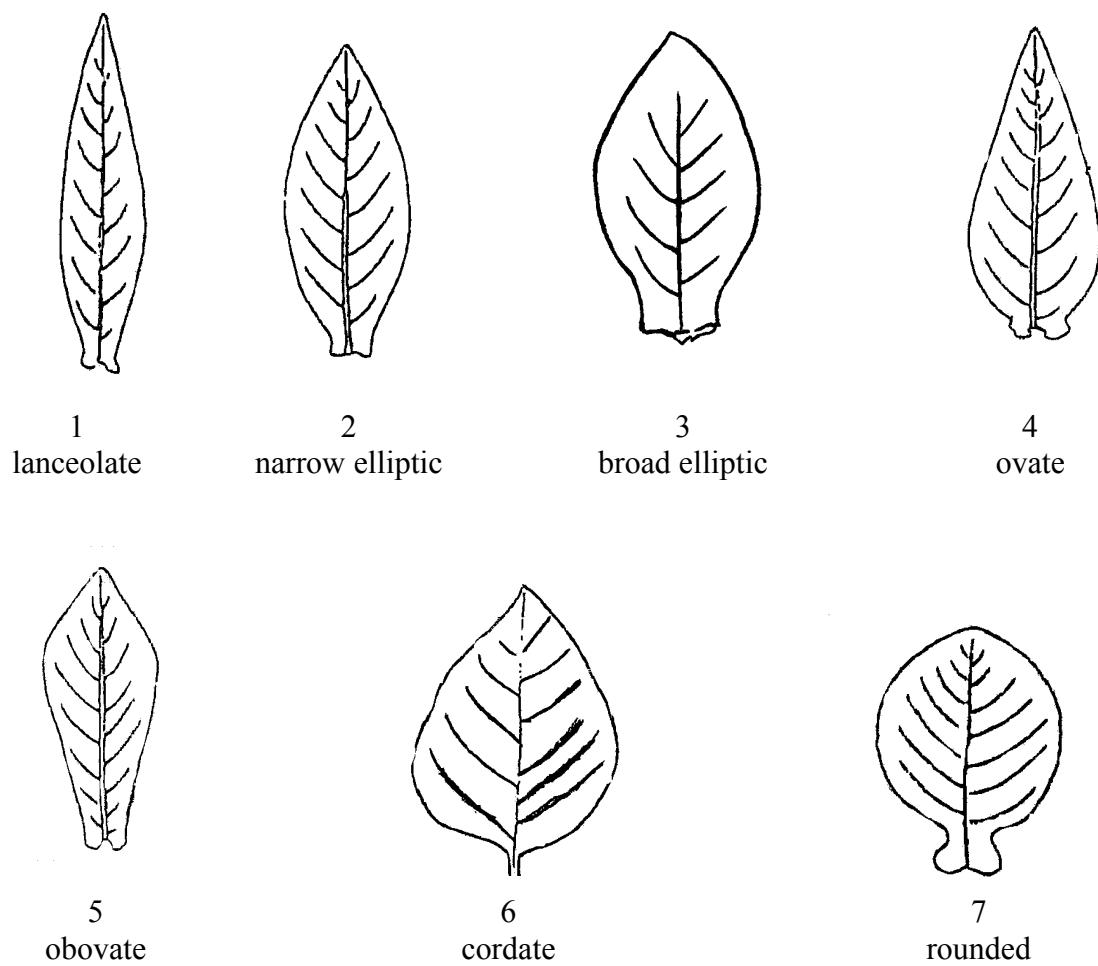

2
petiolate

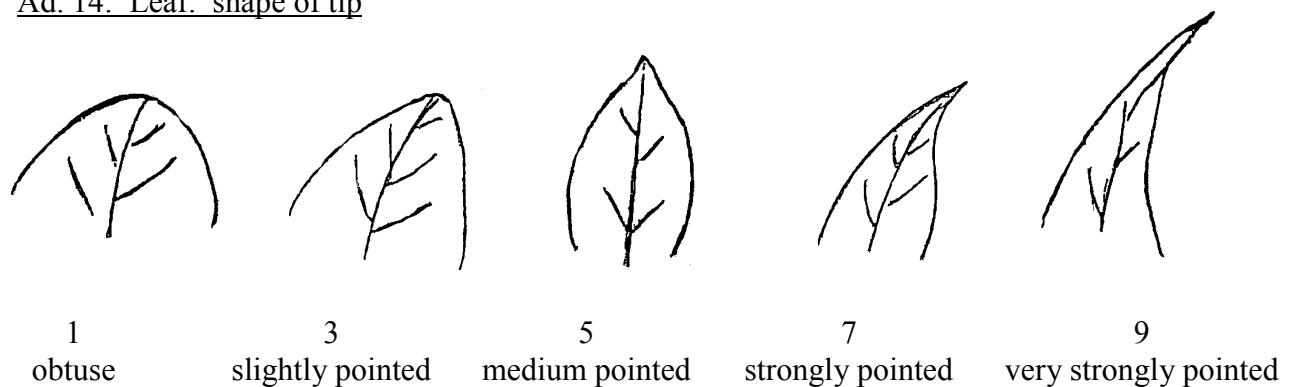

Ad. 7: Leaf: angle of insertion

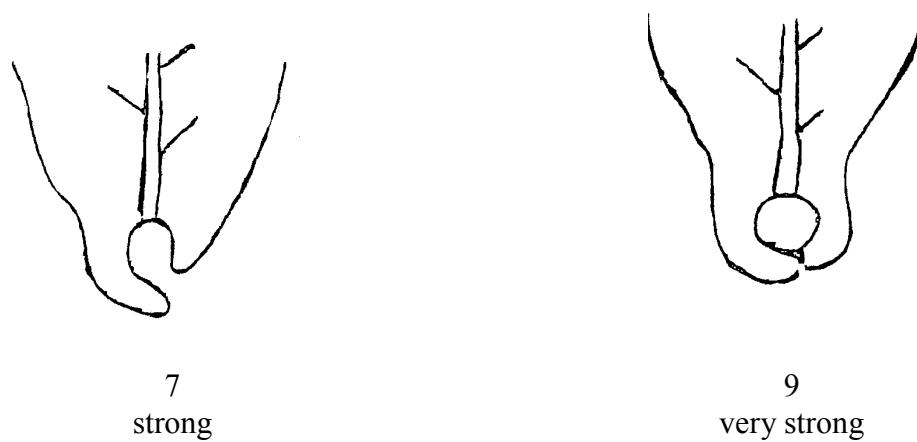

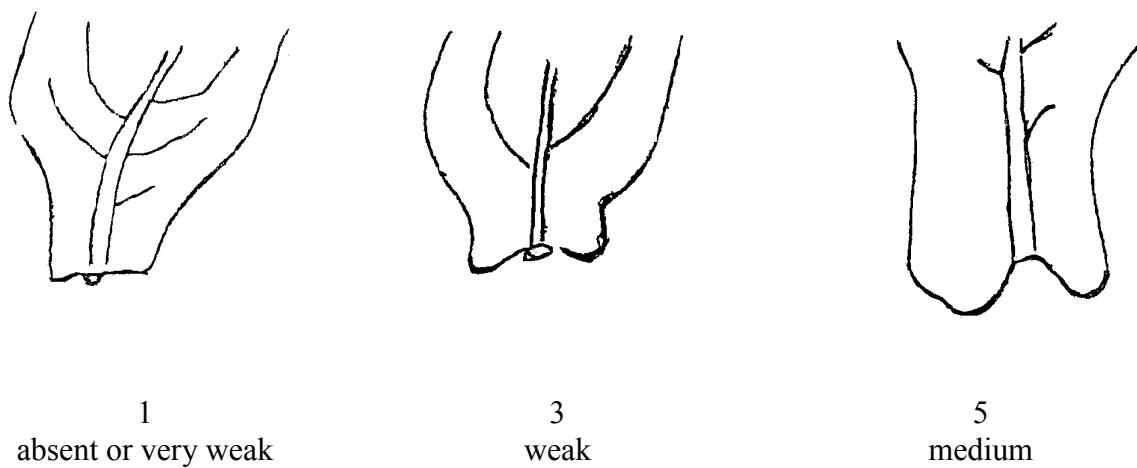

Ad. 11: Leaf: shape of blade

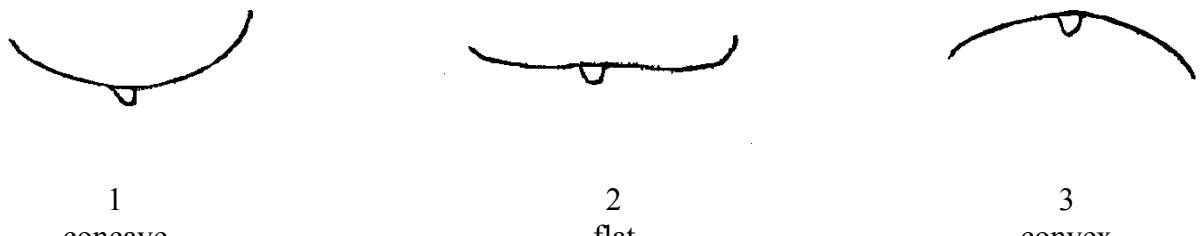

Ad. 14: Leaf: shape of tip

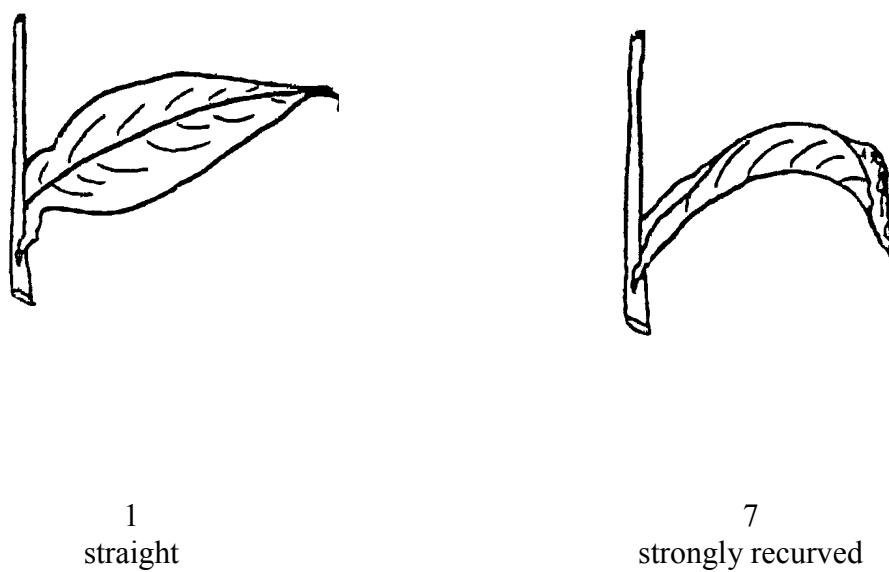

Ad. 17: Leaf: auricles (sessile types only)

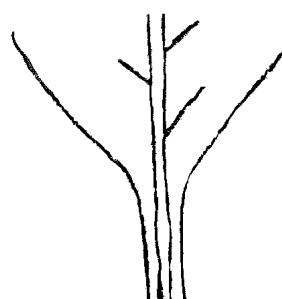

Ad. 18: Leaf: shape in cross section

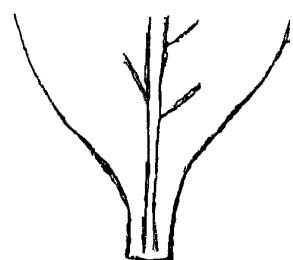

Ad. 19: Leaf: longitudinal profile

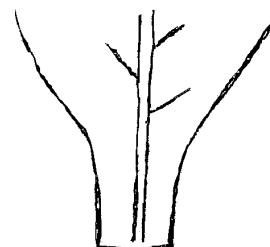

Ad. 20: Leaf: width of blade at basis (sessile types only)

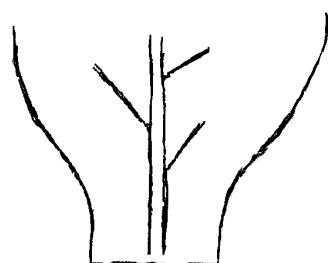

1
very narrow

3
narrow

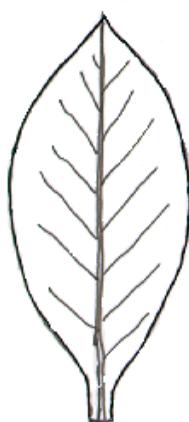

5
medium

7
broad

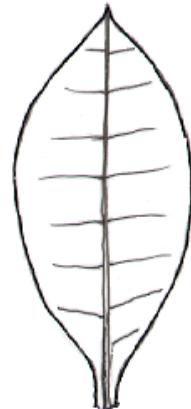

Ad. 22: Leaf: angle of lateral veins to midrib

1
very acute

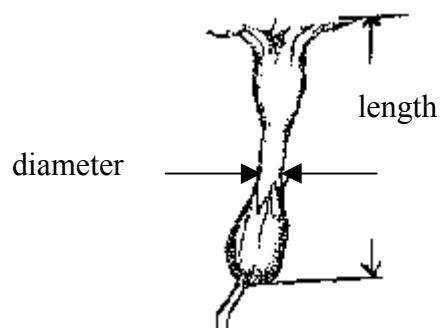

2
moderately acute

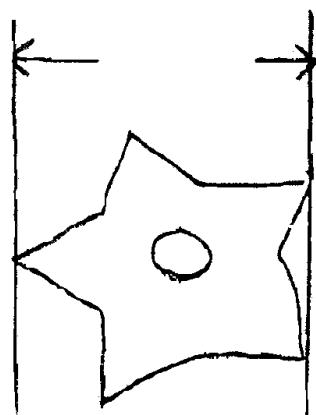

3
right angle

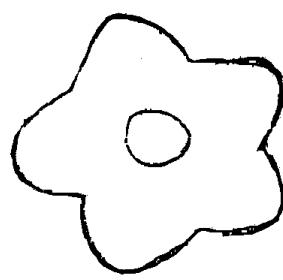

Ad. 24 and 25: Flower: length (excluding peduncle) and diameter of tube (just above calyx)

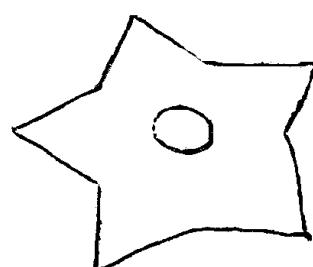

Ad. 27: Flower: size of corolla

Ad. 28: Flower: expression of tips of corolla

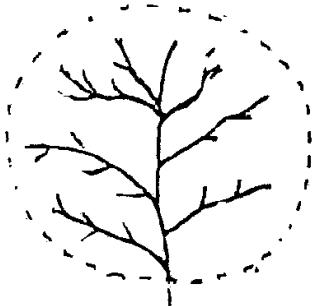

1
absent or very weak

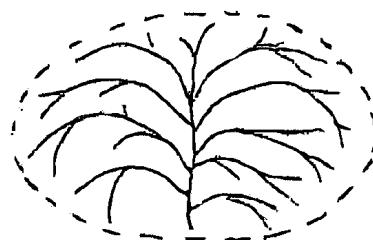

9
very strong

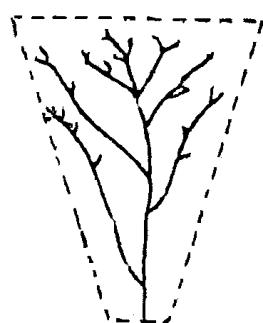

Ad. 32: Inflorescence: shape

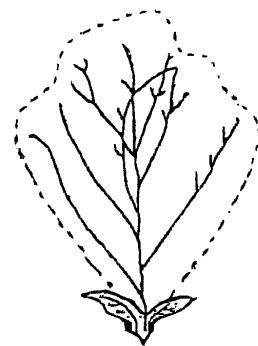

1
spherical

2
flattened spherical

3
reversed conical

4
double conical

Ad. 34: Inflorescence: compactness

1
very loose

3
loose

5
medium

7
dense

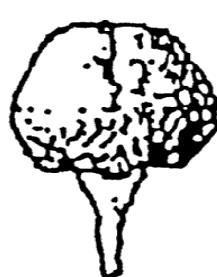

9
very dense

Ad. 35: Fruit: form

1
rounded

2
ovate

IX. Literature

X. Technical Questionnaire

	Reference Number (not to be filled in by the applicant)
TECHNICAL QUESTIONNAIRE to be completed in connection with an application for plant breeders' rights	
1. Species	<i>Nicotiana tabacum</i> L. TOBACCO
2. Applicant (Name and address)	
3. Proposed denomination or breeder's reference	

4. Information on origin, maintenance and reproduction of the variety

4.1 Type of material

- | | |
|--------------------------------|-----|
| (a) inbred line | [] |
| - male fertile line | [] |
| - male sterile line | [] |
| (b) male sterile single hybrid | [] |
| (c) open pollinated variety | [] |
| (d) other (please indicate) | [] |
-

4.2 Formula (hybrid varieties) – The information specified in chapters 5 and/to 7 must be provided, on separate sheets, for each component of the hybrid.

Single hybrid

- female parental line
- male parental line
-

N.B. In the case of use of a male sterility system, indicate the name of the maintainer line of the female parental line

4.3 Genetic origin and breeding method

4.4 Other information

5. Characteristics of the variety to be indicated (the number in brackets refers to the corresponding characteristic in Test Guidelines; please mark the state of expression which best corresponds).

	Characteristics	Example Varieties Table of Characteristics (a)	Example Varieties Table of Characteristics (b)	Note
5.1 (2)	Plant: height of main stem (including inflorescence)			
	very short	Tsempeli Agriniou 21		1[]
	short	Xanthi 81	BY 37; MN373	3[]
	medium	Zihna Pageou	TN90; K326	5[]
	tall	Virginia Hellas 9	Banket, A1 KY8959; NC 27NF	7[]
	very tall	Burley 21E		9[]
5.2 (4)	Plant: number of leaves			
	very few	Mavros Ipatis		1[]
	few	Mirodato Agriniou 13B, Niki	BY37; NC2326, NC82	3[]
	medium	Doxato	TN90; K326	5[]
	many	Zihna Pageou	BY64; NC27NF	7[]
	very many	Sampsous 79		9[]
5.3 (11)	Leaf: shape of blade			
	lanceolate	Tsempeli Agriniou 21		1[]
	narrow elliptic	Virginia Hellas 9	VA510; K326	2[]
	broad elliptic	Xanthi 101	KY907; SPG70	3[]
	ovate	Argiroudis 14A		4[]
	obovate			5[]
	cordate	Katerini 53		6[]
	rounded			7[]

	Characteristics	Example Varieties Table of Characteristics (a)	Example Varieties Table of Characteristics (b)	Note
5.4 (13)	Leaf: color of midrib on lower side			
	whitish		TN86	1[]
	whitish green		TN90; MN373	2[]
	green		—; K326	3[]
5.5 (23)	Time of flowering: (50% of plants with at least one corolla open)			
	very early	Mavros Ipatis		1[]
	early	Xanthi 2A	BY21; MN373	3[]
	medium	Doxato	TN 90; K 326	5[]
	late		BY 64; NC27NF	7[]
	very late	Kontoula Zagliveriou		9[]
5.6 (29)	Flower: color of corolla			
	white		VA 528	1[]
	light pink	Xanthi 2A		2[]
	medium pink		TN90; K 326	3[]
	dark pink	Katerini 53	—; C 371 G	4[]
	red			5[]
5.7 (30)	Flower: development of stamens			
	none or rudimentary	Poroia 52		1[]
	full	Xanthi 2A	TN90; K 326	2[]

6. Similar varieties and differences from these varieties

Denomination of similar variety	Characteristic in which the similar variety is different ^{o)}	State of expression of similar variety	State of expression of candidate variety

^{o)} In the case of identical states of expressions of both varieties, please indicate the size of the difference.

7. Additional information which may help to distinguish the variety

7.1 Classification of tobacco varieties

flue cured []
light air cured []
dark air cured []
sun cured []
fire cured []
other (please specify) []

7.2 Resistance to pests and diseases

7.3 Special conditions for the evaluation of the variety

7.4 Other information

8. Authorization for release

(a) Does the variety require prior authorization for release under legislation concerning the protection of the environment, human and animal health?

Yes [] No []

(b) Has such authorization been obtained?

Yes [] No []

If the answer to that question is yes, please attach a copy of such an authorization.
