Technical Working Party on Automation and Computer Programs (TWC)

Thirty-first Session

PREPARATORY WORKSHOP

Seoul, Republic of Korea
June 3, 2013

PROGRAM

1. Introduction to UPOV and the role of UPOV Technical Working Parties (TWPs)
2. Overview of DUS Trials and Test Guidelines
   a) Method of observation and types of record (MS, MG, VS, VG);
   b) Types of expression (QL, PQ, QN) and types of scales of data
3. Methods used for DUS data analysis and development of variety descriptions
   a) Methods of management used in the DUS examination for transformation of observations and measurements into notes for distinctness for variety descriptions
      [presentations by Japan and Korea]
   b) Methods used for DUS trial design and data analysis
      [presentations by France and United Kingdom]
4. Image analysis
5. UPOV Website
6. Agenda for the TWC Session
7. Feedback from participants

1. INTRODUCTION TO UPOV AND THE ROLE OF UPOV TECHNICAL WORKING PARTIES (TWPs)

UPOV: INDEPENDENT INTERGOVERNMENTAL ORGANIZATION

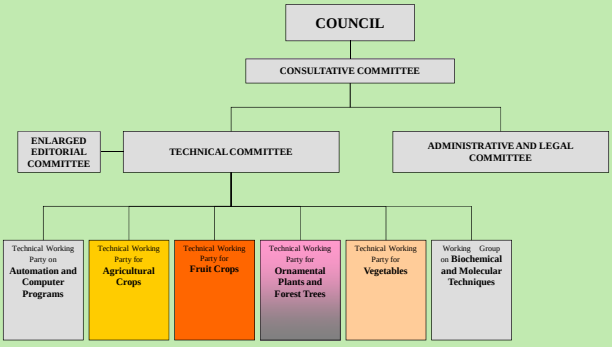
The International Convention for the Protection of New Varieties of Plants

established in 1961

The International Union for the Protection of New Varieties of Plants

Union internationale pour la protection des obtentions végétales

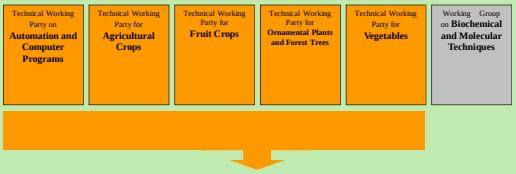
UPOV Structure



UPOV Structure

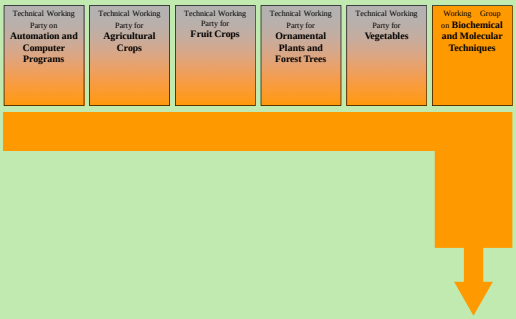
Test Guidelines

UPOV Structure



TGP documents

UPOV Structure



Role of the BMT

The BMT is a group open to DUS experts, biochemical and molecular specialists and plant breeders, whose role is to:

- **(i)** Review general developments in biochemical and molecular techniques;
- **(ii)** Maintain an awareness of relevant applications of biochemical and molecular techniques in plant breeding;
- **(iii)** Consider the possible application of biochemical and molecular techniques in DUS testing and report its considerations to the TC;
- **(iv)** If appropriate, establish guidelines for biochemical and molecular methodologies and their harmonization […];
- **(v)** Consider initiatives from TWPs, for the establishment of crop specific subgroups […];
- **(vi)** Develop guidelines regarding the management and harmonization of databases of biochemical and molecular information, in conjunction with the TWC;
- **(vii)** Receive reports from Crop Subgroups and the BMT Review Group;
- **(viii)** Provide a forum for discussion on the use of biochemical and molecular techniques in the consideration of essential derivation and variety identification.

2. OVERVIEW OF DUS TRIALS AND TEST GUIDELINES (TGs) (document TG/1/3 and TGP documents)

THE CONDITIONS FOR GRANTING A BREEDER'S RIGHT

Criteria to be satisfied

- NOVELTY
- **D**ISTINCTNESS
- **U**NIFORMITY
- **S**TABILITY

"DUS"

THE CONDITIONS FOR GRANTING A BREEDER'S RIGHT

Other conditions

- VARIETY DENOMINATION
- FORMALITIES
- PAYMENT OF FEES

NO OTHER CONDITIONS!

Guidance for DUS Examination

facilitates:

BEST PRACTICE (based on experience)

=> good decisions

=> good definition of the object of protection (strong protection)

=> efficiency in method of examination (learn from the best)

HARMONIZATION

=> efficiency

- mutual acceptance of DUS reports (minimize cost of examination for individual authorities)
- mutual recognition of variety descriptions (all parties speak the same "language")
- simple and cheap system for applicants (minimize cost for breeders)

UPOV provides guidance by:

- The "General Introduction" (TG/1/3)
  - General technical principles
  - Organization of DUS Testing
  - Associated "TGP" Documents (e.g. statistical methods)

= version 3

TG/1/3 General Introduction

"Associated" TGP Documents

Ref.	Title
TG/00	List of TGP Documents and Latest Issue Dates
TGP/1	General Introduction With Explanations
TGP/2	List of Test Guidelines Adopted by UPOV
TGP/3	Varieties of Common Knowledge
TGP/4	Constitution and Maintenance of Variety Collections
TGP/5	Experience and Cooperation in DUS testing
TGP/6	Arrangements for DUS testing
TGP/7	Development of Test Guidelines
TGP/8	Trial Design and Techniques Used in the Examination of DUS
TGP/9	Examining Distinctness
TGP/10	Examining Uniformity
TGP/11	Examining Stability
TGP/12	Special Characteristics
TGP/13	Guidance for New Types and Species
TGP/14	Glossary of Technical, Botanical and Statistical Terms Used in UPOV Documents
TGP/15	Guidance on the Use of Biochemical and Molecular Markers in the Examination of Distinctness, Uniformity and Stability (DUS)

"CHARACTERISTICS"

- may have direct commercial relevance

- Flower color (ornamental)
- Fruit color

- but commercial relevance NOT required

- Leaf shape

Selection of Characteristics

The basic requirements that a characteristic should fulfill before it is used for DUS testing or producing a variety description are that its expression (TG/1/3: Section 4.2.1) :

(a) **results from a given genotype** or combination of genotypes;

(b) is sufficiently **consistent and repeatable** in a **particular environment**;

(c) exhibits sufficient **variation between varieties** to be able to establish distinctness;

(d) is capable of **precise definition and recognition**;

(e) allows **uniformity requirements** to be fulfilled;

(f) allows **stability requirements** to be fulfilled, meaning that it produces consistent and repeatable results after repeated propagation or, where appropriate, at the end of each cycle of propagation.

Selection of Characteristics

- **Yield ???**
- **Straw strength ???**

Etc.

Selection of Characteristics

Criteria	Fruit: color	Leaf: shape	Yield
(a) results from a given genotype or combination of genotypes	Yes	Yes	
(b) sufficiently consistent and repeatable in a particular environment	Yes	Yes	
(c) exhibits sufficient variation between varieties to be able to establish distinctness	Yes	Yes	
(d) is capable of precise definition and recognition	Yes	Yes	
(e) allows uniformity requirements to be fulfilled	Yes	Yes	
(f) allows stability requirements to be fulfilled	Yes	Yes	
Commercial value	Yes	No	
ACCEPTABILITY	Yes	Yes	

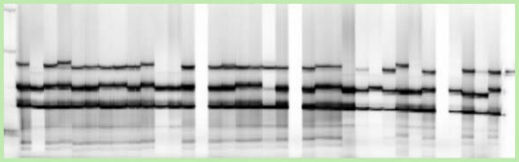
Selection of Characteristics

Criteria	Fruit: color	Leaf: shape	Yield
(a) results from a given genotype or combination of genotypes	Yes	Yes	Yes
(b) sufficiently consistent and repeatable in a particular environment	Yes	Yes	(No)
(c) exhibits sufficient variation between varieties to be able to establish distinctness	Yes	Yes	???
(d) is capable of precise definition and recognition	Yes	Yes	(No)
(e) allows uniformity requirements to be fulfilled	Yes	Yes	???
(f) allows stability requirements to be fulfilled	Yes	Yes	???
Commercial value	Yes	No	Yes
ACCEPTABILITY	Yes	Yes	No

Special Characteristics: Disease Resistance

Criteria	Disease Resistance
(a) results from a given genotype or combination of genotypes	*Knowledge of nature of genetic control of resistance is important
(b) sufficiently consistent and repeatable in a particular environment	*Standardize conditions (greenhouse / laboratory) & methodology *Standardize inoculum *Ring-test
(c) exhibits sufficient variation between varieties to be able to establish distinctness	*Susceptible / Resistant OR varying degrees of resistance?
(d) is capable of precise definition and recognition	*Define and recognize races and strains
(e) allows uniformity requirements to be fulfilled	see above
(f) allows stability requirements to be fulfilled	see above
	Difficult and expensive

Molecular Techniques?



a) Method of observation and types of records (MS, MG, VS, VG)

Method of Observation

M: Measurement:

an objective observation against a calibrated, linear scale e.g. using a ruler, weighing scales, colorimeter, dates, counts, etc.);

V: Visual observation:

includes observations where the expert uses reference points (e.g. diagrams, example varieties, side-by-side comparison) or non-linear charts (e.g. color charts).

"Visual" observation refers to the sensory observations of the expert and, therefore, also includes smell, taste and touch.

TGP/9/1 "Examining Distinctness"

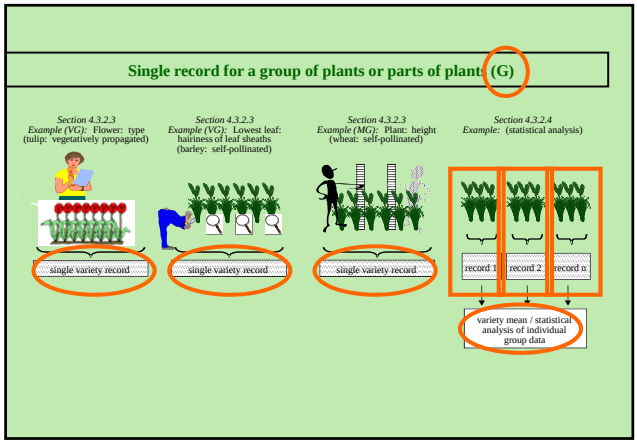
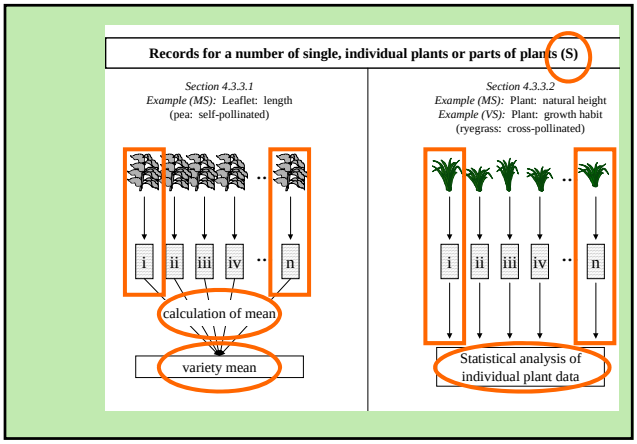
Type of Record
(for the purposes of distinctness)

G: **single record** for a variety, or a **GROUP of plants** or parts of plants;

In most cases, "G" provides a single record per variety and it is not possible or necessary to apply statistical methods in a plant-by-plant analysis for the assessment of distinctness.

S: **records** for a number of **SINGLE**, individual **plants** or parts of plants ...





EXERCISE

b) Types of expression of characteristics (QL, PQ, QN) and types of scales of data

TYPES OF EXPRESSION OF CHARACTERISTICS (QL, QN, PQ)

Types of Expression

QL: QUALITATIVE

QN: QUANTITATIVE

PQ: PSEUDO-QUALITATIVE

7. Table of Characteristics/Tableau des caractères/Merkmalstabelle/Tabla de caracteres

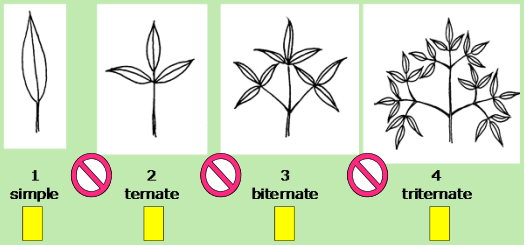
Char. No.	English	français	Deutsch	español	Example Varieties Exemples Beispielsorten Variedades ejemplo	Note/ Nota
1. (*) (+)	**Plant: growth habit**	**Plante : port**	**Pflanze: Wuchsform**	**Planta: porte**		
QN	upright	dressé	aufrecht	erecto	Imppunk	1
	semi-upright	semi dressé	halbaufrecht	semierecto	D0158-1	2
	spreading	étalé	breitwüchsig	abierto	Sunneen 03	3
	semi-trailing	semi-étalé	halbhängend	semirastrero	Impsaf	4
	trailing	coureux	hängend	rastrero	Organza	5
2. (+)	**Plant: height**	**Plante : hauteur**	**Pflanze: Höhe**	**Planta: altura**		
QN	short	basse	niedrig	baja	Yateye	3
	medium	moyenne	mittel	media	D0158-1	5
	tall	haute	hoch	alta	Imppunk	7

QUALITATIVE Characteristics

"Qualitative characteristics" are those that are **expressed in discontinuous states** (e.g. sex of plant: dioecious female (1), dioecious male (2), monoecious unisexual (3), monoecious hermaphrodite (4)).
These states are self-explanatory and independently meaningful. All states are necessary to describe the full range of the characteristic, and every form of expression can be described by a single state. The order of states is not important. As a rule, the **characteristics are not influenced by environment**.

Qualitative characteristic

Clematis: Leaf: type



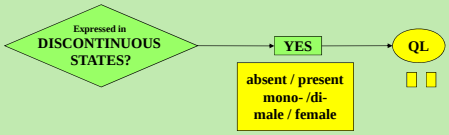
Qualitative (QL) characteristic?

Anthocyanin coloration: QL (=absent / present)?

NO!

	Variety A	Variety B	Variety C
Environment A	absent	present	absent
Environment B	absent	present	present

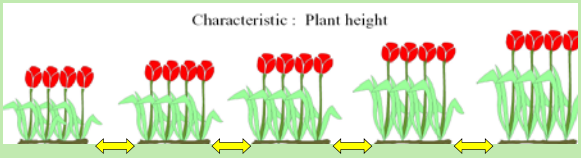
QL, QN or PQ?



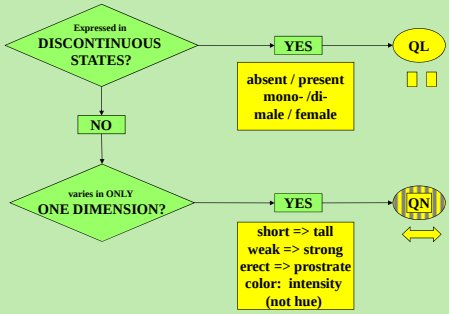
QUANTITATIVE Characteristics

"Quantitative characteristics" are those where the expression covers the full range of variation from one extreme to the other. The **expression can be recorded on a one-dimensional, continuous or discrete, linear scale**. The range of expression is divided into a number of states for the purpose of description (e.g. length of stem: very short (1), short (3), medium (5), long (7), very long (9)). The division seeks to provide, as far as is practical, an even distribution across the scale. The Test Guidelines do not specify the difference needed for distinctness. The states of expression should, however, be meaningful for DUS assessment.

Quantitative Characteristic



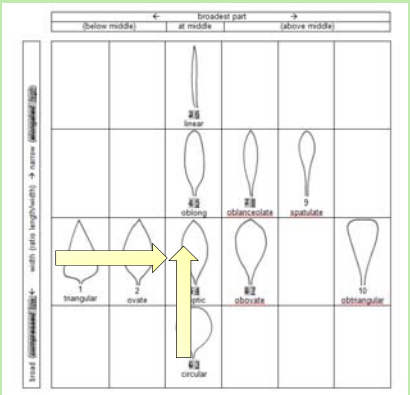
QL, QN or PQ?

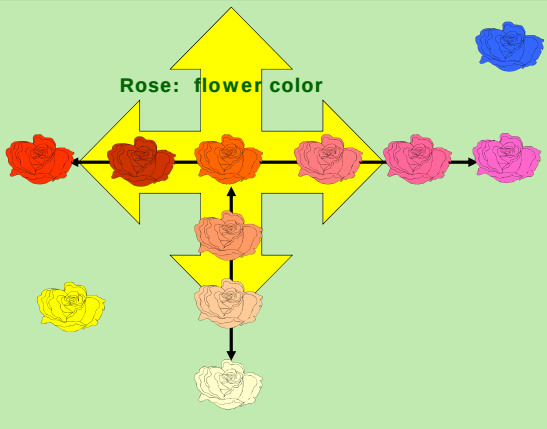


PSEUDO-QUALITATIVE Characteristics

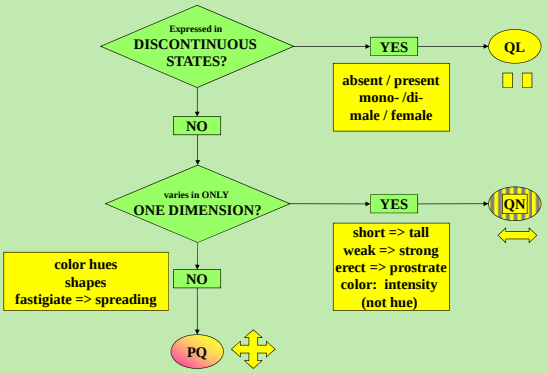
In the case of "pseudo-qualitative characteristics," the **range of expression is at least partly continuous, but varies in more than one dimension** (e.g. shape: ovate (1), elliptic (2), circular (3), obovate (4)) and cannot be adequately described by just defining two ends of a linear range. In a similar way to qualitative (discontinuous) characteristics – hence the term "pseudo-qualitative" – each individual state of expression needs to be identified to adequately describe the range of the characteristic.

Example





QL, QN or PQ?



EXERCISE

Types of scales of data (QL, PQ, QN)

Types of Expression

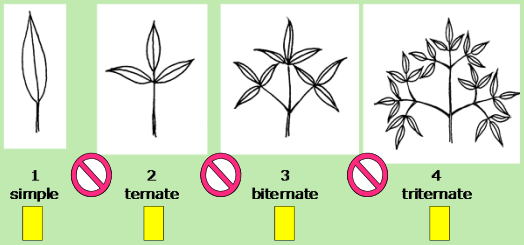
QL: QUALITATIVE

QN: QUANTITATIVE

PQ: PSEUDO-QUALITATIVE

Qualitative characteristic

Clematis: Leaf: type



Qualitative Characteristics (special cases)

Char No.	Method of Examination	English	français	deutsch	español	Example Varieties/ Exemples/ Beispielssorten/ Variedades ejemplo	Note/ Nota
1. (*)	MS C	**Plant: ploidy**					
QL		diploid					2
		tetraploid					4
3. (*)	VG	**Stem: anthocyanin coloration**					
QL		absent				Gumpoong	1
		present				Chunpoong, Gopoong	9

Qualitative Characteristics: **distinctness**

In qualitative characteristics, the difference between two varieties may be considered clear if one or more characteristics have expressions that fall into **two different states in the Test Guidelines**. Varieties should not be considered distinct for a qualitative characteristic if they have the same state of expression.

(e.g. sex of plant: dioecious female (1), dioecious male (2), monoecious unisexual (3), monoecious hermaphrodite (4)).

Types of Expression

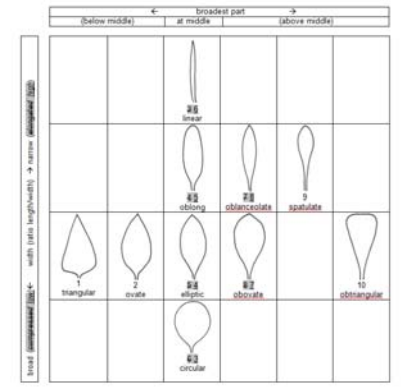
QL: QUALITATIVE

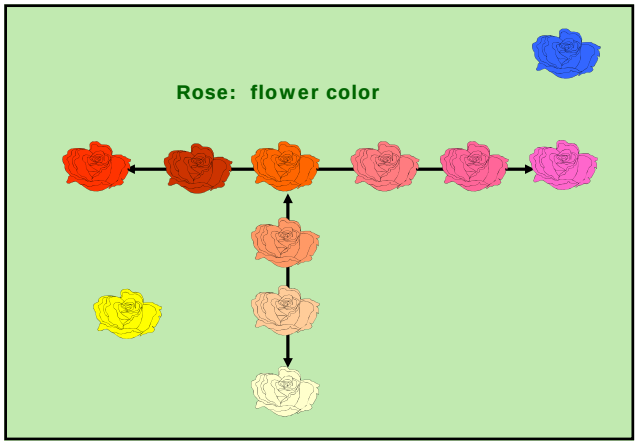
QN: QUANTITATIVE

PQ: PSEUDO-QUALITATIVE

PSEUDO-QUALITATIVE Characteristics

In the case of "pseudo-qualitative characteristics," the **range of expression is at least partly continuous, but varies in more than one dimension** (e.g. shape: ovate (1), elliptic (2), circular (3), obovate (4)) and cannot be adequately described by just defining two ends of a linear range. In a similar way to qualitative (discontinuous) characteristics – hence the term "pseudo-qualitative" – each individual state of expression needs to be identified to adequately describe the range of the characteristic.



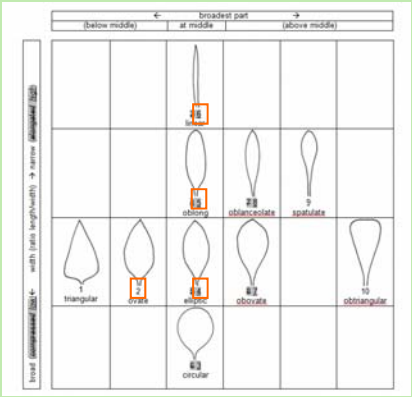


PSEUDO-QUALITATIVE Characteristics
(typical examples)

	24. Flower: color of the center (+)	Fleur: couleur du centre	Farbe der Mitte	Flor: color del centro	
PQ	green	vert	grün	verde	1
	yellow	jaune	gelb	amarillo	2
	orange	orange	orange	naranja	3
	pink	rose	rosa	rosa	4
	red	rouge	rot	rojo	5
	purple	pourpre	purpurn	púrpura	6

Pseudo-Qualitative Characteristics: **distinctness**

A different state in the Test Guidelines may not be sufficient to establish distinctness (see also section 5.5.2.3). However, in certain circumstances, varieties described by the same state of expression may be clearly distinguishable.



Types of Expression

QL: QUALITATIVE

QN: QUANTITATIVE

PQ: PSEUDO-QUALITATIVE

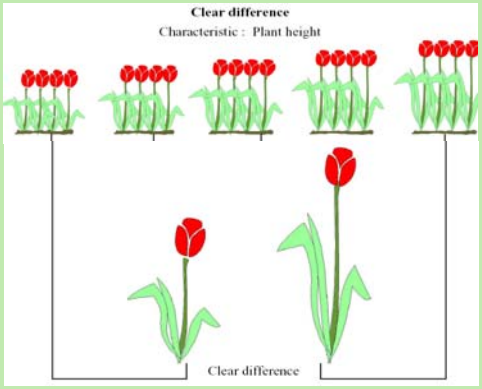
QUANTITATIVE Characteristics

"Quantitative characteristics" are those where the expression covers the full range of variation from one extreme to the other. The **expression can be recorded on a one-dimensional, continuous or discrete, linear scale**. The range of expression is divided into a number of states for the purpose of description (e.g. length of stem: very short (1), short (3), medium (5), long (7), very long (9)). The division seeks to provide, as far as is practical, an even distribution across the scale. The Test Guidelines do not specify the difference needed for distinctness. The states of expression should, however, be meaningful for DUS assessment.

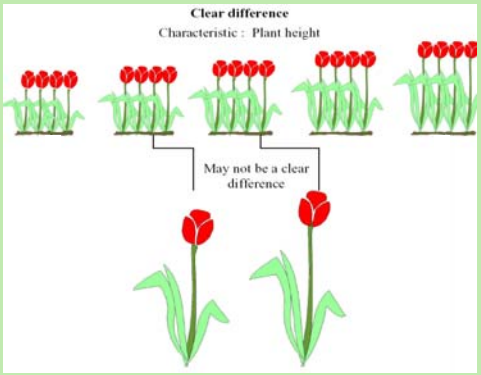
Quantitative Characteristics: **distinctness**

Quantitative characteristics are considered for distinctness according to the method of observation and the features of propagation of the variety concerned...

Quantitative Characteristic



Quantitative Characteristic



Quantitative Characteristics (1-9)

Quantitative Characteristics (1-9)

State	Example 1 **Size relative to:**	Example 2 **Angle:**	Example 3 **Position:**	Example 4 **Length in relation to:**
1	**much smaller**	**very acute**	**at base**	**equal**
3	moderately smaller	moderately acute	one quarter from base	slightly shorter
5	**same size**	**right angle**	**in middle**	**moderately shorter**
7	moderately larger	moderately obtuse	one quarter from apex end	much shorter
9	**much larger**	**very obtuse**	**at apex**	**very much shorter**

Quantitative Characteristics (at least 3 notes)

Example 2
1 e.g. absent or weak *(absent or weakly expressed)*
2 moderate (or medium) *(moderately expressed)*
3 strong *(strongly expressed)*

State	Example 1 **Stem: attitude**
1	erect
3	semi-erect
5	prostrate

3. Methods used for DUS data analysis and development of variety description

Presentations by experts from:
Korea
Japan
United Kingdom
France

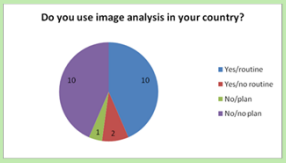
4. Image analysis

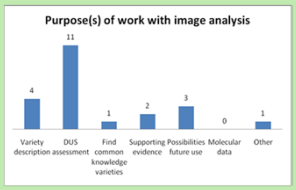
Survey on Image analysis

- A questionnaire on image analysis was sent to the UPOV members in April 2012. The aim of the questionnaire was to gain insight in the frequency and way of use of image analysis in the different member states.
- The questionnaire was returned by 21 UPOV members.

<Summary of the result>

1. USE AND PURPOSE OF IMAGE ANALYSIS





Survey on Image analysis (cont.)

<Summary of the result>

2. CROPS AND CHARACTERISTICS

1. Barley	1. Rape
2. Brassica crops	2. Red clover
3. Brussels sprouts	3. Rice
4. Carrot	4. Running beans
5. Field bean	5. Rye
6. Flax	6. Seeds/grains various crops
7. Fodder radish	7. Sugar Beet (cotyledon)
8. French bean	8. Watercress
9. Impatiens	9. Wheat
10. Maize	10. White mustards
11. Oats	11. Willow (leaves)
12. Oilseed rape	
13. Onion	
14. Ornamentals	
15. Parsnip	
16. Pea	
17. Pelargonium	

3. OTHERS

- 8 respondents use a camera, 5 respondents use a scanner (two respondents use both options). All use a regular PC or workstation.
- Every UPOV member has its own software system. Most respondents use commercially available software or open source software which they have adopted themselves.
- All respondents use some form of calibration for determining the size of an object. In general the lighting conditions are also standardized and verified. Color calibration is not mentioned.

Development of new section of document TGP/8 on image analysis

The TWC, at its thirtieth session, held in 2012, agreed that a draft for New Section - Examining Characteristics Using Image Analysis for document TGP/8 "Trial Design and Techniques Used in the Examination of Distinctness, Uniformity and Stability" should be prepared [...] for the TWP sessions in 2013.

The experts responsible for drafting the new section proposed that the first draft be presented only to the TWC in 2013, and not to the other Technical Working Parties (TWPs) to be held in 2013.

The TWC is invited to consider the first draft of the new section "Examining Characteristics Using Image Analysis" for document TGP/8, as presented in the **Annex to document TWC/31/20 Add.** .

→ To be discussed in agenda item 5 (9).

Additional students: CHF1,000 per student)

Category 3:
Others
Fee: CHF1,000

103

DL-305 (future course)

Examination of applications for plant breeders' rights

SECTION I ADMINISTRATION OF PLANT BREEDERS' RIGHTS

Module 1: The Plant Breeder's Right's Office
Module 2: Administration of applications

SECTION II ENTITLEMENT

Module 3: Entitlement to file an application

SECTION III NOVELTY

Module 4: Examining Novelty

SECTION IV DUS EXAMINATION

Module 5: Introduction to the DUS examination
Module 6: Variety collections
Module 7: Examining Distinctness
Module 8: Examining Uniformity
Module 9: Examining Stability
Module 10: Trial Design and Data Analysis
Module 11: Approaches and cooperation in DUS examination

SECTION V VARIETY DENOMINATION

Module 12: Examining the variety denomination

SECTION VI PUBLICATION OF INFORMATION AND DECISIONS

Module 13: Information to be published
Module 14: Proposed decisions and Objections
Module 15: Decisions
Module 16: Situations which may arise after the grant of PBR

7. FEEDBACK FROM PARTICIPANTS

From TC/49/10:

Survey to seek views on improving the effectiveness of the Preparatory Workshops

10. In conjunction with the survey of participants at the TWP session in 2013 (see document TC/49/3 "Matters arising from the Technical Working Parties") it is proposed to conduct a survey of participants in the preparatory workshop in 2013, with a view to seeking improvements to the effectiveness of the Preparatory Workshops

[See document TC/49/41 Report on Conclusions, paragraph 21]

THANK YOU
