

TWC/32/2

ORIGINAL: English

DATE: May 20, 2014

INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS

Geneva

TECHNICAL WORKING PARTY ON AUTOMATION AND COMPUTER PROGRAMS

Thirty-Second Session

Helsinki, Finland, from June 3 to 6, 2014

MOLECULAR TECHNIQUES

Document prepared by the Office of the Union

Disclaimer: this document does not represent UPOV policies or guidance

1. The purpose of this document is to report on developments concerning the:
 - (a) use of biochemical and molecular markers in the examination of Distinctness, Uniformity and Stability (DUS);
 - (b) Working Group on Biochemical and Molecular Techniques, and DNA-Profiling in Particular (BMT); and
 - (c) presentation of information on the situation in UPOV with regard to the use of molecular techniques to a wider audience, including breeders and the public in general.
2. The following abbreviations are used in this document:

BMT:	Working Group on Biochemical and Molecular Techniques, and DNA-Profiling in Particular
CAJ:	Administrative and Legal Committee
TC:	Technical Committee
TC-EDC:	The Enlarged Editorial Committee

USE OF BIOCHEMICAL AND MOLECULAR MARKERS IN THE EXAMINATION OF DISTINCTNESS, UNIFORMITY AND STABILITY (DUS)

3. The Council, at its forty-seventh ordinary session, held in Geneva on October 24, 2013, adopted document TGP/15/1 "Guidance on the Use of Biochemical and Molecular Markers in the Examination of Distinctness, Uniformity and Stability (DUS)" (see document C/47/19 "Report on the decisions", paragraph 23).
4. On September 23 and 24, 2013, a Joint Workshop on DUS Testing and Molecular Techniques (Workshop) was held in Beijing, China, organized by the State Forestry Administration, China, in cooperation with the Ministry of Agriculture, China, and the Office of the Union. A copy of the program is attached as Annex I to this document.

5. At the Workshop, experts from China and the Republic of Korea reported on their use of molecular techniques to supplement the selection of varieties to be included in the DUS field trial on the basis of descriptions based on morphological characteristics.

6. The TC, at its fiftieth session, held in Geneva on April 7 to 9, 2014 and the CAJ, at its sixty-ninth session, held in Geneva on April 10, 2014, encouraged the experts from China, the Republic of Korea and other members of the Union to make presentations at the fourteenth session of the BMT, to be held in Seoul, from November 10 to 13, 2014, on the use of molecular techniques to supplement the selection of similar varieties for inclusion in the growing trial.

WORKING GROUP ON BIOCHEMICAL AND MOLECULAR TECHNIQUES, AND DNA-PROFILING IN PARTICULAR (BMT)

7. The fourteenth session of the BMT will be held in Seoul, the Republic of Korea, from November 10 to 13, 2014.

8. The TC agreed to the amended program of the fourteenth session of the BMT as set out in Annex II to this document (see document TC/50/36 "Report on the Conclusions", paragraph 20).

9. The TC agreed to the plan for the fourteenth session of the BMT to be held in conjunction with a joint workshop with International Seed Testing Association (ISTA) and Organisation for Economic Co-operation and Development (OECD) (Joint Workshop), to be held on November 12, 2014 (see document TC/50/36 "Report on the Conclusions", paragraph 80).

10. The TC agreed that the progress of work of the BMT and the outcomes of the Joint Workshop with ISTA and OECD should be reported to the TC at its fifty-first session (see document TC/50/36 "Report on the Conclusions", paragraph 81).

11. The workplan of the fourteenth session of the BMT, its preparatory workshop and the Joint Workshop is attached as Annex III to this document.

PRESENTATION OF INFORMATION ON THE SITUATION IN UPOV WITH REGARD TO THE USE OF MOLECULAR TECHNIQUES TO A WIDER AUDIENCE, INCLUDING BREEDERS AND THE PUBLIC IN GENERAL

12. The TC, at its forty-ninth session, held in Geneva from March 18 to 20, 2013, agreed that there was a need to provide suitable information on the situation in UPOV with regard to the use of molecular techniques to a wider audience, including breeders and the public in general. That information should explain the potential advantages and disadvantages of the techniques, and the relationship between genotype and phenotype, which lay behind the situation in UPOV (see document TC/49/41 "Report on the Conclusions", paragraph 136).

13. The Consultative Committee, at its eighty-sixth session, held in Geneva on October 23 and 24, 2013, considered a series of answers to frequently asked questions. One of the questions included was "does UPOV allow molecular techniques (DNA profiles) in the DUS examination?" In that regard the Consultative Committee agreed that the answer should be developed via the Technical Committee.

14. The TC, at its fiftieth session, held in Geneva on April 7 to 9, 2014 and the CAJ, at its sixty-ninth session, held in Geneva on April 10, 2014, agreed the proposed explanation of the situation in UPOV with regard to the use of molecular techniques, as set out below:

Question: Does UPOV allow molecular techniques (DNA profiles) in the DUS examination?

Answer: "It is important to note that, in some cases, varieties may have a different DNA profile but be phenotypically identical, whilst, in other cases, varieties which have a large phenotypic difference may have the same DNA profile for a particular set of molecular markers (e.g. some mutations).

“In relation to the use of molecular markers that are not related to phenotypic differences, the concern is that it might be possible to use a limitless number of markers to find differences between varieties at the genetic level that are not reflected in phenotypic characteristics.

“On the above basis, UPOV has agreed the following uses of molecular markers in relation to DUS examination:

“(a) Molecular markers can be used as a method of examining DUS characteristics that satisfy the criteria for characteristics set out in the General Introduction if there is a reliable link between the marker and the characteristic.

“(b) A combination of phenotypic differences and molecular distances can be used to improve the selection of varieties to be compared in the growing trial if the molecular distances are sufficiently related to phenotypic differences and the method does not create an increased risk of not selecting a variety in the variety collection which should be compared to candidate varieties in the DUS growing trial.

“The situation in UPOV is explained in documents TGP/15 ‘Guidance on the Use of Biochemical and Molecular Markers in the Examination of Distinctness, Uniformity and Stability (DUS)’ and UPOV/INF/18 ‘Possible use of Molecular Markers in the Examination of Distinctness, Uniformity and Stability (DUS)’”.

15. With regard to a wider audience, the TC agreed that the question was not framed in an appropriate way and, therefore, it would not be appropriate to seek to develop an answer to that question. The TC agreed that the question should be rephrased after clarification of the issues of interest to a wider audience.

16. The Council, at its thirty-first extraordinary session, held in Geneva, April 12, 2014, adopted the answers to the frequently asked questions (see document C(Extr.)/31/5 “Report on the Decisions”, paragraph 15 and C(Extr.)/31/3, Annex).

17. The answers to Frequently Asked Questions are published on the website at <http://www.upov.int/about/en/faq/>

18. *The TWC is invited to note the report on developments concerning the:*

(a) use of biochemical and molecular markers in the examination of Distinctness, Uniformity and Stability (DUS);

(b) Working Group on Biochemical and Molecular Techniques, and DNA-Profiling in Particular(BMT); and

(c) presentation of information on the situation in UPOV with regard to the use of molecular techniques to a wider audience, including breeders and the public in general.

[Annex I follows]

Joint Workshop on DUS Testing and Molecular Techniques
September 23 and 24, 2013, Beijing, China

PROGRAM

September 23, 2013

9:00-10:00 Opening ceremony

Chair: Hu Zhangcui, Director General, Science and Technology Development Center (PVP Office), the State Forestry Administration (SFA)

Opening remarks by:

- 1) *Jiang Zehui, Managing Vice President, Committee of Science and Technology, SFA; President, China Flower Association, China*
- 2) *Peter Button, Vice Secretary-General, UPOV*
- 3) *Liu Jian, Deputy Director General, Department of International Cooperation, State Intellectual Property Office (SIPO), China*
- 4) *Zhang Yanqiu, Director General, Bureau of Seed Management, Ministry of Agriculture (MOA), China*

10:00-10:15 Tea break

Theme 1: The latest progress in protection of new plant varieties

Chair: Lǚ Bo, Division Director, PVP Office, MOA

10:15-10:30 Recent developments in UPOV

Fuminori Aihara, Counsellor, UPOV

10:30-10:45 Status of PVP in Forestry sector in China

Hu Zhangcui, Director General, Science and Technology Development Center (PVP Office), SFA

10:45-11:00 Status of PVP in Agriculture sector in China

Lǚ Bo, Division Director, PVP Office, MOA

11:00-11:15 Regional cooperation of PVP in EU

Kees Van Ettehoven, Head of Variety Testing Department, the Netherlands

11:15-11:30 Current status of PVP in Korea

Chan Woong Park, Researcher, Variety Testing Division, Korea Seed and Variety Service (KSVS), the Republic of Korea

11:30-11:45 Current status of PVP in Japan

Masao Okawa, Head of Team for Foreign Plant Genetic Resources, National Center for Seeds and Seedlings (NCSS), Japan

11:30-11:45 Enhance variety innovation and promote the development of China's modern flower industry
Liu Hong, Secretary General, China Flower Association, China

12:00-12:15 Questions and Answers

12:15-13:30 Lunch

Theme 2: BMT applications in PVP

Chair: Peter Button, Vice Secretary-General, UPOV

13:30-13:45 Progress in studies on DNA profiling of Rose varieties
Zheng Yongqi, Research Professor, Lab of Molecular Identification of Plant Varieties, SFA

13:45-14:00 Application of DNA fingerprinting in variety identification and DUS testing
Li Ruyu, Jinan DUS Testing Center, MOA

14:00-14:15 Application of molecular techniques in DUS testing in the European Union
Kees van Ettekoven, Naktuinbouw, the Netherlands

14:15-14:30 Application of molecular techniques in PVP in Korea
Chan Woong Park, Researcher, Variety Testing Division, KSVS, the Republic of Korea

14:30-14:45 Application of molecular techniques in DUS testing in Japan
Masao Okawa, Head of Team for Foreign Plant Genetic Resources, NCSS, Japan

14:45-15:00 Application of molecular techniques in bamboo breeding
Gao Zhimin, International Center for Bamboo and Rattan, China

15:00-15:15 Questions and Answers

15:15-15:30 Break

Theme 3: Growing trials for DUS tests

Chair: Fei Benhua, Executive Deputy Director General, International Center for Bamboo and Rattan, China

15:30-15:45 DUS testing of new varieties of rose
Wang Junyun, Rose DUS Testing Station, SFA

15:45-16:00 DUS testing for new varieties of tree peony
Huang Jinfeng, Peony DUS Testing Station, SFA

16:00-16:15 DUS testing for new varieties of rice
Sun Lianfa, Harbin DUS Testing Center, MOA

16:15-16:30 DUS tests for new varieties of maize
Li Yuyu, Jinan DUS Testing Center, MOA

16:30-16:45 DUS testing for ornamental plants [and forest trees] in the European Union
Kees van Ettekoven, Naktuinbouw, the Netherlands

16:45-17:00 DUS Testing for ornamental plants in Korea
Chan Woong Park, Researcher, Variety Testing Division, KSVS, the Republic of Korea

17:00-17:15 DUS Testing for ornamental plants and forest trees
Masao Okawa, Head of Team for Foreign Plant Genetic Resources, NCSS, Japan

17:15-17:30 DUS testing for Poinsettia
Wang Yan, DUS Testing Station for Poinsettia (Shanghai), SFA

17:30-17:45 DUS testing for Phalaenopsis
Xu Zhenjiang, Guangzhou DUS Testing Station, MOA

17:45-18:00 Questions and Answers

18:00-18:10 Break

Workshop Summary

18:10-18:20 Summary remarks
Peter Button, UPOV

18:20-18:30 Conclusion remarks
Hu Zhangcui, Director General, Science and Technology Development Center (PVP Office), SFA

September 24, 2013

Technical visits to:

- Laboratory of Molecular Identification of Plant Varieties, SFA;
- Institute of Forestry, Chinese Academy of Forestry (CAF); and
- International Center for Bamboo and Rattan (ICBR)

9:00 Arrive at the West Room of the Convention Hall, CAF

9:00-9:10 Introduction to guests
Dr. ZHENG Yongqi, Laboratory of Molecular Identification of Plant Varieties

9:10-9:20 Welcome address
Dr. JIANG Zeping, Deputy Director, CAF

9:20-9:50 Presentation on the Laboratory of Molecular Identification of Plant Varieties
Dr. ZHANG Chuanhong, Laboratory of Molecular Identification of Plant Varieties

9:50-10:20 Presentation on application of molecular techniques in plant variety identification
YU Xuedan, Laboratory of Molecular Identification of Plant Varieties

10:20-10:50 Discussion

10:50-11:20
Visit to greenhouses
Visit to Laboratory of Forest Genetics and Breeding
Visit to Laboratory of Molecular Identification of Plant Varieties

14:00-14:30 Visit to the exhibition room of ICBR

14:30-15:30 Visit to the laboratory of ICBR

[Annex II follows]

PROGRAM OF THE FOURTEENTH SESSION OF THE BMT

to be held in Seoul, Republic of Korea, on November 10 to 13, 2014

1. Opening of the session
2. Adoption of the agenda
3. Reports on developments in UPOV concerning biochemical and molecular techniques
4. Short presentations on new developments in biochemical and molecular techniques by DUS experts, biochemical and molecular specialists, plant breeders and relevant international organizations
5. Report of work on molecular techniques on a crop-by-crop basis:
 - (a) vegetatively propagated crops
 - (b) self-pollinated crops
 - (c) cross-pollinated crops
6. International guidelines on molecular methodologies
7. Variety description databases
8. Methods for analysis of molecular data
9. The use of molecular techniques in examining essential derivation
10. The use of molecular techniques in variety identification
11. Date and place of next session
12. Future program
13. Report of the session (if time permits)
14. Closing of the session

[Annex III follows]

**WORKING GROUP ON BIOCHEMICAL AND MOLECULAR TECHNIQUES,
AND DNA-PROFILING IN PARTICULAR (BMT)**

Fourteenth Session, Seoul, Republic of Korea, November 10 to 13, 2014 / Preparatory Workshop, November 9, 2014 / Joint Workshop, November 12, 2014

	Sunday, Nov. 9	Monday, Nov. 10	Tuesday, Nov. 11	Wednesday, Nov. 12	Thursday, Nov. 13
09.00	X	<p align="center">BMT MEETING</p> <p><u>Item 1: Opening of the session</u></p> <p><u>Item 2: Adoption of the agenda</u></p> <p><u>Item 3: Reports on developments in UPOV</u></p> <p><u>Item 4: Short presentations by participants</u></p>	<p align="center"><i>[Breeders' Day]</i></p> <p><u>Item 10: Variety identification</u></p>	<p align="center">OECD, UPOV, ISTA JOINT WORKSHOP ON MOLECULAR TECHNIQUES</p> <p>9:00 <u>Item 1: Welcome and opening</u></p> <p>9:10 <u>Item 2: Introduction to the OECD Seed Schemes and the situation with regard to molecular techniques</u></p> <p>9:50 <u>Item 3: Introduction to UPOV and the situation with regard to molecular techniques</u></p> <p><i>* Item 2-4: 30min presentation + 10min Q&A session</i></p> <p><i>* Item 5: 30min presentation + 20min Q&A session</i></p>	<p><u>Item 5: Report of work on molecular techniques on a crop-by-crop basis (ctnd.)</u></p> <p><u>Item 6: International Guidelines</u></p> <p><u>Item 11: Date/Place of next session</u></p> <p><u>Item 12: Future program</u></p>
