

TWF/41/8

ORIGINAL: English

DATE: August 27, 2010

INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS
GENEVA

TECHNICAL WORKING PARTY FOR FRUIT CROPS

Forty-First Session

Cuernavaca, Morelos State, Mexico
September 27 to October 1, 2010

ELECTRONIC APPLICATION SYSTEMS

Document prepared by the Office of the Union

1. The purpose of this document is to provide a report on developments concerning electronic application systems and to present the request of the Technical Committee (TC) for the Technical Working Parties (TWPs) to consider the introduction of standard references for the UPOV Model TQ and for Test Guidelines, which would also need to be considered in relation to a revision of document TGP/7 "Development of Test Guidelines".

ANNEX II	SET OF STANDARD REFERENCES TO: DOCUMENT TGP/5 “EXPERIENCE AND COOPERATION IN DUS TESTING” SECTION 2/2: “UPOV MODEL FORM FOR THE APPLICATION FOR PLANT BREEDERS’ RIGHTS” UPOV MODEL APPLICATION FORM
ANNEX III	DOCUMENT TGP/7 “DEVELOPMENT OF TEST GUIDELINES” ANNEX I: “TG TEMPLATE”, CHAPTER 10. TECHNICAL QUESTIONNAIRE, WITH STANDARD REFERENCES
ANNEX IV	SET OF STANDARD REFERENCES TO: DOCUMENT TGP/7 “DEVELOPMENT OF TEST GUIDELINES” ANNEX I: “TG TEMPLATE”, TECHNICAL QUESTIONNAIRE

2. The following abbreviations are used in this document:

CAJ:	Administrative and Legal Committee
TC:	Technical Committee
TC-EDC:	Enlarged Editorial Committee
TWA:	Technical Working Party for Agricultural Crops
TWC:	Technical Working Party on Automation and Computer Programs
TWF:	Technical Working Party for Fruit Crops
TWO:	Technical Working Party for Ornamental Plants and Forest Trees
TWV:	Technical Working Party for Vegetables
TWPs:	Technical Working Parties

UPOV Model Application Form:

UPOV Model Form for the Application for Plant Breeders' Rights (document TGP/5 "Experience and Cooperation in DUS Testing", Section 2/2: "UPOV Model Form for the Application for Plant Breeders' Rights")

UPOV Model TQ:

Generalized UPOV Model Technical Questionnaire to be Completed in Connection with an Application for Plant Breeders' Rights – document TGP/7/1, Annex 1: TG Template, Chapter 10 "Technical Questionnaire" (see document TGP/5 "Experience and Cooperation in DUS Testing", Section 3/1: "Technical Questionnaire to be Completed in Connection with an Application for Plant Breeders' Rights")

UPOV Test Guidelines TQ:

Model Technical Questionnaire specific for the relevant UPOV Test Guidelines (e.g. the Test Guidelines for Rose, document TG/11/8, contains a model Technical Questionnaire for rose)

BACKGROUND

Initiative

3. On January 18, 2007, the Office of the Union (Office) received a letter from the International Seed Federation (ISF) proposing that UPOV should consider the development of an electronic version of the UPOV model application form¹ and technical questionnaire² for use by members of the Union. It was noted that such an approach would allow a standard application form and technical questionnaire to be completed in a language of the applicant's choice and then converted electronically to the language of the member of the Union where an application was to be made. It was suggested that the individual members of the Union could have a separate appendix containing additional questions not covered by the standard application form and technical questionnaire, although ISF suggested that such appendices should be minimized. ISF clarified that the intention was to make the forms available for use by members of the Union as they considered appropriate.

4. The Office received a letter from the International Community of Breeders of Asexually Reproduced Ornamental and Fruit-Tree Varieties (CIOPORA) on January 19, 2007, supporting the proposal made by ISF. It requested, in addition, that any initiative should not lead to a result that application forms which were short and simple would become more complex. The Office also received a letter from the European Seed Association (ESA) on January 30, 2007, expressing its support for the proposal made by ISF.

5. In agreement with the Chairperson of the Technical Committee (TC), ISF was invited to make a presentation on its proposal at the forty-third session of the TC, held in Geneva, from March 26 to 28, 2007.

6. At its forty-third session, the TC thanked ISF for its presentation on a proposal for the development of an electronic application form and technical questionnaire and noted that a copy of the presentation would be posted on the ISF website (www.worldseed.org). The TC noted that any developments should take into account the initiatives by a number of the members of the Union to develop on-line application facilities. The Vice Secretary-General welcomed the initiative of ISF and looked forward to investigating ways in which this matter could be taken forward in the most appropriate and beneficial way, within UPOV's resources. In that respect, the Vice Secretary-General informed the TC that, at its fifty-fifth session, to be held in Geneva on March 29, 2007, the CAJ would be considering the possibility to invite ISF to make a similar presentation to the CAJ in October 2007 (see document TC/43/13 "Report", paragraph 111).

7. The CAJ, at its fifty-fifth session, held in Geneva on March 29, 2007, agreed to invite ISF to make a presentation on its proposal for the development of an electronic application form and technical questionnaire at its fifty-sixth session in conjunction with the CAJ discussions on the revision of document TGP/5. In addition, the CAJ invited members of the Union to present their initiatives on the development of on-line application facilities.

¹ See document TGP/5 "Experience and Cooperation in DUS Testing", Section 2/2: "UPOV Model Form for the Application for Plant Breeders' Rights"

² See document TGP/5 "Experience and Cooperation in DUS Testing", Section 3/1: "Technical Questionnaire to be Completed in Connection with an Application for Plant Breeders' Rights"

8. At its fifty-sixth session, held in Geneva on October 22 and 23, 2007, the CAJ received presentations by a representative of ISF and by the Delegations of Brazil, Germany and the United Kingdom on experiences and initiatives for the development of electronic application forms and technical questionnaires. Those presentations (in English only) are reproduced in Annexes II to V to document CAJ/56/6 “Report”, respectively, and on the UPOV website at http://www.upov.int/restrict/en/caj/index_caj56.htm.

9. The CAJ, at its fifty-sixth session (see document CAJ/56 “Report”, paragraph 20), agreed that the Office should organize a meeting in order to explore possibilities:

(a) to provide a forum for exchanging information on electronic application systems and databasing of information;

(b) to investigate possibilities to facilitate harmonized electronic application systems and databasing of information, for interested members of the Union, by means of a standard electronic application form (including technical questionnaire), possibly with authority-specific annexes, to be made available for downloading from the UPOV website. Investigations would include:

(i) the development of a multilingual standard electronic application form in all languages provided by the relevant members of the Union (if not an official UPOV language);

(ii) options for transfer of data from the standard electronic application form for use in applications made with members of the Union (on-line transmission, e-mail, paper), including the sharing of software between members of the Union and the use of electronic signatures and verification;

(iii) means to facilitate the incorporation of data in electronic application systems in a format compatible with the UPOV-ROM Plant Variety Database;

(c) to identify legal and administrative aspects which should be considered in the development of electronic application systems by members of the Union.

10. The CAJ agreed that any standard electronic application form (including technical questionnaire) would need to be based on the UPOV model forms contained in document TGP/5 “Experience and Cooperation in DUS Testing”^{1,2} and document TGP/7 “Development of Test Guidelines”³.

11. At its fifty-seventh session, held in Geneva on April 10, 2008, the CAJ considered document CAJ/57/4, in conjunction with an oral report by the Vice Secretary-General on the Electronic Applications Systems Meeting, held in Geneva on April 9, 2008. The Vice Secretary-General reported that approximately sixty participants had attended the meeting and that a presentation had been made by the Community Plant Variety Office (CPVO) of the European Community on their project on the development of an electronic application system. As agreed by the CAJ at its fifty-sixth session, held on October 22 and 23, 2007, the meeting had explored the possibilities provided under

³ See document TGP/7 “Development of Test Guidelines”, Annex 1: TG Template, Section 10. Technical Questionnaire.

paragraph 2 of document CAJ/57/4. The Vice Secretary-General reported that two concrete proposals had resulted from the discussions:

(a) to prepare a survey on “core” questions in the UPOV Model Application Form, by requesting members of the Union to indicate which items of the Model Application Form they use and which they consider mandatory; and

(b) to develop a pilot project, for a small number of crops, consisting of a downloadable application form, with or without a technical questionnaire, for testing in cooperation with breeders’ organizations and a number of authorities.

12. In relation to the two proposals, the Vice Secretary-General noted that only very limited interest had been expressed at the meeting, which did not appear to be sufficient to justify the human and financial resources that such an exercise would entail for participating authorities and the Office of the Union.

13. After an initial discussion, the Vice Secretary-General noted that there had been very little time to reflect on the proposals discussed at the meeting and, given the substantial resource implications, suggested that it might be helpful to have more time for reflection.

14. The CAJ agreed that an item should be included on the agenda of its fifty-eighth session on October 27 and 28, 2008, in order to review the situation. The CAJ noted that, if there was support for a pilot project, the matter would need to be considered by the Consultative Committee in order to consider the impact on human and financial resources.

15. At its fifty-eighth session, held in Geneva on October 27 and 28, 2008, the CAJ considered document CAJ/58/5 and agreed that an item should be included on the agenda of its fifty-ninth session, and a document prepared by the Office of the Union on the basis of the agreed UPOV Model Application Form and further inputs from delegations and consultations thereof.

Elaboration of proposals

16. Documents TC/45/13 and CAJ/59/5 presented the following proposals concerning the development of electronic applications systems:

Proposal 1: Standardized reference by authorities to the UPOV Model Application Form, UPOV Model TQ and/or UPOV Test Guidelines TQ

A proposal based on members of the Union making reference in the relevant fields of their application forms and technical questionnaires (TQ) to the corresponding item in the UPOV Model Application Form and UPOV Model TQ or UPOV Test Guidelines TQ.

Proposal 2: Use of information provided in an electronic version of the UPOV Model Application Form (and possibly the UPOV Model TQ or UPOV Test Guidelines TQ)

A proposal based on an approach whereby the applicant would use the UPOV Model Application Form, and possibly the UPOV Model TQ or UPOV Test Guidelines TQ, to provide information to an authority as a part of an application for a breeder’s right.

17. The criteria for developing those proposals were explained in document CAJ/59/5 as follows:

“Criteria

“14. The discussions in the CAJ have confirmed that it would not be feasible to develop an electronic application form that would satisfy the requirements for making a complete application for a breeder’s right with a member of the Union. Of the various aspects that would make such an approach unrealistic, the need for additional authority-specific information by individual members of the Union (i.e. in addition to the information included in the UPOV Model Application Form) and issues concerning electronic signatures have been consistently highlighted.

“15. In addition to practical and resource issues, the discussions in the CAJ have indicated that it would be difficult for UPOV to develop an electronic form that contained requests for information beyond those set out in the UPOV Model Application Form and the UPOV Model TQ or UPOV Test Guidelines TQ.”

18. It should be noted that these proposals would be entirely optional, i.e. it would be a matter for each member of the Union to decide whether to take advantage of the proposed scheme. In addition, the proposals are not mutually exclusive.

19. At its forty-fifth session, held in Geneva from March 30 to April 1, 2009, the TC considered document TC/45/13. The Delegation of New Zealand commented that Proposal 1 “Standardized reference by authorities to the UPOV Model Application Form, UPOV Model TQ and/or UPOV Test Guidelines TQ” would be a reasonable option for implementation in New Zealand. The Delegation of the European Community⁴ and the representative of the International Seed Federation (ISF) expressed a preference for Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form (and possibly the UPOV Model TQ or UPOV Test Guidelines TQ)”. The Delegation of the United States of America expressed concerns about the limited interest of members to make use of the form and the resource implications. It also sought further information with respect to the proposals before it could express a view. The TC noted that the matter would be considered further by the CAJ at its fifty-ninth session, to be held in Geneva on April 2, 2009.

20. At its fifty-ninth session, held in Geneva on April 2, 2009, the CAJ considered document CAJ/59/5 “Electronic application systems” and the oral report by the Vice Secretary-General of the comments made by the TC at its forty-fifth session, held in Geneva from March 30 to April 1, 2009. The discussions at the fifty-ninth session of the CAJ can be found in document CAJ/59/8 “Report”, paragraphs 47 to 56.

21. The CAJ agreed that the Office of the Union should prepare a set of detailed references for the document TGP/5 “Experience and Cooperation in DUS Testing”, Section 2/2: “UPOV Model Form for the Application for Plant Breeders’ Rights” for consideration at the

⁴ At the fifty-ninth session of the CAJ, the Delegation of the European Community noted that, at the forty-fifth session of the TC, it had expressed a preference for Proposal 2. However, taking into consideration the interventions made by other delegations at the forty-fifth session of the TC and, in particular, the resource and administrative implications of Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form (and possibly the UPOV Model TQ or UPOV Test Guidelines TQ)”, it considered that both proposals should be maintained.

sixtieth session of the CAJ. In addition, it requested the Office of the Union to provide information on the resource implications of Proposals 1 and 2 for the consideration of the CAJ at its sixtieth session. On that basis, Proposals 1 and 2 were developed and were considered by the CAJ at its sixtieth session, held in Geneva on October 19, 2009.

PROPOSAL 1: STANDARDIZED REFERENCE BY AUTHORITIES TO THE UPOV MODEL APPLICATION FORM AND UPOV MODEL TQ

Explanation

22. This proposal is based on members of the Union making reference in the relevant fields of their application forms and technical questionnaires to the corresponding item in the UPOV Model Application Form and UPOV Model TQ or UPOV Test Guidelines TQ.

23. In order to provide a precise reference for all elements of information corresponding to the UPOV Model Application Form, a detailed set of references to document TGP/5 “Experience and Cooperation in DUS Testing”, Section 2/2: “UPOV Model Form for the Application for Plant Breeders’ Rights” has been developed. To facilitate the consideration of those references and to provide an illustration of how the standard references might be presented in an application form, Annex I shows the UPOV Model Application Form with the standard references inserted. Annex II provides a list of the standard references for the UPOV Model Application Form.

24. As explained in document CAJ/59/5, paragraph 24, an intended benefit of Proposal 1 is to minimize linguistic difficulties for applicants and to provide the possibility of greater efficiency for applicants making multiple applications. For example, if working with several electronic application forms, the applicant could complete a single UPOV Model Application Form or UPOV Test Guidelines TQ and then transfer that information by “copy/paste” to the relevant fields of the relevant authority forms.

25. On the basis above, Annex II has been developed in a linear form (“linear blank form”), with blank cells for completion by applicants that would allow them to copy the information into relevant fields in the application forms and technical questionnaires of members of the Union, according to the use of standard references by the member of the Union concerned. Those forms could be posted on the UPOV website in the UPOV languages, for downloading by applicants.

26. A detailed set of references for the UPOV Model TQ, according to document TGP/7 “Development of Test Guidelines”, Annex I: TG Template, Chapter 10 “Technical Questionnaire” has also been developed. To facilitate the consideration of those references and to provide an illustration of how the standard references might be presented in a technical questionnaire, Annex III shows the UPOV Model Technical Questionnaire with the standard references inserted. In addition to the text of the UPOV Model Technical Questionnaire, Annex III also contains certain Additional Standard Wording (ASW) from document TGP/7/1, Annex 2: “Additional Standard Wording (ASW) for the TG Template”, as indicated. Annex IV provides a list of the standard references for the UPOV Model Technical Questionnaire in a “linear blank form”, similar to that used in relation to the UPOV Model Application Form.

27. Annexes II and IV could also be produced in other languages, where provided by relevant members of the Union. However, in order to ensure the validity of the translations, all interested members of the Union would be requested to verify the translations of the languages before they were made available on the UPOV website. In addition, there would be an explanation that the translations were unofficial and that it would be the responsibility of the applicant to ensure the validity on any information provided in their application.

28. With regard to providing standard references for the Technical Questionnaire, a particular matter to be considered is that the characteristics of the variety to be indicated will differ according to crop and species (see document TGP/7 “Development of Test Guidelines”, Annex I: TG Template, Chapter 10 “Technical Questionnaire”: Section 5 “Characteristics of the variety to be indicated”). In that respect, the approach developed in Annexes III and IV to this document is to use a formula that will allow all members of the Union to present the characteristics in a standardized way according to the relevant Test Guidelines. Thus, the characteristics and notes would be presented as follows:

UPOV-TQ1: 5 (TG reference)(TQ reference)(TG characteristic number)(TG note)

29. Two examples of that approach are provided at the end of Annex IV. As indicated in those examples, such a reference also provides flexibility for members of the Union to provide a precise reference to any characteristic in the Test Guidelines, irrespective of whether the characteristic is one that is used in the Section 5 of the Technical Questionnaire of the Test Guidelines concerned. This approach means that it would not be necessary for the individual UPOV Test Guidelines to have specific references in order for members of the Union to have a standard form of reference.

30. The inclusion of the TG reference means that the characteristics can be linked to different versions of the Test Guidelines, which means that it would not be necessary for members of the Union to update their references each time the Test Guidelines were revised. However, in order for applicants to be able to refer to the relevant characteristics, it would mean that previous versions of adopted Test Guidelines should continue to be accessible on the UPOV website.

Resource implications

Office of the Union

31. The following actions would be required by the Office of the Union:

- (a) Development of standard UPOV references for the UPOV Model Application Form and UPOV Model TQ;
- (b) Inclusion of explanation of standard references in the revision of document TGP/7 and in a revision of document TGP/5 Section 2/2;
- (c) Posting of standard references and “linear blank forms” (in “Word” format) on freely-accessible area of UPOV website; and
- (d) Posting of “linear blank forms” in languages provided by the relevant members of the Union (if not an official UPOV language).

32. No additional resources, beyond those approved in the Program and Budget for the 2008-2009 and those proposed in the draft Program and Budget for the 2010-2011 Biennium, would be required by the Office of the Union.

Members of the Union

33. The individual members of the Union would, as appropriate, include in their application forms and technical questionnaires a standardized reference to indicate the corresponding item in the UPOV Model Application Form and UPOV Model TQ (see Annexes I and III).

34. It would be a matter for each authority to decide if the field in the individual authority form corresponded sufficiently precisely to a field in the UPOV Model Application Form or UPOV Model TQ such that a reference could be made. For example, if there were any substantial differences in the information being requested in the UPOV model form, compared to the individual authority form, it would not be appropriate to indicate a reference to the UPOV model form.

35. In order to monitor the usefulness of this approach, if approved, it is proposed that, on a regular basis, the members of the Union be invited to provide information to the Office of the Union on the extent to which they use the standard references in their application forms and technical questionnaire.

Current status of Proposal 1

36. The CAJ, at its sixtieth session, held in Geneva on October 19 and 20, 2009, considered “Proposal 1: Standardized reference by authorities to the UPOV Model Application Form and UPOV Model TQ”, on the basis of paragraphs 21 to 30 of document CAJ/60/5 (paragraphs 21 to 35 of this document) and approved the:

(i) standard UPOV references for the UPOV Model Application Form and UPOV Model TQ, as set out in Annexes II and IV of document CAJ/60/5 (Annexes II and IV of this document);

(ii) inclusion of an explanation of the standard references in the revision of document TGP/7 and in a revision of document TGP/5 Section 2/2;

(iii) posting of standard references and “linear blank forms” (in “Word” format) on the freely-accessible area of UPOV website, on the basis of Annexes II and IV of document CAJ/60/5 (Annexes II and IV of this document); and

(iv) translation of “linear blank forms” into other languages, as set out in paragraph 26 of document CAJ/60/5 (paragraph 26 of this document).

37. The CAJ agreed that Proposal 1 “Standardized reference by authorities to the UPOV Model Application Form and UPOV Model TQ”, as approved by the CAJ at its sixtieth session, should be put forward for adoption by the Council in October 2010 (see document CAJ/60/10 “Report on the Conclusions”, paragraph 31).

38. The TC, at its forty-sixth session, held in Geneva from March 22 to 24, 2010, recalled that, as reported under agenda item 6 “TGP Documents”, the CAJ, at its sixty-first session, would be invited to consider a proposal for text to be added to document TGP/5: Section 2

“UPOV Model Form for the Application for Plant Breeders’ Rights”, in order to explain the standard references in the UPOV Model Application Form.

39. The TC agreed to propose to the CAJ that inclusion of an explanation of the standard references for the UPOV Model TQ and for Test Guidelines, as set out in Annexes III and IV of document TC/46/13, would benefit from discussion in the TWPs and TC and should not be included in document TGP/7/2, but should be considered for a future revision of document TGP/7 (document TGP/7/3) (see document TC/46/15 “Report on the conclusions”, paragraph 82).

40. With regard to the inclusion of an explanation of the standard references in the revision of document TGP/5 Section 2/2 (see paragraph 36(ii) above), the CAJ, at its sixty-first session, held in Geneva on March 25, 2010, agreed to the revision of document TGP/5, Section 2/2, as follows:

“A. General Instructions

“[...]

“0.4 A standard UPOV reference has been provided for each field in the UPOV Model Form. For example,

“for item 1.(a) Applicant(s) Name(s),

“the standard UPOV reference is “UPOV A1: 1(a)(i)”

“To facilitate harmonization and to assist applicants, an Authority may include that standard UPOV reference in the corresponding field of the Authority’s own form. It is a matter for each Authority to decide if the field in the Authority’s own form corresponds sufficiently precisely to the field in the UPOV Model Application Form for the standard UPOV reference to be included.”

41. The CAJ also agreed that, in the revision of document TGP/5, Section 2/2, a footnote be added to the first standard reference (UPOV A1: 1(a)(i)) stating that “standard UPOV reference – see Section A. General Instructions, item 0.4”.

42. The CAJ noted that the standard references and “linear blank forms” (in “Word” format) for posting on the freely accessible area of UPOV website, on the basis of Annexes I and II of document CAJ/60/5 (reproduced as Annexes I and II of this document), would be presented for adoption by the Council at its forty-fourth ordinary session, to be held in Geneva on October 21, 2010.

43. The CAJ agreed with the conclusion of the TC that inclusion of an explanation of the standard references for the UPOV Model TQ and for Test Guidelines, as set out in Annexes III and IV of document TC/46/13 (document CAJ/60/5) (reproduced as Annexes III and IV of this document), would benefit from discussion in the TWPs and TC and should not be included in document TGP/7/2, but should be considered for a future revision of document TGP/7 (document TGP/7/3).

Consideration of proposals by the Technical Working Parties

44. At its thirty-ninth session, held in Osijek, Croatia, from May 24 to 28, 2010, the Technical Working Party for Agricultural Crops (TWA) considered document TWA/39/8 (see document TWA/39/27 “Report”, paragraphs 63 to 65 and 77).

45. The representative of the European Seed Association (ESA) noted that the arrangements for providing and using the standard references for Technical Questionnaires, as set out in document TWA/39/8, Annexes III and IV (document TWF/41/8, Annexes III and IV, respectively), could be complicated and would imply a significant commitment for authorities and might not be simple for breeders. Therefore, he agreed to consult his members in order to provide a clear view from ESA on whether such an approach would merit the investment of resources required.

46. The TWA heard that the CPVO was planning to make its electronic application forms available in English, French, German and Dutch in order to assist breeders.

47. At its twenty-eighth session, held in Angers, France, from June 29 to July 2, 2010, the TWC noted that it would be a matter for breeders to indicate the usefulness of standard references for UPOV Technical Questionnaires (TQs). However, it saw the benefits of having a standard reference for items in the TQ, particularly for authorities where applications forms could not be made available in multiple languages. In that regard, it noted that the inclusion of a standard reference in an authority’s TQ would be considerably more straightforward than translating those documents into other languages. It also noted that the growing diversity of languages and alphabets within UPOV meant that the use of the references by only some authorities might still bring substantial benefits (see document TWC/28/36 “Report”, paragraph 42).

48. At its forty-fourth session, held in Veliko Tarnovo, Bulgaria, from July 5 to 9, 2010, the TWV noted the information provided above and the comments of the TWA and TWC. The TWV also agreed that consideration might be given to the inclusion of an additional field in the standard UPOV Model TQ in order for an applicant to have the possibility to indicate a trademark, trade name or other similar indication that was associated with the variety denomination.

49. The Technical Working Party for Fruit Crops (TWF) is invited to consider the standard references for the UPOV Model TQ and for Test Guidelines, as set out in Annexes III and IV of this document, within the context of a future revision of document TGP/7 (document TGP/7/3).

PROPOSAL 2: USE OF INFORMATION PROVIDED IN AN ELECTRONIC VERSION OF THE UPOV MODEL APPLICATION FORM AND UPOV MODEL TQ

Explanation

50. This proposal is based on an approach whereby the applicant would use the UPOV Model Application Form and possibly the UPOV Model TQ, to provide information to an authority as a part of an application for a breeder's right. It would be a matter for each authority to decide if it could accept such information as a part of the application and, if appropriate, the procedure to be followed.

51. The basis for such an approach would be to use the "linear blank forms" in Annexes II and IV to this document as the basis for the applicant to provide information to an authority as a part of an application for a breeder's right.

Resource implications

Office of the Union

52. The initial actions for the Office of the Union would be similar to those of Proposal 1, although the "linear blank forms" might also need to be developed into a format that would facilitate electronic transmission of data to authorities (e.g. in XML format). However, the full resource implications of Proposal 2 would require further evaluation in conjunction with members of the Union that would wish to pursue such an approach (see below) and interested breeders' organizations. In that regard, the International Seed Federation (ISF) has indicated in informal consultations that, in principle, it would be willing to contribute resources to the development of Proposal 2.

Members of the Union

53. The authority would need to develop a procedure to accept the information "requested" in the UPOV Model Application Form and UPOV Model TQ as a part of its application. That information could, for example, be requested to be transmitted to the authority in electronic form (e.g. data in XML format), in the form of a Word document transmitted by e-mail, or as a hard copy by post. However, for applicants using this approach, the authority would also need to develop a procedure for the applicant to provide any additional information by a separate action, e.g. a supplementary form. It would also need to ensure that both sets of information could be combined in a reliable way to form the single application. Furthermore, it would be necessary to consider how to facilitate the completion of relevant fields in the UPOV Model Application Form in an efficient way, e.g. to ensure that the correct alternative (1991 Act or 1978 Act wording) for Question 8 in the UPOV Model Application Form was provided.

Current status of Proposal 2

54. The CAJ, at its sixtieth session, considered "Proposal 2: Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ", on the basis of paragraphs 36 and 37 of document CAJ/60/5 (paragraphs 45 and 46 of this document).

55. The CAJ agreed that a Circular should be issued to the CAJ inviting expressions of interest in relation to “Proposal 2: Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ”. The response to that circular would be considered by the CAJ at its sixty-first session, to be held in Geneva on March 25, 2010.

56. At the forty-sixth session of the TC, the Delegation of the European Union recalled that, in principle, it had supported the Proposal 2 approach, but explained that it had already developed an electronic application system that would preclude such an approach without starting a new system from the beginning. It was explained that the Community Plant Variety Office of the European Union (CPVO) had launched an online application system and was encouraging the individual member States of the European Union to adopt that system for plant breeder’s right and national list purposes. The CPVO had developed its own software and use of the system was not restricted by other parties. It planned to make that system available in French, German and Dutch. In response to a question from the Vice Secretary-General, the Delegation of the European Union explained that the system would be made available to the member States of the European Union in the first instance, but as a second step, consideration could be given to making that system available to members of the Union (see document TC/46/15 “Report on the conclusions”, paragraph 83).

57. At its sixty-first session, held in Geneva on March 25, 2010, the CAJ noted the responses to Circular E-1141 concerning Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ”, as set out in documents CAJ/61/5 and CAJ/61/10.

58. The CAJ noted the intervention made by the Delegation of the European Union that recalled that, in principle, it had supported the Proposal 2 approach, but explained that it had already developed an electronic application system that would preclude such an approach without starting a new system from the beginning. It was explained that the CPVO had launched an online application system and was encouraging the individual member States of the European Union to adopt that system for plant breeder’s right and national list purposes. The CPVO was planning to make that system available in French, German and Dutch. In response to an intervention by the representative of the International Seed Federation (ISF), the Delegation of the European Union explained that the system would be made available to the member States of the European Union in the first instance, but as a second step, consideration could be given to making that system available to members of the Union.

59. The CAJ agreed that, in relation to Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ”, it would be beneficial to await developments concerning the possibility of the CPVO online application system being made available to members of the Union, as explained by the Delegation of the European Union, and decided to continue deliberations on electronic application systems, as considered appropriate by the CAJ (see document CAJ/61/11 “Report on the Conclusions”, paragraphs 48 to 50).

Comments by the Technical Working Parties

60. The TWA, at its thirty-ninth session, held in Osijek, Croatia, from May 24 to 28, 2010, recalled that it had considered the inclusion of standard references for the Technical Questionnaire, as set out in document TWA/39/8, under agenda item 5 (b) “Revision of TGP Documents”. In relation to Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ”, paragraph 54 (paragraph 57 of

this document), which explained that the Administrative and Legal Committee (CAJ) had concluded that it would be beneficial to await developments concerning the possibility of the CPVO online application system being made available to members of the Union, the TWA heard that the CPVO would have a meeting of the network of examination offices of the European Union on June 2, 2010 and would make a report of developments at the twenty-eighth session of the TWC, to be held in Angers, France, from June 29 to July 2, 2010.

61. At its twenty-eighth session, held in Angers, France, from June 29 to July 2, 2010, the TWC received a presentation from Mr. Marc Rouillard (CPVO) on the CPVO Online Application system, a copy of which was provided in document TWC/28/35, Annex IV. In relation to Proposal 2 “Use of information provided in an electronic version of the UPOV Model Application Form and UPOV Model TQ”, the TWC noted that the CAJ had concluded that it would be beneficial to await developments concerning the possibility of the CPVO online application system being made available to members of the Union (see document TWC/28/36 “Report”, paragraphs 68 and 69).

62. At its forty-fourth session, held in Veliko Tarnovo, Bulgaria, from July 5 to 9, 2010, the TWV noted that the CAJ had concluded that it would be beneficial to await developments concerning the possibility of the CPVO online application system being made available to members of the Union and agreed that it would be of great interest to receive a presentation on the CPVO system at the forty-fifth session of the TWV. The expert from the European Union agreed to make such a presentation. The expert from Germany reported that an electronic system had been developed and successfully introduced in Germany and indicated that she would be glad to arrange a demonstration of that system at the TWV (see document TWV/44/34 “Report”, paragraph 86).

-------------------------	-----------------	-------------------

9. Information on plant material to be examined or submitted for examination.

9.1 The expression of a characteristic or several characteristics of a variety may be affected by factors, such as pests and disease, chemical treatment (e.g. growth retardants or pesticides), effects of tissue culture, different rootstocks, scions taken from different growth phases of a tree, etc.

9.2 The plant material should not have undergone any treatment which would affect the expression of the characteristics of the variety, unless the competent authorities allow or request such treatment. If the plant material has undergone such treatment, full details of the treatment must be given. In this respect, please indicate below, to the best of your knowledge, if the plant material to be examined has been subjected to:

- | | | |
|---|---|--------|
| (a) Microorganisms (e.g. virus, bacteria, phytoplasma) | Yes [] | No [] |
| | <i>UPOV-TQ1: 9(2)(a)(i) / 9(2)(a)(ii)</i> | |
| (b) Chemical treatment (e.g. growth retardant, pesticide) | Yes [] | No [] |
| | <i>UPOV-TQ1: 9(2)(b)(i) / 9(2)(b)(ii)</i> | |
| (c) Tissue culture | Yes [] | No [] |
| | <i>UPOV-TQ1: 9(2)(c)(i) / 9(2)(c)(ii)</i> | |
| (d) Other factors | Yes [] | No [] |
| | <i>UPOV-TQ1: 9(2)(d)(i) / 9(2)(d)(ii)</i> | |

Please provide details for where you have indicated “yes”.

UPOV-TQ1: 9(2)(e)

.....

ASW 17

“9.3 Has the plant material to be examined been tested for the presence of virus or other pathogens?”

Yes []

UPOV-TQ1: 9(3)(a)(i)

(please provide details as specified by the Authority)

UPOV-TQ1: 9(3)(a)(ii)

No []”

UPOV-TQ1: 9(3)(b)

10. I hereby declare that, to the best of my knowledge, the information provided in this form is correct:

Applicant's name

UPOV-TQ1: 10(a)

Signature

UPOV-TQ1: 10(b)
