BACKGROUND

3. The TC, at its forty-ninth session held in Geneva from March 18 to 20, 2013, and the CAJ, at its sixty-seventh session, held in Geneva, on March 21, 2013, agreed to invite the Council to adopt document TGP/14/2 “Glossary of Terms Used in UPOV Documents”, at its forty-seventh session, to be held on October 24, 2013 (see document TC/49/41 “Report on the Conclusions”, paragraphs 29 and 30, and document CAJ/67/14 “Report on the Conclusions”, paragraph 36).

4. Document TGP/14/2 “Glossary of Terms Used in UPOV Documents” contains a new “Subsection 3: Color”, and provides definitions of botanical terms with an indication of whether those terms are generally used in Test Guidelines, or whether alternative terms might be more appropriate for use in Test Guidelines (see documents TC/49/36, Part I, 1(c), page 4).

5. Document TGP/14/2 provides a definition of the terms “spot”, “blotch” and “speckle”, but does not mention “dot”. The TC, at its forty-ninth session, agreed that a definition for “dot” be provided in a future revision of document TGP/14 Section 2: “Botanical Terms, Subsection 3: Color” and requested the Office of the Union to prepare a draft for consideration by the TWPs at their sessions in 2013 (see document TC/49/41 “Report on the Conclusions”, paragraph 35).

EXAMPLES OF USE OF DOT AND SPOT

6. A search of the UPOV Test Guidelines presents 67 results on the use of the term “dot” in Test Guidelines. The following characteristics are examples on the use of “dot” where the term “spot” is also used:

PROPOSAL FOR DEFINITION OF DOT

8. On the basis of the existing use of the term “dot” in Test Guidelines, it is proposed to add the following definition of “dot”, for inclusion in a future revision of document TGP/14, Section 4,2,1,2.

“4.2.1.2 Spotted/ Blotched / Speckled

Spot: sharp, clear outlined round or nearly round shaped colored area.

Dot: very small sharp, clear outlined round or nearly round shaped colored area (smaller than spot).
