Seminar on Essentially Derived Varieties (EDVs)

CLOSING REMARKS

Kitisri Sukhapinda
President of the Council of UPOV

Geneva, October 22, 2013

Session 1: Technical and legal aspects of essentially derived varieties and the possible impact on breeding and agriculture

- The [1991] Diplomatic Conference requested the Secretary-General of UPOV to start work immediately after the Conference on the establishment of draft standard guidelines [...]
- Key elements of the guidelines on EDV were considered at 1992 Meeting with Intergovernmental Organizations (IOM/6/2) – and provide a good starting point for future work.
- Currently, genetic distance measurements are not well correlated with phenotypic differences.
- Guidelines would need to consider the situation in different crops/species and methods of breeding, e.g. mutants.
- Two possible starting points:
 - predominant derivation (genetic conformity)
 - essential characteristics (phenotype)
- Need to consider impact on breeders, including farmer-breeders, farmers, growers and society as a whole.

Session 2: Experience in relation to essentially derived varieties

- Australian PBR law provides a **workable "bright line"** on EDV
- Japan: certain **examples** which may be considered as EDVs are provided, **but it is a matter for the courts**
- Court case experience in the Netherlands:
 - for a variety to be qualified an EDV the **differences** with the Initial Variety **should not be more than one or very few inheritable characteristics** (both in terms of genetics and phenotype)
 - **breeders need clear guidance**
- Court case experience in Israel:
 - if there exists a genetic or a morphological **conformity** between the two varieties, the **assumption** is that the **defendant** actually **used the original variety** to produce the EDV: this is only **prima facie** evidence, by which the **burden of proof is shifted to the defendant**, who now has to explain the suspicious conformity

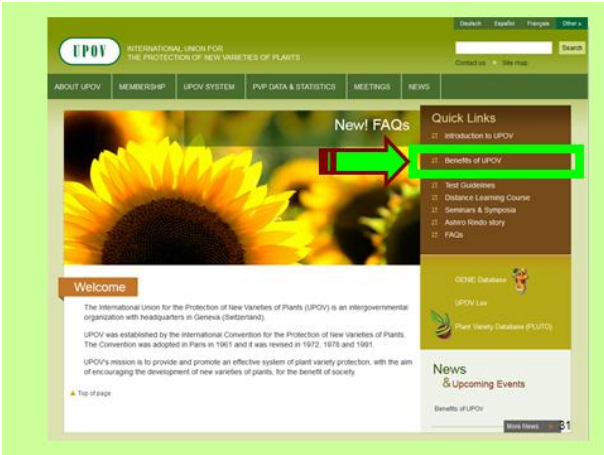

Session 3: Possible role of future UPOV guidance on essentially derived varieties

- "**Soft law**" is an option, e.g. Guidelines.
- Guidelines that **embrace a broad spectrum of stakeholders and interests** may be more credible and persuasive for the Courts.
- The **international standing of UPOV** may help in the use of guidelines by Courts.
- Alternative Dispute Resolution (ADR)** mechanisms - Mediation, Arbitration and/or Expert Determination - **could be useful tools for EDV**
- ISF and WIPO provide ADR options
- Publication of an anonymized **summary of ADR outcomes** could offer guidance and could lead to harmonization

The screenshot shows the UPOV website interface. At the top, there is a navigation menu with options like 'ABOUT UPOV', 'MEMBERSHIP', 'UPOV SYSTEM', 'PVP DATA & STATISTICS', 'MEETINGS', and 'NEWS'. The 'MEETINGS' section is active, displaying details for a seminar on essentially derived varieties (EDVs) held in Geneva, Switzerland, on October 22, 2013. Below the seminar title, there is a list of meeting documents, including a 'Revised Draft Program' with code UPOVSEMGE/13/1 REV. There is also a 'Biographies' section listing participants such as Ms. Mia Buma, Secretary of the Committee for New Varieties of Plants, and Mr. Peter Butten, Vice Secretary-General of UPOV. A search bar is visible at the top right of the page.
