X. Technical Questionnaire.....	21

I. Subject of these Guidelines

These Test Guidelines apply to all varieties of *Lycopersicon lycopersicum (L.) Karsten ex Farw.*

II. Material Required

1. The competent authorities decide when, where and in what quantity and quality the seed required for testing the variety is to be delivered. Applicants submitting material from a State other than that in which the testing takes place must make sure that all customs formalities are complied with. The minimum quantity of seed to be supplied by the applicant in one or several samples should be:

- a) vegetatively propagated varieties: 50 plants
- b) seed propagated varieties: 25 g of seed (10 g. for hybrids)

The germination capacity should be as high as possible but at least meet the minimum requirements for germination capacity, moisture content and purity for marketing seed in the country in which the application is made.

2. The plant material must not have undergone any treatment unless the competent authorities allow or request such treatment. If it has been treated, full details of the treatment must be given.

III. Conduct of Tests

1. The minimum duration of tests should normally be two similar growing periods.

2. The tests should normally be conducted at one place. If any important characteristics of the variety cannot be seen at that place, the variety may be tested at an additional place.

3. The tests should be carried out under conditions ensuring normal growth. The size of the plots should be such that plants or parts of plants may be removed for measurement and counting without prejudice to the observations which must be made up to the end of the growing period. As a minimum, each test should include a total of 20 plants in the glasshouse or 40 plants in the open which should be divided between two or more replicates. Separate plots for observation and for measuring can only be used if they have been subject to similar environmental conditions. Varieties stemming from tissue culture should, in addition, be compared to plant material of comparable varieties raised under the same conditions.

4. Additional tests for special purposes may be established.

IV. Methods and Observations

1. All observations determined by measurement or counting should be made on 20 plants or parts of 20 plants.

2. When resistance characteristics are used for assessing distinctness, homogeneity and stability, records must be taken under conditions of controlled infection and, unless otherwise specified, on at least 10 plants.

V. Grouping of Varieties

1. The collection of varieties to be grown should be divided into groups to facilitate the assessment of distinctness. Characteristics which are suitable for grouping purposes are those which are known from experience not to vary, or to vary only slightly, within a variety. Their various states of expression should be fairly evenly distributed throughout the collection.

2. It is recommended that the competent authorities use the following characteristics for grouping varieties:

- a) Plant: growth type (characteristic 2)
- b) Leaf: division of blade (characteristic 10)
- c) Peduncle: abscission layer (characteristic 18)
- d) Fruit: shape in longitudinal section (characteristic 22)
- e) Fruit: predominant number of locules (characteristic 31)
- f) Fruit: green shoulder (before maturity) (characteristic 32)
- g) Fruit: color at maturity (characteristic 36)

VI. Characteristics and Symbols

1. To assess distinctness, uniformity and stability, the characteristics and their states as given in the Table of Characteristics should be used.

2. Notes (numbers) for the purpose of electronic data processing, are given opposite the states of expression for each characteristic.

3. Legend:

(*) Characteristics that should be used on all varieties in every growing period over which the examinations are made and always be included in the variety descriptions, except when the state of expression of a preceding characteristic or regional environmental conditions render this impossible.

(+) See Explanations on the Table of Characteristics in chapter VIII.

VII. Table of Characteristics/Tableau des caractères/Merkmalstabelle/Tabla de caracteres

	English	français	Deutsch	español	Example Varieties Exemples Beispielssorten Variedades ejemplo	Note/ Nota
1.	Seedling: anthocyanin coloration of hypocotyl					
	absent					1
	present				Montfavet H 63.4	9
2.	Plant: growth type					
	determinate				Campbell 1327	1
	semi-determinate				Marmande	2
indeterminate				Saint-Pierre	3	
3. <u>Determinate varieties only:</u>	Plant: number of nodes on main stem (side shoots to be removed)					
	few				Campbell 1327	3
	medium				Montfavet H 63.4	5
many				Prisca	7	
4. <u>Indeterminate varieties only:</u>	Plant: speed of growth (when fastest variety reached at least 1,5 m height)					
	slow				Colombo, Dombello, Dombito	3
	medium				Bandor, Blizzard, Furiak	5
fast				Favorset, Fignon, Goldstar	7

VIII Explanations on the Table of characteristics

Ad. / Add. / Zu 37a

Fruit: firmness

Method

Harvesting stage: fruits should be harvested when they are completely red.

Determining firmness: determine by hand the firmness of the fruits compared to the standard varieties

IX. Literature

No specific Literature

IX. Technical questionnaire

	Reference Number (not to be filled in by the applicant)
<p>TECHNICAL QUESTIONNAIRE to be completed in connection with an application for plant breeders' rights</p>	
1. Species	<p><i>Lycopersicon lycopersicum (L.) Karsten ex Farw.</i> Tomato</p>
2. Applicant (Name and address)	
3. Proposed denomination or breeder's reference	
4. Information on origin, maintenance and reproduction of the variety	
4.1 Method of maintenance and reproduction	a) vegetative propagation b) seed propagation a) hybrid b) open-pollinated
4.2 Other information	

5. Characteristics of the variety to be indicated (the number in brackets refers to the corresponding characteristic in Test Guidelines; please mark the state of expression which best corresponds).

Characteristics	Example Varieties	
5.1 Plant: growth type (2)		
determinate	Campbell 1327	1
semi-determinate	Marmande	2
indeterminate	Saint-Pierre	3
5.2 Leaf: division of blade (10)		
pinnate	Pilot, Red Jacket, Mikado	1
bipinnate	Lukullus, Saint-Pierre	2
5.3 Peduncle: abscission layer (18)		
absent	Aledo, Bandera, Count, Lerica	1
present	Montfavet H 63.5, Roma	9
5.4 Fruit: size (20)		
very small	Cerise, Sweet 1000	1
small	Early Mech, Europeel, Roma	3
medium	Alphamech, Diego	5
large	Carmello, Ringo	7
very large	Erlidor, Lydia, Muril	9

Characteristics	Example Varieties	
5.5 Fruit: shape in longitudinal section (22)		
flattened	Campbell 28, Marmande	1
slightly flattened	Montfavet H 63.5, Montfavet H 63.4	2
round	Cerise Moneymaker	3
rectangular	Early Mech, Peto Gro	4
cylindrical	Hypeel 244, Macero II, San Marzano 2	5
heart-shaped	Cobra	6
obovoid	Barbara	7
ovoid	Rimone, Rio Grande	8
pear-shaped	Europeel	9
5.6 Fruit: ribbing at stalk end (23)		
absent or very weak	Cerise	1
weak	Early Mech, Hypeel 244, Melody, Peto Gro, Rio Grande	3
medium	Montfavet H 63.4, Montfavet H 63.5	5
strong	Campbell 1327, Carmello, Count	7
very strong	Marmande	9
5.7 Fruit: predominant number of locules (31)		
two	Early Mech, Europeel, San Marzano	1
two and three	Alphamech, Futuria	2
three and four	Montfavet H 63.5	3
more than four	Carmello, Marmande	4

Characteristics	Example Varieties	
5.8 Fruit: green shoulder (before maturity) (32)		
absent	Rio Grande	1
present	Daniela	9
5.9 Fruit: color of epidermis (36)		
colorless	House Momotaro, White Miraball	1
yellow	Yellow Pear	2
orange	Ferline	3
5.10 Fruit: firmness (37.a)		
very soft	Marmande	1
soft	Trend	3
medium	Cristina	5
firm	Tradiro	7
very firm	Daniela	9
5.11 Time of maturity (39)		
very early	Sungold	1
early	Feria, Rossol	3
medium	Montfavet H 63.5	5
late	Manific, Saint-Pierre	7
very late	Daniela	9

6. Similar varieties and differences between these varieties

Denomination of similar variety	Characteristic in which the similar variety is different ^{o)}	State of expression of similar variety	State of expression of candidate variety

^{o)} In the case of identical states of expressions of both varieties, please indicate the size of the difference.

7. Additional information which may help to distinguish the variety

7.1 Resistance to pests and diseases (please specify races/strains, if possible)

8. Authorization for release

(a) Does the variety require prior authorization for release under legislation concerning the protection of the environment, human and animal health?

Yes [] No []

(b) Has such authorization been obtained?

Yes [] No []

If the answer to that question is yes, please attach a copy of such an authorization.
