INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS
GENEVA

TECHNICAL WORKING PARTY FOR VEGETABLES

**Forty-Fourth Session
Veliko Tarnovo, Bulgaria, July 5 to 9, 2010**

**REVIEW OF GROUPING CHARACTERISTICS IN THE TEST GUIDELINES FOR PEA
(ADDENDUM)**

Document prepared by an expert from France

1. This document contains results of Question 2 and Question 4 of the questionnaire survey on grouping characteristics in the Test Guidelines for Pea, circulated by means of Circular E-1266 of April 26, 2010. Circular E-1266 is reproduced in the Annex to document TWV/44/33.

RESULTS OF QUESTION 2

2. Replies were received from 8 countries. The response from each of the countries has been coded (A to H).
3. The results of the survey are summarized in Annex I.

RESULTS OF QUESTION 4

4. In the replies to the questionnaire received from France, the Netherlands and the United Kingdom , lists of varieties classified to the two Groups are provided and reproduced in Annex II (Group 1) and Annex III (Group 2). The table in each of the Annexes contains the varieties classified to the given group in the column of the country where that variety is found in the variety collection. If that same variety is not classified to the given group in another country, the number of characteristic and the state of expression which does not correspond to the definition of the group, or another reason, is provided in the column of that other country. For example, in the case below:

Group 1,

<u>France</u>		<u>NL</u>		<u>GB</u>	
41 = 2	ADRIANA				39 = 2

In the Netherlands, ‘Adriana’ is classified to Group 1, whereas in France and in the United Kingdom ‘Adriana’ is not classified to Group 1. In the case of France characteristic 41 (Pod: shape of distal part) has state 2 (blunt), instead of state1 (pointed).

5. Annex IV provides diagrams to explain how to subdivide Groups 1 and 2 further in France, by using four characteristics (characteristic 58.1 (Resistance to *Fusarium oxysporum* f.sp.*pisi*), characteristic 60, (Resistance to *Ascochyta pisi*, Race C), Virus 2 and characteristic 59 (Resistance to *Erysiphe pisi* Syd.).

Virus 2					x							1

A-H: countries (coded)

Veg: testing station for vegetable pea varieties

Agri.: testing station for agricultural pea varieties

GQ: Grouping characteristics included in document TG/7/10

NGQ: other characteristics included in document TG/7/10 and further characteristics used at the national level for grouping

a: characteristic used to select varieties of common knowledge that can be excluded from the growing trial used for examination of distinctness

b: characteristic used to organize the growing trial so that similar varieties are grouped together

c: characteristic NOT used for grouping purposes

[Annex II follows]

Varieties belonging to the given group found in the collection
in France (FR), the Netherlands (NL) and the United Kingdom (GB)

Groupe 1
