

Meeting on the development of an electronic application form

UPOV/EAF/16/3

Sixteenth Meeting Geneva, October 23, 2020 Original: English

Date: February 11, 2021

REPORT

adopted by the Meeting on the Development of an Electronic Application Form

Disclaimer: this document does not represent UPOV policies or guidance

WELCOME AND OPENING

- 1. The Sixteenth meeting on the development of an electronic form (EAF/16 meeting), organized via electronic means, was opened and chaired by Mr. Peter Button, Vice Secretary-General of UPOV, who welcomed the participants.
- 2. The list of participants is reproduced in Annex I to this report.

APPROVAL OF THE AGENDA

3. The meeting adopted the draft agenda as proposed in document UPOV/EAF/16/1 Rev..

DEVELOPMENTS CONCERNING UPOV PRISMA

4. The meeting considered document <u>UPOV/EAF/16/2</u> "Developments concerning UPOV PRISMA" and received a presentation by the Office of the Union on the latest developments concerning UPOV PRISMA, a copy of which is reproduced in Annex II to this document.

Version 2.4

5. The participants in the EAF/16 meeting noted that version 2.4 of UPOV PRISMA was released on February 24, 2020, at which time a fee of 90 Swiss francs was reintroduced for submissions via UPOV PRISMA. Version 2.4 provided an improved user interface, developed on the basis of feedback received from users in 2019.

Use of UPOV PRISMA

6. The participants noted the information in relation to the use of UPOV PRISMA (as of October 10, 2020), as reported in Annex II of this document.

Feedback from Users

7. The participants noted the feedback received from users on IT matters and on the information in UPOV PRISMA, and agreed the following:

Information in UPOV PRISMA

(a) Priority should be placed on working with participating PBR authorities to ensure that all related information is complete and updated in a timely way before extending UPOV PRISMA to additional UPOV members (see UPOV PRISMA Terms of Use available at: https://www.upov.int/upovprisma/en/termsuse.html "Provide the Office of the Union with the most recent and updated application forms");

UPOV/EAF/16/3 page 2

- (b) Need to increase coverage for important crops in participating PBR authorities that do not cover all crops/species in UPOV PRISMA;
- (c) Ensure that all participating PBR authorities in UPOV PRISMA acknowledge receipt of the application data submission within a reasonable amount of time (see UPOV PRISMA Terms of Use available at: https://www.upov.int/upovprisma/en/termsuse.html "Acknowledge receipt in UPOV PRISMA of any application data submitted via UPOV PRISMA within 7 days");
- (d) Ensure that all requirements of participating PBR authorities are specified in UPOV PRISMA to avoid requests for additional information after data submission via UPOV PRISMA (see UPOV PRISMA Terms of Use available at: https://www.upov.int/upovprisma/en/termsuse.html "Specify all documents required for accepting a completed application and ensure all required information can be provided in UPOV PRISMA");
- (e) Avoid loss of confidence in UPOV PRISMA by withdrawing PBR authority participation where the UPOV PRISMA Terms of Use are not fulfilled.
- 8. The participants in the EAF/16 meeting noted that in order to ensure confidence in UPOV PRISMA, the Office of the Union would contact, individually, all participating PBR authorities before December 31, 2020, to check the information currently available in UPOV PRISMA and assess on any need to update the forms and/or requirements.

IT matters

- 9. The participants noted that the following items would be addressed in Version 2.5:
 - (a) Need to automatically save application data in case of inactivity period in the system/session;
 - (b) Improve the speed of response of the system; and
 - (c) Increase the maximum size of attachments (e.g. for pictures);

Participants noted that increasing the use of machine-to-machine communication would be a matter for each participating PBR authority to decide when to proceed and would be subject to available resources.

Analysis of Technical Questionnaires

10. The participants noted the report on variation between the technical questionnaires of participating authorities in UPOV PRISMA and the UPOV model application form, and noted that the report would be made available to participating PBR authorities and UPOV PRISMA users, upon request.

Version 2.5

- 11. The participants noted that Version 2.5 was anticipated to be released in December 2020, with a possible intermediate version if necessary and according to available resources.
- 12. The participants noted that the following participating PBR authorities had informed the Office of the Union of updates of their application or technical questionnaire forms, which would be implemented in Version 2.5, or earlier according to available resources:
 - Chile
 - European Union
 - Mexico
 - Switzerland
- 13. The participants noted the request from the representative of Norway, to update the way the information provided in UPOV PRISMA for Norway (Application form and Technical Questionnaire), to reflect the national requirements. It was noted that this would be implemented in version 2.5.
- 14. The participants noted that no new authorities would be added in Version 2.5 but the following anticipated increased coverage of crop and species in UPOV PRISMA Version 2.5, compared to Version 2.4:

| Authority | | Anticipated new crop coverage in Version 2.5 |
|----------------|----|--|
| European Union | QZ | Maize |

- 15. The participants noted that the following new functionalities were planned to be included in UPOV PRISMA Version 2.5:
 - New version of payment interface (Epay V2) to facilitate payment by PayPal, China Union Pay and Bulk payment;
 - National Listing for United Kingdom;
 - Bulk upload functionality, as a proof of concept (POC) for Maize in European Union (where additional TQs for parent lines would be completed in CPVO online system);
 - Customization of OAPI form layout (already made available).
- 16. The participants noted that, on the basis of feedback received, the following new functionalities were planned to be introduced in Version 2.5 (as reported in Annex II of this document):
 - Automatically save the application data in case of a period of inactivity;
 - Improve system performance;
 - Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
 - Allow co-agents to appear in the public list of agents available for breeders;
 - Allow uploading of large attachments;
 - Allow the possibility to attach documents as an interim solution when a PBR authority revises its application or technical questionnaire forms;
 - Improve user interface for copy functionality.

Possible future developments

- 17. The participants noted that the following UPOV members had expressed an interest to join UPOV PRISMA in the future: Bosnia and Herzegovina, Japan, Nicaragua, Singapore, United Republic of Tanzania and Uzbekistan. An update on plans would be presented at the next EAF meeting.
- 18. The participants noted that the following new functionalities were being considered for a future version of UPOV PRISMA:
 - Addition of non UPOV TQ characteristics in TQ Section 7 instead of TQ Section 5;
 - Synchronization between UPOV PRISMA and CPVO for TQ changes;
 - Information on DUS cooperation (DUS Arrangement Recommendation Tool (DART));
 - Machine translation:
 - Crop-specific TQs beyond Test Guidelines;
 - Support of additional TQs for parent lines for European Union (Bulk upload functionality).
- 19. The participants agreed that the addition of non UPOV TQ characteristics that were not included in UPOV Test Guidelines in future versions of UPOV PRISMA (from 2021 on)should be included in Section 7 of the UPOV PRISMA TQ instead of Section 5 (see document EAF/15/3 "Developments concerning UPOV PRISMA", paragraphs 28 to 31).

Communication and promotion

- 20. The participants noted that the focus for communication in 2021 would continue to be on individual support via direct contacts and training sessions for existing UPOV PRISMA users.
- 21. The participants noted that UPOV PRISMA promotional material (leaflets, infographics, quick guides, PowerPoint slides) remained available in various languages (as presented in document UPOV/EAF/15/2 "Developments concerning UPOV PRISMA"). It further noted that participating PBR authorities were invited to contact the Office of the Union to obtain promotional material, in order to distribute information to their applicants.

DATE OF NEXT MEETING

- 22. The next meeting of the EAF (EAF/17 meeting) was agreed to be held in Geneva on March 25, 2021, from 12 pm to 2 pm (Geneva time), with participation by electronic means.
 - 23. This report was adopted by correspondence.

UP@V 2

Status - UPOV PRISMA Version 2.4

- Released on February 24, 2020
- News:
 - New interface
 - Re introduction of UPOV PRISMA fee (90 Swiss francs per PVP application made using UPOV PRISMA) This fee is in addition to the PVP application fee(s) for the UPOV member concerned.

UP@V

UPOV PRISMA Fee - 2020

Since February 24, 2020

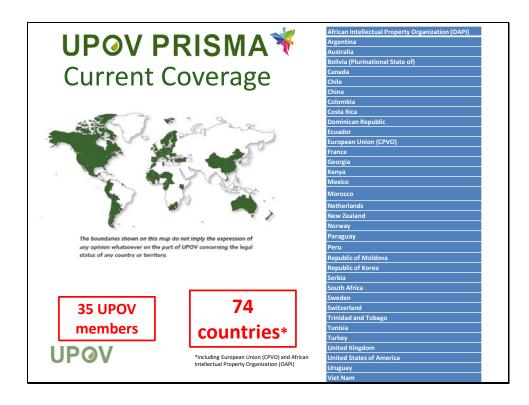

PVP application fee(s) for the UPOV member concerned (according to the selected authority and selected crop)

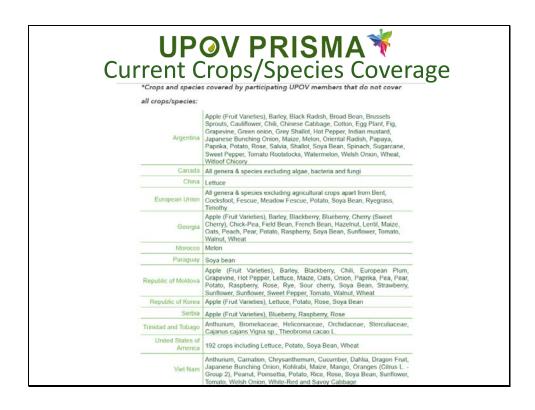

Payment of the UPOV PRISMA fee: is made via the e-pay system (by credit card or bank transfer) at the time of making a submission to a PVP Office

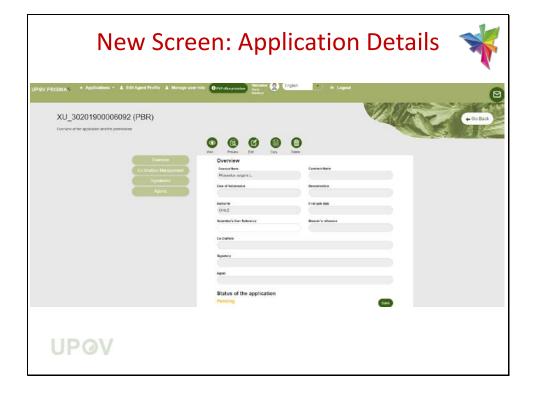

Note: For the United Kingdom, the UPOV PRISMA fee will be paid by the United Kingdom PVP Office

National Listing: Where it is possible in a UPOV member to use UPOV PRISMA also for applications for National Listing, only one UPOV PRISMA fee will be charged (90 Swiss francs) for the same variety (even if the two applications are made at different times).

UP@V 41

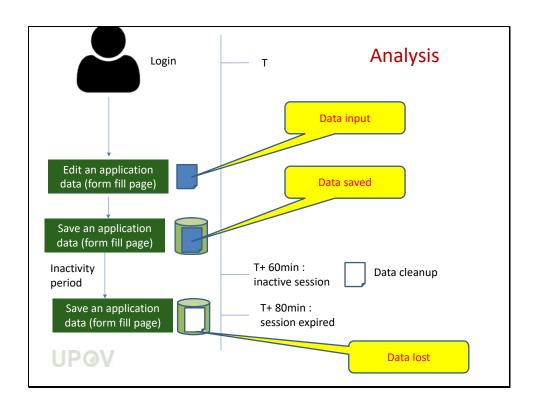

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity;
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
- Allow co-agents to appear in the public list of agents available for breeders;
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms;
- Improve user interface for copy functionality.

UPOV/EAF/16/3 Prov. Annex II, page 22

Need to automatically save application data in case of inactivity period in the system/session

 Use of cookies (the same type of cookies as for WIPO account session management) to identify when a session becomes inactive

Need to automatically save application data in case of inactivity period in the system/session

*

- 10 minutes before:
 - The user is notified
 - A timer countdown is displayed

Need to automatically save application data in case of inactivity period in the system/session

- When a session becomes inactive, the form page will be redirected to dashboard page.
- Auto-save and unlock application data before redirection.

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity;
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality):
- Allow co-agents to appear in the public list of agents available for breeders;
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms;
- Improve user interface for copy functionality.

Improve the speed of response of the system

- Performance experts:
 - Dashboard loading time
 - Form generation
- Upgrade planned for next release (V2.5)

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity:
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
- Allow co-agents to appear in the public list of agents available for breeders:
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms:
- Improve user interface for copy functionality.

UPOV

Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality)

- When a user is working on an application data (Edit mode), the other users (co-drafters, signatories, agents) are not allowed to access the application data
- In case of improper leave of the edit mode (e.g. closing the browser without saving and going back to the dashboard), the application data remains locked

Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality)

Solution:

- Every 5 minutes, the system checks if the application is still locked by a user
- If it is not the case, the system unlocks automatically the application data
- If necessary, an unlock button can be made available to unlock manually the application data.

UPOV

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity;
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
- Allow co-agents to appear in the public list of agents available for breeders;
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms;
- Improve user interface for copy functionality.

Allow co-agents to appear in the public list of agents available for breeders

- In UPOV PRISMA, users within a global legal entity can have the following roles:
 - One single agent
 - Co-agent(s)
 - Drafter(s)
 - Authorized signatory(ies)
- Only agents can specify the PBR authorities in which their company are eligible to operate.

UPOV

Allow co-agents to appear in the public list of agents available for breeders;

- Identified issues:
 - Due to legal restrictions, agent's address is used to allow the selection of PBR authorities in which agents MUST be resident.
 - It is impossible to select for example European
 Union and Australia at the same time.

Allow co-agents to appear in the public list of agents available for breeders;

- Solution:
 - Allow co-agents to specify where they are eligible to operate.
 - Allow breeders to appoint co-agents in UPOV PRISMA.

UPOV

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity;
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
- Allow co-agents to appear in the public list of agents available for breeders:
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms;
- Improve user interface for copy functionality.

Increase the maximum size of attachments

- Configuration changes have been applied
 - Accepted loading time up to 120 seconds ✓
 - − File size limitation is 50 MO

UPOV PRISMA **Version 2.5**Preview

Fix of identified IT issues:

- Automatically save the application data in case of a period of inactivity:
- Improve system performance;
- Avoid simultaneous access to the same application data by colleagues from the same organization (application data lock functionality);
- Allow co-agents to appear in the public list of agents available for breeders;
- Allow uploading of large attachments;
- Allow the possibility to attach documents when a PBR authority revises its application or technical questionnaire forms;
- Improve user interface for copy functionality.

Improve user interface for copy functionality

- Copy functionality covers many use cases in one single interface:
 - Case (i): Same PBR authority/ Same crop / Same application type (PBR or national listing)
 - Case (ii): Different PBR authorities/ Same Crop
 - Case (iii): Same PBR authority/Different crops
 - Case (iv): Different PBR authorities/ Different crops
- Identified issues:
 - Complex interface/ not user friendly
 - Misuse of the functionality
 - It leads sometimes to the original application data withdraw

Improve user interface for copy functionality

- Requirements:
 - In case of different PBR authorities, the representative's details are not copied
 - If the same variety is targeted, the same IRN is kept in order to get benefit of the associated combined application data for future data reuse.
- It is difficult to address the requirements at the same time for different use cases

Improve user interface for copy functionality

- Solution:
 - Separate the cases into two categories based on whether or not the same variety is targeted
 - Two copy buttons will be available

UPOV

Improve user interface for copy functionality

- Use Case 1: Copy data of the same variety
 - Crop, submitter's own reference are not editable.
 - The same IRN is kept
 - The list of PBR authorities (supporting the selected crop) and language for answers are editable.
 - If the same PBR authority is selected (case (i)):
 - The original application data is withdrawn
 - If another PBR authority is selected (case (ii)):
 - Representative's details are not copied

Improve user interface for copy functionality

- Use Case 2: Copy data of another variety
 - Different IRNs are generated automatically
 - In this case, the authority of the original data is selected by default as well as the crop
 - If the same PBR authority is selected (by default) (case (iii))
 - All data is copied
 - If another PBR authority is selected (case (iv))
 - Representative's details are not copied

UPOV

23. Participating members in the development of the electronic application form are invited to consider the plans for UPOV PRISMA Version 2.5, as set out in paragraphs 18 to 22.

PREVIEW

- UPOV PRISMA Version 2.4
- Use of UPOV PRISMA
- Feedback from Users
- UPOV PRISMA Version 2.5
- Future developments
- Communication & Promotion

UP@V 65

Future developments (After Version 2.5)

- Expansion
 - UPOV members
 - (Bosnia and Herzegovina, Japan, Nicaragua, Singapore, United Republic of Tanzania and Uzbekistan have previously expressed interest to join future releases)
 - > The Office of the Union will discuss with those UPOV members their latest plans to join UPOV PRISMA and expected timeline.
 - Crops
 - According to participating PBR Authorities request on the basis of applicants' interest

UP@V 66

Future developments (After Version 2.5) Preview

- New functionalities
 - Addition of non UPOV TQ characteristics in TQ Section 7 instead of TQ Section 5;
 - Synchronization between UPOV PRISMA and CPVO for TQ changes;
 - More PBR authorities with machine-to-machine links/ communication to UPOV PRISMA;
 - Information on DUS cooperation (<u>D</u>US <u>Arrangement Tool</u> (DART));
 - Machine translation;
 - Additional participating PBR authorities with National Listing;
 - Crop-specific TQs beyond Test Guidelines.

UP@V

Future developments (After Version 2.5) Preview

31. In future versions of UPOV PRISMA (from 2021 on), for participating PBR authorities in UPOV PRISMA, which require information on characteristics that are not included in the UPOV TQ to be included in UPOV PRISMA (e.g. Netherlands), it is proposed to include them in Section 7 of the UPOV PRISMA TQ instead of Section 5 (Option 2 below), on the basis of the following analysis:

Addition of non UPOV TQ characteristics (after Version 2.5)

Option 1: To include characteristics that are not included in the UPOV TQ in Section 5 (i.e. Characteristics of the variety) of the UPOV PRISMA TQ:

Advantages:

- a) The information provided will be reusable in subsequent applications (cropdependent data reusability)
- The output form will be similar to the current forms (Forms display in line with national TQ forms)

Disadvantages:

- The UPOV PRISMA data structure would need to be updated (PVP-XML should include the standard structure (i.e. Characteristic name + States of Expression))
- b) Additional development costs are foreseen (Code generation)
- c) A new deployment of the system would be required for each update

Addition of non UPOV TQ characteristics (after Version 2.5)

Option 2: To include characteristics that are not included in the UPOV TQ in Section 7 (i.e. Additional Information) of the UPOV PRISMA TQ:

Advantages:

- a) The UPOV PRISMA data structure (PVP-XML) does not need to be updated
- b) No additional development costs are foreseen on the UPOV side
- c) No new deployment of the system would be required
- d) Rapid response to request for inclusion (Fast integration of new/updated characteristics)
- e) The output forms will remain similar to the current forms in the case of machine-to-machine communication or customized layout (No impact on the form layout)
- f) The concerned PBR Authority will have the possibility for their applicants to use UPOV PRISMA for all genera & species, thereby remaining in Approach 1 (i.e. the TQ in UPOV PRISMA would be identical to the TQ in the adopted UPOV TGs) (see document EAF/10/3 "Report" paragraphs 12 and 13)

Addition of non UPOV TQ characteristics (after Version 2.5)

Option 2: To include characteristics that are not included in the UPOV TQ in Section 7 (i.e. Additional Information) of the UPOV PRISMA TQ:

Disadvantages:

- a) The information provided by the applicant would not be reusable in a subsequent application, as it would be inserted as free text (no data reusability between different authorities). However, this is not considered to be a major disadvantage because the characteristics are not harmonized with other UPOV members
- b) The display of output forms might be different from the PBR authority TQ forms (i.e. the numbering or the order of the sections)
- c) Work is required on the PVP Office side (preparation of data in a predefined excel template is required (to be done by PVP office)

71

Future developments (After Version 2.5) Preview

New functionalities

- Addition of non UPOV TQ characteristics in TQ Section 7 instead of TQ Section 5;
- Synchronization between UPOV PRISMA and CPVO for TQ changes;
- More PBR authorities with machine-to-machine links/ communication to UPOV PRISMA;
- Information on DUS cooperation (DUS Arrangement Tool (DART));
- Machine translation;
- Additional participating PBR authorities with National Listing;
- Crop-specific TQs beyond Test Guidelines.

UPOV

72

Synchronization between UPOV PRISMA and CPVO for TQ changes (after Version 2.5)

- Automatic notification of changes in the TQ questions
- Changes are reflected automatically in the following cases:
 - New national characteristics organized as part of TQ7
 - New wording without changing the semantics
 - Addition of UPOV characteristics in TQ5
 - Deletion of questions

 - Crop-specific TQs beyond Test Guidelines.

UP@V 74

Implement machine-to-machine communication with PBR authorities participating in UPOV PRISMA (after Version 2.5)

- Already in production (i.e. in UPOV PRISMA)
 - European Union
 - United States of America
- PBR authorities that have been in contact with UPOV office
 - Brazil
 - China
 - Georgia
 - Kenya

- Republic of Korea
- Republic of Moldova
- Japan
- Uruguay

UP@V 77

UPOV PRISMA PROMOTION in 2021

- Priority given to customer support, individual contacts (one to one) with individual users
- ➤ UPOV PRISMA **promotional material** (leaflets, infographics, quick guides, PowerPoint slides) remain available in different languages for participating PBR authorities to reach out their applicants

UP@V

32. Participating members in the development of the electronic application form are invited to note the proposed future developments of UPOV PRISMA as set out in paragraphs 27 to 31.

Next EAF/17 Meeting:

➤ March 25, 2021 :

- 12 pm-2 pm
- Online meeting

TENTATIVE DATES OF MEETINGS IN 2021

| MARCH | Tuesday, 23 and Wednesday, 24 | Enlarged Editorial Committee |
|---------|-------------------------------------|------------------------------------|
| OCTOBER | Sunday, 24 and Monday, 25 (evening) | Enlarged Editorial Committee |
| | Monday, 25 and Tuesday, 26 | Technical Committee |
| | Wednesday, 27 | Administrative and Legal Committee |
| | Thursday, 28 | Consultative Committee |
| | Friday, 29 | Council |
