March 16, 2022 (virtual meeting)****Original:** English  
**Date:** April 25, 2022

---

**REPORT**

*adopted by the Meeting on the Development of an Electronic Application Form*

*Disclaimer: this document does not represent UPOV policies or guidance*

**WELCOME AND OPENING**

1. The nineteenth meeting on the development of an electronic form (EAF/19 meeting), organized via electronic means, was opened and chaired by Mr. Peter Button, Vice Secretary-General of UPOV, who welcomed the participants.
2. The list of participants is reproduced in Annex I to this report.

**APPROVAL OF THE AGENDA**

3. The meeting adopted the draft agenda as proposed in document UPOV/EAF/19/1.

**DEVELOPMENTS CONCERNING UPOV PRISMA**

4. The meeting considered document UPOV/EAF/19/2 Rev. (F) / UPOV/EAF/19/2 Rev. Corr. (E,S) "Developments concerning UPOV PRISMA" and received a presentation by the Office of the Union on the latest developments concerning UPOV PRISMA, a copy of which is reproduced in Annex II to this document.

Use of UPOV PRISMA (as of January 31, 2022)

5. The EAF/19 participants noted the information on the use of UPOV PRISMA as of February 28, 2022, as reported in Annex II of this report.

Launch of Version 2.7

6. The EAF/19 participants noted that UPOV PRISMA Version 2.7 was fully deployed in January 2022, with the following changes:
  - Saint Vincent and Grenadines as additional participating PBR authorities;
  - Forms updated for European Union and the Netherlands;
  - Possibility to download the list of applications as displayed in the dashboard for PVP office in Excel format;
  - Introduction of the WIPO IP Portal navigation bar;
  - Bulk Upload (for maize, European Union);
  - Provide the Co-agent with the right to view applications of other colleagues.

## Other developments

### *IT Quality Software Audit*

7. The EAF/19 participants noted that in order to reduce the risk of problems when introducing new versions and/or new functionalities, the following steps would be taken (see document UPOV/EAF/17/3 “Report”):

- Appoint an external company to perform a software quality audit;
- Organize user acceptance testing (UAT) before going live with new functionalities.

8. The EAF/19 participants noted that the Office of the Union had appointed an external company to perform a software quality audit, and that according to the test maturity model, UPOV PRISMA had reached maturity level 2: “the organization has a fundamental test approach where some common test practices are implemented such as planning, monitoring and control over test activities”. The following recommendations had been provided to move to maturity level 3: “the organization is rather proactive and the test approach is documented and described in standards, procedures, tools and methods”:

- (a) Know the users and how UPOV PRISMA is used;
- (b) Focus on what is important and urgent: Automate test cases for regression on the functionalities mostly used and the functionalities that generate 80% of the bugs;
- (c) Define a clear Test strategy document;
- (d) For each new requirement, an impact analysis should be made;
- (e) Define a standard process for test case creation;
- (f) Use a test repository tool.

9. The EAF/19 participants noted that the above recommendations had been implemented except for the second recommendation. In that regard, the EAF/19 participants noted the test case for regression tests which was being automated and would be deployed in June 2022.

10. Further to the above measures to improve the quality of the UPOV PRISMA software, the EAF/19 participants noted that a code audit had been organized, which produced the following recommendations:

- (a) Implement best practices in terms of coding in order to avoid concurrency and performance issues;
- (b) Move to the cloud for a better resource management at infrastructure level and keep following the highest security standards ;
- (c) Develop a dedicated configuration interface for a controlled management of the forms.

11. The EAF/19 participants noted that in relation to user acceptance testing (UAT) before going live with any new functionalities, it was planned to consult UPOV PRISMA “Task Force” Group before implementing the changes in the real environment.

### *Improvement of user-friendliness of UPOV PRISMA*

12. The EAF/19 participants noted the new proposals to improve “Start New Application” and “Copy Application” screens and the next steps as follows:

- (a) A first round discussion with UPOV PRISMA Task force group took place in February 2022;
- (b) The second round discussion will take place in June 2022;
- (c) The implementation will be done in 2023.

### *CPVO participation in UPOV PRISMA*

13. The EAF/19 participants noted that in order to achieve and maintain synchronization of TQs between UPOV PRISMA and CPVO (see documents UPOV/EAF/16/3 “Report” paragraph 18, UPOV/EAF/17/3 “Report” paragraph 32 and UPOV/EAF/18/3 “Report” paragraph 12) the following projects had been agreed with CPVO:

- Project 1: “Audit” (current issues/ states of affairs) for exchange of data between UPOV PRISMA and CPVO in both directions (Status: completed);

- Project 2: Part A: Resolving current issues; Part B : Synchronizing changes by UPOV/CPVO (Status: not started);
- Project 3: Implementation of Project 2 outcome: Bi-directional exchange of application data (lettuce, tomato, rose) (Status: ongoing but limited to lettuce and rose);
- Project 4: Bulk upload of Maize applications from UPOV to CPVO (Status: completed);
- Project 5: “Transitional arrangements”, to communicate to applicants about the situations in which they can use UPOV PRISMA for applications at the CPVO and the measures that need to be taken until all issues have been resolved (Status: ongoing).

14. The EAF/19 participants noted the report on each project (as of March 16, 2022), as reported in Annex II of this report.

15. The EAF/19 participants noted the transitional arrangements agreed by UPOV and CPVO in relation to Project 5, as reported in Annex II of this report.

#### Coverage of Test Guidelines: Sugar Beet

16. The EAF/19 participants approved the procedure for utilizing authorities' TQs as presented in document UPOV/EAF/19/2 Rev. Corr., paragraphs 24 and 25:

1. Request from Authority A for a specific crop (Authority A TQ)
2. Inform other participating authorities in UPOV PRISMA
3. Circulate the Authority A TQ to see if participating UPOV members that use the UPOV TQ for all genera and species would prefer to:
  - (a) use Authority A TQ or
  - (b) continue using the generic TQ
4. Implement Authority A TQ for UPOV members who wish to use Authority A TQ (subject to available resources).

17. The EAF/19 participants noted that the United Kingdom TQ for sugar beet would be circulated to the participating UPOV members that use the UPOV TQ for all genera and species to see if they would wish to use the United Kingdom TQ or to continue using the generic TQ.

#### Version 2.8

18. The EAF/19 participants noted that on the basis of the request for new developments made by PVP Offices and registered users (see paragraph 29 to 31 of document UPOV/EAF/19/2 Rev. Corr.), the following new coverage and functionalities were planned to be introduced in Version 2.8:

- The forms for France and the Netherlands will be updated
- Bulk Upload (Maize, United Kingdom);
- Bulk invoice upon request;
- Improve the download functionality for PVP Offices by including UPOV code information for crops not covered by UPOV TG and the addition of following columns (only for United Kingdom as Proof of Concept):
  - Country of Origin
  - NLI Maintainer
  - NLI Agent
  - NLI Applicant
  - PBR Breeder
  - PBR Applicant
  - PBR Agent
  - Date PBR application received
  - Date NL application Received
  - Provisional Marketing Authorisation Code
  - Provisional Marketing Authorisation Date
  - Seed Weight
- Improve the loading performance of the dashboard

19. The EAF/19 participants noted that Version 2.8 was planned to be launched by the end of 2022, subject to available resources.

#### PLANNED FUTURE DEVELOPMENTS (AFTER VERSION 2.8)

##### Coverage

20. The EAF/19 participants noted the feedback received from registered users as following:

- Allow the possibility to upload multiple attachments for the same question;
- In the email notification message, remove the reference to the “applicant” since it is not correct when an agent submits the application data;
- For agents, accept invitations in bulk instead of clicking each one individually;
- Add an additional "notes" field to the agent profile to allow agents to provide further information to breeders/applicants, such as services offered and languages spoken.

21. The EAF/19 participants noted that the following UPOV members had previously expressed an interest in participating in UPOV PRISMA: Bosnia and Herzegovina, Brazil, Egypt, Japan, Nicaragua, Singapore, United Republic of Tanzania and Uzbekistan. The Office of the Union would consult the UPOV members concerned to discuss their requirements and timeline for joining UPOV PRISMA.

##### User-friendliness of the tool

22. The EAF/19 participants noted that the following elements would be considered after 2021 to increase the user-friendliness of UPOV PRISMA:

- Addition of non UPOV TQ characteristics in TQ Section 7 instead of TQ Section 5 (see document UPOV/EAF/17/3 “Report” paragraph 19);
- Crop-specific TQs beyond Test Guidelines (see document UPOV/EAF/16/3 “Report” paragraph 18);

##### New functionalities

23. The EAF/19 participants noted that the following new functionalities would be considered for possible development:

- Machine translation (see document UPOV/EAF/16/3 “Report” paragraph 18);
- Information on DUS cooperation (DUS Arrangement Recommendation Tool (DART)) (see document UPOV/EAF/16/3 “Report”, paragraph 18).

##### IT improvements

24. The EAF/19 participants noted that the following IT improvements would be considered for possible development after Version 2.8:

- Improve the performance of form generation.

##### UPOV PRISMA support and development team

25. The EAF/19 participants noted the new organization of the UPOV PRISMA support and development team as reported in Annex II of this report.

#### DATE OF NEXT MEETING

26. The next meeting of the EAF (EAF/20 meeting) was agreed to be held as a hybrid meeting (physical/virtual means) on the evening of October 25, 2022.

27. *This report was adopted by correspondence.*

## 2-Interviews

  
November

**'Better' than paper**

People are happy to have an online tool instead of old-fashioned applications. However, it feels like it could've learnt better from its peers.

**Simplicity** - a clear overview - is key

It is difficult to **navigate in the tool**. Word use, filtering, chosen forms, concept saving all come with their own hassle and together result in a loss of overview.

**Bug specifics**

The tool is rather buggy. Some of the specific bugs cause for a lot of (time consuming) trouble).

UPOV

## Status – IT Quality Software Audit Recommendations

1. Know the users and how UPOV PRISMA is used;
2. Focus on what is important and urgent: Automate test cases for regression on the functionalities mostly used and the functionalities that generate 80% of the bugs;
3. Define a clear Test strategy document;
4. For each new requirement, an impact analysis should be made;
5. Define a standard process for test case creation;
6. Use a test repository tool.

## Test automation

- For all participating authorities and all supported crops:
  - Test Case:
    - Step 1: Start New Application
    - Step 2: Select Crop and authority
    - Step 3: Get the form generated properly
    - Step 4: Save application data
    - Step 5: Edit application data : validate that all the answers are saved correctly
    - Step 6: View/Preview the application data: validate that all the answers are displayed correctly in the PDF

## Software Quality Improvement UAT

## Software quality improvement Code Audit

- Implement best practices in terms of coding in order to avoid **concurrency** and **performance** issues;
- Move to **the cloud** for a better resource management at infrastructure level and keep following the highest security standards ;
- Develop a **dedicated configuration** interface for a controlled management of the forms;

## User-friendliness of UPOV PRISMA

- Consultations with Users on how to improve some functionalities- screens in UPOV PRISMA
- Proposals were made by an external company
- First round discussion with UPOV PRISMA Task Force group : February 2022

## User-friendliness of UPOV PRISMA

### Bugfixing

Repair features that technically do not function properly or are perceived by the user as being broken.

### Usability Improvements

Isolated **redesign of individual features** so that their efficiency and workflow are improved. Improvements are based on usability feedback from users.

### Strategic Improvements

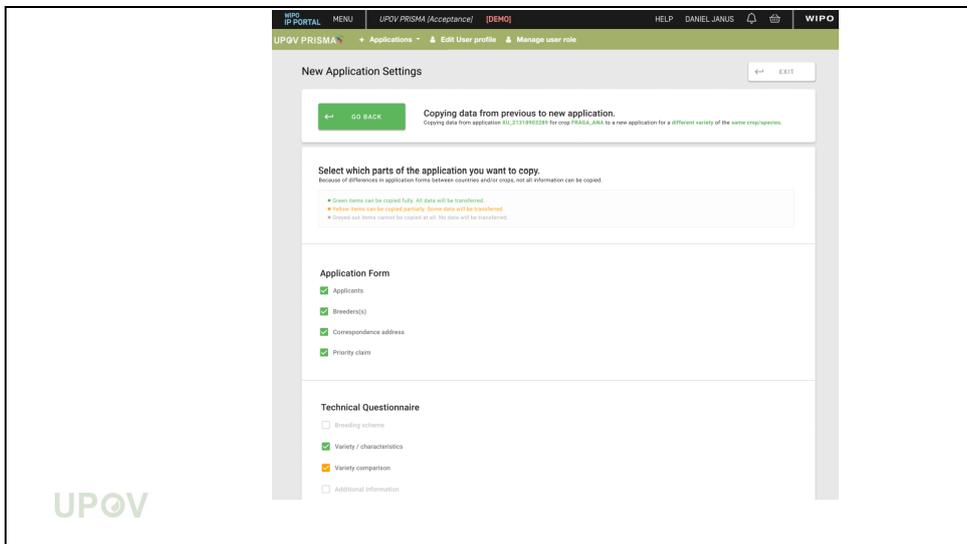

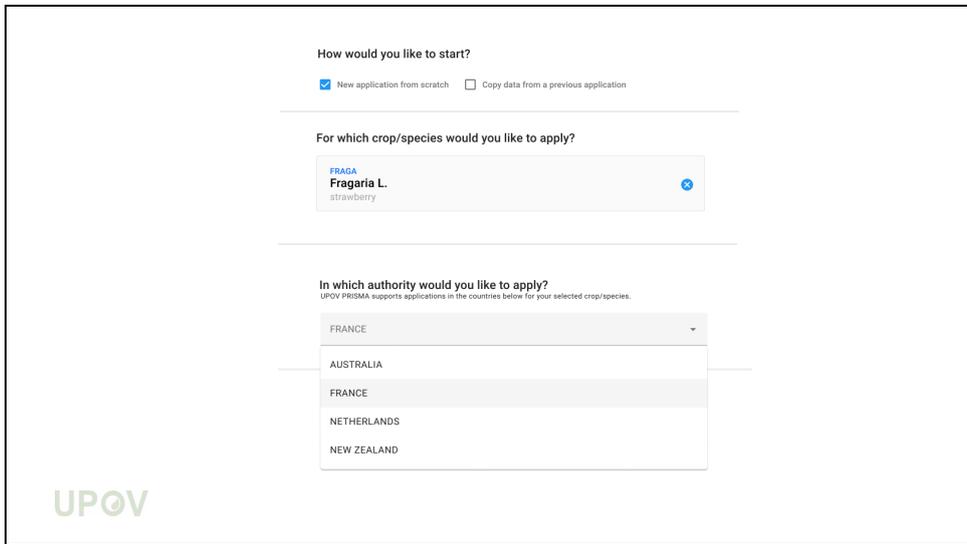

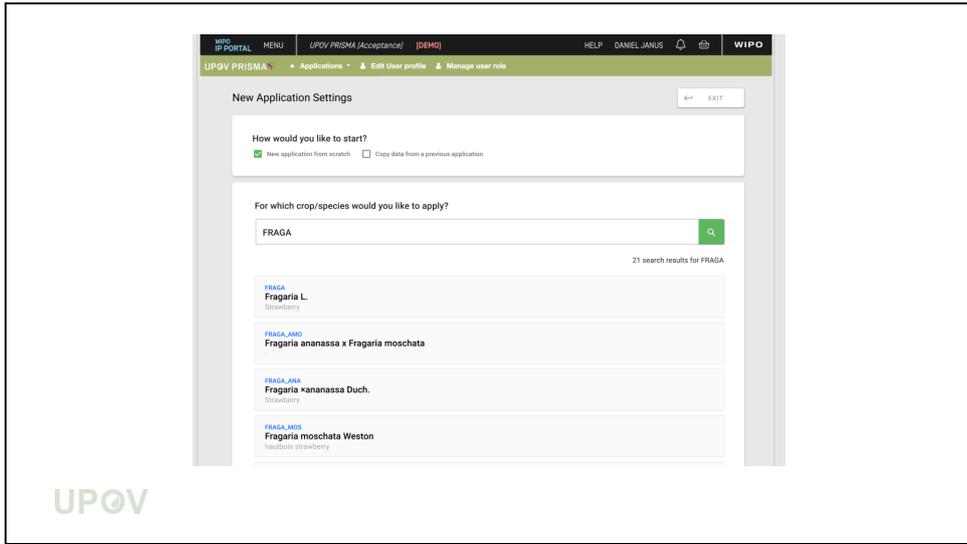

Holistic redesign considering the cohesion of all features so that the overall experience and outcome is improved. Improvements are based on long term business goals.

► UPOV PRISMA – Interviews - Insights

## Project scope

### 2 requested usability improvements

- Copy-paste functionality
- New Application Settings

## Next steps for improving User-friendliness of UPOV PRISMA

- New screens/ interface for:
  - Start new application
  - Copy functionalities
- New proposal/ Version of screens to reflect comments received to clarify specifications
- Timing:
  - Second round discussion with UPOV PRISMA Task Force group : June 2022
  - Implementation in 2023 (to be confirmed)

## CPVO participation in UPOV PRISMA

In order to achieve and maintain synchronization of TQs between UPOV PRISMA and CPVO (see document UPOV/EAF/16/3 "Report" paragraph 18, document UPOV/EAF/17/3 "Report" paragraph 32 and document UPOV/EAF/18/3 "Report", paragraph 12) the following projects have been agreed with CPVO:

- Project 1: "Audit" (current issues/ states of affairs) for exchange of data between UPOV PRISMA and CPVO in both directions → 
- Project 2: Part A: Resolving current issues; Part B : Synchronizing changes by UPOV/CPVO
- Project 3: Implementation of Project 2 outcome: Bi-directional exchange of application data (lettuce, tomato, rose)
- Project 4: Bulk upload of Maize applications from UPOV to CPVO → 
- Project 5: "Transitional arrangements", to communicate to applicants about the situations in which they can use UPOV PRISMA for applications at the CPVO and the measures that need to be taken until all issues have been resolved

UPOV

## Next steps for CPVO participation in UPOV PRISMA

- Start Project 3 :
  - Limited to lettuce and rose
- Start project 2 will start when project 3 is more advanced

UPOV

## Project 5

### *Transitional arrangements*

It was decided by the TF Group (15/11/2021) to:

- Display a popup disclaimer message in UPOV PRISMA when starting an application for CPVO, to warn applicants about the need to check and complete the application data in CPVO Online system after submission in UPOV PRISMA
- Investigate technical possibilities to “inactivate” or “acknowledge” this disclaimer, after the first time it is being displayed
- Send messages to registered Users (by email) in cases of new developments for alignment of forms (if occurs before projects 2 & 3 are finalized)
- Organize a Webinar: Training/ info Session on “How to submit application data for CPVO via UPOV PRISMA?”

UPOV

## UPOV PRISMA Taskforce group

1. CPVO working on a procedure for the modification of technical questionnaires

Various types of modifications ranging from the correction of typos to the reshuffling of forms

- Stake holders (examination offices, breeders' associations) involved in the most important modifications, UPOV can be informed
- information of all stake holders on the final version of CPVO forms foreseen, at least 2 weeks delay before release

UPOV PRISMA Taskforce group 

1. CPVO working on a procedure for the modification of technical questionnaires 

- Various channels of information foreseen:
  - ✓ In case ongoing draft applications are impacted in CPVO Online with a new version for a form, automatic update and warning to the breeder
  - ✓ Website
  - ✓ Newsletter
  - ✓ Mailing to stake holders (examination offices, breeders' associations, UPOV)

21. *Participating members in the development of the electronic application form are invited to note:*

(a) *the developments concerning UPOV PRISMA since the EAF/18 meeting;*

(b) *that a report on plans for improving CPVO TQ synchronization and the user-friendliness of UPOV PRISMA will be made at the EAF/19 meeting.*

UPOV 13

## Background UPOV/EAF/13/3

21. The participants noted that, in cases where a participating authority used a **national Technical Questionnaire** for the Table of Characteristics, for a specific crop, where there was **no UPOV Test Guidelines (TGs)** and where the generic TQ was not appropriate, there would be a possibility to develop **a specific UPOV PRISMA TQ for this crop**, subject to a **procedure for consultation** with other UPOV participating members in UPOV PRISMA and under the condition to follow UPOV TGs TQ and UPOV characteristics

GB uses a national TQ for Sugar Beet  
There is no UPOV TG for Sugar Beet

## Background Procedure as agreed at the EAF/13

1. Request from Country A for a specific crop (Country A TQ)
2. Inform other participating authorities in UPOV PRISMA
3. Circulate the Country A TQ to see if there are any objections to use as UPOV PRISMA TQ
4. If no objections: Country A TQ becomes UPOV PRISMA TQ (subject to resources available)
5. If objections: discussion among interested authorities to explore possibilities to develop a harmonized TQ (and then back to 3)

## New proposal for the procedure

1. Request from Authority A for a specific crop (Authority A TQ)
2. Inform other participating authorities in UPOV PRISMA
3. Circulate the Authority A TQ to see **if participating UPOV members that use the UPOV TQ for all genera and species would prefer to:**
  - (a) use Authority A TQ or
  - (b) continue using the generic TQ
4. **Implement Authority A TQ for UPOV members who wish to use Authority A TQ (subject to available resources).**
  - **Note: Authority B (etc.) could subsequently put forward their TQ for use by other authorities**

- Future developments (after 2022)
- UPOV PRISMA support and development team

### Status - UPOV PRISMA Version 2.8

- Coverage:
  - UPOV Members:
    - No new participating authorities are anticipated for Version 2.8
  - Crops/ species:
    - The forms for France and the Netherlands will be updated

### Status - UPOV PRISMA Version 2.8

- News functionalities in V2.8 :
  - Bulk Upload (Maize, United Kingdom);
    - Extend the POC to United Kingdom
    - Keep QZ Maize up to date.

### Status - UPOV PRISMA Version 2.8

- News functionalities in V2.8 :
  - Bulk invoice upon request;
    - In case of bulk upload or bulk payment.
    - Currently, an invoice is sent by application data.
    - In order to facilitate payment by bank transfer, one single invoice would be provided for a set of applications upon request.

### Status - UPOV PRISMA Version 2.8

- News functionalities in V2.8 :
  - Improve the download functionality for PVP Offices by including UPOV code information for crops not covered by UPOV TG and the addition of following columns (only for United Kingdom as Proof of Concept):
    - Country of Origin
    - NLI Maintainer
    - NLI Agent
    - NLI Applicant
    - PBR Breeder
    - PBR Applicant
    - PBR Agent
    - Date PBR application received
    - Date NL application Received
    - Provisional Marketing Authorisation Code
    - Provisional Marketing Authorisation Date
    - Seed Weight

### Status - UPOV PRISMA Version 2.8

- Improve the loading performance of the dashboard

32. Participating members in the development of the electronic application form are invited to note the plans for Version 2.8, as set out in paragraphs 28 to 31 of this document.

### Future developments (After 2022)

- Feedback received from registered users:
  - Allow the possibility to **upload multiple attachments** for the same question;
  - In the email notification message, **remove the reference to the “applicant”** since it is not correct when an agent submits the application data;
  - For agents, **accept invitations in bulk** instead of clicking each one individually;
  - Add **an additional “notes”** field to the agent profile to allow agents to **provide further information to breeders/applicants**, such as services offered and languages spoken.

UPOV

28

### Future developments (After 2022)

- Coverage:
  - New authorities:
    - The following UPOV members have expressed an interest to join UPOV PRISMA in the future: **Bosnia and Herzegovina, Brazil, Egypt, Japan, Nicaragua, Singapore, United Republic of Tanzania and Uzbekistan.**
    - The Office of the Union will consult the UPOV members concerned to discuss their requirements and timeline for joining UPOV PRISMA.

### Future developments (After 2022)

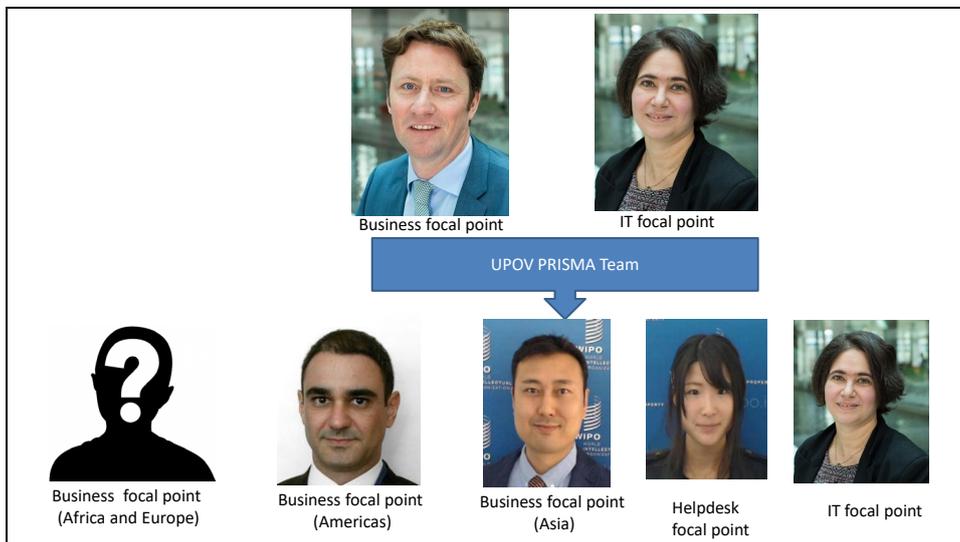

- User-friendliness of the tool
  - Addition of non UPOV TQ characteristics in TQ7
  - Crop-specific TQs beyond Test Guidelines
- New functionalities
  - Machine translation
  - DUS Arrangement Tool (DART)
- IT improvements
  - Improve the performance of form generation

*39. Participating members in the development of the electronic application form are invited to note the possible future developments of UPOV PRISMA as set out in paragraphs 33 to 38 of this document.*
