UPOV

CPVO participation in UPOV PRISMA

In order to achieve and maintain synchronization of TQs between UPOV PRISMA and CPVO (see document UPOV/EAF/16/3 "Report" paragraph 18, document UPOV/EAF/17/3 "Report" paragraph 32 and document UPOV/EAF/18/3 "Report", paragraph 12) the following projects have been agreed with CPVO:

- Project 1: "Audit" (current issues/ states of affairs) for exchange of data between UPOV PRISMA and CPVO in both directions → 
- Project 2: Part A: Resolving current issues; Part B : Synchronizing changes by UPOV/CPVO
- Project 3: Implementation of Project 2 outcome: Bi-directional exchange of application data (lettuce, tomato, rose)
- Project 4: Bulk upload of Maize applications from UPOV to CPVO → Proof of concept 
- Project 5: "Transitional arrangements", to communicate to applicants about the situations in which they can use UPOV PRISMA for applications at the CPVO and the measures that need to be taken until all issues have been resolved

UPOV

Project 4

- Proof of concept : completed
- Plan to use the bulk upload (QZ Maize) in November 2022 (Pilot with Corteva)
- Bulk Invoice (UAT during V2.8 Test Campaign)
- Remaining tasks (after November 2022):
 - UPOV/CPVO: Address all the cases
 - UPOV/CPVO: Automatic tests

UPOV

Project 2 and 3- Three phases

- Phase 1: Project 3 for Lettuce and Rose
 - UPOV TQ questions can be reused
 - Characteristics from the UPOV TG Table of characteristics are reusable whether they appear in TQ5 or TQ7 section.
 - The ordering might not be the same in UPOV PRISMA and CPVO online system
 - CPVO specific TQ questions are not reusable if they are not UPOV TG Table of characteristics questions, otherwise they are re-usable

UPOV

Project 2 and 3- Three phases

- Phase 2: Rollout the approach to other pilot crops where their UPOV TG are under revision
- Objective:
 - Have more consistency between TQs
 - » eg all table of characteristics linked questions under section 5, always the same order in questions under section 7, etc
- UPOV will work with CPVO to look in more details how the characteristics are constructed to make sure that it will work from IT point of view.

UPOV

Project 2 and 3- Three phases

- Phase 3: Fully automated synchronization for TQ5 (Project 2 after 2023)
 - Automatic import of UPOV TQ5 questions to CPVO system
 - Automatic configuration of XML Mapping

UPOV

Project 3 : Import application data from CPVO to UPOV PRISMA – Lettuce and Rose

- Timelines of Phase 1:
 - Internal testing in September-October 2022
 - User acceptance tests in November 2022
 - Go-live in November-December 2022

UPOV

Project 5: Information to stakeholders

- Information to stakeholders will continue to take place in the Task Force and EAF meetings

UPOV

25. Participating members in the development of the electronic application form are invited to note:

(a) the developments concerning UPOV PRISMA since the EAF/19 meeting;

(b) that a report on plans for improving CPVO TQ synchronization and the user-friendliness of UPOV PRISMA will be made at the EAF/20 meeting.

UPOV

Other Developments

- IT Quality Software Audit
- Improvement of user-friendliness of UPOV PRISMA
- CPVO Synchronization
- Coverage of Test Guidelines: Sugar Beet

Coverage of Test Guidelines: Sugar Beet

Background UPOV/EAF/13/3

21. The participants noted that, in cases where a participating authority used a **national Technical Questionnaire** for the Table of Characteristics, for a specific crop, where there was **no UPOV Test Guidelines (TGs)** and where the generic TQ was not appropriate, there would be a possibility to develop **a specific UPOV PRISMA TQ for this crop**, subject to a **procedure for consultation** with other UPOV participating members in UPOV PRISMA and under the condition to follow UPOV TGs TQ and UPOV characteristics

Coverage of Test Guidelines: Sugar Beet Background

Procedure as agreed at the EAF/19

1. Request from Authority A for a specific crop (Authority A TQ)
2. Inform other participating authorities in UPOV PRISMA
3. Circulate the Authority A TQ to see if participating UPOV members that use the UPOV TQ for all genera and species would prefer to:
 - (a) use Authority A TQ or
 - (b) continue using the generic TQ
4. Implement Authority A TQ for UPOV members who wish to use Authority A TQ (subject to available resources).

Coverage of Test Guidelines: Sugar Beet United Kingdom TQ of Sugar Beet

- There is no UPOV TQ for Sugar Beet
- In accordance with the proposed new procedure, the United Kingdom TQ for Sugar Beet was circulated on June 15, 2022 (Circular E-22/089) to the participating UPOV members that use the UPOV TQ for all genera and species to see if they would wish to use the United Kingdom TQ or to continue using the generic TQ.
