BACKGROUND

3. The background to the development of a prototype electronic form and previous developments are provided in document EAF/7/2 "Developments concerning the prototype electronic form project".

4. The aim of the electronic application form (EAF) project is to develop a multilingual electronic form containing questions relevant for plant breeders' rights (PBRs) applications (see document CAJ/66/5 "Electronic Application Systems", paragraph 2).

DEVELOPMENTS AT THE SEVENTH MEETING ON THE DEVELOPMENT OF A PROTOTYPE ELECTRONIC FORM

5. At the Seventh Meeting on the Development of a Prototype Electronic Form ("EAF/7 meeting"), held in Geneva on March 16, 2016, the participating members considered document EAF/7/2 "Developments concerning the prototype electronic form project" and received a presentation from the Office of the Union. The EAF/7 meeting agreed (see document UPOV/EAF/7/3 "Report", paragraphs 4 to 16):

- (a) on the release of PVP-XML Version 2 (Version to be used for the Prototype_PV2);
- (b) on the plan presented for the test campaign for PV2 and had noted that participating members should:
 - create WIPO Accounts to access and use the prototype (PVP Offices & Breeders)
 - provide terms and conditions when needed (PVP Offices)
 - check mapping files: mandatory/optional elements (PVP Offices)
 - provide bank account details and PVP Office application fee (amount and currency) to be used (PVP Offices)
 - develop the client interface to interact with EAF in form of system-to-system communication (if requested) (PVP Offices);
- (c) that the Eighth Meeting on the Development of a Prototype Electronic Form ("EAF/8 meeting") would be held in Geneva on Monday October 24, 2016, starting at 6 p.m.

6. In relation to the possible implementation of an operational system, the EAF/7 meeting agreed the following:

- (a) all legal requirements of the PVP Offices concerned would need to be met
 - e.g. to clarify that the EAF does not represent an intermediary in the application process. The application would be made by the user with the PVP Office concerned;
- (b) all questions would be available in the languages of the participating UPOV members;
- (c) users would be required to provide information (answers) in a language accepted by the authority concerned (as indicated in the form);
- (d) the following two options in relation to integration with PVP Offices systems:
 - (i) Case 1: In the case of PVP Offices with no electronic system or who do not wish to integrate their existing system with the EAF, they would receive the submitted application data via:
 - e-mail or
 - regular mail/hand delivery
 - (ii) Case 2: System-to-System communication
 - Synchronization for submitted application data
 - Validation of submitted application data and authorization through Web application;
- (e) all data would be encrypted and considered confidential;
- (f) that the EAF system should allow, if requested, for PVP Office fees to be collected by UPOV and distributed to the PVP Offices in a form and currency determined by the PVP Office concerned;

- (g) that the implementation of the EAF would not affect the fees that PVP Offices would receive per application;
- (h) for payment to cover the costs of the EAF, including UPOV charge per application, as follows:
 - CHF 150 / submitted application in 2017/2018
 - CHF 250 / submitted application from 2019 on;
- (i) that financial and administrative regulations and rules should be presented for approval at the EAF/8 meeting;
- (j) on the development of a program of training for PVP Offices and users, to be arranged in conjunction with the launch of the EAF;
- (k) on a program of publicity on the availability of the system for breeders to be organized in conjunction with the launch of the EAF;
- (l) on the need to develop an approach to add new crops more rapidly, for consideration at the EAF/8 meeting;
- (m) to make an initial assessment of the feasibility of including information for official variety list purposes, for consideration at the EAF/8 meeting.

7. The EAF/7 meeting agreed with the plan to make a presentation of PV2 to the CAJ and the Consultative Committee at their sessions in October 2016, and to seek the approval by the Council at its fiftieth ordinary session, to be held in Geneva on October 28, 2016, for the launch of the EAF at the end of 2016 or beginning of 2017.

Approaches for adding new crops/species

32. Participants in the EAF agreed that it would be beneficial for the system to cover the maximum number of crops as soon as possible. Therefore, at the EAF/7 meeting, the Office of the Union was requested to find a way to develop an approach to add new crops more rapidly and to increase the number of crops to be included in the EAF (see document EAF/7/3 "Report", paragraph 13).

33. The main part of the application form is normally the same for all crops for a particular authority. However, the crop-specific technical information, typically provided in the technical questionnaire, differs between crops. Therefore, the challenge in adding new crops more rapidly is to address the technical crop-specific part of the application.

34. It is proposed to use the following three approaches, in parallel, for adding crops to the EAF:

Approach 1: Customized technical questionnaire (crop and country specific):

35. The crop-specific technical questionnaire, customized for each participating member of the Union, is included in the EAF. This approach requires the maximum effort in term of capturing all specific information provided by each authority. This is the approach that has been used in the EAF until now.

Approach 2: Technical questionnaire based on the UPOV Test Guidelines (crop specific – not country specific):

36. In this approach, for crops that are not covered by Approach 1, it is proposed to add the technical questionnaire from the adopted UPOV Test Guidelines (UPOV TQ), for the crops to be supported in the EAF. Participating members of the Union that would be able to accept this information as the basis for an application would be covered by the EAF for that crop. Participating members of the Union that needed more or different information to that covered in the UPOV TQ would not be covered by this approach but could be covered by Approach 3.

Approach 3: Generic technical questionnaire:

37. In order to be able to cover all crops, it is proposed to create a non-crop-specific “generic” technical questionnaire for each authority. Such an approach would mean that re-use of data from different authorities would not be as complete as for Approaches 1 and 2. However, this approach would use components based on the web-based Test Guidelines template (TG Template), to allow users to provide crop-specific information, in a standardized way. As a result, the information provided in the following TQ chapters would be partially reusable in other applications: breeding scheme; method of propagating the variety; TQ characteristics; similar varieties and differences from these varieties.

38. Based on the anticipated resources, and on allocating equal resources to each of the three approaches above, the addition of crops/species would be possible at the following rate:

| Year | Customized technical questionnaire | Technical questionnaire based on the UPOV Test Guidelines | Generic technical questionnaire |
|--------------|-------------------------------------|---|---------------------------------|
| | Number of crops included in the EAF | | |
| January 2017 | 5 | 5 | - |
| January 2018 | 10 | 30 | All crops |
| January 2019 | 20 | 60 | All crops |
| January 2020 | 30 | 90 | All crops |

39. It would be a matter for each participating member of the Union to decide which of the three approaches to apply on a crop-by-crop basis.

Information for official variety list purposes

40. An initial assessment of the feasibility of including information for official variety list purposes will be presented for consideration by the participating members at the EAF/8 meeting, on the basis of ongoing discussions with participating members of the Union that have expressed a wish to include such information.

User's Guide to the EAF

41. User guides to the EAF, for breeders and for PVP Offices, will be presented (in English only) for consideration by the participating members at the EAF/8 meeting. Versions in other relevant languages will be produced for the launch of the EAF.

PARTICIPATION IN LAUNCH OF EAF

42. The Office of the Union has received the necessary information and application forms for the EAF from the following 29 members of the Union: African Intellectual Property Organization (OAPI), Argentina, Australia, Bolivia (Plurinational State of), Brazil, Canada, Chile, China, Colombia, Czech Republic, European Union, France, Germany, Georgia, Japan, Kenya, Mexico, Netherlands, New Zealand, Norway, Republic of Korea, Republic of Moldova, South Africa, Sweden, Switzerland, Tunisia, United States of America, Uruguay and Viet Nam.

43. Participating members in the development of an electronic application form have been invited to test the prototype through different releases during the test campaign, from March 2016 to October 2016. Subject to their validation, PV2 will be the basis for the launch of an operational system.

44. At their sessions in October 2016, the EAF/8, CAJ and Consultative Committee will receive a report on the feedback received by participating members for PV2. At this stage the EAF is made available in English, Spanish, German and French for participating members, for the following crops:

46. Subject to approval of the launch of the EAF by the Council on October 28, 2016, those 29 members of the Union would be requested to indicate their willingness to participate in the EAF, and an announcement will be made to inform users accordingly.

47. Any other member of the Union wishing to join the EAF would need to provide their forms for the selected crops (application form and technical questionnaire) in a UPOV language and, if appropriate, to provide translations of the questions of the applications forms and technical questionnaires of the other participating members of the Union. The timetable for addition of new members of the Union would be subject to available resources and would vary according to the content of the applications forms and technical questionnaires.

TENTATIVE TIMETABLE FOR THE LAUNCH OF THE EAF

48. Subject to approval by the participants to the EAF project, the CAJ and the Consultative Committee, it is proposed to seek the approval by the Council at its fiftieth ordinary session, to be held in Geneva on

October 28, 2016, for the launch of the EAF in January 2017 for rose, soya bean, lettuce, apple fruit varieties and potato.

49. Participating members in the development of a prototype electronic form are invited to:

(a) note the developments concerning the development of a prototype electronic form as set out in this document;

(b) consider the items to be addressed for implementation of an operational system for electronic application form, as set out in paragraphs 14 to 41;
