

Yu Zhang

Mr. Zhang graduated from the Huazhong agriculture University with a Doctor's degree in agriculture. During the postgraduate period, he was mainly engaged in the research of molecular mechanism of water-saving and drought-resistance rice. From 2020 he worked for Shanghai Academy of Agricultural Sciences. The research direction is molecular mechanism of plant resistance to abiotic stress. The relevant research results have been published in 'plos Genetics', 'Frontiers in Plant Science' and 'Molecular Genetics and Genomics' et al.
