

Sol Ortiz García

Sol Ortiz has served as General Director for Policies, Prospective and Climate Change in the Agricultural Sector within the Ministry of Agriculture and Rural Development, since 2018. Currently she is coordinating the development of the National Strategy for the Sustainable Use and Conservation of Pollinators in Mexico, she is the Executive Secretary of the Sectorial Committee on Genetic Resources for Food and Agriculture and starting as national focal point to the Global Soil Partnership she has been recently elected the Chair of the Latin America and the Caribbean Soil Partnership (LACS).

Sol graduated as a Biologist from the Faculty of Sciences of the National Autonomous University of Mexico (UNAM) and has a Doctorate in Ecology from the Institute of Ecology also at UNAM.

She has worked in the Public Sector since 2001, first at the National Institute of Ecology as an advisor to the President and later as Coordinator of the Biosafety Program. From 2007 to 2018, she worked for the National Council of Science and Technology (CONACYT) in the Executive Secretariat of the inter-ministerial commission dealing with issues related to the safe use of biotechnology.
