

Shaojiang Chen

Mr. Shaojiang Chen graduated from Northeast Agricultural University with a Ph.D. degree in agronomy. From 1999-2000, he was a visitor scholar in the International Center of Genetic Engineering and Biotechnology (ICGEB). From 2003 until now, he worked in the field of maize genetics and breeding as professor of China Agricultural University. He was appointed as Vice-Director of National Maize Center of China in 1997. As a senior scientist, he has been the director in different national maize breeding programs since 2006. His long term focus is mainly on the development of new breeding technology, especially the DH technology. He has also developed many new maize hybrid varieties and commercialized in large areas.
