Dr. Lorelei Ana Garagancea

Dr. Lorelei Ana Garagancea is a legal expert in intellectual property, genetic resources and the international legal framework shaping innovation in research-intensive industries.

She currently serves as Legal Director for Intellectual Property and Genetic Resources at the International Seed Federation in Switzerland. In this role, she leads global engagement on plant intellectual property protection, access to genetic resources and benefit-sharing, engaging with key international fora such as UPOV, the Convention on Biological Diversity, and the FAO and participating in governmental consultations across countries.

Dr. Garagancea holds a PhD in international trade law (summa cum laude) from the University of Geneva, where her research examined contractual licensing mechanisms. With prior experience as in-house Legal Counsel, she has advised on complex IP, regulatory, and contractual matters across the pharmaceutical and biotech sectors, from early-stage R&D through market access.

A published author on international trade-related aspects of intellectual property and contract law, she brings a multidisciplinary perspective on intellectual property.
