ALEXSANDRO MACEDO MASTROPAULO

Alexsandro Macedo Mastropaulo is an agribusiness professional with more than 25 years of experience in project management, strategy, business development, financial planning, and rural development. Throughout his career, he has led initiatives in organizational transformation, business governance, strategic planning, operational excellence, and market development.

In recent years, he has worked on agricultural development programs aimed at empowering smallholder farmers and fostering their productive inclusion in modern agricultural value chains. Through his leadership of the Prospera Program, he has helped connect rural producers with improved seeds, agricultural technologies, technical training, and market opportunities, contributing to higher productivity, increased income, and improved quality of life for thousands of farming families in Northeast Brazil.

Holding a Bachelor's Degree in Business Administration and an Executive MBA in Finance, Alexsandro works at the intersection of innovation, sustainability, economic development, and social-economic impact. His work demonstrates how science, plant breeding innovation, and cross-sector collaboration can drive agricultural transformation and create lasting benefits for farmers, their families, and rural communities.
