## UPOV Press Release No. 82

Geneva, October 21, 2010

### UPOV Council Holds Annual Session

The Council of the International Union for the Protection of New Varieties of Plants (UPOV) held its annual ordinary session on October 21, 2010.

The Council noted a modest increase – 3 percent - in the overall number of applications (13,019) for plant variety protection in 2009. A record number of titles in force – 86,325 – was registered in 2009, representing a 6 percent increase on figures for 2008.

In 2009, the number of plant genera and species for which there were agreements between members of the Union for cooperation in the examination of distinctness, uniformity and stability exceeded 1,400 (a 3 percent increase on 2009).

The Council thanked out-going Vice Secretary General, Mr. Rolf Jördens, for his dedicated service over the past ten years. Mr. Jördens will be succeeded by Mr. Peter Button, who is currently UPOV's Technical Director, on December 1, 2010.

#### Round-up of key developments:

##### Examination of laws

The Council decided that the Draft Law on Plant Variety Protection of the Republic of Tajikistan was in conformity with the provisions of the 1991 Act of the UPOV. Once this draft law is adopted by the Republic of Tajikistan, that country will be in a position to deposit its instrument of accession to the 1991 Act of UPOV.

##### Observers<sup>i</sup>

Observer status was granted to the Association for Plant Breeding for the Benefit of Society (APBREBES) and to European Coordination Via Campesina (ECVC) for the Council, the Administrative and Legal Committee (CAJ), the Technical Committee (TC) and the Technical Working Parties (TWPs). The observer status for CropLife International was extended to the CAJ, TC and TWPs.

NordGen access to UPOV-ROM Plant Variety Database (UPOV-ROM)<sup>ii</sup>

It was agreed that NordGen (Nordic Genetic Resource Center) be granted a free subscription to the UPOV-ROM Plant Variety Database (UPOV-ROM) with an explanation that the background to this sharing of information is provided by the “Reply of UPOV to the Notification of June 26, 2003, from the Executive Secretary of the Convention on Biological Diversity (CBD)”, adopted by the Council of UPOV at its thirty-seventh ordinary session on October 23, 2003.<sup>iii</sup>

Finances and internal auditing

UPOV’s Financial Regulations and Rules were revised, together with the introduction of provisions for internal auditing

Information and Guidance

The Council also adopted a number of information and guidance documents in relation to:

- (a) conditions and limitations concerning the breeder’s authorization in respect of propagating material; the definition of variety; and a revision of the explanatory note on variety denominations;
- (b) guidance documents on the examination of Distinctness, Uniformity and Stability (“DUS”)<sup>iv</sup> and on DNA-Profiling; and
- (c) information on software that would be made available by members of the Union to all other members of the Union.

<sup>iv</sup> Document TG/1/3 “General Introduction to the Examination of Distinctness, Uniformity and Stability and the Development of Harmonized Descriptions of New Varieties of Plants” (see [http://www.upov.int/en/publications/tg-rom/tg001/tg\\_1\\_3.pdf](http://www.upov.int/en/publications/tg-rom/tg001/tg_1_3.pdf)) explains that:

“1.1 According to Article 7 of the 1961/1972 and 1978 Acts and Article 12 of the 1991 Act of the UPOV Convention, protection can only be granted in respect of a new plant variety after examination of the variety has shown that it complies with the requirements for protection laid down in those Acts and, in particular, that the variety is distinct (D) from any other variety whose existence is a matter of common knowledge at the time of the filing of the application (hereinafter referred to as a “variety of common knowledge”) and that it is sufficiently uniform (U) and stable (S), or “DUS” in short. [...]

“1.2 The purpose of this document (hereinafter referred to as “the General Introduction”), and the associated series of documents specifying Test Guidelines’ Procedures (hereinafter referred to as “the TGP documents”), is to set out the principles which are used in the examination of DUS. The identification of those principles ensures that examination of new plant varieties is conducted in a harmonized way throughout the members of the Union . This harmonization is important because it facilitates cooperation in DUS testing and also helps to provide effective protection through the development of harmonized, internationally recognized descriptions of protected varieties.”
