INFORMATION FROM UPOV

Sixth Session of the Committee of Experts on the Interpretation and Revision of the Convention and Eleventh Session of the Working Group on Variety Denominations, September 1977

The Committee of Experts on the Interpretation and Revision of the Convention held its sixth session from September 20 to 23, 1977, under the chairmanship of Mr. H. Skov (Denmark). The Working Group on Variety Denominations held its eleventh session on September 23, 1977, at a joint meeting with the above Committee, under the chairmanship of Mr. S. Mejegard (Sweden).

The Committee and the Working Group continued the preparation of the documents required for the Diplomatic Conference on the Revision of the UPOV Convention and established drafts which were submitted to the Council (see page 3).

Eighth Session of the Committee of Experts on International Cooperation in Examination, November 1977

The Committee of Experts on International Cooperation in Examination held its eighth session on November 16, 1977, under the chairmanship of Mr. A.F. Kelly (United Kingdom). All member States except Italy were represented. Spain was represented by observers.

The main business of the session was as follows:

Reports were presented on the progress of cooperation in examination based on bilateral agreements.

The Committee noted the statistics on the exchange of examination reports relating to the period from July 1, 1976, to June 30, 1977. These statistics will be published in the next issue of the UPOV Newsletter.

The Committee revised and updated the list of offers for cooperation in examination, which is reproduced on pages 4 to 29 of this issue.

The Committee adopted the UPOV Model Form for the Request of Examination Results, which is a form designed to improve the flow of information on the examination of varieties between member States and to facilitate the application of bilateral agreements on cooperation in examination.

The Committee started considering the possibilities of harmonizing the plant breeders' rights gazettes of member States.

Eleventh Session of the Technical Steering Committee, November 1977

The Technical Steering Committee held its eleventh session from November 15 to 17, 1977, under the chairmanship of Dr. D. Böringer (Federal Republic of Germany) and Mr. A.F. Kelly (United Kingdom) successively. All member States except Italy were represented.

The main business of the session was as follows:

The Committee continued its discussion on data recording and interpretation, with particular regard to the testing of homogeneity and stability. This question will be further examined at future sessions.

The Committee continued its discussion on the standardization of simple symmetrical plane shapes for the purposes of the Test Guidelines and examinations based thereon. Since no proposal met with unanimous approval on the part of the Committee, it was decided that the present practice should be continued for the time being.

The Committee adopted Test Guidelines for Brussels Sprouts, European Plum, Gooseberry, Peach, Rape, Spinach and Vine.

Eleventh Ordinary Session of the Council and Sixteenth Session of the Consultative Committee, December 1977

The sixteenth session of the Consultative Committee was held on December 5 and 9, 1977, under the chairmanship of Mr. B. Laclavière (France). All ten member States were represented. The Consultative Committee prepared the eleventh ordinary session of the Council.

The eleventh ordinary session of the Council was held from December 6 to 9, 1977, under the chairmanship of Mr. B. Laclavière (France), President of the Council. All member States were represented. The following non-member States were represented by observers: Austria, Canada, Hungary, Ireland, Japan, New Zealand, Norway, Poland, Spain, Turkey, United States of America.

The representatives of the different States reported on the present situation, the problems arising and progress achieved in the legislative, administrative and technical fields. These reports will be reproduced in the next issue of the UPOV Newsletter.

Reports were also delivered on the following matters: activities of the Union in 1976; management and financial situation of the Union in 1976 and auditing of the accounts for 1976; progress made by the various committees and working groups in their activities; Eighth Panamerican Seed Seminar held in Tegucigalpa (Honduras) in March 1977. The main issue of the Eighth Panamerican Seed Seminar, concerning plant variety protection, was a Recommendation of the effect that (i) "the protection or the rights which a private or official plant breeder may receive for the creation of seed varieties should be laid down in the special laws of each State and in the working agreements to be concluded"; and (ii) that a committee composed of Argentine experts be appointed to prepare a model law on plant variety protection, a task for which UPOV has already offered its help to the experts.

With respect to the Diplomatic Conference on the Revision of the UPOV Convention, the Council decided that it should be held from October 9 to 23, 1978, and approved the following documents for distribution:

(i) the draft of the Revised Convention which will serve as the basis of the Diplomatic Conference's discussions;

(ii) the Provisional Rules of Procedure of the Diplomatic Conference, which lists in the Annexes the non-member States and international organizations invited;

(iii) the Provisional Agenda of the Diplomatic Conference;

According to the proposed timetable for the preparation of the Conference, these documents should be distributed in the second half of January 1978.

The Council decided to reorganize the activities of the UPOV bodies in the following manner:

(i) The Council--established by the Convention--and its Consultative Committee will continue their activities as at present.

(ii) Matters of a technical nature will be dealt with by the Technical Committee, which is to replace the Technical Steering Committee, and by the Technical Working Parties under the guidance and supervision of the first-mentioned Committee.

(iii) All other matters, mainly of an administrative and legal nature (but also concerning finance and policy matters), will be dealt with by the Administrative and Legal Committee, which will be free to establish subgroups for the consideration of special questions and which will replace four bodies (the Committee of Experts on the Interpretation and Revision of the Convention, the Committee of Experts on International Cooperation in Examination, the Working Group on Variety Denominations and the Fee Harmonization Working Party).

(iv) The Draft of the Revised Convention will, in the light of comments submitted by the States and international organizations invited, be studied by an Ad Hoc Committee on the Revision of the Convention.

The reorganization described above has little influence on the program of work for 1978, which will consist mainly in the continuation of the work achieved in 1977, including in particular the holding of the Diplomatic Conference, and, in two new activities: the study of the relations between rules on competition and plant variety protection and the preparation of a model law on the protection of new plant varieties.

The Council adopted the budget for 1978.

The Council agreed that Argentina should be added to the list of non-member States invited to participate as observers in Council sessions.

The three-year term of Mr. B. Laclavière as President of the Council having come to an end, Mr. H. Skov (Denmark) was unanimously elected as the new President of the Council for a period of three years expiring at the end of the fourteenth ordinary Council session, which will be held in 1980. Mr. J.I.C. Butler (Netherlands) was elected as the new Vice-President for one year. The session of the above-mentioned Ad Hoc Committee on the Revision of the Convention will be chaired by Mr. H. Skov (Denmark). The chairmanship of the Administrative and Legal Committee was entrusted to Dr. D. Böringer (Federal Republic of Germany) and that of the Technical Committee to Mr. A.F. Kelly (United Kingdom), both for a period of three years expiring at the end of the fourteenth ordinary Council session, to be held in 1980.

Test Guidelines for Cabbage and Cauliflower: Errata

In the Guidelines for the Conduct of Tests for Distinctness, Homogeneity and Stability for Cabbage (document TG/48/3) and for Cauliflower (document TG/45/3), the second sentence of paragraph 4 of the Technical Notes should be corrected to read as follows (the correction is underlined):

in English: "As a minimum, each test should include a total of 80 plants..."

in French: "Chaque essai doit porter sur au moins 80 plantes..."

in German: "Jede Prüfung sollte insgesamt wenigstens 80 Pflanzen enthalten ..."

List of species eligible for protection and of offers for cooperation in examination

1. The following table gives a synopsis of the state of eligibility of species for protection in the individual member States of UPOV and of the offers for co-operation in examination. In this table, "species" means any taxonomic unit of the vegetable kingdom.

2. "Offer" means that the offering authority invites authorities of other States to contact it with a view to concluding bilateral agreements, based on the UPOV Model Agreement for International Cooperation in the Testing of Varieties as adopted by the Council at its ninth ordinary session of October 1975, under which the offering authority undertakes, on behalf of these other authorities, the technical examination of the varieties of the species to which the offer refers. It has been emphasized that, even where no offer is made in this list for a given species, a national authority might, under special circumstances, be prepared to conclude an agreement of the above kind for that species with the authority of another State.

3. The species are listed in the alphabetical order of their Latin names. Where several Latin names are used by several member States to designate categories of plants which are identical or so closely related that they are known under one name in the common languages, such Latin names have been grouped, whereby all of them but one appear in brackets [Example: Beta vulgaris L. ssp. vulgaris L. var. alba DC. (B. vulgaris L. var. alba DC.)]. The Latin names of species (in the taxonomic sense) preceded by an asterisk (*) are conform to the stabilized ISTA names. Since nomenclatures used in the laws and regulations of the member States differ, it is recommended that these texts be consulted where precise information is needed.

4. English, French and German common names have been added to the best of the knowledge of the Office of the Union. The concordance of these names with the Latin names is not guaranteed.

Liste des espèces bénéficiant de la protection et des offres de coopération en matière d'examen

1. Le tableau suivant constitue un tableau synoptique de l'admission des espèces au bénéfice de la protection dans chaque Etat membre de l'UPOV et des offres de coopération en matière d'examen. Dans le présent tableau, le mot "espèce" désigne toute unité taxonomique du règne végétal.

2. "Offre" signifie que l'autorité offrante invite les autorités d'autres Etats à prendre contact avec elle en vue de conclure des accords bilatéraux fondés sur l'Accord type de l'UPOV pour la coopération internationale en matière d'examen des variétés, tel qu'adopté par le Conseil à sa neuvième session ordinaire d'octobre 1975; en vertu d'un tel accord, l'autorité offrante entreprendrait, pour le compte d'une autre autorité, l'examen technique des variétés de l'espèce faisant l'objet de l'offre. Il a été souligné que, même en l'absence d'une offre relative à une espèce déterminée, une autorité nationale pourrait, dans des circonstances particulières, accepter de conclure un tel accord avec l'autorité d'un autre Etat pour cette espèce.

3. Les espèces sont énumérées dans l'ordre alphabétique de leurs noms latins. Lorsque plusieurs noms latins sont utilisés par les Etats membres pour désigner des catégories de plantes qui sont identiques ou tellement voisines qu'elles sont connues sous un nom commun seulement dans les langues courantes, ces noms latins ont été groupés et, à l'exception de l'un d'entre eux, figurent entre parenthèses [exemple: Beta vulgaris L. ssp. vulgaris L. var. alba DC. (B. vulgaris L. var. alba DC.)]. Les noms latins des espèces (au sens taxonomique du terme) précédés d'un astérisque (*) sont conformes aux noms stabilisés par l'ISTA. Du fait que les nomenclatures utilisées dans les textes de loi des Etats membres ne sont pas uniformes, il est recommandé de consulter ces textes pour avoir des indications plus précises.

4. Les noms communs allemands, anglais et français ont été ajoutés par le Bureau de l'Union pour plus de commodité. Le Bureau de l'Union ne garantit pas leur concordance avec les noms latins.

Liste der schutzfähigen Arten und der Angebote für eine Zusammenarbeit auf dem Gebiet der Prüfung

1. Die nachstehende Tabelle gibt eine Übersicht über die Schutzfähigkeit der Arten in den einzelnen UPOV-Verbandsstaaten und über Angebote für eine Zusammenarbeit auf dem Gebiet der Prüfung. In dieser Tabelle bezeichnet der Begriff "Art" taxonomische Einheiten des Pflanzenreichs.

2. "Angebot" bedeutet, dass die anbietende Behörde den Behörden anderer Staaten anheimgibt, mit ihr Verbindung aufzunehmen, um den Abschluss von bilateralen Vereinbarungen auf der Grundlage der vom Rat in seiner neunten ordentlichen Sitzung im Oktober 1975 verabschiedeten Mustervereinbarung der UPOV für die internationale Zusammenarbeit bei der Prüfung von Sorten vorzubereiten; im Rahmen einer solchen Vereinbarung würde die anbietende Behörde die Prüfung von Pflanzensorten der Art, auf die sich das Angebot bezieht, für eine andere Behörde übernehmen. Es ist hervorgehoben worden, dass eine nationale Behörde selbst in Fällen, in denen kein Angebot für eine bestimmte Art angekündigt ist, unter besonderen Umständen bereit wäre, eine Vereinbarung des oben gekennzeichneten Typs für diese Art mit der Behörde eines anderen Staats abzuschliessen.

3. Die Arten sind nach der alphabetischen Ordnung ihrer lateinischen Namen aufgeführt. Werden von den Verbandsstaaten verschiedene lateinische Namen benutzt, um identische oder solche Pflanzenkategorien zu kennzeichnen, die so nahe verwandt sind, dass sie in den Landessprachen unter einem Namen bekannt sind, so sind diese lateinischen Namen in Gruppen zusammengefasst worden, wobei alle Namen ausser einem in Klammern aufgeführt worden sind [Beispiel: Beta vulgaris L. ssp. vulgaris L. var. alba DC. (B. vulgaris L. var. alba DC.)]. Die mit einem Sternchen (*) versehenen lateinischen Namen (im taxonomischen Sinn des Begriffs) entsprechen den von der ISTA stabilisierten Namen. Da die in den nationalen Gesetzen der Verbandsstaaten verwendeten Nomenklaturen voneinander abweichen, wird empfohlen, für eine genaue Information auf diese Gesetzestexte zurückzugreifen.

4. Landesübliche Bezeichnungen in Deutsch, English und Französisch sind vom Verbandsbüro nach dessen bestem Wissen hinzugefügt worden. Das Verbandsbüro kann für die Übereinstimmung dieser Bezeichnungen mit den lateinischen Namen keine Garantie übernehmen.

Explanation of the Letters Used in the Columns

Légende: lettres dans les colonnes

Erklärung der Buchstaben innerhalb der Spalten

- O Species eligible for protection and examination facilities offered to other States.
Espèce admise au bénéfice de la protection et facilités d'examen consenties à d'autres Etats.
Art schutzfähig und Prüfungsmöglichkeiten sind anderen Staaten angeboten worden.
- X Species eligible for protection (but no examination facilities offered).
Espèce admise au bénéfice de la protection (mais pas de facilités d'examen consenties).
Art schutzfähig (aber keine Prüfungsmöglichkeiten angeboten).
- + Eligible for protection because forming part of a taxon of higher rank which is eligible for protection (for example in the case of a species: whole genus eligible for protection).
Admis au bénéfice de la protection car inclus dans un taxon de rang plus élevé qui bénéficie de la protection (cas d'une espèce par exemple : le genre entier bénéficie de la protection).
Schutzfähig als Teil eines schutzfähigen Taxons von höherem Rang (zum Beispiel im Falle von Arten: gesamte Gattung schutzfähig).
- (X) Intended to make the species eligible for protection in the near future.
Intention d'admettre prochainement l'espèce au bénéfice de la protection.
Es ist beabsichtigt, in naher Zukunft die Art für schutzfähig zu erklären.
- O* Species not yet eligible for protection, but examination facilities offered to other States.
Espèce non encore admise au bénéfice de la protection, mais facilités d'examen consenties à d'autres Etats.
Art noch nicht schutzfähig, aber Prüfungsmöglichkeiten sind anderen Staaten angeboten worden.

INFORMATION FROM MEMBER STATES

Belgium: Publication of Decrees Concerning Plant Variety Protection

Four Royal Decrees, all dated July 22, 1977, were published in the Moniteur belge - Belgisch Staatsblad of October 13, 1977. These Decrees are the following:

- (i) Royal Decree on the Protection of New Plant Varieties;
- (ii) Royal Decree Fixing the Plant Species for which a New Plant Variety Certificate may be Delivered and Fixing the Duration of Protection for Those Species;
- (iii) Royal Decree Fixing the Fees to be Charged in the Matter of Plant Variety Protection;
- (iv) Royal Decree Harmonizing the Consideration Payable for the Inclusion of Varieties in Official Examinations for the Purpose of their Possible Entry in the Register of Varieties and in the National Lists of Varieties.

France and the Netherlands: Extension of a List of Species under the Bilateral Agreements

The list of species whose varieties are examined by the Netherlands on behalf of France for plant breeders' rights purposes (see UPOV Newsletter No. 9, pages 30 and 31) has been extended to include the following two genera:

| <u>Latin name</u> | <u>English</u> | <u>French</u> | <u>German</u> |
|-------------------|----------------|---------------|---------------|
| Gladiolus L. | Gladioli | Glaïeul | Gladiole |
| Lilium L. | Lily | Lis | Lilie |

South Africa: Accession to the UPOV Convention

In accordance with the provisions of Article 32 of the Convention and of Article V(5) of the Additional Act, the Government of the Republic of South Africa deposited, on October 7, 1977, its instrument of accession to the International Convention for the Protection of New Varieties of Plants of December 2, 1961, and to the Additional Act of November 10, 1972.

Thus the Convention, as amended by the Additional Act, entered into force with respect to the Republic of South Africa on November 6, 1977.

For the list of species eligible for protection in the Republic of South Africa, see the list of species eligible for protection and of offers for cooperation in examination, on pages 7 to 29.

South Africa: Publication of Legal Texts Concerning Plant Breeders' Rights

The following texts providing for the entry into force and the application of the Plant Breeders' Rights Act, 1976, were published in the Government Gazette - Staatskoerant of October 28, 1977:

- (i) Plant Breeders' Rights Act (15/1976): Commencement
- (ii) Plant Breeders' Rights Act (15/1976): Declaration of Countries as Convention Countries
- (iii) Plant Breeders' Rights Act (15/1976): Declaration of Countries as Agreement Countries
- (iv) Plant Breeders' Rights Act (15/1976): Declaration of Plants as Kinds of Plants.
- (v) Plant Breeders' Rights Act (15/1976): Regulations

Sweden: Extension of Protection

As of December 13, 1977, the list of species eligible for protection is extended to include: *Alstroemeria* L., *Begonia elatior* (*Begonia X hiemalis*), *Chrysanthemum* spp., *Euphorbia pulcherrima* Willd. ex Klotzsch, *Potentilla fruticosa* L., *Saintpaulia ionantha* H. Wendl. and *Streptocarpus X hybridus* Voss. For the common names, see the list of species eligible for protection and of offers for cooperation in examination on pages 7 to 29, which already takes account of this extension.

Switzerland: Ordinance on the Protection of Varieties and Ordinance on the Fees of the Office for the Protection of Varieties

The Ordinance on the Protection of Varieties (of May 11, 1977) entered into force on June 1, 1977. The Ordinance on the Fees of the Office for the Protection of Varieties (of June 30, 1977) entered into force on August 1, 1977.

PUBLICATIONS OF THE OFFICE OF THE UNION
