Membership

At the end of 1977, the International Union for the Protection of New Varieties of Plants (UPOV) comprised the following ten member States: Belgium, Denmark, France, Germany (Federal Republic of), Italy, Netherlands, South Africa, Sweden, Switzerland, United Kingdom. Italy deposited its instrument of ratification of the International Convention for the Protection of New Varieties of Plants, as amended by the Additional Act of 1972, on June 1, 1977, and Switzerland on June 10, 1977; South Africa deposited its instrument of accession on October 7, 1977. Thus, Italy became a member State of UPOV as from July 1, 1977, Switzerland as from July 10, 1977, and South Africa as from November 6, 1977.

The Additional Act of November 10, 1972, amending the UPOV Convention, entered into force on February 11, 1977. By the end of 1977, the Additional Act was in force in all but one of the member States (the United Kingdom).

Sessions

During 1977, the various bodies of UPOV met as listed below (unless otherwise indicated, the sessions took place in Geneva).

The Council held its eleventh ordinary session from December 6 to 9, 1977, under the chairmanship of Mr. B. Laclavière (France). That session was attended by observers from a number of interested non-member States, namely: Austria, Canada, Hungary, Ireland, Japan, New Zealand, Norway, Poland, Spain, Turkey and the United States of America. The following decisions were taken, inter alia, by the Council:

(i) it approved the annual report and the accounts for 1976 and established the program and budget for 1978;

(ii) it unanimously decided that a Diplomatic Conference be held from October 9 to 23, 1978. It approved the Provisional Agenda and the Provisional Rules of Procedure of that Diplomatic Conference and authorized the Secretary-General to issue the invitations in January 1978;

(iii) it discussed in detail and cleared for distribution the proposed new text of the Convention. That text will be sent to the States and organizations invited to the Diplomatic Conference and will form the basis for discussions during that Conference;

(iv) it agreed on a reorganization of the different sub-bodies created by it. Thus, as from December 9, 1977, the following are attached to the Council: the Consultative Committee, the Administrative and Legal Committee, the Technical Committee, and five Technical Working Parties (for Agricultural Crops, for Forest Trees, for Fruit Crops, for Ornamental Plants and for Vegetables, respectively). The Technical Committee will take over the tasks handled to date by the Technical Steering Committee, while the Administrative and Legal Committee will take over the tasks so far handled by the Fee Harmonization Working Party, the Committee of Experts on International Cooperation in Examination and the Working Group on Variety Denominations. It will also examine the relations between rules on competition and plant variety protection and will establish a UPOV model law on plant variety protection. In addition, an Ad Hoc Committee on the Revision of the Convention will take over the tasks of the Committee of Experts on the Interpretation and Revision of the Convention, but will meet only once in 1978 to study the observations received on the proposed new text of the UPOV Convention;
(v) it elected a new President, a new Vice-President and new Chairmen for the following bodies of UPOV:

(a) Mr. H. Skov (Denmark) was elected President of the Council. His term of office will last until the closing of the ordinary session of the Council in 1980.

(b) Mr. J.I.C. Butler (Netherlands) was elected Vice-President of the Council. His term of office will last until the closing of the ordinary session of the Council in 1978.

(c) Dr. D. Böringer (Federal Republic of Germany) was elected Chairman of the Administrative and Legal Committee. His term of office will last until the closing of the ordinary session of the Council in 1980.

(d) Mr. A.F. Kelly (United Kingdom) was elected Chairman of the Technical Committee. His term of office will last until the closing of the ordinary session of the Council in 1980.

The Consultative Committee held its fifteenth session on March 11, 1977, and its sixteenth session on December 5 and 9, 1977, under the chairmanship of Mr. B. Laclavière (France). In these sessions, it prepared the work of the Council and, in particular, discussed the progress of the preparations for the Diplomatic Conference on the Revision of the UPOV Convention and the draft program and budget for 1978.

The Committee of Experts on the Interpretation and Revision of the Convention held its fifth session from March 8 to 10, 1977, and its sixth session from September 20 to 23, 1977, under the chairmanship of Mr. H. Skov (Denmark). In the discussions during the fifth session, representatives of the following non-member States also had the possibility of expressing their views: Australia, Canada, Hungary, Ireland, Japan, New Zealand, Poland, South Africa, Spain and the United States of America. The following international non-governmental organizations were also represented by observers: the International Association of Horticultural Producers (AIPH), the International Association for the Protection of Industrial Property (AIPPI), the International Association of Plant Breeders for the Protection of Plant Varieties (ASSINSEL), the International Community of Breeders of Asexually Reproduced Ornamentals (CIOPORA), the International Federation of the Seed Trade (FIS). During the fifth and the sixth sessions, the Committee considered proposals for the revision, or more flexible interpretation, of those provisions of the UPOV Convention which could constitute obstacles to the accession of further States to UPOV, and prepared the following draft documents for the Diplomatic Conference on the Revision of the UPOV Convention to be held in October 1978 for adoption by the Council: the Provisional Agenda of the Diplomatic Conference, the Provisional Rules of Procedure of the Diplomatic Conference and the proposed new text of the Convention.

The Committee of Experts on International Cooperation in Examination held its seventh session on May 17, 1977, under the chairmanship of Mr. J.I.C. Butler (Netherlands), and its eighth session on November 16, 1977, under the chairmanship of Mr. A.F. Kelly (United Kingdom), who replaced Mr. Butler. During both sessions, the Committee took note of reports on bilateral agreements concluded or in preparation on the basis of the UPOV Model Agreement for International Cooperation in the Testing of Varieties, examined statistics on the exchange of examination reports and updated the list of offers for cooperation in examination. During its eighth session, the Committee adopted a UPOV Model Form for the Request of Examination Results and began to consider the possibilities of harmonizing the plant breeders' rights gazettes of the member States.

The Technical Steering Committee held its tenth session from May 16 to 18, 1977, and its eleventh session from November 15 to 17, 1977, under the chairmanship of Dr. D. Böringer (Federal Republic of Germany), except for the last one and a half days of the eleventh session, during which time the Committee was presided over by Mr. A.F. Kelly (United Kingdom). During these two sessions, the Committee continued its discussions on data recording and interpretation with respect to distinctness and partly with respect to the testing of maize hybrids, and requested the Office of UPOV to transmit the preliminary results to the professional organizations in the field of plant breeding and the seed trade for comments.
During its eleventh session, the Committee began discussions on data recording and interpretation with respect to the testing of homogeneity and stability. As a result of the successful conclusion of the work of the Technical Working Parties, the Committee adopted, during its tenth session, Test Guidelines for Alstroemeria (TG/29/3), Streptocarpus (TG/47/2) and Red and White Currant (TG/52/2) and, during its eleventh session, Test Guidelines for Rape (TG/36/3), European Plum (TG/41/4), Vine (TG/50/3), Gooseberry (TG/51/3), Peach (TG/53/3), Brussels Sprouts (TG/54/3) and Spinach (TG/55/3). With the addition of these new Test Guidelines, Test Guidelines have now been adopted for a total of 53 species. Finally, the Committee also discussed problems associated with the grouping of colors, the determination and wording of simple symmetrical plane shapes and the question of multiline varieties.

The Technical Working Party for Agricultural Crops held its sixth session from May 24 to 26, 1977, in Hanover (Federal Republic of Germany) under the chairmanship of Mr. A.F. Kelly (United Kingdom). During this session, the Working Party finalized its work on draft Test Guidelines for Rape and prepared a first draft of Test Guidelines for Flax and Linseed and for Rye. It also discussed the preparation of lists of varieties of ryegrass used in the reference collections in different member States and the establishment of a growth stage code for grasses.

The Technical Working Party for Forest Trees held its fifth session from June 14 to 16, 1977, at Orleans (France) under the chairmanship of Mr. M. Bischoff (Federal Republic of Germany). During this session, it discussed the inclusion of further example varieties in the already adopted Test Guidelines for Poplar. It also discussed working papers on Test Guidelines for Willow and for Spruce. In addition, it noted that the results reached by the Technical Steering Committee on data recording and interpretation might not always be applicable to Test Guidelines established by this Working Party because, in forestry, the knowledge of the different characteristics mentioned in the relevant Test Guidelines was limited and each characteristic was not as well known as, for example, those characteristics mentioned in the Test Guidelines prepared by the Technical Working Party for Agricultural Crops.

The Technical Working Party for Fruit Crops held its eighth session from May 10 to 12, 1977, in Madrid under the chairmanship of Mr. J. Brossier (France). During this session, the Working Party finalized draft Test Guidelines for European Plum, for Vine, for Gooseberry, for Red and White Currant and for Peach. It also established first drafts of Test Guidelines for Almond and discussed a working paper on Test Guidelines for Apricot.

The Technical Working Party for Ornamental Plants held its tenth session from June 7 to 9, 1977, at Wageningen (Netherlands) under the chairmanship of Mr. F. Schneider (Netherlands). During this session, the Working Party finalized the draft Test Guidelines for Chrysanthemum, subject to a few points left open and to be agreed upon by correspondence, established a first draft of Test Guidelines for Lily and discussed working papers on Test Guidelines for Berberis and for Forsythia. It also discussed problems associated with virus diseases in material submitted for examination.

The Technical Working Party for Vegetables held its tenth session from September 6 to 8, 1977, at Aarslev (Denmark) under the chairmanship of Mr. T. Webster (United Kingdom). During its session, it finalized the draft Test Guidelines for Spinach and for Brussels Sprouts. In addition, it established first drafts of Test Guidelines for Cucumber and Gherkin, for Beetroot and for Rhubarb, subject to a few points left open and to be agreed upon by correspondence. It also discussed problems associated with the testing of diseases, the establishment of reference collections and the establishment of variety distinctness in vegetable crops.

The Working Group on Variety Denominations held its tenth session from March 8 to 11, 1977, jointly with the fifth session of the Committee of Experts on the Interpretation and Revision of the Convention, and its eleventh session on September 23, 1977, under the chairmanship of Mr. S. Mejegaard (Sweden). During both sessions, the Working Group discussed the provisions of the Convention relating to variety denominations.

Relations with States and Organizations

The President of the Council of UPOV, the Secretary-General and the Vice Secretary-General, as well as several other members of the Council, participated in a symposium organized by the International Community of Breeders of Asexually Reproduced Ornamentals (CIOPORA) in Budapest.

The President of the Council of UPOV and the Vice Secretary-General attended a meeting of experts of CIOPORA at Sparrieshoop (Federal Republic of Germany) and a meeting of a joint drafting committee of the International Association of Plant Breeders for the Protection of Plant Varieties (ASSINSEL) and UPOV, held in Paris, as well as the annual meeting of ASSINSEL and the Congress of the International Federation of the Seed Trade (FIS), both held at Monterey (California, USA).

The Vice Secretary-General attended meetings of the International Association of Horticultural Producers (AIPH) held in Lyngby (Denmark) and in Luxembourg.

The Office of the Union was represented at the Eighth Panamerican Seed Seminar held in Tegucigalpa (Honduras) and at a special meeting of the eighteenth Congress of the International Seed Testing Association (ISTA) in Madrid.

The Vice Secretary-General, outside his official duties, participated in the Centenary of the German Patent Office in Munich. At this time, he also accepted an invitation from the President of the Federal Plant Varieties Office of the Federal Republic of Germany to visit the trials conducted by that Office at Moosinnich near Munich.

Publications

In 1977, the Office of the Union continued the publication of the UPOV Newsletter and published four issues, in March, June, September and December, respectively. The Office also prepared a revised version of the General Information Brochure in English and issued a Japanese translation of this Brochure.

MEMBERSHIP OF THE UNION
(as of January 1, 1978)

The table appearing on page 6 indicates the dates on which the member States took the various steps in order to become bound by the International Convention for the Protection of New Varieties of Plants (of December 2, 1961) and by the Additional Act (of November 10, 1972), and the dates on which they actually became bound by those texts.

Pursuant to the provisions of the Convention, declarations and notifications were made by the member States on certain dates, in particular when signing the Convention or when depositing their instruments of ratification of or accession to the Convention. They dealt, in particular, with the following matters:

(i) list of species eligible for protection (for the latest stage, see UPOV Newsletter No. 11);

(ii) territorial extension of the application of the Convention;

(iii) in the case of the genera and species not appearing in the Annex to the Convention, entitlement of certain persons to protection.

These declarations and notifications are not reproduced here.

1 Of ratification if the State has signed the Convention or the Additional Act, as the case may be; of accession if the State has not done so.
DEVELOPMENT OF PLANT VARIETY PROTECTION THROUGHOUT THE WORLD IN 1977

Summary of Exposés made by Government Representatives at the Eleventh Ordinary Session of the Council

Following established practice, the representatives of States having participated in the eleventh ordinary session of the Council of UPOV (December 6 to 9, 1977) briefly reported on the development of plant variety protection in their countries.

Most of the information given by the representatives of the member States has already been published in recent issues of the UPOV Newsletter and is therefore not restated here. Several member States were said to be preparing or planning extension of protection to further genera and species, which was in many cases made possible by the conclusion of bilateral agreements on cooperation in examination.

The following information given by the representatives of the non-member States is of particular interest.

In Austria, the first draft of a new law on plant variety protection had been submitted to certain government authorities. Progress had been delayed, however, by certain problems of competence which had arisen between institutes subordinated to the Ministry of Agriculture and Forestry and the Patent Office.

In Canada, legislation was in the draft stage and was expected to be submitted to Parliament during the current session.

From Hungary, it was reported that there had been no change in the legislation on patent protection for plant varieties. However, in other fields related to plant breeding, notably in respect of variety testing, new legal rules had been elaborated, mainly in order to establish closer links between the protection system and variety testing, thereby promoting and strengthening plant variety protection.

In Ireland, legislation for the implementation of the provisions of the Convention on the national level was being finalized.

As to Japan, it was reported that the Government fully recognized the importance of plant variety protection and that active studies were in progress to prepare the framework for such protection, having due regard to the progress of the work on the revision of the Convention.

In New Zealand, protection had been extended to further species in 1977 (see UPOV Newsletter No. 7) and a further extension was under consideration. No final decision had been made so far on whether to join UPOV or not. Since it was noted that the proposed revised text of the Convention would remove several problems which New Zealand would be faced with under the present text, membership might well be considered after the 1978 Diplomatic Conference.

In Norway, a new administration (the Norwegian State Seed Council) had been established and the intention was that this organ would also serve as the secretariat for plant variety protection.

From Poland, it was reported that a new draft of the law on plant breeding, seed production and nurseries and of the implementing decree, which would also provide for plant variety protection, had been prepared. According to the draft decree, protection would be afforded in respect of 189 kinds of plants (agricultural crops, vegetables, fruit crops, medical plants and ornamentals). It could be expected that the drafts would be submitted to the Government for acceptance during the first quarter of 1978 and then to the Chamber of Deputies. The legal texts, as adopted, would create the theoretical basis for the accession of Poland to the UPOV Convention.
From Spain, it was reported that the following species would be eligible for protection as of January 11, 1978, as provided by the Royal Decree of June 10, 1977, Approving the General Regulations for the Protection of New Plant Varieties: wheat, barley, oats, rice, potato, rose and carnation. The National Institute of Seed and Nursery Plants was entrusted with plant variety protection and was preparing the draft of the documentation which, after being studied and approved by the Government, would be addressed to the Swiss Federal Political Department as the formal application for accession to the UPOV Convention.

As to the United States of America, it was reported that "Reciprocity Limits" had been established under the Plant Variety Protection Act with Germany (Federal Republic of), the Netherlands, the United Kingdom and the Republic of South Africa. Agreements with Denmark, Israel and New Zealand were being discussed. In addition, with effect from March 17, 1977, the Plant Variety Protection Regulations had been amended to (i) extend from a total of 4 to 5 years the time within which a foreign applicant could file an application in the United States of America after filing in a foreign country, limited to the delay caused by the growing test plus one year, (ii) require a seed sample to be submitted with the application, and (iii) require the application and search fee to be submitted with the application. As regards the protection under the Patent Law, it was reported that there was no change in legislation in 1977. Finally, the representatives of both the Patent and Trademarks Office and of the Plant Variety Protection Office gave some statistical indications on plant variety protection.

Germany (Federal Republic of): Issuance of the 3,000th Title of Protection

On December 19, 1977, the Bundessortenamt (Federal Plant Varieties Office) issued the 3,000th title of protection after the introduction of plant variety protection in the Federal Republic of Germany and the setting up of the Federal Plant Varieties Office in 1953.

Of the 3,000 titles of protection issued, presently in respect of about 150 species (agricultural crops, vegetables, fruit crops, vine and forest trees), 1,752 were in force on the said date. At present, about 600 applications for protection are filed each year and about 250 titles of protection are issued, almost half of which are in respect of varieties of foreign origin.

Protection expires yearly in respect of more than 100 varieties, so that the yearly net increase in the number of titles in force amounts to between 100 and 150.

Belgium: Extension of Protection

By the Royal Decree of November 25, 1977, Fixing the Plant Species for which a New Plant Variety Certificate may be Delivered and Fixing the Duration of Protection for Those Species, which was published in the Moniteur belge - Belgisch Staatsblad of January 20, 1978 (pages 582 to 585), protection was extended to further genera and species. The corresponding former decree of July 22, 1977, has been repealed.

The list of the genera and species which are covered by the Decree is given hereunder, as well as some details on the duration and scope of protection and the date of entry into effect of the Decree in respect of each species. The Latin, Dutch and French names appear in the Decree, whereas the English and German common names have been added, without guarantee of concordance, by the Office of the Union.

Scope of Protection/Portée de la protection/Schutzumfang:

A: Protection relates to any type of seed, whether certified or not.
La protection porte sur tout type de semences, certifiées ou non.
Der Schutz bezieht sich auf jeden Typ von Saatgut, ob zertifiziert oder nicht.

B: Protection relates to the whole plant or parts thereof to be used as vegetative or reproductive propagating material.
La protection porte sur tout ou partie de la plante destinée à être utilisée comme matériel de multiplication et de reproduction.
Der Schutz bezieht sich auf die ganze Pflanze, die als vegetatives oder generatives Vermehrungsmaterial verwendet werden soll, oder Teile davon.

C: Protection relates to the whole plant or parts thereof, as well as to any reproductive or vegetative propagating material of the variety.
La protection porte sur tout ou partie de la plante de même que sur tout élément de reproduction ou de multiplication de la variété.
Der Schutz bezieht sich auf die ganze Pflanze oder Teile davon sowie auf jedes generative oder vegetative Vermehrungsmaterial der Sorte.

All varieties, including rootstocks, except ornamental varieties may be protected. Protection relates to any part of the plant to be used as vegetative propagating material, such as plants, grafts, cuttings, layers. It relates also to any type of seed or to the pips and stones of these species, in cases where they may be used as seeds for the generative reproduction of the varieties.

Protection relates to the cuttings and, in general, to any part of the plant to be used as vegetative or reproductive propagating material.

Entry into effect/Applicabilité/Anwendbarkeit

C: (a) On January 21, 1978, in the case of new varieties in respect of which protection is granted for the first time from the said date in one of the UPOV member States.

(b) On July 1, 1981, in the case of the other varieties which, on the said date, meet the requirements specified in Article 3 of the Law of May 20, 1975, on the Protection of New Plant Varieties. However, rose varieties cultivated for the production of cut flowers which were planted on January 20, 1978, are exempted from royalties for the normal duration of exploitation of the plantation, provided that such plantations are the subject of a declaration filed with the State horticultural engineer of the district before March 21, 1978. Such exemption expires on August 31, 1984.

(a) Depuis le 21 janvier 1978, pour les variétés nouvelles pour lesquelles un certificat d’obtention est délivré pour la première fois à partir de cette date dans un des États membres de l’UPOV.
